Janus Henderson

For the six months ended 23 May 2018

Janus Henderson Multi-Manager Income & Growth Fund (formerly Henderson Multi-Manager Income & Growth Fund)

Who are Janus Henderson Investors?

Janus Henderson Investors exists to help clients achieve their long-term financial goals.

Formed in 2017 from the merger between Janus Capital Group and Henderson Group, we are committed to adding value through active management. For us, active is more than our investment approach – it is the way we translate ideas into action, how we communicate our views and the partnerships we build in order to create the best outcomes for clients.

We are proud to offer a highly diversified range of products, harnessing the intellectual capital of some of the industry's most innovative and formative thinkers. Our expertise encompasses the major asset classes, we have investment teams situated around the world and we serve intermediary, institutional and individual investors globally. As at 31 March 2018, we had approximately US\$372bn in assets under management, more than 2,000 employees and offices in 27 cities worldwide. Headquartered in London, we are an independent asset manager that is dual-listed on the New York Stock Exchange and the Australian Securities Exchange.

At Janus Henderson, we believe in the sharing of expert insight for better investment and business decisions. We call this ethos *Knowledge. Shared. Knowledge. Shared* is reflected both in how our investment teams interact and in our commitment to empowering clients in their decision-making. In our view, knowledge is powerful when it is shared.

Authorised Fund Manager's report for the six months ended 23 May 2018

We are pleased to present the Report and Accounts for Janus Henderson Multi-Manager Income & Growth Fund (formerly Henderson Multi-Manager Income & Growth Fund) (the "fund") for the six months ended 23 May 2018.

Authorised status

The fund is an authorised unit trust scheme under Section 243 of the FSMA 2000 Act and is a Non-UCITS Retail Scheme ("NURS") operating under Chapter 5 of the Collective Investment Schemes sourcebook ("COLL") issued by the Financial Conduct Authority. It is an alternative investment scheme for the purpose of the Alternative Investment Fund Manager's Directive ("AIFMD") Regulations. The Trustee is also the Depositary for the purposes of the AIFMD pursuant to a depositary agreement dated 22 July 2014.

Unitholders are not liable for the debts of the fund.

Other information

On 15 December 2017, the fund changed its name from Henderson Multi-Manager Income & Growth Fund to Janus Henderson Multi-Manager Income & Growth Fund.

Investment Fund Managers

Janus Henderson Multi-Asset Team

Investment objective and policy

The fund aims to provide long term capital growth with the potential for some income generation.

The fund will invest in a spread of authorised unit trusts and/or authorised companies which may be selected from those available in the whole market. The fund will not be restricted to any particular economic sectors and the investment policy will take a long term balanced view of stock markets worldwide while maintaining a core holding in the UK. The fund may also invest in transferable securities including investment trusts, money market instruments, deposits, derivatives and forward transactions.

Authorised Fund Manager's report (continued)

Investment review

The period under review was mixed for markets, with some pronounced currency movements and ongoing political risk. In Europe, political tensions continued to test the stability of the European Union. Trade friction persists between the US and China, as well as the EU. A stronger US dollar weighed on those emerging markets with weaker fundamentals.

Rapid gains for equity markets in January were more than offset by falls in February and March. April and May subsequently proved to be a period of moderation, as unpredictable geopolitics and volatile markets both seemed to calm somewhat. Global equities performed well, although there were some changes in regional fortunes compared with the first quarter of 2018: the UK and US were particularly strong performers, followed by the eurozone. Within sectors, energy stocks were strong on the back of a rising oil price, after weakness earlier in 2018.

Major government bond market yields were generally higher, although the rise in US Treasury yields was easily the most notable. Good US economic data, rising inflation and a weaker US dollar helped the 10-year US Treasury yield rise above 3% for the first time since the start of 2014. Corporate bond markets were further hampered by a modest rise in credit spreads (the extra yield over an equivalent government security). UK 10-year gilt yields spiked higher in late 2017 and early 2018 on Brexit concerns and expectations of a near-term Bank of England rate rise, before falling in March on news of the government's lower short-term borrowing target. German bund yields neared a two-and-a-half-year high in February on the better-than-expected US employment data but slumped in March on investor nerves regarding a potential US/China trade war. Bund yields were back up in April, taking their cue from US Treasuries.

The fund returned 1.6% over the period under review, based on the performance of Class I income (net of fees), outperforming the IA Mixed Investment 20-60% Shares sector average by 0.4%. Longer-term performance of the fund has also been strong, with the fund outperforming its peer group over all periods in the last five years.

Our allocation to UK equities delivered a strong overall contribution for the fund. Key holdings included the Old Mutual UK Alpha Fund and the Jupiter UK Special Situations Fund, which both outperformed their sector's return. Elsewhere, the fund received a strong positive contribution from holdings across a broad range of asset classes. These included positions in the Findlay Park American Fund, the Hermes Asia ex Japan Equity Fund and the Janus Henderson UK Property PAIF. European ex UK equities struggled during the period under review. Holdings in the BlackRock Continental European Income Fund and Invesco Perpetual European Equity Income Fund suffered negative absolute returns and underperformed the broader market. Other detractors during the period were holdings in the Polar Capital Global Insurance Fund, the BlackRock Emerging Markets Flexi Dynamic Bond Fund and the MI TwentyFour Dynamic Bond Fund.

The volatility observed across a range of asset classes in the first quarter of 2018 offered the opportunity for some contrarian technical-driven investment activity. Equity risk was gradually dialled down through January, as volatility troughed and investor euphoria reached uncomfortable levels; we fully redeemed our position in the Veritas Global Equity Fund and reduced our holding in the Hermes Asia ex-Japan Equity Fund. The ensuing spike in risk and sell-off in risk assets presented an opportunity to rebuild equity positions at more attractive levels in February; we achieved this mainly through index futures.

Summing up, we still see the global economic backdrop as being in a transition phase, moving away from the exceptional macroeconomic conditions of 2017 towards a more complicated and uncertain environment. Investors may need to adjust to more frequent swings in sentiment and less stability in markets. However, even if things work out well, we still expect relatively modest returns from most asset classes over the course of this year. We think that the era of easy buy-and-hold investing is over and we believe this is a time for active asset allocation. Expect surprises – expect volatility.

Lowest unit price (pence)	128.80	122.80	111.20	114.20

Direct transaction costs incurred on securities transactions (including derivatives) are stated after deducting the proportion of the amounts collected from dilution adjustments that relate to direct transaction costs.

Performance values are at close of business and may differ from the performance summary.

Operating charges

Operating charges are expenses associated with the maintenance and administration of the fund on a day-to-day basis that are actually borne by the unit class.

Unit class launches and closures

There were no unit classes launched or closed in the period.

Ongoing charge figure

The annualised ongoing charge figure (OCF) of the fund is calculated as the ratio of the total ongoing charges to the average net asset value for twelve months. Ongoing charges are all expenses deducted from the assets of the fund during the period, except for expenses that are explicitly excluded by regulation.

	23/05/18 %	23/11/17 %
Class A	2.22	2.23
Class B	1.47	1.48
Class I	1.40	1.42

The OCF includes a synthetic element of 0.56% (23/11/17: 0.58%) to incorporate the OCF of underlying funds.

The OCF is calculated in accordance with guidelines issued by the European Securities and Markets Authority (ESMA).

The fund is a non-UCITS fund and we have used this disclosure to enable comparison across our fund range.

Risk and reward profile

The fund currently has 5 unit classes in issue; A income, A accumulation, B income, I accumulation and I income. The risk and reward profile is as follows:

Typically Lower po	tential		Typically Higher potent			lly Higher potential
risk/reward						risk/reward
•						-
Lower Risk						Higher Risk
1	2	3	4	5	6	7

The Synthetic Risk and Reward Indicator (SRRI) is calculated based on historical volatility over a rolling 5 year period, it is reviewed monthly and updated if volatility has changed materially to cause a movement in the SRRI level. The SRRI is an indicator and may not accurately reflect future volatility and market conditions. The value of an investment in the Fund can go up or down. When you sell your units they may be worth less than you paid for them. The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The unit classes appear at 4 out of 7. Unit classes in higher categories have shown greater and/or more frequent variations in unit price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The following risks apply to investments in the fund. These could be triggered or made worse by unusual market conditions or unpredictable market events. Under normal market conditions the following risks may apply:

Active management risk Active management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

Charges to capital risk Some or all of the annual management charge is taken from capital. This may constrain potential for capital growth.

Collective investment scheme risk The fund may invest in other funds, which may increase losses due to investment in risky assets such as property or commodities, restrictions on withdrawals, less strict regulation and use of derivatives.

Counterparty risk The fund could lose money if a counterparty withwhich it trades becomes unwilling or unable to meet its obligations to the fund.

Derivatives risk Derivatives use exposes the fund to risks different from, and potentially greater than, the risks associated with investing directly in securities and may therefore result in additional loss, which could be significantly greater than the cost of the derivative.

Exchange rate risk Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.

Hedging risk If the fund or a specific share class of the fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

Liquidity risk Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.

The full list of the fund's risks are contained in the "Risk Factors" section of the Fund's prospectus.

There have been no changes to the risk rating in the period.

The SRRI conforms to the ESMA guidelines for the calculation of the SRRI.

* Class B income has not been in existence for 5 years as it launched on 25 November 2013. As this share class does not have a 5 year history, a synthetic history has been created using the fund's relevant sector average.
