

BlackRock Global Income Fund Class D DIST GBP

MAY 2020 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2020. All other data as at 09-Jun-2020.

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to provide an income return on your investment that is above average when compared to the income produced by global equity markets (as defined by the MSCI All Countries World Index), without sacrificing capital growth (i.e. the value of the assets held by the Fund) over the long term (5 years or more). The Fund invests at least 70% of its total assets in equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, developed markets. The Fund has the flexibility to invest outside of the asset class and sector set out above, including in developing markets.

Key Risks: The value of your investment and the income from it will vary and your initial investment amount is not guaranteed. Investors should understand that capital growth is not a priority for the Fund and that income levels will vary and are not guaranteed. Overseas investments will be affected by movements in currency exchange rates. Compared to more established economies, the value of investments in Emerging Markets may be subject to greater volatility due to differences in generally accepted accounting principles or from economic or political instability. Some or all of the Manager's annual charge for the Fund is taken from capital rather than from income. This increases the income, but reduces the potential for capital growth.

BLACKROCK®

Capital at risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, material sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI Fund Ratings and, unless otherwise stated in Fund documentation and included within a Fund's investment objective, ESG integration does not change a Fund's investment objective or constrain the Investment Manager's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a Fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	AA	MSCI ESG Quality Score (0-10)	7.34
MSCI ESG Quality Score - Peer Percentile	83.85%	MSCI ESG % Coverage	100.00%
Fund Lipper Global Classification	Equity Global Income	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	51.09
Funds in Peer Group	322		

All data is from MSCI ESG Fund Ratings as of **01-May-2020**, based on holdings as of **31-Oct-2019**. As such, the funds sustainable characteristics may differ from MSCI ESG ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund's underlying holdings (excluding cash positions) must be covered by MSCI ESG Research, the fund's holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

ESG GLOSSARY

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to 37 industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of a fund's holdings that have MSCI ESG ratings data.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

IMPORTANT INFORMATION:

The above Sustainability Characteristics metrics are not to be taken as an exhaustive list of the controversial areas of interest and are part of an extensive set of MSCI ESG metrics. There may be corporate actions or other situations that may cause the Fund or Index to passively hold securities that may not comply with MSCI ESG criteria. Please refer to the Fund's prospectus for more information. The screening applied by MSCI may include revenue thresholds set by MSCI. The information displayed above may not include all of the screens that apply to the relevant index or the relevant Fund. These screens are described in more detail in the Fund's prospectus, KIID and the relevant index methodology.
