

Stuart Steven & Kenny Watson & Aitken Ross

The Fund

The Fund aims to produce a monthly income yield and the prospect of capital growth by investing in a portfolio of assets which predominately comprises corporate bonds, and also includes government bonds, whilst at the same time actively managing the interest rate exposure of the Fund. The Fund pays interest distributions monthly. The Fund holds investment-grade Sterling corporate bonds, government bonds, non-Sterling investment grade corporate bonds and relevant derivative instruments. For full investment objective and policy details please refer to the Prospectus.

Key risks: Past performance is not a guide to future performance. Investment in the Fund carries the risk of potential total loss of capital. Investment decisions should not be based on short-term performance. Investment in the Fund involves foreign currencies and may be subject to fluctuations in value due to movements in exchange rates. The value of fixed income securities will fall if the issuer is unable to repay its debt or has its credit rating reduced. Generally, the higher the perceived credit risk of the issuer, the higher the rate of interest.

*Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates in years. †The Distribution Yield is higher than the Net Underlying Yield because the fund distributes coupon income and a portion of the fund's expenses are charged to capital. This has the effect of increasing distributions while constraining the fund's capital appreciation.

*The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF **excludes** portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term. **These are the annual costs of running and managing the Fund.
