The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Schroder Prime UK Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class I Accumulation GBP (GB0007870131)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the FTSE All Share (Gross Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in equities of UK companies.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the FTSE All Share (Gross Total Return) index and compared against the Investment Association UK All Companies sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

Lower risk — Potentially lower reward

Higher risk — Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk – Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year	
Ongoing charges	0.51%

Charges taken from the fund under certain specific conditions
Performance fee
None

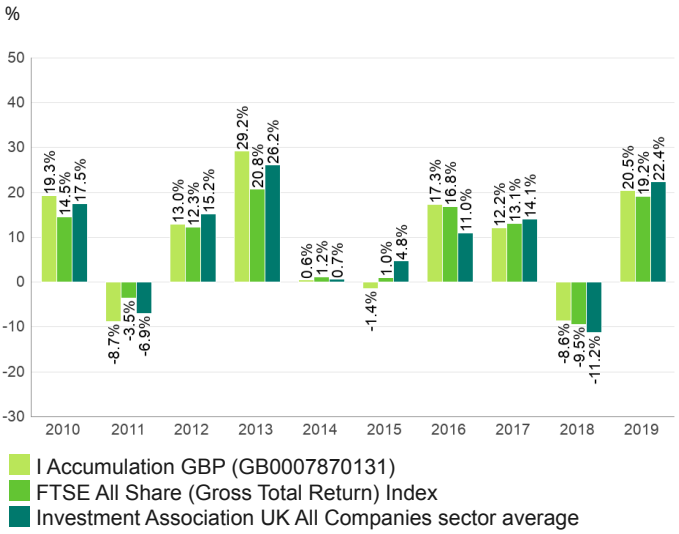

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2019 and may vary from year to year.

Please see the prospectus for more details about the charges.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 06 May 1997.
