

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

GlobalAccess Emerging Market Debt Fund Share Class M Dis GBP (Hedged) (ISIN: IE00B5VRNQ18), (SEDOL: B5VRNQ1) a sub fund of Barclays Multi-Manager Fund plc.

Objectives and Investment Policy

The aim is to increase the value of your investment and to earn income within the Fund.

The Fund is actively managed and invests mainly in multi-currency tradable debt (such as bonds and notes), money market instruments (a range of short-term financial products which can be easily bought and sold on money markets), preferred shares and convertible securities (tradable debt which can be converted into shares), with variable repayment terms and interest rates, issued by government, other public bodies and companies based in emerging market economies. The Fund may have a large allocation to bonds that have a below investment grade credit rating.

The Fund may use financial contracts (derivatives) to help achieve its aim and to manage risk, reduce costs and improve results.

The investment manager has discretion to select the securities it chooses to invest in but does take into consideration the universe of securities represented by the JP Morgan EMBI Global Diversified Index (Total Return). While the Index may inform the selection of potential investments, the overall Fund investments, as well as the performance of the Fund, can differ significantly from the Index.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Income is paid out quarterly.

You may buy and sell your investment on each business day.

Risk and Reward Profile

This indicator is based on historical data which may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category (i.e. Category 1) does not mean a risk-free investment. The Fund is rated Category 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

The following are material risks not adequately covered by the risk and reward category.

The assets in which the Fund invests may be denominated in currencies other than the Fund's base currency. Changes in currency exchange rates can therefore affect the value of your investment.

Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. This may not completely eliminate currency risk and therefore any residual risk may affect the performance of your shares.

The Fund relies upon the performance of one or more investment managers. If the investment managers perform

poorly, the value of your investment is likely to be adversely affected.

Future legal or regulatory change could have a substantial adverse effect on the Fund and your investment.

Tradable debt (bonds) are interest rate sensitive, meaning that the range and frequency of price movements may be significant due to various factors, including changes in interest rates, the creditworthiness of the issuer and the ease with which similar investments may be bought or sold (liquidity).

The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment.

The Fund may invest in bonds/debt issued by entities considered to be more likely to default (sub-investment grade). If an issuer does default this may result in loss to the Fund.

The Fund may invest in less economically developed (known as emerging) markets which can involve greater risks than well developed economies. Amongst other issues, the level of government supervision and market regulation may be less than in more developed economies and could affect the value of your investment. Investment in emerging markets also increases the risk of settlement default.

Information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.88%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.

The ongoing charges figure is based on expenses for the 12 months ending May 2019. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

A switch fee of up to 1.00% may apply if you convert your shares into shares of other funds of Barclays Multi-Manager Fund plc.

Past Performance

Past performance is not a guide to future performance. The Fund's ongoing charges are included in the calculation of past performance. The entry/exit charges are excluded from the calculation of past performance.

The Fund was launched in 2007 and the share class was launched in 2010.

Past performance has been calculated in GBP.
