Registration for public distribution	UK registered and listed
Benchmark index	Dynamic Market Intellidex Net Total Return Index

Investment objective

The Invesco Dynamic US Market UCITS ETF aims to provide investors with investment results which, before expenses, correspond to the price and yield performance of the Dynamic Market Intellidex Net Total Return Index (a modified equal dollar index) in US dollar terms by holding, as far as practicable, all of the Index's constituents in their respective weighting. The Index uses market-like sector weightings and tiered market-capitalisation groupings to provide an accurate representation of the US stock market, while avoiding high mega cap concentrations found in capitalisation weighted indices. The Index is rebalanced quarterly. Please note that, prior to 29 May 2018, the name of this product was PowerShares Dynamic US Market UCITS ETF.

Benchmark index description

The Intellidex methodology is designed to objectively identify those stocks within a particular market segment that have the greatest potential for capital appreciation. The Index seeks to go beyond traditional measurements to consider the fundamentals that drive healthy companies and growth. The methodology evaluates companies quarterly, based on five Superfactors: Price Momentum, Earnings Momentum, Quality, Management Action, Value. Rigorous research has gone into how each of the factors performs across time and within different market conditions. Within each category, factors are combined to form a composite exposure.

ETF NAV performance (%)

Cumulative performance

	3 months	1 year	3 years	5 years	Since inception
Invesco Dynamic US Market UCITS ETF	4.68	13.03	26.06	40.41	115.41
Dynamic Market Intellidex NTR Index	4.85	13.70	28.57	45.20	134.16
S&P 500 Index	8.91	30.70	50.45	68.59	169.09

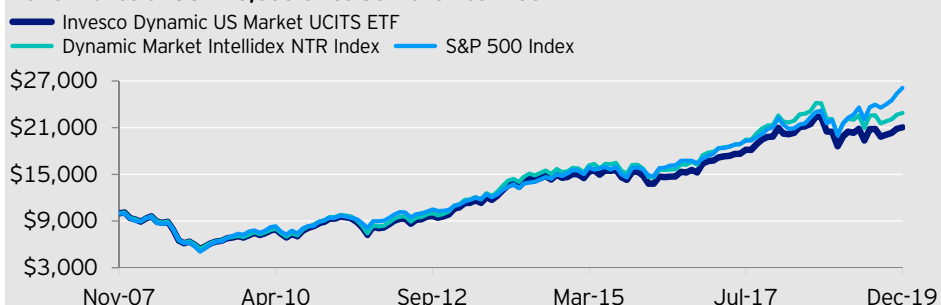

Annual performance

	2019	2018	2017	2016	2015
Invesco Dynamic US Market UCITS ETF	13.03	-6.17	18.86	12.40	-0.90
Dynamic Market Intellidex NTR Index	13.70	-5.63	19.82	13.15	-0.19
S&P 500 Index	30.70	-4.94	21.10	11.23	0.75

Standardised rolling 12 month performance

	31.12.18 31.12.19	31.12.17 31.12.18	31.12.16 31.12.17	31.12.15 31.12.16	31.12.14 31.12.15
Invesco Dynamic US Market UCITS ETF	13.03	-6.17	18.86	12.40	-0.90
Dynamic Market Intellidex NTR Index	13.70	-5.63	19.82	13.15	-0.19
S&P 500 Index	30.70	-4.94	21.10	11.23	0.75

Performance of USD 10,000 since 30 November 2007

Past performance is not a guide to future returns. Source: Invesco, Amex, FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions.

ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting.

Risk warnings

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

When making an investment in an ETF you are buying shares in a company that is listed on a stock exchange.

It is expected that the shares of the ETF will trade closely to its Net Asset Value (NAV), and because of the exchange-traded fund structure, that a significant discount or premium to the NAV will not be sustained over the long term. However, supply of, and demand for, the shares on the relevant exchange together with any disruptions to creations and redemptions of units in the underlying fund may result in share prices that differ significantly from the NAV and there can be no certainty that there will be liquidity in the shares on any exchange. Only Authorised Participants, as defined in the Prospectus of the ETF, can request the Manager to create and redeem units in the underlying fund.

Important information

¹ The ongoing charges figure is based on annualised expenses. It excludes portfolio transaction costs.

² The ETF will, as far as practicable, hold all the securities in the index in their respective weightings.

³ The Historic Yield reflects the distributions declared over the past twelve months as a percentage of the NAV at the beginning of the next period. Investors may be subject to tax on their distributions.
