

# Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Trojan Ethical Fund, O Income, a fund within Trojan Investment Funds (ISIN: GB00BJP0XY24)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

### Objective and investment policy

#### Objective

To seek to achieve growth in capital (net of fees), ahead of inflation, as measured by the UK Retail Prices Index, over the longer term (5 to 7 years). There is no guarantee that the objective will be met or that capital growth will be delivered over any time period and you may get back less than you invest.

#### Investment Policy

To invest globally in a range of asset classes including equities (company shares) and equity related securities (investments whose value is linked to the performance of the shares in one or more companies), bonds (for example, loans to either a company or government that pay interest), money market instruments (for example, short term loans that pay interest), deposits and cash and indirectly private equity and precious metals (e.g. gold). Exposure to these asset classes may be achieved by investing in investment trusts and other funds (including those managed by Link Fund Solutions, the Investment Manager (Troy Asset Management) and their associates).

Investments will not be made in companies which derive material exposure to revenues from fossil fuels, pornography, tobacco, alcohol, gambling, high interest rate lending and certain types of armaments. Investment in government debt is limited to that issued by Canada, France, Germany, Italy, Japan, the UK and the US (commonly known as the "G7"). Not all asset types are subject to ethical exclusion criteria. A document setting out the fund's ethical exclusion criteria is available at [www.linkfundsolutions.co.uk](http://www.linkfundsolutions.co.uk). You should read this document before investing.

The investment manager's asset allocation decisions will be based on various factors including analysis of economic conditions, interest rates and inflation. The investment manager will seek to buy investments which it considers have the ability to grow in value over time.

#### Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- Whilst the fund can invest in different asset classes it may not have exposure to all asset classes at all times.
- The fund can invest across different geographic areas and industry sectors without limitation.
- You can buy and sell shares in the fund on each business day.
- The fund aims to distribute available income every six months.
- Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may change over time. Number 1 on the scale does not mean that a fund is risk free.

- Currency risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Credit risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
- Changes in interest rate risk: A rise in interest rates generally causes bond prices to fall.
- Counterparty risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Derivative risk: A derivative may not perform as expected and may create losses greater than its cost.
- Ethical investments: The fund is prevented from investing in certain sectors or companies. This narrower range may constrain the fund's performance. If an investment no longer meets the ethical exclusion criteria it will be sold and the price obtained may be less than could be obtained if a forced sale was not required.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	1.02%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is capped at 1.02% until further notice. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund. This is normally only charged when the dealing costs are significant.

For more information about charges, please see the prospectus.

## Past performance

- Because the share class has less than one calendar year's performance, there is insufficient data to provide a useful indication of past performance.
- The fund was launched in March 2019.
- The share class was launched in March 2019

## Practical information
