Alquity Africa Fund GBP Y Class Institutional/Reporting Shares

ISIN: LU0727491382

Alquity SICAV - Alquity Africa Fund (the 'Fund') is a sub-fund of Alquity SICAV. Alquity Investment Management Ltd is the Investment Manager of the Fund. Lemanik Asset Management S.A. is the Management Company of the Fund.

OBJECTIVES & INVESTMENT POLICY

Objective

The Fund aims to achieve long-term capital appreciation for investors, by investing in African securities. Details of these are shown below under 'Investment Policy'.

Investment Policy

- The Fund will invest at least 70% of its net assets in the shares of companies that are listed on the regulated African stock exchanges.
- The Fund may also invest in shares of companies listed on other regulated stock exchanges, which derive over 50% of their revenue or profit from the African continent.
- Although the Fund will invest mainly in shares of the companies referred to above, it may also invest in the same companies via fixed income investments such as bonds.
- The Fund may, on an ancillary basis, hold cash and equivalents.
- The Fund may invest in money market instruments as set out in the prospectus.
- Although permitted to do so, the Fund will not, in practice, invest in financial derivatives.
- The Fund will not borrow to invest and nor will it engage in lending of securities or repurchase agreements.
- Sector and country allocations are closely monitored, but the Fund has flexibility in its investment strategy regarding sector and country allocations. As part of the risk management process, the Fund will ensure exposure to a single stock does not exceed 10% of the net assets of the Fund.
- The investment process of the Fund encompasses the consideration of environmental, social and governance (ESG) factors.
- The Fund does not use a benchmark.

Other information

- Investment in the Fund should be regarded as a long-term investment.
- You can buy and sell shares in the Fund from Monday to Friday except on Luxembourg public holidays.
- Provided the order is received prior to 12pm Luxembourg time, the order will be processed at the next valuation point. This assumes that all relevant regulatory documentation, including that for customer identity and anti money laundering, is already in place.
- Any income received by the Fund will be added to the capital value of the Fund and not distributed to investors. However, for certain classes of shares

("Distribution Shares"), the Board of Directors may decide to make distributions of income and capital gains. For these Distribution Shares (identified in the sub-fund's relevant data sheet under Appendix III in the prospectus with "(dis)" next to the ISIN Code), it is expected that the net income (net of expenses and reserves) actually received by the relevant sub-fund attributable to the relevant class will be distributed to the relevant shareholders.

RISK & REWARD PROFILE

Typically Lower Rewards				Typically Higher Rewards		
Lower Risk				Higher Risk		
1	2	3	4	5	6	7

- The Risk and Reward Indicator table shows where this share class ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward but the greater the risk of losing capital.
- This indicator is based on historical data and is not a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- A risk and reward indicator of '1' does not mean that the investment is risk free.
- The indicator is not a measure of the possibility of losing your investment.
- A complete set of risk factors is set out in the prospectus of Alquity SICAV under Section XIII, entitled 'Special Consideration on Risks'.

The risk indicator for the Fund is as above because:

- The price of shares, and the income from them, can rise and fall because of currency or stock market movements.
- As the Fund invests in shares of African companies its performance will be affected by economic downturns or other factors affecting Africa as a whole or countries or regions making up the continent.
- Overseas investments inevitably carry a risk of changes to the political environment in that region. For Africa, many countries have been subject to political instability and are undergoing economic, political and social change. The performance of the Fund may be affected by perceived or actual risks relating to social, religious or political influences. In addition government actions can sometimes be seen as a risk.
- As the Fund invests in emerging markets, there is a higher degree of risk to value as these markets are

sometimes not as regulated as those of developed economies, and in addition shares may be more difficult to buy or sell on demand.

- As the investments may be in currencies that are subject to greater fluctuations than shares denominated in sterling, there is a higher degree of risk to value.
- Some of the companies invested in may have small market capitalisations. This can sometimes lead to their prices fluctuating more widely than those of larger companies. In addition shares in them may be more difficult to buy and sell on demand.
- Investments in emerging markets such as Africa may carry higher dealing costs due to the various other risks applicable as noted earlier. Also doing business in Africa can involve some high administration and trading costs.

CHARGES

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. The charges reduce the potential growth of your investment.

- The entry charge is included in the purchase price of each share. At present for this class of share, there is no exit charge.
- The entry charge shown is the maximum figure. In some cases you might pay less, you can find out actual entry charges from your financial adviser.
- For more information about charges, please see section VI of the Alquity SICAV prospectus, which is available at www.alquity.com.

One off charges taken before or after you invest*

Entry Charge	Up to 5%
Exit Charge	0%

*The charges shown are maximum figures. In some cases you may pay less.

Charges taken from this class of share over a year

Ongoing Charge 1.74%

This charge represents a single figure, which encompasses all annual charges, and other payments out of the Fund's assets excluding portfolio charges, and performance fees, which are disclosed below.

Charges taken from this class of share under specific conditions

There are no additional charges for this share class.

PERFORMANCE

This share class was launched on 24th May 2012 and so the performance shown for that year is from that date until the end of the year. The performance shown is for the calendar year to 31st December.

Past performance has been calculated in GBP. The returns on this table include all fees and expenses and show percentage year-on-year changes in the value of this class of share.

Past returns are not a reliable indicator of or a guide to future returns.
