Investment objective

The investment objective of the Fund is to manage investor capital to provide a secure and stable investment primarily through acquiring freehold ground rents which offer a consistent income stream and capital growth prospects. The aim is to achieve a total return for the Fund in excess of 5% per annum for Shareholders.

Fund commentary

The Fund continues its 26 year track record of positive inflation beating returns, generating a total return (inclusive of income 4.28% and capital gains 3.63%) for the twelve months to 30 April 2019 of 7.91%.

The Fund's next distribution for its income for the period from 1 October 2018 to 31 March 2019 will be paid at the end of May 2019.

The Fund's assets are very long dated (with an average lease length in excess of 100 years) and have much greater security of income than standard property. The Fund owns over 65,000 freeholds with a gross annual ground rent income of circa £9.0 million. 86% of its freeholds have a form of inflation protection through periodic uplifts linked to Retail Price Index (RPI), property values or fixed uplifts.

As of 13 August 2018, a 1% dilution levy will be applied to subscriptions into the Fund. This levy remains constantly under review at each dealing day.

The Government announced plans in their 2017 consultation paper to review unfair practices in the residential leasehold market. Although the focus of the consultation paper is on new residential leaseholds, the timing of any changes and the outcome of any legislative changes in the residential leasehold market and on the value of the portfolio owned by the Fund is uncertain.

Following on from the Government's consultation on "Tackling Unfair Practices in the Leasehold Market" and its subsequent response paper, the Government asked the Law Commission to consider further measures which could assist existing leaseholders of houses and to prioritise enfranchisement solutions for residential leasehold property generally.

In 2018 the Law Commission issued an initial paper followed by a full consultation paper, which sets out a number of potential solutions for a more coherent and streamlined enfranchisement regime for leaseholders of houses and flats. The Law Commission will review the responses, decide on their final recommendations and present them to the Government later in 2019.

The independent valuer of the Fund, has valued the property portfolio in light of the current market conditions and taking into account the uncertainty of any legislative initiatives.

We therefore await the recommendations of the Law Commission to the Government and the response to the Government's proposed legislative initiatives. In the short term, until there is more clarity on any proposed reforms to the residential leasehold market, the Fund is not expected to acquire properties, unless contractually committed to do so (at 30 April 2019 the value of property exchanged but not completed is £0.4 million). Any gains derived from the Fund's property portfolio are likely to arise from uplifts in rental income as leases pass through their review periods or through lease extensions. As a result, looking forward, the Fund may generate returns more commensurate with its target total return of 5% per annum.
