Objectives and investment policy

OBJECTIVE

To preserve the value of your investment, while achieving a return in line with money market rates.

PORTFOLIO ASSETS

The Compartment mainly invests in short-term money market instruments that are issued by highly rated issuers and are either denominated in CHF or systematically hedged to this currency (meaning investments have little or no exposure to currency risk).

DERIVATIVES AND STRUCTURED PRODUCTS

The Compartment may use derivatives to reduce various risks (hedging) and for efficient portfolio management, and may use structured products to gain exposure to portfolio assets.

COMPARTMENT CURRENCY

CHF

INVESTMENT PROCESS

The investment manager uses a combination of market and issuer analysis to identify those securities that offer the best performance in light of interest rate trends. The Compartment's active management approach uses strict risk controls.

Terms to understand

Bonds Securities that represent an obligation to repay a debt, along with interest.

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Money market instruments Financial instruments designed to provide stable value, interest and a very low risk of loss, as well as being readily convertible into cash.

Structured products Securities similar to derivatives, but with defined risk or performance characteristics.

Other characteristics

Designed for investors who understand the risks of this Compartment and plan to invest for less than 1 year(s) or may need to take their money out at any time. This is an accumulation share class, meaning any income earned is retained in the share price. Orders to buy, switch or redeem shares are ordinarily processed on any day that is a full bank business day in Luxembourg.

Risk and reward profile

Lower Risk — Higher Risk

Typically lower reward — Typically higher reward

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures. The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.

Further information can be found in the prospectus.

Charges

The charges you pay are used to cover the costs of running the Compartment, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry, conversion and **exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your financial adviser or fund distributor.

The **ongoing charges** figure is based on expenses for the period ending on 31 December 2018. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking.
