

Invesco Income Fund (UK)

November 2019

Covering the month of October 2019

On 7 August 2019, we updated the Prospectus to make the investment objective and policy clearer and more specific. We have also added a description of the fund's strategy and the benchmark(s) it uses. These changes are also reflected on the Key Investor Information Document and this Factsheet. Further details of the changes can be found on our website at: www.invesco.co.uk.

Fund manager: Mark Barnett

Key facts¹

| Yield (Z Accumulation share class) | |
| Historic yield ² | 3.64% |
| Income distribution date(s) | 31 May 30 November |
| Accounting period ends | 31 March 30 September |
| Available with an ISA? | Yes |

Benchmark

Benchmark: Investment Association UK All Companies Sector*

This is a Comparator Benchmark. Given its geographic focus the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

* Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics.

Fund investment objective and policy

The objective of the Fund is to achieve a reasonable level of income together with capital growth over the long-term (5 years plus). The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. The Fund may also invest in private and unlisted equities and non-UK companies. The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.

Fund strategy

The fund aims to deliver a reasonable level of income together with capital growth, primarily through a portfolio of investments in UK-listed companies. The fund aims to achieve this by investing for the long term, primarily in companies listed in the UK. The fund manager pursues an active investment approach, which is based on individual stock selection. The fund manager seeks to identify undervalued businesses that can offer capital appreciation and growth in income over time. The fund manager has a flexible and pragmatic approach, whilst the fund has no inbuilt sector, style or market capitalisation bias.

The fund manager remains convinced that, in a changing global environment, the interests of investors are best served by employing a well-tested investment process, which is based on fundamental company analysis and a prudent approach to valuation. He continues to evaluate and re-evaluate the holdings in the portfolio, seeking the best opportunities to create a sustainable flow of dividend income for investors. The fund manager believes that the most compelling opportunities rest within domestic sectors, where political uncertainty has weighed on sentiment towards companies with UK revenue exposure. The fund also has notable exposure to the Financials sector.

Five year performance

Performance

| | % growth | | | | | |
|-----------------------------------|----------|---------|---------|--------------|----------|---------------|
| | 1 year | 3 years | 5 years | 5 years ACR* | 10 years | 10 years ACR* |

| Benchmark | 6.97 | 19.46 | 37.67 | 6.60 | 123.63 | 8.38 |

*ACR - Annual Compound Return

Standardised rolling 12-month performance

| | % growth | | | | | |
|-----------------------------------|----------|----------|----------|----------|----------|----------|
| | 30.09.14 | 30.09.15 | 30.09.16 | 30.09.17 | 30.09.18 | 30.09.19 |
| Fund (Z Accumulation share class) | 7.37 | 5.55 | 5.82 | -0.21 | -7.32 | |
| Benchmark | 1.70 | 11.98 | 13.84 | 5.63 | 0.03 | |

Past performance is not a guide to future returns. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the income share class, without any adjustment for fees. Performance figures for all share classes can be found in the relevant Key Investor Information Document. Fund performance figures are shown in sterling, inclusive of reinvested income and net of the ongoing charge and portfolio transaction costs to 31 October 2019 unless otherwise stated. Sector average performance is calculated on an equivalent basis. The standardised past performance information is updated on a quarterly basis. Source: Lipper.

Investment risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.
- The fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the fund. The Manager, however, will ensure that the use of derivatives within the fund does not materially alter the overall risk profile of the fund.
- As one of the key objectives of the fund is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.
- The Fund invests in smaller companies which may result in a higher level of risk than a fund that invests in larger companies. Securities of smaller companies may be subject to abrupt price movements and may be less liquid, which may mean they are not easy to buy or sell.
- The fund may invest in private and unlisted equities which may involve additional risks such as lack of liquidity and concentrated ownership. These investments may result in greater fluctuations of the value of the fund. The Manager, however, will ensure that any investments in private and unlisted equities do not materially alter the overall risk profile of the fund.

Important information

- ¹ All fund portfolio figures within this leaflet are as at 31 October 2019 (source: Invesco).
- ² The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. It does not include any entry charge and investors may be subject to tax on their distributions. The fund's ongoing charge is charged to capital. This has the effect of increasing the distributions for the year by the amount of the ongoing charge and constraining the fund's capital performance to an equivalent extent.
- ³ The Industry Classification Benchmark is a joint product of FTSE International Limited and Dow Jones & Company, Inc. and has been licensed for use in our industry breakdown.

Where individuals or the business have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice. This document is marketing material and is not intended as a recommendation to invest in any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication. The information provided is for illustrative purposes only, it should not be relied upon as recommendations to buy or sell securities.

For the most up to date information on our funds, please refer to the relevant fund and share class specific Key Investor Information Documents, the Supplementary Information Document, the ICVC ISA Terms and Conditions, the Annual or Interim Reports and the Prospectus, which are available using the contact details shown.

Telephone calls may be recorded.

Who is this fund for?

The fund might be right for you if you:

- Are a private or professional investor looking for income and growth over the long term.
- Are able to make an informed investment decision based on this document and the Key Investor Information Document (KIID).
- Are willing to accept that your capital is at risk and you may not get back the amount invested.

The fund will not be right for you if you:

- Require capital protection or have no appetite for risk.
