

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Short Duration Credit Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds II ICVC ISIN: GB00BJ4KW792

Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The investment objective of the Fund is to maximise investment return through income but with some capital growth over the medium (5 years) to long (7 years) term.

Policy The Fund invests predominantly in high quality fixed or floating rate sterling denominated bonds issued by companies. The Fund has a target duration of less than 5 years. The Fund may use derivatives, but for efficient portfolio management purposes only.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

Duration Measures the sensitivity of the price of a bond to a change in interest rates. Duration is measured in years. A lower duration means there will be a smaller impact on the price of a bond for a given change in interest rates with a higher duration resulting in a larger movement in the price of a bond. The change in the price of a bond has an inverse relationship with the change in interest rates.

The following share classes are available for the Fund: Accumulation M, Accumulation Z, Income M, Income Z and Accumulation R. All share classes are subject to a minimum investment. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Class R shares are available only at the discretion of Royal London Unit Trust Managers.

Risk and reward profile

The Fund is ranked in risk category 3 because its simulated share price has shown a low to medium level of volatility historically. The Fund was formed by merger and the SRRI was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge	0.00%
Exit charge	0.00%

Charges taken from the fund over a year:

Ongoing charge	0.35%
----------------	-------

Charges taken from the fund under specific conditions:

Performance fee	none
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure shown is an estimate of the charges because the Fund only launched on 12 April 2019. The annual report for each financial year will include details on the exact charges made. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors in the same share class.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Past performance

The Royal London Short Duration Credit Fund (Accumulation - Class M Shares) in GBP

The Fund and share class were launched on 12 April 2019. The Fund was formed by a merger on 12 April 2019. The performance shown above is that of the merging fund. The merging fund had the same investment objectives and policy as this fund. The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Practical information

Depository HSBC Bank plc

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund's Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below. Alternatively, visit www.rlam.co.uk. The Prospectus and shareholder reports are in English.

This document describes one share class of the Fund. The Prospectus and annual and semi-annual shareholder reports are prepared for the entire fund across all share classes.

For fund performance and most recent share price, visit www.rlam.co.uk.

Should you wish to switch share classes or funds, please see the "Switching" section of the Prospectus for details.

Tax: Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of their investment in the Fund. Contact your adviser to discuss tax treatment, suitability of this investment, and other questions.

Notices: Royal London Unit Trust Managers may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the UCITS.

The Fund is a sub-fund of Royal London Bond Funds II ICVC (a UCITS umbrella company). The prospectus and long reports (shareholder reports) are prepared for the entire company. The assets and liabilities of each sub-fund are segregated by law. Therefore, the assets of the Fund belong exclusively to it and are not available to meet the liabilities of any other fund of Royal London Bond Funds II ICVC.

This Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority (FCA).

Details of the Company's remuneration policy are available at www.rlam.co.uk including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, on request from the Company, at the address below.
