

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Premier Miton Liberation No. VI Fund – Class B Shares

A sub-fund of Premier Miton Liberation Fund

Class B Income Shares, ISIN no.GB00BN7ZF032

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

The objective of the Fund is to provide capital growth over the long-term, being five years or more, whilst seeking to remain within a defined risk profile with defined volatility parameters which may result in the income and the capital growth from the Fund being constrained. The Investment Adviser will aim to maintain a risk profile classification of 6 as set and monitored by an external third party risk rating company. Five years is also the minimum recommended period for holding shares in this Fund. This does not mean that the Fund will achieve the objective throughout this, or any other, specific time period and there is a risk of loss to the original capital invested.

Income will be paid as dividend distributions.

The Fund will be invested in a globally diversified portfolio covering different asset classes; these will include investments in equities (company shares and structured investments based on company share indices), fixed income (including bonds issued by governments and companies, which could either be investment grade (high quality) or non-investment grade (lower quality) bonds), property (including Real Estate Investment Trusts), and alternative investments (which may include ones aimed at making positive returns in all market conditions, such as total return and absolute return funds), deposits, cash and near cash.

The Fund will be managed to maintain a specific risk profile, within defined volatility parameters, which may result in the income and the capital growth from the Fund being constrained. The Dynamic Planner risk profiling service is used to profile the Fund's investment portfolio. Dynamic Planner offers risk profiles on a scale of 1 (lowest) to 10 (highest) and is provided by Distribution Technology, an independent company that offers risk profiling services for funds and portfolios. The investment team will aim to maintain a risk profile classification of 6 as set and monitored by Dynamic Planner. This is the constraining

benchmark for the Fund. This risk profile classification is different from the SRRI for the Fund. Whilst the Fund will be managed to meet the risk profile, it will not be managed to maintain the SRRI, which may change over time. The risk profiling service could be changed to another independent company in the future.

There is no guarantee that the Fund will maintain its risk profile.

The Fund may invest in derivatives (although their use will be limited), warrants and forward transactions (these are contracts whose value is based on the change in price of an underlying investment) for investment purposes as well as for the purpose of efficient portfolio management, including hedging (hedging is designed to offset the risk of another investment falling in price).

The Fund is actively managed which means that the investment team will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Income shares: any income made by the Fund will be paid out to you.

Corporate bonds: issued by companies and similar to a loan in nature, usually paying a fixed rate of interest.

Funds: a general term used to describe collective investment schemes, such as unit trusts, open-ended investment companies and closed-ended investment companies.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The underlying assets held by the funds in which the Fund invests include equities and property both of which tend to experience higher volatility than fixed income or money markets but this is tempered by diversification across some other lower volatility asset classes. The Fund also has some exposure to emerging markets which tend to move in a more volatile fashion than developed markets.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Credit risk:** if the issuer of an underlying security is unable to make income payments or to repay its debt.
- **Liquidity risk:** during difficult market conditions some underlying securities, such as corporate bonds or emerging market equities, may become more difficult to sell at a desired price. Some securities may have special liquidity arrangements within their documentation which allow them to temporarily suspend redemption; the Fund does not currently hold any securities which have suspended redemptions.
- **Operational risk:** arising from investments in overseas markets, in particular emerging markets, which may not have the same level of safekeeping and other controls as UK markets
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year	
Ongoing charges	1.16%
Charges taken from the Fund under specific conditions	
Performance fee	NONE

- Switching charge (for switching into the Fund from another fund) 0.00%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are units/shares of another fund).
- For more information about charges, please refer to the Fund's prospectus.
- For the Ongoing Charge, the figure was calculated as at 11/09/2020.
