Report of the Directors

The Board of Directors (the "Board" or the "Directors") submit their report together with the audited financial statements for the year ended 30 June 2018.

Principal Activities

GAM Star Fund p.l.c. (the "Company") was incorporated and registered in Ireland under the Companies Act 2014 as an investment company with variable capital on 20 February 1998 and is authorised by the Central Bank of Ireland ("the Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations").

It is an umbrella type company, in that shares may be issued in relation to different funds (the "Funds") from time to time. A separate portfolio of assets will be maintained for each Fund and will be invested in accordance with the investment objective and policies applicable to such a Fund as set out in "Investments Objectives". Segregated liability exists between Funds.

Certain Funds are authorised for sale in Austria, Bahrain, Belgium, Bulgaria, Chile, Denmark, Finland, France, Germany, Gibraltar, Iceland, Ireland, Israel, Italy, Japan, Lebanon, Liechtenstein, Luxembourg, the Netherlands, Norway, Peru, Portugal, Singapore, Spain, Switzerland, Sweden, Taiwan, United Arab Emirates and the United Kingdom.

Risk Management Objectives

Details of risk management objectives are shown in note 3.

Results and Distributions

The results and distributions for the year are stated in the Profit and Loss Account.

Review of the Business and Future Developments

Please refer to the investment commentary of each Fund on the following pages for a review of each Fund's activities during the year. The suspension of four Funds with effect 31 July 2018 and their subsequent termination was a clear setback for the Company however we expect the business of the Company to stabilise which will allow it build on its diversified range of existing Funds and also to launch new Funds.

Events Since Year End

Please refer Note 23 for further details.

Directors

The Directors of the Company during the year ended 30 June 2018 were:

Andrew Bates
David Dillon
Andrew Hanges
Daniel O' Donovan
Burkhard Poschadel*
Deborah Reidy**

* Resigned 31 December 2017.

** Appointed 2 May 2018.

Directors' fees for the period are stated in note 11.

Directors' and Secretary's Interests

None of the Directors or Secretary or their families held any beneficial interest in the share capital of the Company during the years ended 30 June 2018 and 30 June 2017.

Transactions Involving Directors

The Board are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest as defined in the Companies Act 2014 at any time during the year from 1 July 2017 to 30 June 2018, other than as disclosed in note 11.

Transactions with Connected Persons (for the purposes of Central Bank of Ireland UCITS Regulation 41(1))

The Board are satisfied:

- (i) that there are arrangements (evidenced by written procedures) in place to ensure that all transactions with connected persons (for the purposes of Central Bank of Ireland UCITS Regulation 41(1)) are conducted at arm's length and in the best interest of shareholders and
- (ii) that any transactions with connected persons entered into during the year complied with the obligation of (i) above as attested by the Manager through regular updates to the Board.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with Irish law.

Irish law requires the Directors to prepare financial statements for each financial year. The Directors have prepared the financial statements in accordance with Financial Reporting Standard ("FRS") 102 and the UCITS Regulations.

Under Irish law the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with FRS 102 and ensure that they contain the additional information required by the Companies Act 2014; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

Statement of Directors' Responsibilities, continued

The Directors believe that they have complied with the requirement to maintain adequate accounting records by employing an experienced Administrator for the purpose of maintaining adequate accounting records.

The Directors are responsible for safeguarding the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary who has been appointed as Depositary to the Company pursuant to the terms of a Depositary Agreement. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Corporate Governance

The Company is subject to and complies with Irish Statute comprising the Companies Act 2014, the UCITS Regulations and the Listing Rules of Euronext Dublin. The Company does not apply additional requirements in addition to those required by the above. Each of the service providers engaged by the Company is subject to their own corporate governance requirements.

GAM Star Absolute Return Macro, GAM Star Dynamic Global Bond, GAM Star Absolute Return Bond, GAM Star Absolute Return Bond Plus and GAM Star Absolute Return Bond Defender

The Board note that an investigation was carried out by external advisors on behalf of GAM International Management Limited ("GIML") in relation to Mr Haywood, investment director of GIML who managed GAM Star Absolute Return Macro, GAM Star Dynamic Global Bond, GAM Star Absolute Return Bond, GAM Star Absolute Return Bond Plus and GAM Star Absolute Return Bond Defender. The latest draft report on that investigation concludes that Mr Haywood may have failed to conduct or evidence sufficient due diligence on some of the investments that were made, or to make accessible internal records of documents relating to these. There is an ongoing disciplinary investigation of Mr Haywood in respect of these issues. The draft report concludes that the relevant investments are not prohibited by the investment guidelines which apply to the Funds of the Company. The Board believes, based on the information that has been brought to its attention by GIML and by GAM Fund Management Limited (the "Manager"), and having taken due consideration of the draft report, that all investments in the aforementioned Funds managed by Mr. Haywood have been recorded and appropriately valued as at 30 June 2018 and that the issues identified in the review of Mr Haywood do not impact any other Fund of the Company.

Financial Reporting Process – Description of Main Features

The Board has delegated to the Manager, the responsibility for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process whilst maintaining effective oversight of this process. Such systems are designed to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. This includes appointing the Manager to maintain the accounting records of the Company independently of each of the Co-Investment Managers and Delegate Investment Managers and the Depositary. The Manager has delegated this responsibility to the Delegate Administrator.

The Manager was contractually obliged to maintain adequate accounting records as required by the Management Agreement dated 12 March 1998 as may be amended from time to time and in compliance with local laws. The Delegate Administrator is contractually obliged to maintain adequate accounting records as required by the Administration Agreement dated 6 March 2016 as may be amended from time to time and in compliance with local laws. To that end the Delegate Administrator performs regular reconciliations of its records to those of the Depositary. The Delegate Administrator is also contractually obliged to prepare for review and approval by the Board the annual report including financial statements intended to give a true and fair view.

The Board evaluates and discusses significant accounting and reporting issues as the need arises. The Board also assesses and evaluates the Delegate Administrator's financial accounting and reporting routines and further assesses and evaluates the external auditors' performance, qualifications and independence. The Manager has operating responsibility for internal control in relation to the financial reporting process and the Manager's report to the Board.

Risk Assessment

The Board is responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The Board has also put in place processes to identify changes in accounting rules and to ensure that these changes are accurately reflected in the Company's financial statements.

Control Activities

The Manager/Delegate Administrator is contractually obliged to design and maintain control structures to manage the risks which the Board judges to be significant for internal control over financial reporting. These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report. Examples of control activities exercised by the Manager/Delegate Administrator include approval of transactions, analytical procedures, reconciliations and automatic controls in IT systems. In the event that prices are not available from external independent sources, the Board has approved the use of a pricing committee, comprised of certain Directors of the Manager, to review and make decisions on the value of any securities that the Pricing department of the Delegate Administrator cannot determine. Any decisions are notified to the Board.

Information and Communication

The Company's policies and the Board's instructions with relevance for financial reporting are updated and communicated via appropriate channels, such as e-mail correspondence and meetings to ensure that all financial reporting information requirements are met in a complete and accurate manner.

Monitoring

The Board receives regular presentations and review reports from the Depositary, each of the Co-Investment and Delegate Investment Managers, the Manager and the Delegate Administrator as appropriate. The Board also has an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Monitoring, continued

Given the contractual obligations on the Manager and the Delegate Administrator, the Board has concluded that there is currently no need for the Company to have a separate internal audit function or an audit committee in order for the Board to perform effective monitoring and oversight of the internal control and risk management systems of the Company in relation to the financial reporting process.

Shareholder Meetings

The Annual General Meetings of the Company are held in Ireland. Twenty one days notice is given in respect of each general meeting. A proxy may attend on behalf of any shareholder. An ordinary resolution is a resolution passed by a plurality of votes cast and a special resolution is a resolution passed by a majority of 75% or more of the votes cast.

Each of the shares entitles the holder to attend and vote at meetings of the Company. Matters may be determined by a meeting of shareholders on a show of hands unless a poll is requested. Each shareholder has one vote on a show of hands. Each share gives the holder one vote in relation to any matters relating to the Company which are submitted to shareholders for a vote by poll.

No class of shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other share class or any voting rights in relation to matters relating solely to any other share class.

Any resolution to alter the class rights of the shares requires the approval of three quarters of the holders of the shares represented or present and voting at a general meeting of the class. The quorum for any general meeting of the class convened to consider any alteration to the class rights of the shares shall be such number of shareholders being two or more persons whose holdings comprise one third of the shares.

Each of the shares other than subscriber shares entitles the shareholder to participate equally on a pro-rata basis in the dividends and net assets of the sub-fund in respect of which the shares have been issued, save in the case of dividends declared prior to becoming a shareholder.

Subscriber shares entitle the shareholders holding them to attend and vote at all general meetings of the company but do not entitle the holders to participate in the dividends or net assets of the Company.

Composition and Operation of Board and Committees

There are currently three directors, all of whom are non-executive. Mr Bates is a partner in Dillon Eustace who are legal advisers to the Company. None of the Directors have entered into an employment or service contract with the Company. The Articles of Association do not provide for retirement of Directors by rotation. However, the Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Irish Companies Act 2014. Currently the Board meets at least quarterly. There are no standing sub-committees of the Board however sub committees of 2 Directors can convene on an ad hoc basis if required to do so.

With reference to Section 4.8 of the Corporate Governance Code, while David Dillon holds non-fund directorships in excess of 8, the board is satisfied, having considered the number and nature of such directorships and the time and resources that David Dillon is required to devote to such companies, that this does not impact in any way on his ability to devote sufficient time to his role as director of the Company and his associated responsibilities. In this context

the board noted that the majority of non-fund directorships are either dormant companies or companies which are in wind down.

Accounting Records

The measures taken by the Board to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures and the employment of competent persons. The Board have appointed the Manager for the purpose of maintaining accounting records. The Manager have delegated these responsibilities effective from 7 March 2016 to State Street Fund Services (Ireland) Limited as Delegate Administrator. Accordingly, the books of account are kept at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

The integrity of these financial statements published on www.gam.com remain the responsibility of the Board.

Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Relevant Audit Information

In accordance with section 330 and 332 of the Companies Act 2014, we confirm that all audit information relating to the Company has been made available to PricewaterhouseCoopers.

In accordance with section 330 of the Companies Act 2014, the Board have taken all steps that ought to have been taken by the Board in order to make themselves aware of any relevant audit information and to establish that PricewaterhouseCoopers are aware of that information.

Directors Compliance Statement

In accordance with Section 225 of the Companies Act 2014, The Directors:

- (a) acknowledge that they are responsible for securing the Company's compliance with its relevant obligations, as defined by the Companies Act 2014; and
- (b) confirm that
 - i) a compliance policy statement has been prepared setting out the Company's policies (that, in the Directors' opinion, are appropriate to the Company) for ensuring compliance by the Company with its relevant obligations;
 - ii) adequate structures are in place, that in the Directors' opinion, are designed to secure material compliance with the Company's relevant obligations; and
 - iii) an annual review procedure has been put in place to review the Company's relevant obligations and ensure a structure is in place to comply with these obligations

Independent Auditors

The independent auditors, PricewaterhouseCoopers, have indicated their willingness to remain in office in accordance with section 383(2) of the Companies Act 2014.

PricewaterhouseCoopers were appointed by the Directors on 20 February 1998 to audit the financial statements for the period ended 30 June 1998 and subsequent financial periods. The period of total uninterrupted engagement is 20 years, covering the years ended 30 June 1998 to 30 June 2018.

Approval of Financial Statements

These financial statements were approved by the Board of Directors on 03 December 2018.

On behalf of the Board of Directors:

Director: Daniel O'Donovan
03 December 2018

Director: Andrew Bates

Investment Objectives

The investment objectives of each Fund are set out below.

GAM Star Absolute Return Bond

The investment objective of the Fund is to invest at least 85% of its assets in GAM Multibond Absolute Return Bond Fund (the “Master Fund”), the investment objective of which is to achieve a long term positive (absolute) return in both rising and falling financial markets while observing the principle of risk diversification. The Master Fund is a sub-fund of GAM Multibond which is established as a société d’investissement, a capital variable, and is authorised by the Commission de Surveillance du Secteur Financier in Luxembourg (“CSSF”) as a UCITS. The Master Fund is managed by GAM International Management Limited, which has also been appointed as Co-Investment Manager of the Fund.

GAM Star Absolute Return Bond Defender

The investment objective of the Fund is to invest at least 85% of its assets in GAM Multibond Absolute Return Bond Fund Defender (the “Master Fund”), the investment objective of which is to achieve a long term positive (absolute) return in both rising and falling financial markets while observing the principle of risk diversification. The Master Fund is a sub-fund of GAM Multibond which is established as a société d’investissement, a capital variable, and is authorised by the Commission de Surveillance du Secteur Financier in Luxembourg (“CSSF”) as a UCITS. The Master Fund is managed by GAM International Management Limited, which has also been appointed as Co-Investment Manager of the Fund.

GAM Star Absolute Return Bond Plus

The investment objective of the Fund is to invest at least 85% of its assets in GAM Multibond Absolute Return Bond Fund Plus (the “Master Fund”), the investment objective of which is to achieve a long term positive (absolute) return in both rising and falling financial markets while observing the principle of risk diversification. The Master Fund is a sub-fund of GAM Multibond which is established as a société d’investissement, a capital variable, and is authorised by the Commission de Surveillance du Secteur Financier in Luxembourg (“CSSF”) as a UCITS. The Master Fund is managed by GAM International Management Limited, which has also been appointed as Co-Investment Manager of the Fund.

GAM Star Absolute Return Macro

(formerly known as GAM Star Alternative Fixed Income)

The investment objective of the Fund is to seek to achieve consistent positive returns over the long term while observing the principle of risk diversification. The Fund aims to achieve this by blending discretionary and model driven investment strategies which may generate exposure (either directly or indirectly through the use of financial derivative instruments) principally to Fund income instruments and currencies.

GAM Star Alpha Spectrum

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund aims to achieve this investment objective by gaining exposure to equity, fixed income and trading strategies. Such exposure may be achieved principally through investment in open-ended collective investment schemes deploying equity long only, equity hedge, fixed income and trading strategies.

GAM Star Alpha Technology

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective by taking long and short positions primarily in equities or equity related derivative contracts of technology related companies. Such companies will be listed on or dealt in Recognised Markets globally (including in Emerging Markets as described in the prospectus) and up to 10% of its Net Asset Value may be invested in unlisted equities of such companies.

GAM Star Asian Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted securities which are issued by public companies with principal offices or significant business activities in the Asian region, excluding Japan.

GAM Star Asia-Pacific Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing, primarily in quoted equity securities, in companies with principal offices in the Pacific Basin, including Australia, China, Hong Kong, India, Indonesia, Japan, Malaysia, New Zealand, Pakistan, the Philippines, Singapore, South Korea, Sri Lanka, Taiwan and Thailand.

GAM Star Balanced

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. This investment objective may be achieved primarily through investment in open-ended collective investment schemes which gain exposure to equities, Fixed Income Securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the Prospectus.

GAM Star Capital Appreciation US Equity

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in equities and other equity related securities (including preferred shares, convertible bonds, American Depositary Receipts and exchange traded funds) which are issued by companies with principal offices in the United States of America, which exercise their primary economic activity in the United States of America, or which are listed on or dealt in a Recognised Market in the United States of America.

GAM Star Cat Bond

The investment objective of the Fund is to seek to generate returns through selective investment in a global portfolio of catastrophe bonds (“Cat Bonds”). Cat Bonds are debt securities that transfer the risk of catastrophic events from insurance companies, reinsurance companies, corporations, governments, etc. to the capital markets.

GAM Star Cautious

The investment objective of the Fund is to seek to achieve long term capital growth with lower volatility than a fund which invests solely in equities. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, Fixed Income Securities, property, commodities and currencies as set out in the Prospectus.

GAM Star China A Equity

(Approved on 12 December 2014. Not yet launched)

The investment objective of the Fund is to achieve capital appreciation. GAM International Management Limited and GAM Hong Kong Limited, which have been appointed as Co-Investment Managers to the Fund, intend to achieve this investment objective through investment primarily in China A shares listed on or dealt in the Shanghai Stock Exchange ("SSE") or the Shenzhen Stock Exchange ("SZSE") ("China A Shares").

GAM Star China Bond

(Approved on 27 September 2016. Not yet launched.)

The investment objective of the Fund is to provide long-term capital growth and income. The Fund seeks to achieve this investment objective through investment primarily in Fixed Income Securities and Money Market Instruments denominated in Renminbi ("RMB") issued by entities located in the People's Republic of China (the "PRC") or by entities which carry out a predominant proportion of their business activities in the PRC. The Fund may also invest up to 100% of net assets in instruments issued by government, government agencies, supra-national agencies located in the PRC in accordance with the requirements set out in the Investment Restrictions section of the Prospectus.

GAM Star China Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted equity securities listed on or dealt in any Recognised Market and which are issued by companies with principal offices or significant business activities in the People's Republic of China and Hong Kong.

GAM Star China Focus Fund

(Approved on 12 October 2015. Not yet launched)

The investment objective of the Fund is to achieve capital appreciation through investment primarily in equity securities of small or medium sized companies listed on or dealt in any Recognised Market and which are issued by companies with principal offices or significant business activities in the People's Republic of China and Hong Kong.

GAM Star Composite Global Equity

The investment objective of the Fund is to achieve long term capital appreciation with the aim of generating a capital return in excess of global equity markets over the medium to long term. The Fund intends to pursue its investment objective by gaining exposure principally to equity strategies. Such exposure may be achieved principally through investment in open ended collective investment schemes deploying equity long only and equity hedge strategies. The Fund may also invest in exchange traded funds which are listed or traded on Recognised Markets worldwide in order to gain exposure to such strategies. The Fund may also invest in unlisted collective investment schemes in accordance with the provisions of the UCITS Regulations.

GAM Star Continental European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity and equity related securities (including but not limited to warrants), listed on or dealt in Recognised Markets within the EU which are issued by companies with principal offices in Europe other than the United Kingdom.

GAM Star Credit Opportunities (EUR)

The investment objective of the Fund is to achieve long-term capital gain in Euro. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (GBP)

The investment objective of the Fund is to achieve long-term capital gain in Sterling. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (USD)

The investment objective of the Fund is to achieve long-term capital gain in US dollars. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Defensive

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, Fixed Income Securities, property, commodities and currencies as set out in the Prospectus.

GAM Star Discretionary FX

The investment objective of the Fund is to achieve absolute returns over the medium term arising out of the Fund's participation in the global currency and related markets.

GAM Star Dynamic Global Bond

The investment objective of the Fund is to maximise total investment return generated from a combination of income, capital appreciation and currency gains. The Fund aims to achieve this investment objective principally through investment either directly or through the use of associated financial derivative instruments in a broadly diversified portfolio of Fixed Income Securities and currencies.

GAM Star Dynamic Growth

(formerly known as GAM Star Global Equity)

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, Fixed Income Securities, property, commodities and currencies as set out in the terms of the Prospectus. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

GAM Star Emerging Equity

(formerly known as GAM Star North of South EM Equity)

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets.

GAM Star Emerging Market Rates

The investment objective of the Fund is to achieve absolute return regardless of market conditions through investment in a portfolio of local and hard currency bonds and other fixed income securities from emerging markets worldwide.

GAM Star European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities issued by companies with principal offices in Europe, including Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Russia, Spain, Sweden, Switzerland, Turkey and the United Kingdom. It will be the policy of the Fund to invest primarily in equities.

GAM Star Flexible Global Portfolio

The investment objective of the Fund is to achieve capital appreciation by gaining exposure to one or more of the following asset classes: financial indices, open-ended collective investment schemes, exchange traded funds, exchange traded commodities, Fixed Income Securities, equities, equity related securities, derivative instruments, cash, cash equivalents, Money Market Instruments and closed-ended funds. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes. The Fund need not be invested in any or all of the asset classes at any one time.

GAM Star GAMCO US Equity

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in a diversified portfolio of equities (i) issued by companies with principal offices in the United States of America and/or (ii) which are listed on Recognised Markets in the United States of America. Whilst the Fund will primarily invest in the equities described above, it may also invest in other equities listed on Recognised Markets worldwide.

GAM Star Global Diversified

(Approved on 12 October 2015. Not yet launched)

The investment objective of the Fund is to provide capital appreciation. It will be the normal policy of the Fund to invest primarily in shares and other equity related securities (which shall comprise of preferred stock) listed on or dealt in Recognised Markets worldwide.

GAM Star Global Quality

The investment objective of the Fund is to provide capital appreciation primarily through investment in quoted equity securities listed on or dealt in Recognised Markets on a worldwide basis. The Fund emphasises investment in companies in developed countries such as the United States, the countries of Western Europe and certain countries in the Pacific Basin, which include but are not limited to Australia, Hong Kong, Japan, New Zealand and Singapore.

GAM Star Global Rates

The investment objective of the Fund is to achieve absolute returns. The Fund employs a process of economic analysis to identify fundamental trends within both the fixed income and global currency markets. There are both medium term and short term based themes involved in the Fund's strategy.

GAM Star Global Selector

The investment objective of the Fund is to achieve long term capital appreciation by investing primarily in a focused, concentrated portfolio of worldwide quoted equity and equity related securities (including, but not limited to warrants), listed on or dealt in Recognised Markets on a worldwide basis.

GAM Star Global Smaller Companies

(Approved on 27 September 2016. Not yet launched.)

The investment objective of the Fund is to provide capital appreciation. The Fund aims to achieve this investment objective through direct investment in securities of small and medium sized companies on a worldwide basis which are listed or traded on Recognised Markets worldwide.

GAM Star Growth

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, Fixed Income Securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

GAM Star India Equity

The investment objective of the Fund is to achieve long-term capital appreciation. It is the policy of the Fund to invest primarily in a diversified portfolio of equity and equity related securities and/or other derivative instruments of companies listed or dealt on any Recognised Market with principal offices in India or significant business activities, assets or resources related to India.

GAM Star Interest Trend

The investment objective of the Fund is to achieve long-term capital appreciation in US dollars. The Fund aims to achieve its investment objective through investment principally in income bearing securities which are expected to generate fixed income payments and also selectively make capital gains from trends in interest rates. Such instruments include government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent convertible notes.

GAM Star Japan Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities in Japan issued by companies with principal office in Japan. It will be the policy of the Fund to invest primarily in equities.

GAM Star Keynes Quantitative Strategies

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund aims to achieve this investment objective through the use of systematic quantitative models.

GAM Star MBS Total Return

The Fund's primary investment objective is to seek to generate returns through selective investment in a diversified portfolio of mortgage-backed debt securities ("MBS"). The Fund may also invest to a lesser extent in asset-backed debt securities ("ABS") as well as debt securities (such as bonds and notes) issued by corporations and governments. Such debt securities may pay fixed, floating and inverse floating rates of interest and may include zero coupon obligations.

GAM Star North American Growth

(Approved on 12 October 2015. Not yet launched)

The objective of the Fund is to provide capital appreciation. The Fund aims to achieve this investment objective primarily through investment in equity and equity related securities (which shall comprise of warrants, rights issues and preferred stock) of companies listed on or dealt on Recognised Markets in the United States and Canada.

GAM Systematic Alternative Risk Premia

The investment objective of the Fund is to provide consistent above-average, risk-adjusted returns on capital with a low long term correlation with traditional asset classes such as equities and bonds. The investment objective is achieved by the Co-Investment Manager by gaining exposure directly or indirectly using financial derivatives instruments to the following four asset classes i.e. equities (which will be listed or traded worldwide), fixed income (i.e. Fixed Income Securities), Currencies and Commodities.

GAM Systematic Alternative Risk Premia Ex-A

(Approved on 11 July 2017. Not yet launched)

The investment objective of the Fund is to provide consistent above-average, risk-adjusted returns on capital with a low long term correlation with traditional asset classes such as equities and bonds.

GAM Systematic Core Macro

(formerly known as GAM Systematic Diversified Macro)

The investment objective of the Fund is to achieve long term capital growth through the generation of absolute returns by the use of proprietary advanced modeling techniques which are used to identify appropriate investments for the Fund across all relevant asset classes.

GAM Systematic Global Equity Market Neutral

The investment objective of the Fund is to provide investors with consistent absolute returns independent of global equity markets. The Fund aims to achieve this investment objective through the use of proprietary advanced modeling techniques which are used to identify appropriate investments for the Fund.

GAM Star Tactical Opportunities

The investment objective of the Fund is to seek to achieve capital appreciation via unconstrained tactical asset allocation. The Fund aims to achieve this investment objective by gaining exposure either directly or indirectly through the use of derivatives to a range of asset classes including equities, fixed income securities, currencies, commodities and property as described in the Prospectus. The Fund will not invest directly in property or commodities.

GAM Star Target Return

The investment objective of the Fund is to seek to achieve long term growth and capital appreciation via a flexible asset allocation, using a conservative approach. The Fund aims to achieve this investment objective by gaining exposure, either directly or indirectly through the use of collective investment schemes and derivatives to a range of asset classes including equities, Fixed Income Securities, currencies, commodities and property as described in the Prospectus. The Fund will not invest directly in property or commodities.

GAM Star Target Return Plus

The investment objective of the Fund is to seek to achieve long term growth and capital appreciation via a flexible asset allocation, using a moderate approach. The Fund aims to achieve this investment objective by gaining exposure, either directly or indirectly through the use of collective investment schemes and derivatives to a range of asset classes including equities, Fixed Income Securities, currencies, commodities and property as described in the Prospectus. The Fund will not invest directly in property or commodities.

GAM Star Technology

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in a globally diversified portfolio of technology related companies. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets worldwide, and up to 10% of its net assets in unlisted equities, in each case which demonstrate long term growth opportunities within the broader technology sector or whose business models are driven by new technologies. The Fund may also seek to gain exposure to such companies through the use of financial derivative instruments described in the Prospectus.

GAM Star UK Diversified

(Approved on 12 October 2015. Not yet launched)

The investment objective of the Fund is to provide capital appreciation. The Fund aims to achieve this investment objective primarily through investment in quoted equity and equity related securities (which shall comprise of preferred stock) which are (i) listed on or dealt in Recognised Markets in the UK, (ii) issued by companies with principal offices in the UK or (iii) issued by companies which exercise their primary economic activity in the UK.

GAM Star US All Cap Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted securities in the United States of America issued by companies with principal offices in the United States of America. The Fund will invest in a broad spread of equities, and may invest in Fixed Income Securities and preferred stock listed on or dealt in a Recognised Market in the United States of America. It will be the policy of the Fund to invest primarily in equities.

GAM Star Worldwide Equity

The investment objective of the Fund is to provide capital appreciation primarily through investment in quoted securities on a worldwide basis. It will be the normal policy of the Fund to invest primarily in equities.

General

In addition, please note the following in relation to the investment objectives and policies of the Funds:

- (i) any Fund, the name of which contains a reference to a specific type of security, country or region will invest at least two thirds of its non-liquid assets in that specific type of security, country or region;
- (ii) any Fund, the name of which contains a specific reference to a specific currency, will invest at least two thirds of its non-liquid assets in securities denominated in that specific currency;
- (iii) where the investment policy of a Fund states that investments are made "primarily" in a specific type of security, country or region, that Fund will invest either directly or indirectly (through the use of financial derivative instruments) at least two thirds of its non-liquid assets in that specific type of security, country or region;
- (iv) where the investment policy of a Fund refers to investments in companies of a specific country or region, this means (in the absence of any other definition) that these companies will have their registered office in the specific country or region stated, notwithstanding their being listed on any stock exchange mentioned in the investment policy of the Fund.

GAM Star Absolute Return Bond

Fund Manager: Absolute Return Bond Team

30 June 2018

Commentary (Unaudited)

The Fund fell 2.5% for the year to 30 June 2018 (as measured by the EUR Institutional share class), compared to its benchmark the 3 month Libor in EUR which fell by 0.4%.

Corporate credit was the primary driver of investment returns, with financial names performing well within both the investment grade and high yield segments of the account. Alternative forms of credit, such as asset backed securities and trade finance, made a noteworthy positive contribution to performance. Interest rate strategies detracted from investment returns, with a short (negative duration) bias in Europe proving the most costly. Interest rate strategies in the emerging world added value, particularly positions in Hungary and Brazil. Convertible debt had a negligible impact on performance with good stock and sector selection offset by the cost of equity market hedges. Foreign exchange management added value over the period.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD X class) fell 4.8% over the year to 30 June 2018, compared to its benchmark, the 3 Month Libor Index which rose 1.7% in USD terms.

Interest rate strategies were the primary detractor of performance over the review period, with the portfolio's short duration bias in Europe proving the most costly. Interest-rate strategies in the emerging world made a positive contribution to performance. This was driven largely by a long position in Brazil and short position in Hungary, while a long position in Mexico detracted from investment returns. Foreign exchange management made a positive contribution to fund returns.

At the end of the review period, the Fund had a VaR of 2.6% and an interest rate duration of -1.1 years.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation share class) rose 1.9% over the year to 30 June 2018, outperforming its benchmark, the Average EUR 1 Month Deposit Rate which fell 0.4% in EUR terms.

Quarter three of 2017 was a good quarter for global equity markets, with the economic data continuing to point to a healthy global economy. US equity markets in particular have had a remarkably smooth journey so far this year, with this quarter proving to be no exception amid supportive macroeconomic data, a robust quarterly reporting season and further weakness in the US dollar. Sentiment was undimmed by increased political uncertainty amid rising tensions with North Korea and the on-going failure of the Trump administration to realise its policy goals. The risk-on sentiment that pushed equities higher over the quarter was also visible in fixed income markets, with credit outperforming government bonds. After a strong rally early in the quarter, government bonds sold off in September as markets started to take central bank tightening communications more seriously, leaving them broadly flat over the quarter. The dollar posted a monthly gain at the end of the third quarter for the first time since February 2017 on the back of returning market optimism on US tax reforms and an increasing likelihood of another Fed hike this year. In commodities, gold was up marginally over the quarter in part given an uptick in geopolitical concerns.

Quarter four of 2017 was a good quarter, topping off a very strong year for equity markets. Credit markets have also had a decent quarter and year, outperforming government bonds, although underperforming equities. A strong earnings season, continued healthy economic growth and US tax cuts have helped equity markets this quarter. It was a year when downside political risks failed to materialise and major upside political risk, in the form of US tax cuts, was delivered. The positive economic and political backdrop helped drive risk assets higher. US equities in particular have had a great year and delivered positive returns in every single month of 2017. A rebound in inflation expectations, combined with the US tax cuts and central bank tightening ensured that government bonds underperformed for the quarter. Despite three Fed hikes and robust macro data the dollar depreciated most of the year due to persistently low inflation as well as the uncertainty on the path of Fed rate hikes. Sterling also gained on the back of strong data in spite of Brexit worries ending the year stronger against the dollar. The weak dollar and improving global growth outlook proved profitable for most commodities.

Global markets were certainly not initially plagued with the January blues. The major equity markets continued to climb, picking up where we left off last year at the start of the first quarter but reversed performance throughout the remaining period of the first quarter. The fundamentals remain strongly supportive with events that might typically be problematic for equity markets, including tightening by the Federal Reserve or political turbulence, are taking second stage to the underlying fundamentals. However, growing confidence among central banks that the strong recovery will bring inflation back towards targets caused most government bond prices to weaken, particularly US Treasuries. The most notable market move over the month was dollar weakness, evident against the euro, sterling and the yen, amongst others, as global growth outside of the US picked up.

The second quarter of 2018 saw little progress in equities and bonds. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also see-sawed, with yields at first rising, before falling away again, as investors sought refuge in the asset class amid a less certain economic and political outlook. Currency movements – in particular, the rising US dollar – were more notable, and had a sizeable effect on emerging-market economies and related capital markets.

The top three holdings contributing to performance were Artemis Global Income Fund I, iShares Edge MSCI USA Value Factor UCITS ETF and GAM Star Japan Equity. The bottom three performers were iShares Core MSCI EM IMI UCITS ETF, Polar Capital Global Insurance Fund USD I Acc and Prusik Asian Equity Income Fund 2x.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Income class) rose 11.4% over the year to 30 June 2018, underperforming its benchmark, the MSCI World Information Technology Index which rose to 29.0% in USD terms.

The backdrop for technology investing remained very constructive during the third quarter of 2017. This was underpinned by further evidence that trends in key growth themes like mobility, the automation of knowledge work and cloud computing remain very strong. The second quarter earnings season confirmed this with the best level of earnings beats since Q2 2010 according to Goldman Sachs. However, share prices have also risen strongly throughout the year and good news is well priced in. The result is that the market began the quarter with a strong month but performance, while still positive, slowed as the quarter progressed. The quarter's winners for the Fund came from gaming, where we have continued to increase exposure.

The fourth quarter of 2017 followed the trend established for the year, namely a grind higher in risk assets with technology equities as a leading sub-set of that trade. The year passed without the S&P 500 having a pull-back of more than 3% and continuing its record breaking run, adding a further 6.1% in Q4. That was topped by the various technology indices with the Nasdaq 100 up 7.0% and the MSCI World Technology Index up 8.1%. Growth names lagged slightly, rising just 6.2% over the quarter. The main driver of markets was a very strong Q3 reporting season backed up with continued macro growth indicators that maintained a very positive bias. In fact, while technology equities made great progress throughout the year, the earnings growth reported more than matched that growth in many cases and the sector ended the year with only modest gains in relative valuation compared to the broader S&P 500 index. This will come as a surprise to some when seeing 30-50% moves in many large cap names for the year but in truth, according to a study by Sanford Bernstein, the valuation of technology remains at the lower end of historical levels.

Equity markets got off to a record-breaking start in 2018 as US tax cuts drove demand for shares across the board. However, as is so often the case, travelling can be better than arriving for markets and more structural issues began to darken the skies with bond yields rising sharply as the counter-side of strong growth led to higher interest rates and inflation concerns. At the same time, Trump's posturing on trade with China created a great deal of uncertainty that led to a sharp sell-off in equities from the January record highs. The net effect of a strong start followed by a sell down in February and March was to leave global equity markets slightly lower for the quarter and to put an overly intense focus on the Q4 reporting season as a catalyst for equities to move higher again. The S&P 500 fell 1.2% in Q1 but technology shares as measured by the Nasdaq 100 managed to hold positive territory, rising 2.9%. While less exposure to large-cap internet was a help at the margin, the real boost to performance came from our continued belief in the memory and storage theme, as well as exposure to Software as a Service (SaaS) companies that continue to exhibit tremendous growth.

Equity markets were driven higher across the board in the second quarter of 2018 as better economic data and strong earnings reports outweighed trade war, emerging markets and Brexit concerns. World equities rose just 0.7%, held back by emerging markets, but developed market indices kicked on with technology again leading the way. The Q2 earnings season was an important driver of continued performance and we expect Q3 reporting to be equally important. While the actual second quarter numbers will likely be very strong we can see that companies may downplay their outlooks, particularly with trade sanctions intensifying. We have taken this into account via positioning changes to reflect the risk to semiconductors in particular as well as taking down overall exposure slightly. There is no concern whatsoever regarding the medium to long term trends in technology – in fact the pace of change is only accelerating. But in the short term, given that earnings will be released in a traditionally low liquidity summer period, we may see increased volatility and we want to be in a position to buy dips.

The top three holdings contributing to performance were Micron Technology, Amazon, Adobe Systems and the bottom three performers were Criteo Sa-Spon, Blue Prism Group, Intel Corp.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 6.4% over the year to 30 June 2018, underperforming its benchmark, the MSCI AC Far East ex Japan Index which returned 10.7% in USD terms.

The start of the third quarter for 2017 saw Asia Ex Japan's environment generally constructive with the synchronised global economic recovery, a turnaround in regional exports and positive corporate earnings momentum lifting equities in the region. S&P cut the credit rating of China in line with the move by Moody's earlier this year, citing the same reason of soaring debt levels raising financial risks. However, the outlook was revised upwards from negative to stable due to robust economic performance campaign. While this might cause a cyclical slowdown in the short term, as several industries curtail production in the coming months, we remain sanguine over the future long-term direction of the economy. The big picture is unchanged: supply-side reforms to redeploy resources to more productive areas; and financial sector discipline to restore health and stability, while at the same time achieving a cleaner environment. We remain overweight and continued to add China exposure. In preparation for the 19th Party Congress, the government restarted its anti-pollution campaign. Sentiment is further buoyed by pressure on the Bank of Thailand to cut interest rates. The outlook for Thailand and Singapore appears positive as export gains spill over to the domestic sector. Meanwhile, Indonesia cut interest rates for the second consecutive month. We reduced ASEAN to underweight as we expect it to be more vulnerable to a US dollar appreciation. Meanwhile, we are neutral in Korea which has held up well, unfazed by geopolitical 'noise' in the peninsula, and underweight Taiwan, which saw profit taking following disappointment over Apple's recent product launch.

Coming toward the end of 2017 Asia ex Japan equity markets continued their upward trend, encouraged by strengthening global growth. ASEAN countries announced generally healthy third quarter GDP numbers underpinned by good exports and fiscal spending. However, we are underweight this region because rising expectations for US rate hikes could take its toll on their currencies.

As we entered 2018, Asian equity markets had a volatile first quarter. They started strongly in January, supported by a positive economic environment and weak USD, which encouraged inflows into the equity markets. Then a correction kicked in during February and March, as investors adjusted to a faster pace of US rate hikes and intensifying trade tensions. There were plenty of political and macro events taking place in the first quarter: firstly the US hiked its rate by 25 bps in March, which was within expectations; secondly China hosted the National People's Congress (NPC) delivering ample political changes and institutional restructuring (merger of banking and insurance regulators); and thirdly escalating trade frictions. China, Malaysia, Taiwan and Thailand led the gains this quarter, while sector-wise healthcare, energy and utility performed the best. While uncertainty may temper investor sentiment, the strong domestic demand story, healthy fiscal, trade and reserve positions of Asian countries should support the markets going forward.

Markets slumped in the second quarter of 2018, under pressure from rising US interest rates, currency instability and heightened fears of a US-led trade war. Interestingly, North Asia fared better with export-oriented Korea and Taiwan falling to a lesser degree, as investors were encouraged by the alleviation of concerns on the oversupply of smartphones and the improved outlook for spec upgrades beyond 2018. China outperformed the region, as it is a relatively closed economy that was also helped by the inclusion of A shares in the MSCI indices at the end of May.

The top three holdings contributing to performance were Tencent Holdings, Baozun Inc, Ping An Insurance Group of China and the bottom three performers were Nine Dragons Paper Holdings, Aluminium of China, Brilliance China Automotive Holdings.

GAM Star Asia-Pacific Equity

Fund Manager: Michael Lai/Ben Williams

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 11.1% over the year to 30 June 2018, outperforming its benchmark, the MSCI Pacific Index which returned 9.9% in USD terms.

Entering into the third quarter of 2017 Pacific equities continue to perform well. Stock selection and asset allocation both helped performance during the period. Key contributors during September were Toyota Industries, the leading global forklift manufacturer and Toyota Tsusho Corp, a trading company within the Toyota group. Outside Japan, China's largest IT-gaming company and the Macau gaming stocks also contributed. Hong Kong outperformed the Pacific region this quarter, benefitting from China's robust economy and positive corporate earnings momentum. Meanwhile for Australia and Singapore the improvement in exports is starting to spill over to the non-trade sector, lifting overall confidence.

Ending 2017 we saw December as another good month for equity markets topping off a strong year. During the fourth quarter, equity prices continued to be lifted by synchronised economic momentum, while progress on US tax reforms was also greeted with enthusiasm. Each of the constituent markets posted positive returns in Q4, with Singapore and Japan outperforming while Australia lagged in relative terms. The Australian economy extended its recession-free era to 26 years, but relatively weak underlying profit growth, constrained consumer spending and record low wage growth continue to temper enthusiasm. In December positive contributions to performance were posted by Japanese trading companies, Mitsubishi, Sumitomo and Itochu and Asian gaming related names such as Aristocrat Leisure and Galaxy Entertainment Group – these stocks also featured among the list of notable contributors over the quarter.

As we entered 2018, Asian equity markets had a volatile first quarter. They started strongly in January, supported by a positive economic environment and weak USD, which encouraged inflows into the equity markets. Then a correction kicked in during February and March, as investors adjusted to a faster pace of US rate hikes and intensifying trade tensions. There were plenty of political and macro events taking place in the first quarter: firstly the US hiked its rate by 25 bps in March, which was within expectations; secondly China hosted the National People's Congress (NPC) delivering ample political changes and institutional restructuring (merger of banking and insurance regulators); and thirdly escalating trade frictions. China, Malaysia, Taiwan and Thailand led the gains this quarter, while sector-wise healthcare, energy and utility performed the best. While uncertainty may temper investor sentiment, the strong domestic demand story, healthy fiscal, trade and reserve positions of Asian countries should support the markets going forward.

Markets slumped in the second quarter of 2018, under pressure from rising US interest rates, currency instability and heightened fears of a US-led trade war. Interestingly, North Asia fared better with export-oriented Korea and Taiwan falling to a lesser degree, as investors were encouraged by the alleviation of concerns on the oversupply of smartphones and the improved outlook for spec upgrades beyond 2018. China outperformed the region, as it is a relatively closed economy that was also helped by the inclusion of A shares in the MSCI indices at the end of May.

The top three holdings contributing to performance were Tencent Holdings, Toyota Motor, Mitsubishi and the bottom three performers were Mitsubishi UFJ Financial Group, Yuzhou Properties Company, Fujitsu.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the GBP II Accumulation class) rose to 4.8% over the year to 30 June 2018, compared to its benchmark, Lipper Global Mixed Asset GBP Balanced which returned 2.8% in GBP terms.

Economic data for the third quarter of 2017 provided some validation for the strong performance of equities for the year to date. Amongst the plethora of available data releases, standout figures included the Purchasing Managers Index for both Germany and France, which showed strong growth in European manufacturing, and Japan's longest unbroken growth streak in more than a decade. With an improving environment, global corporates are posting firm sales and earnings growth that are acting as a tailwind for continued upward momentum in global equity indices. There were several events that could have led to a material pullback in markets after such a long period of gains, amongst them hurricanes in the Caribbean and increasingly provocative sparring between the United States and North Korea; however, investors remained resilient. Global bonds had a less impressive quarter as inflation figures were higher than expected for key markets such as the UK. With higher inflation comes the likelihood of interest-rate increases as central banks turn more 'hawkish'. Within the portfolio, notable performance came from the recent addition of the RWC Global Emerging Markets fund. Emerging market (EM) equities are a key allocation as they will benefit from a sustained global uptick. For instance, figures released during September confirmed that EM exports are growing at their fastest pace in over six years.

Moving into the final quarter of 2017, despite strong economic data, including an annualised growth rate of 2.8% in Germany, the strategy had a lacklustre month in terms of performance. After several months of positive gains, it was perhaps inevitable that investors would at some stage take an opportunity to assess current market levels before adding to 'risk-on' positions. There were several factors through the month which could justify investor reticence: political worries in Germany after Chancellor Angela Merkel struggled to form a coalition; a purge of princes in Saudi Arabia; continued wrangles within the Conservative Party, in the UK; and doubt over President Trump's ability to pass tax reform.

Investors started the first quarter of 2018, in an exuberant mood with most global equity indices firmly in positive territory in the first few weeks of January. The economic data supporting this feeling of optimism included US and EU manufacturing surveys at the highest levels in ten years, and Japan recording its longest growth spurt in 28 years. However, this level of synchronised growth had led to questions on whether inflation could increase with an overheating economic backdrop. Gains that had built up during the start of the quarter quickly evaporated in the quarter following the release of US wage figures which pointed to a build-up in inflationary pressures. Markets were concerned that this could lead the US Federal Reserve to increase the rate at which it raises interest rates. As has been the case in recent years, it did not take long for equity markets to recover their composure.

Moving on into the second quarter of 2018 saw little progress in equities and bonds, as measured by the MSCI AC World Index USD and the Barclays US Aggregate Bond Index, but this masked significant underlying moves during the period. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also saw-sawed, with yields initially rising before falling away again as investors fled to the asset class amid a less certain economic and political outlook. Currency movements – specifically the rising US dollar – were more notable, profoundly impacting emerging market economies and related capital markets. This was evident in the performance of the emerging market equity funds held within the strategy – the GAM Emerging Market Equity fund saw a decline during June.

While our assessment of the outlook has become less optimistic than it was at the beginning of 2018, it is important to clarify that we do not forecast asset-price falls akin to that which followed the credit bust 10 years ago. As disappointing as it is to see negative performance for the month of June, it is important to note that global economic growth remains positive and most business confidence surveys in developed economies are pointing towards a continuation of this trend.

The top three holdings contributing to performance were CC Japan Alpha Fund, JP Morgan Fund ICVC – Japan Fund, GAM North American Growth Fund and the bottom three performers were GAM Star Absolute Return Macro, Active Global High Income Bond Fund, River and Mercantile UK Dynamic Equity Fund.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 11.7% over the year to 30 June 2018, underperforming to its benchmark, the S&P 500 Index, which rose 14.4% in USD terms.

US equities rose for the quarter to the end of September 2017. Despite continued White House turmoil and heightened US tensions with Russia and North Korea, strong employment data and corporate earnings helped propel the S&P 500 to a series of new highs during the quarter. The persistently low rate of inflation growth has been a concern for the US Federal Reserve (Fed), however core CPI rose 0.2% in August increasing the market's expectation for an interest rate hike. The Fed announced the start of its balance sheet normalisation programme in October. The Fund underperformed the S&P 500 index in Q3 2017, however returns were positive. Stock selection was weakest within healthcare while stock selection within industrials added to performance. At the issuer level, our holding in DexCom Inc detracted the most from performance while our overweight in Bristol-Myers Squibb added to performance. Within sector allocation, the result of our bottom-up stock selection process, our underweight to consumer staples contributed to relative performance while our overweight to financials detracted the most. Sector exposure is an indication of where the team is finding compelling investment ideas, and changes quarter-to-quarter are often modest. The fund is currently overweight utilities and materials and underweight in consumer staples and energy.

US equities rose again for the quarter to the end of December. A strong labour market, benign inflation, progress on tax reform, and solid GDP growth contributed to positive US economic momentum. During the quarter, the portfolio slightly underperformed the S&P 500 Index. Security selection was the primary driver of underperformance, particularly in the information technology and consumer discretionary sectors.

2018 started with a bang: January was a remarkably strong month for global equities, whereas the chill winds of February brought the first noticeable market correction since 2011. Early in February a fall of over 5% in stock market indices on a single day, beginning in the US, was the first slide in excess of 3% in more than 400 trading days – the longest such record since the 1930s. The Fund delivered a positive performance for the quarter and outperformed the S&P 500 Index.

US equities rose for the quarter to the end of June. As widely anticipated, the Fed raised its benchmark interest rate by 25 basis points (bps) and signalled the potential for two additional increases in 2018. The Fed also lifted its economic growth forecast for 2018 to 2.8%, and lowered its expectation for unemployment to 3.6%, from 3.8% in March. AT&T closed its US\$85 billion takeover of Time Warner after a federal judge rebuffed the US Justice Department's attempts to block the deal in one of the largest antitrust cases in decades. The decision is expected to spark a wave of merger activity across industries. US Supreme Court Justice Anthony Kennedy, viewed as the crucial swing vote between the liberal and conservative justices, announced his retirement, setting the stage for President Trump to nominate a replacement that would solidify the court's conservative majority. The historic summit between President Trump and North Korean leader Kim Jong-un ended with an agreement to work toward peace and complete denuclearisation of the Korean Peninsula, without offering specific details or commitments. During June, we increased our overweight to industrials and decreased our overweight to consumer discretionary. We increased our position in American Express and reduced our position in Dollar Tree Stores. The portfolio's largest overweight exposure is to the industrials and information technology sectors, the largest underweight exposure is to the energy and consumer staples sectors. Key positions within industrials include Costar Group and Cintas. Key positions within information technology include Motorola Solutions and SS&C Technologies.

The top three holdings contributing to performance were Trade Desk Inc, Co-Star Group, NIKE and the bottom three performers were Coty, Ulta Salon Cosmetics & Fragrance, McKesson.

30 June 2018

Commentary (Unaudited)

The Fund rose by 1.5% over the year to 30 June 2018 (as measured by the USD Accumulation Class) compared to a rise of 1.9% for its benchmark, the FTSE (WGBI) World Government Bond index in USD.

Overall, the first half of the year (June to June) was busy in terms of natural catastrophes. The third quarter of 2017 had several catastrophes with Hurricanes Harvey, Irma, and Maria ("HIM") as well as the M8.1 Chiapas Mexico earthquake impacting the market and leading to negative performance for Q3.

The trend continued into Q4 with the massive Northern California Wildfires of October and Southern California Wildfires of December, which piled onto 2017 losses for insurers. However, despite this trend, the performance for Q4 was strong with marks on many bonds recovering from the hits they took from HIM. The Q4 California Wildfires did negatively impact a few positions, and the losses are ultimately expected to contribute towards principal losses on certain aggregate loss triggered bonds.

The start of 2018 saw a record total of bonds priced during Q1, taking the total size of the cat bond market to USD 30.6 billion, or USD 5.1 billion of net growth over the previous 12 months. Despite the strong market growth, spreads tightened, dropping back to the levels close to those before HIM as investor demand continued to increase. While still positive, performance for the quarter was lower than expected heading into the year. This was primarily due to unexpected adverse loss development related to Hurricane Irma.

In Q2 2018, approximately USD 3.3 billion of bonds in the market matured, against new issuance for the quarter of approximately USD 4.0. As in the first quarter, while performance was positive in the second quarter, it was slightly lower than expected due to continued adverse loss development related to Hurricane Irma.

For the 12 months ending June 30, 2017, the number of positions in the portfolio increased from 128 to 156, and the total number of cat bond tranches in the market increased from 178 to 202. The largest 10 investment positions in the portfolio accounted for 20.03% of the fund's NAV vs. 29.61% of the fund's NAV a year prior.

GAM Star Cautious

Fund Manager: Charles Hepworth/James McDaid

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the GBP Accumulation class) returned 3.6% over the year to 30 June 2018, outperforming its benchmark, Lipper Global Mixed Asset GBP Conservative which returned 1.4% in GBP terms.

Economic data for the third quarter of 2017 provided some validation for the strong performance of equities for the year to date. Amongst the plethora of available data releases, standout figures included the Purchasing Managers Index for both Germany and France, which showed strong growth in European manufacturing, and Japan's longest unbroken growth streak in more than a decade. With an improving environment, global corporates are posting firm sales and earnings growth that are acting as a tailwind for continued upward momentum in global equity indices. There were several events that could have led to a material pullback in markets after such a long period of gains, amongst them hurricanes in the Caribbean and increasingly provocative sparring between the United States and North Korea; however, investors remained resilient. Global bonds had a less impressive quarter as inflation figures were higher than expected for key markets such as the UK. With higher inflation comes the likelihood of interest-rate increases as central banks turn more 'hawkish'. Within the portfolio, notable performance came from the recent addition of the RWC Global Emerging Markets fund. Emerging market (EM) equities are a key allocation as they will benefit from a sustained global uptick. For instance, figures released during September confirmed that EM exports are growing at their fastest pace in over six years.

Moving on into the second quarter of 2018 saw little progress in equities and bonds, as measured by the MSCI AC World Index USD and the Barclays US Aggregate Bond Index, but this masked significant underlying moves during the period. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also see-sawed, with yields initially rising before falling away again as investors fled to the asset class amid a less certain economic and political outlook. Currency movements – specifically the rising US dollar – were more notable, profoundly impacting emerging market economies and related capital markets. This was evident in the performance of the emerging market equity funds held within the strategy – the GAM Emerging Market Equity fund saw a decline during June.

While our assessment of the outlook has become less optimistic than it was at the beginning of 2018, it is important to clarify that we do not forecast asset-price falls akin to that which followed the credit bust 10 years ago. As disappointing as it is to see negative performance for the month of June, it is important to note that global economic growth remains positive and most business confidence surveys in developed economies are pointing towards a continuation of this trend.

The top three holdings contributing to performance were CC Japan Alpha Fund, JP Morgan Fund ICVC – Japan Fund, GAM Star Technology and the bottom three performers were GAM Star Absolute Return Macro, Active Global High Income Bond Fund, River and Mercantile UK Dynamic Equity Fund.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 14.5% in the year to 30 June 2018, underperforming to the benchmark, the MSCI China index in USD terms, which rose to 21.4%.

Q3 2017 started off with China's equity market stretched, its unbroken string of monthly gains to a ninth month. The investment climate remained constructive, featuring a synchronised global economic recovery; a turnaround in regional exports; strong Chinese macro figures; positive corporate earnings momentum; and a firmer renminbi. Supportive as well, for now, was receding uncertainty over US monetary policy with the release of the Fed's 'dot plot' until 2019 and announcement of its QE tapering plans. In preparation for the 19th Party Congress, the government restarted its anti-pollution campaign. While this might cause a cyclical slowdown in the short term, as several industries curtail production in the coming months, we remain sanguine over the long-term direction of the economy. The big picture remains unchanged: supply-side reforms to redeploy resources to more productive areas; and financial sector discipline to restore the system's health and stability, while at the same time achieving a cleaner environment budget. Early in this quarter the government implemented a high-profile, mixed-ownership reform of state-owned enterprise (SOE) Unicom by placing stock with prominent private sector companies such as Tencent, Baidu, JD.com and Alibaba. The long-term objectives are to improve SOE efficiency, motivate talent, align shareholders' interest and improve corporate governance. A similar attempt was made in the education industry with the government relaxing and clarifying regulations to encourage private-sector investments in a bid to reduce the burden on the fiscal budget.

MSCI China completed 2017 with a remarkable series of 12 consecutive monthly gains. Market strength was underpinned by the robust underlying economic fundamentals driven by vigorous consumer spending, coupled with a healthy corporate sector. The Central Economic Work Conference, held in December, to set the economic agenda for the following year, stressed quality growth and the objective of containing financial risks – a confirmation of the targets set out by the 19th Party Congress held in October. We expect GDP growth to moderate slightly from 6.8% in 2017 to 6.7% in 2018 (in line with the government forecast), as structural transition into a service-oriented economy continues apace. The external backdrop remained positive for emerging markets in general. In December, the US passed its long-awaited tax-reform plan, lifting markets. While a third interest-rate hike was delivered by the Fed, investors still view US monetary policy as remaining 'dovish', as structural forces keep inflation at bay. Looking at high frequency economic data, China began 2018 with positive economic momentum.

As we entered 2018, Asian equity markets had a volatile first quarter. They started strongly in January, supported by a positive economic environment and weak USD, which encouraged inflows into the equity markets then a correction kicked in during February and March, as investors adjusted to a faster pace of US rate hikes and intensifying trade tensions. There were plenty of political and macro events taking place in the first quarter: firstly the US hiked its rate by 25 bps in March, which was within expectations; secondly China hosted the National People's Congress (NPC) delivering ample political changes and institutional restructuring (merger of banking and insurance regulators); and thirdly escalating trade frictions. While uncertainty may temper investor sentiment, the strong domestic demand story, healthy fiscal, trade and reserve positions of China should support the markets going forward.

The MSCI China was down 3.4% in USD terms in the second quarter following two developments: firstly, intensifying US-China trade tensions; and secondly, despite solid China economic data being announced for both March and April, May activity surprised on the downside. The market was worried the latter was caused by the ongoing financial deleveraging. In terms of sectors, the best performers were energy (because of a higher oil price), consumer staples, healthcare and utilities (due to their defensive nature during the market correction). Real estate, financials and materials were the underperformers, impacted by the market's worries on the financial deleveraging initiative. During the quarter the Fund benefited in relative terms from the underweight position in financials as well as the overweight position, and positive stock selection, in healthcare; another positive element was stock selection in industrials. In terms of contributors a Chinese hotel operator announced first-quarter 2018 EBITDA, beating consensus by 5% due to higher-than-expected margins; the stock re-rated on the back of strong growth in the company's revenue per available room.

Among detractors, a social media platform underperformed due to ongoing concerns surrounding both greater competition and CNY depreciation. The US-China trade dispute has been pressuring the Chinese equity market in June, erasing the modest recovery led by solid economic data (China's first-quarter GDP, at 6.8% YOY, remained robust and the May PMI number of 51.9% was also strong). While China has been relatively immune from the emerging markets' sell-off (caused by rising US government bond yields), the Chinese equity market was finally impacted by escalating trade tensions, recent softer-than-expected economic activity data, and concerns about the impact of the deleveraging progress on the economy. While we acknowledge the uncertainty associated with the mounting trade tensions, as it becomes a game of brinkmanship between the US and China, we think a solution is more likely than not. We have taken advantage of the recent market volatility to upgrade our portfolio to focus on those sectors and stocks where we have higher conviction. For example, we have reduced our exposure to financial companies, switching into selected technology and healthcare names, reiterating our positive view on structural growth stories in these sectors. Corporate earnings should continue to be robust in the upcoming interim reporting season. Given that economic indicators in the first half of 2018 were surprisingly strong, we expect some softness in the second half of the year due to the looming uncertainties. However, the long-term trend should remain unchanged, supported by China's healthy domestic demand.

The top three holdings contributing to performance were Tencent Holdings, Alibaba Group Holdings, Ping An Insurance Group of China and the bottom three performers were Aluminium of China, Nine Dragons Paper Holdings, Brilliance China Automotive Holdings.

GAM Star Composite Global Equity

Fund Manager: Julian Howard/Sandro Cerulli/GAM's Multi Asset Solutions Team

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 8.9% in the year to 30 June 2018, versus the MSCI AC World index, which returned 11.3% in USD terms.

Global equity markets as measured by the MSCI AC World in US dollars made good progress during the third quarter of 2017. Global growth appeared solid too, with the IMF in July predicting a healthy 3.5% increase for the whole of 2017. While US consumer sentiment and corporate profits were healthy, the US economy itself showed few signs of breaking free of the 2-2.5% range that has characterised the years since the global financial crisis. Wages in particular remain structurally mired despite steady falls in the unemployment rate. Instead, other economies picked up the slack. Europe's recovery proved broad-based and consistent, extending even to southern economies previously considered beyond redemption. Emerging markets also played a significant part, as demonstrated by high frequency industrial growth indicators such as the steel and copper price. However, or perhaps because of this, the investment community remains divided on the outlook for equities. Legitimate concerns for the US as the largest equity market of all centred on the possibility of tax reform failure and another debt ceiling crisis, while geopolitically North Korea provided the startling albeit remote spectre of outright nuclear conflict.

Quarter four, 2017 saw strong gains across global equities, with the Fund outperforming the index for the period. While most of the major markets fared well during the year, there was also considerable regional diversification in evidence. For example, the FTSE returned just under 12% but the MSCI Emerging Markets Index piled on a cool 31%. For many investors, these positive returns were surprising given perceived political risks and also the sheer age of the equity market rally, which it could be argued began back in March 2009. However, the political factor can be discounted with some confidence. The well-established Policy Uncertainty Index was in fact not especially heightened versus its 20-year average despite the newsflow out of North Korea. Without wishing to sound complacent, it should also be remembered that the media is driven by the mantra "if it bleeds it leads" and the North Korea story was always going to dominate given the two larger-than-life personalities involved. From a broader perspective too it is worth noting that we have in fact been living in an era of relative calm since the end of what Eric Hobsbawm once described as "the short 20th century". Today, there are no grand political ideas violently battling it out for supremacy.

The first four weeks of 2018 saw global equities as measured by the MSCI AC World Index in local currency terms climb by 5.8%. This, coming after the 20% gain posted for 2017, suggested price action that was becoming unsustainable. Sure enough, the market went on to correct during the 'Wage Rage' episode of early February when US hourly pay was reported to have risen by 2.8% on the previous year. Investors took fright at the prospect of higher-than-expected inflation and the tighter interest rates that would surely follow. By late February, the 10- year US Treasury yield had risen to 2.95%, further contributing to the volatility in equities. But concern soon switched to the prospect of a trade war, as the US administration applied tariffs to steel and aluminium in an apparent effort to reduce the bilateral trade deficit with China.

With the second quarter of 2018, little or no progress was seen by the equities and bonds. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. With the first half of 2018 now complete, it is clear that the 'free ride' of 2017 in which equities rallied virtually uninterrupted is firmly over. Unlike during the China scare of 2016, a brief survey of the fundamentals suggests that negative sentiment may be more justified this time around. Across Europe, Japan, Emerging Markets and Asia, economic data has become more mixed even when taking into account seasonal factors, raising questions about how sustainable corporate profitability growth really is. Earnings in America for the first quarter grew by around 25% on the previous year, a phenomenal increase that will be hard to repeat. For markets to recover from the late January sell-off, let alone make further gains, fresh 'good news' will be required. However, the global context for such improvements is becoming less clear. Equity allocations across our portfolios had already been pared back in the last year and remain appropriate. Within the asset class we maintain a core position in US stocks generally and quality stocks in particular. The latter are characterised by high earnings consistency and this allows us to 'fund' structural allocations to the

primary drivers of growth, primarily emerging markets and, to a lesser extent, technology. However, in the near term it is capital preservation assets that will play the most important role in a more uncertain environment, both in terms of limiting losses but also generating returns in the meantime.

While our assessment of the outlook has darkened somewhat compared with last year or even last quarter, it is important to note that we do not forecast a worldwide depression akin to that which followed the last significant imposition of tariffs in the early 1930s. Crucially, we will be avoiding panic-sales out of the long term, secular growth drivers mentioned, even if this means maintaining allocations vulnerable to a potentially more uncertain market environment. This approach remains sensible when considering the alternative, which would be to attempt to market-time when policy on areas of concern like trade appears to be changing daily. Dampening portfolio volatility where possible will be important but our main message to investors is that they must extend their investment horizons.

The top three holdings contributing to performance were SPDR S&P 500 UCITS ETF, Artemis Global Income Fund, GAM Emerging Markets Equity and the bottom three were Vanguard FTSE Emerging Markets UCITS, GAM Star Japan Equity, iShares Edge MSCI USA Quality Factor UCITS ETF.

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) rose 2.3% in the year to 30 June 2018, outperforming its benchmark, the MSCI Europe ex UK Net index in EUR terms, which rose 1.1%.

During the third quarter of 2017, European equity markets recorded strong performance with the Fund outperforming its benchmark. European equities outperformed global equities, with all size indices performing strongly, although large-caps underperformed their small and mid-cap peers. Company earnings have generally been well received, supported by higher GDP growth, as well as some early signs of pricing power emerging. The Fund outperformed the benchmark index during the quarter, with the positive impact from sector and country positioning, and stock selection. The outlook for European equities remains positive, with a supportive macro situation, robust earnings growth and attractive valuations relative to other regions and asset classes.

The Fund enjoyed a strong end to the year, performing well in both absolute and relative terms during December. For 2017 as a whole the Fund posted robust returns but underperformed in a relative context. Significant positive contributors to performance for December – adding more than 20 basis points (bps) to relative performance – were a housebuilder and a building materials company. The housebuilder continues to benefit from an improving housing market in Ireland, while the building materials company announced a number of deals that the market assumed to be financially and strategically accretive. There were also a number of less significant (i.e. contribution fewer than 20bps) but positive contributors to performance. There was only one significant detractor and that was an airline company, where industrial relations problems continue to weigh on the stock. The company announced that it will recognise trade unions in a number of countries where it operates, for the first time. It is difficult to ascertain the longer-term consequences of greater trade union involvement in the company's affairs, but they are unlikely to be positive.

Markets were buffeted by a range of macroeconomic and political uncertainties in March of quarter one, 2018. These included fears of an impending global trade war, anxiety about the intensifying political pressure on global technology stocks on both sides of the Atlantic as well as concerns over the downward inflection in PMIs in Continental Europe and the high valuation of US equities. Amid all the noise, however, we do not see anything that changes our view on the attractiveness of the European equity asset class, and believe that the recent decline will represent a temporary correction. The key positive contributors to relative performance for Q1 were Hexagon, Euronext, Ryanair, ASML, Societe Generale and FinecoBank. The key negative contributors to relative performance for Q1 were KPN, Paddy Power, Betfair and Inditex. Market concerns over the slowdown in eurozone/European PMIs feel overdone to us. PMIs at the beginning of the year were abnormally high and have simply declined to levels in the last month that are merely high. Current PMIs indicate that the eurozone economy is still growing at a level that is above the long-term trend and indicative of healthy expansion. We understand that in the very short-term markets trade on the 'second derivative' (change in the rate of growth) but mindful of the levels and the broader trends we see from the companies we talk to, we retain a high degree of confidence in the outlook.

Overall the Fund had modest performance in the second quarter, slightly outperforming the market/index. The negative single stock contributors were: Paddy Power Betfair, Continental and Cie Financiere Richemont. The relative underperformance of Continental is likely related to 'geopolitics' and the risks of an escalating trade war, with European automotive stocks in the crosshairs of US-China tension. We do not have a high exposure to automotive manufacturers – our only exposure being Volkswagen – with more of our exposure being towards automotive suppliers, tyres and capital goods companies. Nonetheless, we think the market's reaction is excessive and that the valuation for Volkswagen, in particular, is compelling: evidence suggests that the market for premium cars in China remains very strong; also, the company has an attractive model line-up, little US exposure, and no US-to-China export exposure, yet the stock trades on just 5x 2019 earnings. We are aware of the adage of selling cyclical stocks when the PE ratio is at its lowest – indicating that the earnings are about to fall off a cliff – but we struggle to see what is going to reduce earnings, or even earnings growth, any time soon. Continental, as a key supplier to the car industry, has also been 'hit'; while we recognise the negative sentiment, we do not think the share price reaction reflects the fundamentals, or an increasingly attractive valuation. Almost half of Continental's operating profit is made up of the car tyres segment which is very profitable. And the automotive supplies segment of Continental includes some of the fastest-growing trends in the automotive sector.

The top three holdings contributing to performance were Kingspan Group, Faurecia, LVMH Moet Hennessy, Louis Vuitton SE and the bottom three performers were Distribuidora Internacional de Alimentacion, Pandora, Bayer.

GAM Star Credit Opportunities (EUR)

Fund Manager: Anthony Smouha/Gregoire Mivelaz, ATLANTICOMNIUM SA

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) returned 0.2% in the year to 30 June 2018, versus the Barclays Euro Aggregate Corporate Total Return index in EUR terms, which gained 1.1%.

During the third quarter of 2017 the Fund posted steady positive returns as there were price gains amongst both fixed rate and floating rate bonds. During the quarter, a wide variety of holdings were bought in Euro including old callable 5.5% Royal Bank of Scotland securities, 4.75% contingent capital securities of HSBC and ING floating-rate notes based on 10-year swap rates in the mid 80% range. We continue to watch out for rises in government bond rates but the key attribute for many of our fixed rate holdings is a yield generally above 4% meaning that prices should not be significantly affected by rises in government bond yields from much lower levels. The EUR Accumulation class of the Fund increased by 2.48% over the quarter, comfortably outperforming the Barclays EUR Aggregate Corporate Total Return index, which gained 1.13%. Economic growth remains low in Europe and quantitative easing measures remain in place.

Moving on into the last quarter of 2017 we saw the 10-year German Bond yield declined marginally from 0.46% to 0.42% during the quarter and the fund posted consistently positive returns, including interest and capital gains, as there were price increases among both fixed and floating-rate bonds. During the quarter, we added to a wide range of holdings in euro, sterling and US dollars (which were hedged back to euro). In euro we added to the old Royal Bank of Scotland floating-rate notes below par and to 6.5% Rabobank perpetual bonds at a running yield of 5.3%. We added to contingent capital securities of BBVA, Banco Santander, Deutsche Bank and HSBC and we participated in the new 4.625% ASR transaction. While we do not have any exposure at the present time to Italian banks, we added to holdings in Assicurazioni Generali, the Italian Insurer. We have added to holdings in the trading company Targa. In sterling and US dollars, we also made purchases of Barclays, Lloyds Bank, Direct Line Insurance and Leucadia. While the majority of holdings are denominated in euro we also have holdings in other currencies that give as good or better returns when hedged back in euro.

Heading into 2018 the first quarter was marked by another strong earnings season for the issuers held in the portfolio. Therefore, the negative performance of the Fund during the quarter means that prices declined but credit quality did not change or actually even improved on margin. This creates opportunities, reflected by the fact that we have been very active both on the primary as well as on the secondary market. Independent of market conditions, the fund is capturing a steady income and we believe that the prices will recover once the dust has settled. During the quarter, we took advantage of favourable prices and added to our holdings in Rabobank, HSBC, Lloyds as well as other securities. Unlike previous quarters the EUR Accumulation share class declined by 0.52% over the quarter, versus the Barclays EUR Aggregate Corporate Total Return index, which lost 0.39%. The reason was a decline in prices that occurred in February and March as a result of the risk off sentiment in markets caused by credit unrelated events. We have for some time positioned the Fund in anticipation of a normalisation of interest rates, even if this takes longer than originally anticipated. Yield is a significant component of returns with a yield-to-maturity of 4.54% compared with 0.88% for the benchmark.

During the second quarter of 2018 the Fund declined despite no specific credit events. Clearly, there were concerns about political risk in Italy during the reporting period. This led to a widening of spreads on Italian government bonds, which translated into a risk-off environment, confirmed by 10-year German Bunds that actually tightened from 0.49% to 0.30% over the period. However, from an individual credit perspective there was general continuing improvement. While the market experienced distress during the quarter due to the Italian elections and geopolitical concerns, European economic activity continues to be satisfactory, while banks in general continue to improve their balance sheet strength. Yields on many of our securities have risen and we continue to believe that yields on euro denominated securities that we own at close to or above 4% remain very attractive, particularly when they concern investment grade rated securities.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the GBP Accumulation class) returned 1.6% in the year to 30 June 2018, outperforming the Barclays Sterling Aggregate Corporate Total Return index, which returned 0.4% in GBP terms.

The Fund posted good positive results over the second half of 2017 despite a marginal increase from 1.26% to 1.36% in the 10-year gilt yield. During the third quarter of 2017, we have continued to replace some of our long-dated insurance bonds with contingent capital securities of Barclays, Coventry, HSBC and Lloyds Bank where the outstanding period to interest re-fix provides yields above 5% and the duration is much shorter. The GBP Accumulation class gained 2.42% in the third quarter, comfortably outperforming the Barclays Sterling Aggregate Corporate Total Return index, which gained 0.13%.

Approaching the end of 2017 the Fund posted good positive results over the quarter as most of the securities made significant gains. During this quarter, we are still continuing to increase our holdings in contingent capital securities of Barclays, HSBC and Lloyds Bank.

However moving into 2018, a decline in Fund performance occurred due mainly to weak markets and in part due to a well-publicised Aviva preference share announcement. 2017 was a very strong year, so in January we felt prices were getting closer to fair value. Now with spreads having widened, prices have fallen and credit quality has improved. Therefore, we remain positively inclined for the remainder of the year. The GBP Accumulation share class declined -1.93% in the first quarter, versus the Barclays Sterling Aggregate Corporate Total Return index, which lost -1.53%. The fund's aim to be relatively interest rate insensitive held well.

Another decline occurred in Q2 of 2018 of 1.92% in the GBP Accumulation share class of the Fund, despite the fact that there were no specific credit events. There was a risk-off environment in May, which continued into June, and, therefore, a setback in the price of the majority of holdings. Fundamental results for our credits were credit positive, yet spreads continued to widen. This has created good opportunities for long-term investors as spreads have widened significantly above fair value and do not reflect the strong underlying credit quality of issuers in the portfolio. During the quarter, we bought the sterling issue 4.478% Quilter 2028 which has a coupon reset in 2023; we also added to a number of holdings in US dollars and Euro, which were then hedged back to sterling for names such as Julius Baer, Citadel, EFG, HSBC, Leucadia and Trafigura. The income provided by our portfolio – with its blend of fixed rate, fixed-to-floating bonds and discounted floating-rate notes – continues to provide an attractive return, as well as some potential for capital gains.

During the first half of 2018, the 10-year Gilt, yield declined from 1.35% to 1.28%. However, there are wide interest-rate spreads on our bonds, which mainly represent investment-grade companies with interest yields accruing 5%-6% per annum. Most of our long-dated securities yield over 5% and we have many highcoupon bonds with likely calls in the next few years, as well as fixed-to-floating bonds and some discounted floating-rate notes. Although we can expect rising rates due to inflation and there may be unexpected twists and turns in Brexit negotiations, hikes are likely to remain limited in absolute terms as growth remains weak and structural deflationary forces due to cost-cutting and technology remain in place. So our current high yields should continue to be beneficial when returns elsewhere remain low.

GAM Star Credit Opportunities (USD)

Fund Manager: Anthony Smouha/Gregoire Mivelaz, ATLANTICOMNIUM SA

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) fell 1.4% over the year to 30 June 2018, versus the Barclays US Aggregate Corporate Total Return index, which fell 0.8% in USD terms.

During the third quarter of 2017, the Fund benefited from robust income and capital gains while the US Treasury bond yield ended the period little changed. There were gains in all our categories of fixed-rate bonds, fixed-to-floating securities and floating-rate notes. During the quarter, we invested in a wide range of bond opportunities including 5.375% Phoenix 2027, 6.625% Leucadia 2043, contingent capital securities of Credit Suisse, HSBC, UBS and old discounted floating-rate notes of DNB Bank and Nordea Bank. Later in the quarter, we added to our holdings of 6.15% Tesco 2037 at around 105% and BNP Fortis euro denominated securities at 84% paying 200 basis points above 3 month Euribor which we hedged back to US dollars. The 10-year US treasury rate edged a fraction higher to 2.33% over the quarter and we remain focussed on the probability and expectation of higher interest rates. Over the quarter, two year interest rates increased from 1.38% to 1.48% and we would expect higher interest rates going forward. However, we do not believe that the rate of increase will be extreme and in some of the fixed-rate bond positions that we hold, a narrowing of interest spreads could continue to counteract the expected interest rate rises. Within the fund we will therefore continue to target yields of 5%, 6% or above for our fixed-rate holdings, most of which are issued by investment grade companies.

During the second half of 2017, the Fund was able to generate returns of close to 2% despite a rise in the 10-year US Treasury bond yield from 2.33% to 2.41%. There were gains in all our categories of fixed-rate bonds, fixed-to-floating rate securities and floating-rate notes. During the quarter, we invested in several new issues including the investment grade rated 5.375% Citadel 2023, and 4.25% Standard Life Aberdeen 2048 which has an interest reset in 2028. We also participated in the new contingent capital securities of 6.125% BBVA and 5.125% BNP Paribas which have interest resets in 2027. In the secondary market a wide variety of securities were purchased including some old floating-rate notes of Australia New Zealand bank, BNP, Den Norske Bank, Standard Chartered Bank and Westpac Bank, which all traded in the low to mid 80% range. Individual credits were also bought including the new issue for the petrol distributor 5.125% Puma 2024. As interest rates have risen in the US we continue to find a variety of attractively priced securities, which we are able to buy. The USD Accumulation class gained 1.9% over the quarter, versus the Barclays US Aggregate Corporate Total Return index, which gained 1.2%.

Entering the first quarter of 2018 market sentiment has been soft since the spike in volatility and the equity market price correction at the beginning of February. The movement was healthy but created some spill-over effects to other markets, as indicated by the negative price movements of securities held in the portfolio. The quarter was marked by another strong earnings season for the issuers held in the portfolio. Therefore, the negative performance of the fund during the quarter means that prices declined but credit quality did not change or actually even improved on margin. This creates opportunities, reflected by the fact that we have been very active both on the primary as well as secondary market. We took advantage of favourable prices and added to many securities as well as participating in attractive new issues.

Market sentiment was still extremely weak over the second quarter of 2018 despite the underlining quality of the credits in the portfolio having generally improved and 10-year US Treasury rates only rising 12 bps to 2.86% during the period. This has created good opportunities for long-term investors as spreads have widened significantly above fair value and do not reflect the strong underlying credit quality of issuers in the portfolio.

The income offered by our portfolio continues to provide an attractive return and the fund is well positioned for an environment of somewhat higher rates. This is thanks to owning 50% in fixed-to-floater bonds and almost 15% in discounted floating rate notes, as well as a number of high-coupon securities with relatively short issues call dates. The 10-year US treasury rate increased again from 2.74% to 2.86% during the quarter and while we remain focused on potentially higher short term and long term interest rates going forward we do not expect the 10-year interest rate to rise much beyond 3%. This means that many of the fixed interest rate bonds that we hold and that yield well over 5% are relatively well protected. In addition, we own many fixed-to-floating securities where the interest rate will be refixed within the next few years or the bonds can be called for redemption. Finally, we have holdings in discounted floating rate notes, which benefit from rising interest rates and can achieve price increases. We will continue to maintain a good balance between fixed-rate, fixed to floating and floating rate securities in order to achieve a steady high income and capital gains.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the GBP Accumulation class) rose 1.5% over the year to 30 June 2018, compared to its benchmark, the Lipper Global Mixed Asset GBP Conservative, which rose 1.4% in GBP terms.

Economic data for the third quarter of 2017 provided some validation for the strong performance of equities for the year to date. Amongst the plethora of available data releases, standout figures included the Purchasing Managers Index for both Germany and France, which showed strong growth in European manufacturing, and Japan's longest unbroken growth streak in more than a decade. With an improving environment, global corporates are posting firm sales and earnings growth that are acting as a tailwind for continued upward momentum in global equity indices. There were several events that could have led to a material pullback in markets after such a long period of gains, amongst them hurricanes in the Caribbean and increasingly provocative sparring between the United States and North Korea; however, investors remained resilient. Global bonds had a less impressive quarter as inflation figures were higher than expected for key markets such as the UK. With higher inflation comes the likelihood of interest-rate increases as central banks turn more 'hawkish'. Within the portfolio, notable performance came from the recent addition of the RWC Global Emerging Markets fund. Emerging market (EM) equities are a key allocation as they will benefit from a sustained global uptick. For instance, figures released during September confirmed that EM exports are growing at their fastest pace in over six years.

Moving into the final quarter of 2017, despite strong economic data, including an annualised growth rate of 2.8% in Germany, the strategy had a lacklustre month in terms of performance. After several months of positive gains, it was perhaps inevitable that investors would at some stage take an opportunity to assess current market levels before adding to 'risk-on' positions. There were several factors through the month which could justify investor reticence: political worries in Germany after Chancellor Angela Merkel struggled to form a coalition; a purge of princes in Saudi Arabia; continued wrangles within the Conservative Party, in the UK; and doubt over President Trump's ability to pass tax reform.

Investors started the first quarter of 2018, in an exuberant mood with most global equity indices firmly in positive territory in the first few weeks of January. The economic data supporting this feeling of optimism included US and EU manufacturing surveys at the highest levels in ten years, and Japan recording its longest growth spurt in 28 years. However, this level of synchronised growth had led to questions on whether inflation could increase with an overheating economic backdrop. Gains that had built up during the start of the quarter quickly evaporated in the quarter following the release of US wage figures which pointed to a build-up in inflationary pressures. Markets were concerned that this could lead the US Federal Reserve to increase the rate at which it raises interest rates. As has been the case in recent years, it did not take long for equity markets to recover their composure.

Moving on into the second quarter of 2018 saw little progress in equities and bonds, as measured by the MSCI AC World Index USD and the Barclays US Aggregate Bond Index, but this masked significant underlying moves during the period. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also saw-sawed, with yields initially rising before falling away again as investors fled to the asset class amid a less certain economic and political outlook. Currency movements – specifically the rising US dollar – were more notable, profoundly impacting emerging market economies and related capital markets. This was evident in the performance of the emerging market equity funds held within the strategy – the GAM Multistock Emerging Market Equity fund saw a decline during June.

While our assessment of the outlook has become less optimistic than it was at the beginning of 2018, it is important to clarify that we do not forecast asset-price falls akin to that which followed the credit bust 10 years ago. As disappointing as it is to see negative performance for the month of June, it is important to note that global economic growth remains positive and most business confidence surveys in developed economies are pointing towards a continuation of this trend.

The top three holdings contributing to performance were CC Japan Alpha Fund, JP Morgan Japan Fund and JPM Multi-Asset Macro Opportunities Fund. The bottom three performers were GAM Star Absolute Return Macro, Active Global High Income Bond Fund and River & Mercantile UK Dynamic Equity.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Institutional share class) fell 12.2% over the year to 30 June 2018, compared to its benchmark, the Average USD 1Month Deposit Rate which rose 1.5%.

The biggest losses for the third quarter to 30 September 2017, came from a long position in the Swedish and Norwegian currencies. Then after a difficult couple of months the Norwegian krone strengthened, towards the end of 2017 making around 120 basis points (bps) for the fund.

Long positions in the Mexican peso versus South Africa rand and the euro contributed to performance for the start of 2018. However, long positions in the Swedish krone, primarily versus the euro, detracted from performance.

A tactical long euro versus short US dollar trade was closed ahead of the ECB's meeting. We trimmed our long euro versus short sterling currency position. Trade and political risks are higher than usual and are likely to remain a headwind for markets. Aside from the ongoing trade tensions, the political environments in Germany, Italy and the UK are likely to remain a focus for investors in Europe. Unless we see some easing of tensions, risk assets and high-beta currencies are likely to remain under pressure in the coming weeks.

There were no other purchases and sales during the period.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Institutional share class) fell 0.7% over the year 30 June 2018, while the FTSE World Government Bond Index rose 1.9% over the same period. Performance is net of fees.

Interest rate strategies were the primary detractor of performance over the review period, with the portfolio's underweight exposure to higher quality issuers in Europe and Japanese government debt proving the most costly. Interest-rate strategies in the emerging world made a small positive contribution to performance, while foreign exchange management detracted from investment returns.

At the end of the review period, the Fund had a modified duration of 5.0 versus 7.8 years for the benchmark. Average credit quality for both the fund at its benchmark was AAA.

GAM Star Dynamic Growth

Fund Manager: Charles Hepworth/James McDaid

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the GBP Institutional Accumulation class) rose 8.7% over the year to 30 June 2018, compared to its benchmark, the Lipper Global Mixed Asset GBP Conservative, which rose 4.8% in GBP terms.

Economic data for the third quarter of 2017 provided some validation for the strong performance of equities for the year to date. Amongst the plethora of available data releases, standout figures included the Purchasing Managers Index for both Germany and France, which showed strong growth in European manufacturing, and Japan's longest unbroken growth streak in more than a decade. With an improving environment, global corporates are posting firm sales and earnings growth that are acting as a tailwind for continued upward momentum in global equity indices. There were several events that could have led to a material pullback in markets after such a long period of gains, amongst them hurricanes in the Caribbean and increasingly provocative sparring between the United States and North Korea; however, investors remained resilient. Global bonds had a less impressive quarter as inflation figures were higher than expected for key markets such as the UK. With higher inflation comes the likelihood of interest-rate increases as central banks turn more 'hawkish'. Within the portfolio, notable performance came from the recent addition of the RWC Global Emerging Markets fund. Emerging market (EM) equities are a key allocation as they will benefit from a sustained global uptick. For instance, figures released during September confirmed that EM exports are growing at their fastest pace in over six years.

Moving into the final quarter of 2017, despite strong economic data, including an annualised growth rate of 2.8% in Germany, the strategy had a lacklustre month in terms of performance. After several months of positive gains, it was perhaps inevitable that investors would at some stage take an opportunity to assess current market levels before adding to 'risk-on' positions. There were several factors through the month which could justify investor reticence: political worries in Germany after Chancellor Angela Merkel struggled to form a coalition; a purge of princes in Saudi Arabia; continued wrangles within the Conservative Party, in the UK; and doubt over President Trump's ability to pass tax reform.

Investors started the first quarter of 2018, in an exuberant mood with most global equity indices firmly in positive territory in the first few weeks of January. The economic data supporting this feeling of optimism included US and EU manufacturing surveys at the highest levels in ten years, and Japan recording its longest growth spurt in 28 years. However, this level of synchronised growth had led to questions on whether inflation could increase with an overheating economic backdrop. Gains that had built up during the start of the quarter quickly evaporated in the quarter following the release of US wage figures which pointed to a build-up in inflationary pressures. Markets were concerned that this could lead the US Federal Reserve to increase the rate at which it raises interest rates. As has been the case in recent years, it did not take long for equity markets to recover their composure.

Moving on into the second quarter of 2018 saw little progress in equities and bonds, as measured by the MSCI AC World Index USD and the Barclays US Aggregate Bond Index, but this masked significant underlying moves during the period. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also saw-sawed, with yields initially rising before falling away again as investors fled to the asset class amid a less certain economic and political outlook. Currency movements – specifically the rising US dollar – were more notable, profoundly impacting emerging market economies and related capital markets. This was evident in the performance of the emerging market equity funds held within the strategy – the GAM Multistock Emerging Market Equity fund saw a decline during June.

While our assessment of the outlook has become less optimistic than it was at the beginning of 2018, it is important to clarify that we do not forecast asset-price falls akin to that which followed the credit bust 10 years ago. As disappointing as it is to see negative performance for the month of June, it is important to note that global economic growth remains positive and most business confidence surveys in developed economies are pointing towards a continuation of this trend.

The top three holdings contributing to performance were CC Japan Alpha Fund, JP Morgan fund ICVC – Japan Fund and GAM Star Technology. The bottom three performers were River & Mercantile UK Dynamic Equity, Alken Fund – Continental Europe and Hermes Europe ex-UK Equity Fund.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 8.0% over the year to 30 June 2018, underperforming its benchmark, the MSCI Emerging Markets index which rose 8.6% in USD terms.

In the third quarter of 2017, the MSCI Emerging Markets Index was up 7.0%, outperforming developed markets (DM) by 2.6%. In July all emerging markets (EM) delivered positive returns. China's economic data beat expectations. The US dollar weakened and commodities rallied. Brazil (+11%) benefited from the labour-reform approval and the 100bps SELIC rate cut (with indications of further cuts). India (+7%) was driven by smooth GST implementation, good monsoon progress and rate-cut expectations. In August EM equities maintained their run of outperformance (+2% versus DM -0.1%) bringing the year-to-date to 26% (versus 12% DM). September was marked by higher US bond yields, a recovering US dollar, and consequently weaker EM currencies and declining metal prices. Still, the best performers were carry trade markets, such as Russia (+4%) and Brazil (+4%). The worst were Greece (-14%), Turkey (-10%) and South Africa (-7%). The fund's top contributors in Q3 included Brazil (International Meal Alimentacao, apparel company Guararapes Confecoes and airline company Azul); Zimbabwe (telecoms business Econet Wireless); China (Phoenix New Media); and Russia (Sberbank and aluminium company Rusal). The main detractors in quarter 3 were largely in Korea and included Finetex Ene, Hyundai Motor and Modetour. In spite of a shallow correction at the beginning of September, we believe that the momentum for EM equities remains strong. In line with this we are moving the portfolio towards a cautious pro-cyclical stance, with key overweight positions in Russia, Mexico and uncorrelated growth VARP countries (Vietnam, Argentina, Romania and Pakistan).

The year 2017 turned out to be a positive one for the Fund, as global trade growth returned, and global emerging markets (EM) and Asian earnings rose to 22% EPS growth. This was particularly impressive, given that 2017 performance was achieved from a low base in 2016. The prime driver was global liquidity, which remained consistently positive on both domestic and international flows. 2017 showed us the widest competitor dispersion of return in the last 10 years. It was a year when the need for top-down and portfolio construction overlays was greatest. This was our key differentiator, which allowed our bottom-up alpha generation to operate unhindered. This was doubly important when technology and China drove the vast part of the EM return profile through the year. At the beginning of 2017, we mentioned that our strong, top-down, risk management and portfolio construction tools would be crucial. This is because we correctly predicted heavy liquidity flows to EM equities, which historically have led to a few striking changes occurring to the portfolio. This year was no exception. The portfolio's volatility declined remarkably, as did its tracking error; its Sharpe ratio rallied aggressively and its dispersion of returns to competition rose remarkably. In the last quarter of 2017 we added to the materials sector on valuation and supply/demand grounds, and to the frontier markets, particularly Pakistan and also Ukraine; we rotated some Indian exposure to higher-quality secondary growth stocks; and we added to China A-shares. Our regional asset allocation focus in 2018 will be an underweight exposure to Asia. This will include a slightly underweight position in China. We will have an overweight exposure to the EMEA and Latin America regions, particularly to Russia, Brazil and Mexico, at a country level. We will maintain our exposure to the 'VARP' countries of Vietnam, Argentina, Romania and Pakistan.

The first quarter of 2018 was an eventful quarter as volatility returned to global markets. Equities rallied sharply in January, helped by strong Asian manufacturing data, as well as US tax reform. Investors were keen to add risk to emerging markets, which were supported by a further weakening in the US dollar. Emerging market assets were also impacted by growing fears of protectionism, as the US government announced tariffs on a wide range of Chinese goods. Initially, these measures were limited to products such as solar panels and washing machines. However, the range of affected industries then increased to include both steel and aluminium. As quarter end approached, the growing threat of a US-China trade war increasingly weighed on sentiment.

The return of volatility this year has seen greater dispersion in emerging markets assets across FX, rates, credit and equity markets. Our fundamental managers are finding better value as a result, and price dislocations are providing better opportunities for our more short term managers. Political uncertainty is set to remain a key theme for the rest of the year with elections in Mexico, Brazil and mid-terms in the US, which will create favourable conditions to generate alpha. Political uncertainty is set to remain a key theme for the rest of the year with elections in Mexico, Brazil and mid-terms in the US, which will create favourable conditions to generate alpha.

The top three holdings contributing to performance were Econet Wireless Zimbabwe, Phoenix New Media Ltd, Guararapes Confecoes. The bottom three performers were Summit Ascent Holdings, Itau Unibanco Holding, Finetex EnE.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) fell 0.9% over the year to 30 June 2018, underperforming its benchmark, the 3 Month Libor in USD, which rose 1.7%.

After rising in July and August 2017 the JPMorgan's GBI-EM Global Diversified index of local currency debt fell by 0.3% in September, its first monthly decline of the year, following hawkish comments from the US Federal Reserve chair, Janet Yellen. Treasury bond yields rose as the probability increased of an interest rate hike in December; the US dollar gained against other developed market currencies for the first time since February. Within emerging markets, there was a wide dispersion in performance: while Turkey and South Africa – traditionally high-beta plays on the asset class, given their fiscal and external vulnerabilities – fell heavily, Russia and Colombia edged higher on the back of stronger oil prices. The Fund notched up positive returns, despite its long bias and September's overall decline in emerging markets.

Local emerging market debt rallied into the end of 2017, with investor sentiment buoyed by tax reform approval in the US, higher commodity prices and a weaker US dollar. There was a wide dispersion in December returns, however: South Africa surged by 16.1% after market-favourite Cyril Ramaphosa won the ANC's leadership contest, while Mexico slumped by 6.2%. Nervousness surrounding trade negotiations with the US as well as next year's presidential elections exacted a heavy toll on local assets amid limited year-end liquidity.

This dispersion in returns was reflected in the performance of the strategy. Although we were overweight the South African rand, which was beneficial, gains were more than offset by a large structural underweight in the Turkish lira – which rallied sharply on robust risk appetite – and a new position anticipating lower yields in Mexico. Elsewhere, long positions in the Russian rouble and the Colombian peso were both positive, reflecting stronger oil prices. Funding long EM FX positions out of non-US dollars, including the Canadian and Australian dollars, detracted given the dollar's general weakness on the year end.

Local currency emerging market debt performed well in the first quarter to 31 March 2018: JPMorgan's benchmark GBI EM Global Diversified index rose by 1.0%, despite growing concerns about global trade wars and a technology-led sell-off in equity markets. A range-bound US dollar and lower US Treasury yields broadly supported EM FX. Firm oil prices helped Colombia outperform but proved insufficient to cushion the Russian rouble from a fresh round of diplomatic sanctions. Mexico benefited from renewed hopes that NAFTA will be renegotiated rather than rescinded. South Africa also outperformed, with Moody's choosing to leave the country's credit rating unchanged and with a stable outlook.

In June, a relentlessly strong dollar and concerns about a trade war between the US and China weighed on emerging market assets. JPMorgan's benchmark GBI EM Global Diversified index sank by 2.9%, for a second-quarter to 30 June 2018 loss of 10.4%. Argentina's travails continued, its sub-index plummeting by nearly 14% on the month as the central bank struggled to contain pressure on the currency. Other high-yielding countries also struggled, however, with Indonesia, South Africa and Turkey all dropping more than 6% Mexico was the month's stellar performer, rising over 3% in the run-up to elections on July 1. Peru was the only other country in the index to end the month in positive territory.

Against the strong dollar backdrop, we benefited from funding our long emerging market positions out of alternative currencies, such as the Australian and Canadian dollars. A long-standing short in the Turkish lira ended broadly flat on the month after some early weakness reversed following a strong election result for President Erdogan. We have not changed our negative view on the country's prospects, however: we remain sceptical about the government's bias towards strong growth, which could weigh on an already-large current account deficit, and the central bank's ability to fight against double-digit inflation. Also performing well were long positions in Mexico, via the peso and interest-rate swaps. Performance contributors included long Brazil rates, short Australian dollar and short Canadian dollar. Detractors included long Argentina hard currency bond, long Argentina local currency bond, and long South Africa local currency.

There's no denying that it has been a frustrating few months: despite all the factors supporting emerging markets-strong global growth; emerging markets economies that have already adjusted and where growth prospects are improving; and attractive valuations- nothing, it seems, can trump a stronger US dollar. Thanks to the product's flexibility, we have been able to guard against this by partially funding our long EM currency positions out of alternative currencies – but it is a headwind for the asset class, and one that needs to subside for investors to refocus on its positive fundamentals. We think the dollar should trade sideways from here: the interest-rate differential rationale should be well-priced by now, while relative economic surprise indices have recently moved in favour of Europe. If we are right, we would expect emerging market assets to stabilise and recover, given the attractive valuations on offer and lighter positioning by investors.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) gained 5.6% over the year to 30 June 2018, outperforming its benchmark, the MSCI Europe Net Index, which rose 2.8% in EUR terms.

During the third quarter of 2017, European equity markets recorded strong performance with the Fund outperforming its benchmark. European equities outperformed global equities, with all size indices performing strongly, although large-caps underperformed their small and mid-cap peers. Company earnings have generally been well received, supported by higher GDP growth, as well as some early signs of pricing power emerging. The Fund outperformed the benchmark index during the quarter, with the positive impact from sector and country positioning, and stock selection. The outlook for European equities remains positive, with a supportive macro situation, robust earnings growth and attractive valuations relative to other regions and asset classes.

The Fund enjoyed a strong end to the year, performing well in both absolute and relative terms during December. For 2017 as a whole the Fund posted robust returns but underperformed in a relative context. Significant positive contributors to performance for December – adding more than 20 basis points (bps) to relative performance – were a housebuilder and a building materials company. The housebuilder continues to benefit from an improving housing market in Ireland, while the building materials company announced a number of deals that the market assumed to be financially and strategically accretive. There were also a number of less significant (i.e. contribution fewer than 20bps) but positive contributors to performance. There was only one significant detractor and that was an airline company, where industrial relations problems continue to weigh on the stock. The company announced that it will recognise trade unions in a number of countries where it operates, for the first time. It is difficult to ascertain the longer-term consequences of greater trade union involvement in the company's affairs, but they are unlikely to be positive.

Markets were buffeted by a range of macroeconomic and political uncertainties in March of quarter 1, 2018. These included fears of an impending global trade war, anxiety about the intensifying political pressure on global technology stocks on both sides of the Atlantic as well as concerns over the downward inflection in PMIs in Continental Europe and the high valuation of US equities. Amid all the noise, however, we do not see anything that changes our view on the attractiveness of the European equity asset class, and believe that the recent decline will represent a temporary correction. The key positive contributors to relative performance for Q1 were Hexagon, Euronext, Ryanair, ASML, Societe General and FincoBank. The key negative contributors to relative performance for Q1 were KPN, Paddy Power, Betfair and Inditex. Market concerns over the slowdown in eurozone/European PMIs feel overdone to us. PMIs at the beginning of the year were abnormally high and have simply declined to levels in the last month that are merely high. Current PMIs indicate that the eurozone economy is still growing at a level that is above the long-term trend and indicative of healthy expansion. We understand that in the very short-term markets trade on the 'second derivative' (change in the rate of growth) but mindful of the levels and the broader trends we see from the companies we talk to, we retain a high degree of confidence in the outlook.

Overall the Fund had modest performance in the second quarter, slightly outperforming the market/index. The negative single stock contributors were: Paddy Power Betfair, Continental and Richemont Cie Financiere. The relative underperformance of Continental is likely related to 'geopolitics' and the risks of an escalating trade war, with European automotive stocks in the crosshairs of US-China tension. We do not have a high exposure to automotive manufacturers – our only exposure being Volkswagen – with more of our exposure being towards automotive suppliers, tyres and capital goods companies. Nonetheless, we think the market's reaction is excessive and that the valuation for Volkswagen, in particular, is compelling: evidence suggests that the market for premium cars in China remains very strong; also, the company has an attractive model line-up, little US exposure, and no US-to-China export exposure, yet the stock trades on just 5x 2019 earnings. We are aware of the adage of selling cyclical stocks when the PE ratio is at its lowest – indicating that the earnings are about to fall off a cliff – but we struggle to see what is going to reduce earnings, or even earnings growth, any time soon. Continental, as a key supplier to the car industry, has also been 'hit'; while we recognise the negative sentiment, we do not think the share price reaction reflects the fundamentals, or an increasingly attractive valuation. Almost half of Continental's operating profit is made up of the car tyres segment which is very profitable. And the automotive supplies segment of Continental includes some of the fastest-growing trends in the automotive sector.

The top three holdings contributing to performance were Kingspan Group, Faurecia and Rio Tinto. The bottom three performers were Distribuidora Internacional de Alimentacion, Bayer and Ryanair Holdings.

GAM Star Flexible Global Portfolio

Fund Manager: Julian Howard/GAM's Multi Asset Solutions Team

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) rose 1.2% over the year to 30 June 2018, compared to its benchmark, the Lipper Global Mixed Asset Flexible Index, which rose 0.4% in EUR terms.

Global equity markets as measured by the MSCI AC World in US dollars made good progress during the third quarter of 2017. Global growth appeared solid too, with the IMF in July predicting a healthy 3.5% increase for the whole of 2017. While US consumer sentiment and corporate profits were healthy, the US economy itself showed few signs of breaking free of the 2-2.5% range that has characterised the years since the global financial crisis.

2017 saw strong gains across global equities, with the MSCI AC World Index up just over 20% in local currency terms. While most of the major markets fared well during the year, there was also considerable regional diversification in evidence. For example, the FTSE returned just under 12% but the MSCI Emerging Markets Index piled on a cool 31%. For many investors, these positive returns were surprising given perceived political risks and also the sheer age of the equity market rally, which it could be argued began back in March 2009. However, the political factor can be discounted with some confidence. The well-established Policy Uncertainty Index was in fact not especially heightened versus its 20-year average despite the newsflow out of North Korea. Without wishing to sound complacent, it should also be remembered that the media is driven by the mantra "if it bleeds it leads" and the North Korea story was always going to dominate given the two larger-than-life personalities involved. From a broader perspective too it is worth noting that we have in fact been living in an era of relative calm since the end of what Eric Hobsbawm once described as "the short 20th century". Today, there are no grand political ideas violently battling it out for supremacy.

The first four weeks of 2018 saw global equities as measured by the MSCI AC World Index in local currency terms climb by 5.8%. This, coming after the 20% gain posted for 2017, suggested price action that was becoming unsustainable. Sure enough, the market went on to correct during the 'Wage Rage' episode of early February when US hourly pay was reported to have risen by 2.8% on the previous year. Investors took fright at the prospect of higher-than-expected inflation and the tighter interest rates that would surely follow. By late February, the 10- year US Treasury yield had risen to 2.95%, further contributing to the volatility in equities. But concern soon switched to the prospect of a trade war, as the US administration applied tariffs to steel and aluminium in an apparent effort to reduce the bilateral trade deficit with China.

The second quarter of the year saw little progress in equities and bonds, as measured by the MSCI AC World Index USD and the Barclays US Aggregate Bond Index, though this masked significant underlying moves during the period. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also see-sawed, with yields at first rising before falling away again as investors fled to the asset class amid a less certain economic and political outlook. Currency movements – specifically the rising US dollar – were more notable, profoundly impacting emerging market economies and related capital markets. With the first half of 2018 now complete, it is clear that the 'free ride' of 2017 in which equities rallied virtually uninterrupted is firmly over. Unlike during the China scare of 2016, a brief survey of the fundamentals suggests that negative sentiment may be more justified this time around. Across Europe, Japan, Emerging Markets and Asia, economic data has become more mixed even when taking into account seasonal factors, raising questions about how sustainable corporate profitability growth really is. Earnings in America for the first quarter grew by around 25% on the previous year, a phenomenal increase that will be hard to repeat. For markets to recover from the late January sell-off, let alone make further gains, fresh 'good news' will be required. However, the global context for such improvements is becoming less clear.

While our assessment of the outlook has darkened somewhat compared with last year or even last quarter, it is important to note that we do not forecast a worldwide depression akin to that which followed the last significant imposition of tariffs in the early 1930s. Crucially, we will be avoiding panic-sales out of the long term, secular growth drivers mentioned, even if this means maintaining allocations vulnerable to a potentially more uncertain market environment. This approach remains sensible when considering the alternative, which would be to attempt to market-time when policy on areas of concern like trade appears to be changing daily. Dampening portfolio volatility where possible will be important but our main message to investors is that they must extend their investment horizons.

The top three holdings contributing to performance were iShares Core S&P 500 UCITS ETF, Artemis Global Income Fund and GAM Star (Lux) European Alpha. The bottom three performers were GAM Star Global Rates, Legg Mason Western Asset Global Core Plus Bond Fund and GAM Total Return.

Fund Manager: GAMCO Asset Management Inc.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 11.4% over the year to 30 June 2018, compared to its benchmark, the S&P 500 index, which rose 14.4% in USD terms.

The US stock market advanced to record highs in September and the third quarter of 2017 as investors stayed focused on rising corporate earnings and the prospects for lower taxes and regulatory reform. The overall value of global deal activity slowed about 5% year-over-year during the third quarter as CEOs pressed the pause button on transformative mega deals pending clarification of US tax policy and Brexit. The USD 30 billion United Technologies avionics deal to acquire Rockwell Collins was a standout.

The US stock market powered to all-time highs in December to wrap up 12 consecutive monthly gains with a strong quarter and an astonishing year. The broad based 2017 advance in equities was driven by rising confidence in capitalism and the US, as well as the prospect of tax cut legislation, ongoing financial deregulation and other reforms, and rising corporate earnings and sales. Worldwide merger and acquisition activity set a positive tone for stocks as the pro-business Washington outlook raised both consumer and investor confidence.

The US equity market extended its strong gains into the beginning of quarter 1, 2018 with record high but had a long overdue correction of 10% in early February as a period of historically low S&P 500 volatility abruptly ended with a derivatives-driven three-day spike in the CBOE's Volatility Index from 13 to 50. The US equity market closed high as corporate earnings continued to post strong first-quarter gains but in aggregate, investors have so far been unrewarded with higher prices. The US economy is keeping the job market tight and both wages and inflation are starting to rise.

The US stock market closed higher for June and the second quarter. Rising volatility, part of what we call Wall Street's 'old normal', reflected uncertainty over the eventual outcome of the aggressive trade actions taken by the Trump administration aimed at lowering the protectionist barriers of other countries. A relatively strong economy continues to position US equities in the global sweet spot versus non-US stocks. The Federal Reserve is signalling higher rates ahead and this is keeping the dollar strong, emerging markets weak, and inflation in focus. Migration-related political risks in Germany are stress testing European unity. Second quarter earnings reports will start soon and are expected to rise in line with first quarter gains and to fuel deals, capex, dividends and share buybacks. Global merger and acquisition activity set a record high in the first half of 2018, as the value of announced deals spiked to a new high of \$2.5 trillion year to date.

We continue to analyse major demographic trends in the growing world population. US millennial and baby boomer preferences are of high interest. However, Generation Z is comprised of 1.9 billion people born between 1995 and 2009 and is a larger group than the Millennials born between 1980 and 1994. By 2020, Gen Z consumers are projected by Booz Co to represent about 40% of the markets in the US, Europe, China, India, Russia and Brazil. There will be lots of fundamental investment dynamics ahead and rising deal activity. The US economy remains upbeat and as always, we are watching world economic and political developments, as they may impact financial markets and opportunities.

The top three holdings contributing to performance were Navistar International, Sony and Twenty-First Century Fox. The bottom three performers were EW Scripps Co, Diebold and Grupo Televisa Sa.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 4.4% over the year to 30 June 2018, compared to its benchmark, the MSCI World Index, which rose 11.7% in USD terms.

Supported by earnings growth across major regions, accelerating business activity and an improving economic backdrop, global equity markets ended the third quarter of 2017 higher. As markets continue to advance, we believe it is important to reiterate our view that investors should exercise caution and selectivity due to rising risks associated with elevated complacency; valuations across most markets that remain at or somewhat above fair value; and the inflection in global monetary policy to less accommodative conditions. We believe these risk factors reinforce the need for an active, fundamentals-based approach, as they will be critical to manage. The Fund delivered positive absolute returns, but underperformed the MSCI World Index during the third quarter.

Global equities rose over the fourth quarter and the full year as robust equity performance was seen across many global markets. At the same time, strong returns have been amid an environment of low volatility, particularly in the US, with the combination of the two having reached historic levels. For example, the S&P 500 posted gains each month of 2017 for the first time in its long history. Though certain major economies continue to move through a later-cycle expansion, investors should temper expectations as full valuations and investor complacency add a sense of market vulnerability. The Fund delivered strong absolute returns during the fourth quarter and outperformed the MSCI World Index. Equity selection aided relative returns and drove outperformance. Sector positioning challenged relative returns.

2018 started with a bang: January was a remarkably strong month for global equities, whereas the chill winds of February brought the first noticeable market correction since 2011. Early in the month a fall of over 5% in stock market indices on a single day, beginning in the US, was the first slide in excess of 3% in more than 400 trading days – the longest such record since the 1930s. The Fund returned a negative performance for the quarter.

Throughout quarter two of 2018, the US dollar extended its recent strength against most major trading partners. The European Central Bank is to wind down its quantitative tightening policy in the last quarter of 2018. There was an escalation in 'trade war' fears. Emerging markets' currencies and stock markets underperformed. However, markets have caught up with central banks' thinking on the need for higher short-term rates and the global growth environment remains benign. Most emerging markets are no longer dependent on high levels of USD external debt and foreign capital inflows and can generate their own growth. In Europe, a slowdown in growth has recently caused significant underperformance of cyclically-exposed sectors. It now seems a good time to selectively increase weightings to some of these holdings.

We had a relatively active month in terms of new purchases last month and had three new additions to the portfolio, two of which are discussed below. We also sold out of our very long term holding in CK Hutchison Holdings, the Hong Kong based conglomerate, and also reduced our holdings in both Sumitomo Mitsui Financial Group (in Japan) and Royal Dutch Shell. We initiated a position in Synchrony Financial, the old GE Capital credit card business. The company focuses on store cards, where it is the provider for a large number of partners. The lender has excellent technology, a long track record of managing credit risk effectively, and considerable excess capital; it has both high returns and a very low cost-to-income ratio. The shares are deeply undervalued, trading on a multiple of around 7 times 2020 estimated earnings. Auto Trader Group, the UK and Irish based car marketplace, is dominant in its home markets. It has plans to grow in adjacencies within the UK car market, such as helping used-car dealers offer financing to buyers. Auto Trader Group also wants to grow its share of the new car market in the UK and Ireland. The business model is highly cash generative and the bulk of cash flow from operations is used to buy back shares. The shares trade around 15 times 2020 forecast earnings.

The top three holdings contributing to performance were Dollar General, Mastercard and Autozone. The bottom three performers were ING Groep, Allergan and BNP Paribas.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Institutional Accumulation class) fell 7.5% over the year to 30 June 2018, compared to its benchmark, the 3 month LIBOR in USD, which rose 1.7%.

The start of the third quarter of 2017 saw a continuation of an environment of solid growth and low inflation. With the exception of the UK, G4 central bankers lowered their inflation forecasts and continued to debate the length of time required for inflation to return to target. Political developments, North Korean tensions and headlines out of Washington were more of a focus for markets during August than economic data. Economic reports were generally encouraging and continued to point towards diminishing spare capacity. In the UK, this point was highlighted by Mr Saunders of the Bank of England's MPC. He argued that evidence suggests the output gap in the UK has likely closed and that "our foot no longer needs to be quite so firmly on the accelerator...". Money was made from currency during August but interest rate positions were a drag. Whilst economic data remain supportive we believe the risks are biased towards higher rates. Fixed income markets came under pressure during September but markets are still only pricing modest rate rises from the major central banks over the next two years.

October saw further upward revisions to global GDP which, for the third quarter, is expected to be up 3.4% versus a year earlier. This is around 1% above potential and goes some way to explaining why some of the major central banks have started to shift their monetary stance. During October, developed fixed income markets saw relatively modest moves despite the ECB tapering their QE program further. Chinese credit tightening and higher commodity prices may take the edge off growth in the months ahead but given the robust starting point this is unlikely to unduly trouble markets. Recent data remain solid with the November global manufacturing output Purchasing Manager's Index rising to its highest level in almost seven years. There is also increasing evidence that capital spending globally is gaining momentum. In addition, the policy backdrop remains hugely supportive despite moves by the Fed and other central banks to begin the process of winding back QE. The strategy lost money in December to end a difficult fourth quarter. To provide some context, currency positions had weighed on performance during October and November while interest rate positions cost during December.

Both currency and fixed income contributed to returns during January 2018. Global data have remained upbeat, risk has continued to perform well and government bond yields have started to rise. As labour markets continue to tighten and capacity utilisation extends, we expect inflationary pressures to emerge, especially in developed market economies where economic recoveries are at an advanced stage. Fixed income contributed to returns during February while currency was a drag. By the end of the quarter, a lot of good news appeared to be in the price of many risk assets, especially now that the Trump tax plans have been digested.

Both currency and fixed income detracted from performance during April. Italian politics dominated May. The prospective coalition government mooted issuing short-term debt, while President Mattarella vetoed its proposed finance minister. European equities and the euro fell. Italian bond yields widened, while German yields declined. However, inflation in Germany and the euro area rose. Italian concerns pressurised European credit and emerging-market fixed income. Trade tensions, European politics and a hawkish Federal Reserve weighed on risk assets during June. Against such a backdrop, emerging market equities came under the most pressure, down over 4% on the month. Emerging market bonds were also generally weaker. A more dovish than expected European Central Bank (ECB) provided support for European fixed income but was not enough to help European equities, which again underperformed the US. Despite the headline risks, US treasuries were broadly flat on the month. Within currency markets, higher interest rates in Turkey and Mexico left them as the top performing currencies within the "expanded majors". Norway was also a strong performer as the Norges Bank signaled that it was still on course to raise interest rates in September. Global risks were felt most notably in Argentina, South Africa and South Korea, as these currencies were among the worst performers during the month.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) fell 0.4% over the year to 30 June 2018, compared to its benchmark, the MSCI World Index Hedged in USD, which rose 12.2%.

Fund performance for the third quarter of 2017, was positively driven by our holdings in Micron Technology, BW LPG and Avance Gas Holdings. Micron reported solid margin improvement in its most recent quarterly earnings release and continued to benefit from firm pricing in memory. Micron is a direct beneficiary of smartphones using increased memory. It would not surprise us if the price-to-earnings multiple modestly expanded along with its improving margins.

Fund performance for the fourth quarter of 2017 was positively driven by our holdings in Cheniere Energy Partners LP Holdings, LLC and Micron Technology. Cheniere Energy Partners LP Holdings significantly increased its dividend during the quarter, apparently enthrusting new investors. This capital action was part of the original investment thesis when a position was initiated at lower valuations. The Fund saw further contributions from its position in Micron Technology, Inc. Micron continues to benefit from healthy memory pricing, a strengthening balance sheet and a modest mid-single P/E valuation.

2018 started with a bang: January was a remarkably strong month for global equities, whereas the chill winds of February brought the first noticeable market correction since 2011. Early in the month a fall of over 5% in stock market indices on a single day, beginning in the US, was the first slide in excess of 3% in more than 400 trading days – the longest such record since the 1930s. Although outperforming the benchmark, the Fund returned a negative performance for the quarter.

Throughout quarter two of 2018, the US dollar extended its recent strength against most major trading partners. The European Central Bank is to wind down its quantitative tightening policy in the last quarter of 2018. There was an escalation in 'trade war' fears. Emerging markets' currencies and stock markets underperformed. However, markets have caught up with central banks' thinking on the need for higher short-term rates and the global growth environment remains benign. Most emerging markets are no longer dependent on high levels of USD external debt and foreign capital inflows and can generate their own growth. In Europe, a slowdown in growth has recently caused significant underperformance of cyclically-exposed sectors. It now seems a good time to selectively increase weightings to some of these holdings.

The top three holdings contributing to performance were Micron Technology, Yoox Net-A-Porter Group and BW LPG Ltd. The bottom three performers were BNP Paribas, ING Groep and Cie de Saint-Gobain.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the GBP Institutional Accumulation class) rose 7.4% over the year to 30 June 2018, compared to its benchmark, the Lipper Global Mixed Asset GBP Conservative, which rose 3.4% in GBP terms.

Economic data for the third quarter of 2017 provided some validation for the strong performance of equities for the year to date. Amongst the plethora of available data releases, standout figures included the Purchasing Managers Index for both Germany and France, which showed strong growth in European manufacturing, and Japan's longest unbroken growth streak in more than a decade. With an improving environment, global corporates are posting firm sales and earnings growth that are acting as a tailwind for continued upward momentum in global equity indices. There were several events that could have led to a material pullback in markets after such a long period of gains, amongst them hurricanes in the Caribbean and increasingly provocative sparring between the United States and North Korea; however, investors remained resilient. Global bonds had a less impressive quarter as inflation figures were higher than expected for key markets such as the UK. With higher inflation comes the likelihood of interest-rate increases as central banks turn more 'hawkish'. Within the portfolio, notable performance came from the recent addition of the RWC Global Emerging Markets fund. Emerging market (EM) equities are a key allocation as they will benefit from a sustained global uptick. For instance, figures released during September confirmed that EM exports are growing at their fastest pace in over six years.

Moving into the final quarter of 2017, despite strong economic data, including an annualised growth rate of 2.8% in Germany, the strategy had a lacklustre month in terms of performance. After several months of positive gains, it was perhaps inevitable that investors would at some stage take an opportunity to assess current market levels before adding to 'risk-on' positions. There were several factors through the month which could justify investor reticence: political worries in Germany after Chancellor Angela Merkel struggled to form a coalition; a purge of princes in Saudi Arabia; continued wrangles within the Conservative Party, in the UK; and doubt over President Trump's ability to pass tax reform.

Investors started the first quarter of 2018, in an exuberant mood with most global equity indices firmly in positive territory in the first few weeks of January. The economic data supporting this feeling of optimism included US and EU manufacturing surveys at the highest levels in ten years, and Japan recording its longest growth spurt in 28 years. However, this level of synchronised growth had led to questions on whether inflation could increase with an overheating economic backdrop. Gains that had built up during the start of the quarter quickly evaporated in the quarter following the release of US wage figures which pointed to a build-up in inflationary pressures. Markets were concerned that this could lead the US Federal Reserve to increase the rate at which it raises interest rates. As has been the case in recent years, it did not take long for equity markets to recover their composure.

Moving on into the second quarter of 2018 saw little progress in equities and bonds, as measured by the MSCI AC World Index USD and the Barclays US Aggregate Bond Index, but this masked significant underlying moves during the period. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also see-sawed, with yields initially rising before falling away again as investors fled to the asset class amid a less certain economic and political outlook. Currency movements – specifically the rising US dollar – were more notable, profoundly impacting emerging market economies and related capital markets. This was evident in the performance of the emerging market equity funds held within the strategy – the GAM Multistock Emerging Market Equity fund saw a decline during June.

While our assessment of the outlook has become less optimistic than it was at the beginning of the year, it is important to clarify that we do not forecast asset-price falls akin to that which followed the credit bust 10 years ago. As disappointing as it is to see negative performance for the month of June, it is important to note that global economic growth remains positive and most business confidence surveys in developed economies are pointing towards a continuation of this trend.

The top three holdings contributing to performance were CC Japan Alpha Fund, JP Morgan Fund ICVC – Japan Fund and GAM Star Technology. The bottom three performers were River and Mercantile UK Dynamic Equity Fund, Alken Fund – Continental Europe and Hermes Europe ex-UK Equity Fund.

30 June 2018

Commentary (Unaudited)

The Funds consistent longer term conservative management delivered a positive real and relative return over the last 12 month period. It has been a tail of two halves; namely pre 2018 (EM Equities including India benefitting from EPS and P/ER expansion in an environment of easy monetary liquidity) and post 2018 (P/ER De-rating and right monetary policy conditions leading to Rupee weakness and Credit differentiation.). At the end of the review period, the Fund had a growth bias with a higher PER (21x forward PER) than the market to lock in the exposure to a deliberate high quality domestic return profile/overweight.

The Reserve Bank of India (7.4%) and International Monetary Fund (7.3%) GDP growth forecast remains solid and impressive and overall domestic demand remains strong from multiple sources; including investment growth, private consumption and public spending/government spending drivers. India's infrastructure landscape – with a faster pace of construction of roads and highways, increased power generation capacity, upgrading of the rail network and development of dedicated freight corridors (DFCs) linking a number of major cities- is a further plus to the supportive backdrop.

We recognise that sentiment is likely to remain negative while the current noise persists and are taking a cautious stance. Namely, we further reduced higher leveraged names in favour of companies with stronger FCF, and Balance sheet strength. As the Rupee weakens (down circa 10% from Mid Jan 2018 to End Aug 2018), it has been extremely important to assess the Debt service levels and coverage ratios of Indian companies operating overseas.

We remain constructive on Indian Equities, but recognise that in the short-term risk-aversion may dominate fund flows.

The top three holdings contributing to performance were Bajaj Finance, KPIT Technologies and Reliance Industries. The bottom three performers were JBF Industries, Axis Bank and Grasim Industries Ltd.

GAM Star Interest Trend

Fund Manager: Anthony Smouha/Gregoire Mivelaz, ATLANTICOMNIUM SA

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 0.5% over the year to 30 June 2018, outperforming its benchmark FTSE (WGBI) United States Index in USD which fell 0.6%.

The Fund posted positive returns during the third quarter of 2017, combining a mixture of income and capital gains. The main gains arose from the floating-rate note holdings but there were also gains in some of the fixed rate bonds. Fundamental results and the strengthening of balance sheets of many of our holdings continue to be positive for our credits.

During the fourth quarter of 2017, the Fund posted gains of 1.98% representing both income and capital gains. The main gains arose from the floating-rate notes holdings, with Aegon, HSBC and Rothschild all gaining over 6% during the quarter. There were also smaller gains in some of the fixed-rate securities. Among our fixed rate bonds, neither 6.75% British Airways nor 6.85% HBOS (Lloyds Bank) were called so we continue to benefit from their high coupon rates.

Although the Fund posted positive returns for the first quarter of 2018, these gains were mostly picked up during January. The months of February and March saw a contrast between strong earnings from issuers held in the portfolio and negative price movements in many of our holdings, driven not by fundamentals but instead by some "risk off" price adjustments. These were prompted by equity markets experiencing a significant correction accentuated by a spike in volatility.

The Fund suffered a decline during the second quarter of 2018 primarily as the result of declines in a number of the contingent capital liabilities. While some of the discounted floating rate notes based on 3-6 month Libor recovered marginally from the lows of May 2018, Aegon floating rate notes, based on 10-year swap rates, declined from 79% to 77%. During June there was an issuer call notice on our significant holding of 6.75% British Airways. We will use these proceeds to take advantage of the weaker prices of the other securities in the Fund, including both the discounted floating rate notes, which now benefit from higher US dollar yields, and the fixed-to-floater and fixed-rate securities, where the interest spreads have widened significantly.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the JPY Accumulation Class) rose 13.5% over the year to 30 June 2018, outperforming its benchmark, the Tokyo Stock Exchange (TOPIX) 1st Section index which rose 9.7%.

The Japanese equity market witnessed another strong quarter to September 2017. The market initially rallied as US and European monetary policy diverged from Japan's, which had a depreciating effect on the yen. It then pulled back in response to heightened geopolitical risk, but bounced back on expectations for US and Japanese economic policies. Over the quarter, the largest absolute contribution to portfolio performance came from our holdings in the industrials, information technology and real estate sectors. This was partly offset by unrewarding stock selection in consumer staples, materials and telecoms services. Our recent visit to Japan confirms a solid earnings trend for industrial companies, in particular in factory automation and industrial robots.

The fourth quarter of 2017 turned out to be the best performing quarter of the year for Japanese equities. Very solid corporate earnings growth contributed to this result as the broad pickup in global economic activity continued. Numerous companies raised their full-year guidance after obtaining more visibility on demand and adjusting their cautious FX assumptions. The astonishing win for Prime Minister Abe in the lower house elections also supported the rally as economic policy is expected to remain favourable. Over the quarter, the largest absolute contribution to portfolio performance came from our holdings in industrials, health care and consumer discretionary. The sectors where stock selection was less rewarding were real estate, materials and financials.

Japanese equities lost some ground during the first quarter of 2018 as yields especially in the US climbed higher in the first two months, while protectionist remarks from US President Donald Trump led to increased risk aversion. In this environment the Japanese yen strengthened considerably versus major currencies, creating an additional headwind for Japanese equities. Even though corporate earnings and relevant indicators remained solid and proved that real economic growth remained healthy, upside was limited throughout the later part of the quarter as uncertainties surrounding trade tariffs clouded investor's sentiment. Over the quarter, the largest absolute contribution to portfolio performance came from our holdings in healthcare, information technology and consumer staples. Conversely, our positions in industrials, real estate and consumer discretionary positions detracted from returns.

During the second quarter of 2018, the Japanese equity market rallied through mid-May, amid a general risk-on environment in which large-cap value names enjoyed a pronounced recovery. However, uncertainty returned with the introduction of tariffs by the Trump administration, and political risks in southern Europe. The quarter ended on a downbeat note; there was profit taking in the broader market, as oil prices climbed noticeably, and market participants are expecting a second round of tariffs from the US. The yen weakened over the period from 106 JPY/USD to 111 JPY/USD. The largest absolute contribution to portfolio performance over the quarter came from our holdings in consumer staples and industrials. This was offset by unrewarding stock selection in information technology, consumer discretionary and materials. We also executed our annual rebalancing to restore an equal weight positioning in June.

We remain positive on Japanese equities in the medium term. Recent meetings with Japanese companies suggest that fundamentals are more solid than much of the earnings guidance for the full year ending March 2019 has suggested. The next quarterly earnings releases may well trigger a market turnaround. While the Bank of Japan Tankan survey for the second quarter exhibited a downward trend superficially, compared to the previous quarter, this reflected concerns about rising protectionism. Capital expenditure continues to be solid, which bodes well for manufacturers. We maintain our view that companies should be able to sustain a long-term profit growth of around 8% per annum in the coming years.

The top three holdings contributing to performance were Sysmex, Nidec and M3. The bottom three performers were Yahoo Japan, Shimano Inc and Bridgestone.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 6.0% over the year to 30 June 2018, outperforming its benchmark, the 3 Month Libor in USD which rose 1.7%.

Following June's more 'hawkish' tone from a number of central banks, July and August saw them back-peddalling, in part because of lower-than-expected inflation (e.g. in the US) and in part because of market moves (e.g. the euro's rise). A notable exception was the Bank of Canada (BoC), which hiked rates in July. Most central banks then switched back to 'hawkish' mode in September – with, for example, the Bank of England (BoE) signalling that a rate hike was likely soon; the Federal Reserve putting a rate hike in December firmly back into play; and European Central Bank officials admitting that tapering is on the table. The BoC hiked again.

Fiscal policy came to the fore again towards the end of the third quarter of 2017, as hopes of a tax-cutting package being agreed in the US resurfaced. Despite renewed bouts of concern over North Korea, this, along with better-than-expected economic data pointing to growth exceeding expectations, helped support stocks.

In terms of asset classes, our strategies during the third quarter of 2017 performed well in currencies (up about 2.5%) and equities (up 2%). These gains were partly offset by losses in fixed income (down about 1.5%).

Equities performed well during the fourth quarter, boosted by growing (and justified) optimism that the Trump administration would pass a tax package that would include a significant cut in the corporate-tax rate; on positive earnings and macro data surprises; and growing confidence that a change of chair at the Federal Reserve (Fed) would not entail a marked tightening of monetary policy. Bond yields fluctuated around a rising trend – whipsawed both by shifting perceptions as regards who would be the next chair (and the possible ramifications), but also by varying messages concerning the importance of recent lower-than-expected inflation data (and whether this might deflect the Fed from its gradual equity-market-friendly normalisation of official rates).

In terms of asset classes, our strategies during the fourth quarter of 2017 performed well in equities (up about 3.5%), currencies (flat) and fixed income (down about 2%).

The first quarter of 2018 was dominated by two equity market corrections. The first occurred in late January/early February, after strong wage data caused an "inflation scare", which raised fears that the Federal Reserve (the Fed) might have to tighten policy more aggressively than expected. The S&P fell by 10%. Then, not long after these fears had been assuaged by more subdued price and wage data, a second equity market fall occurred when the US administration's announcement of trade tariffs and the Section 301 Investigation on China fanned fears of a global trade war. By 23 March, the S&P was close to its February low. The shift of emphasis, from fears of inflation to worries about global growth, arrested the bond market selloff, which had seen US 10-year Treasury yields near 3%. By the end of March they were back down to 2.75%, despite the Fed having delivered a 25 bps rate hike at its latest FOMC meeting, along with more hawkish economic projections. In Europe, the bond market rally in the core markets was supported by predominantly lower than expected macro-economic data. The peripheral markets also performed well, in part because Italy's election result was perceived positively by investors. The dollar depreciated by more than 3% in January in trade-weighted terms, but then found its feet, trading in a fairly narrow range during February and March. The yen was the star performer among the major currencies: up 5.6% versus the dollar over the quarter as a whole. In terms of asset classes, fixed income contributed most of the quarter's gains. In particular, we were able to benefit from short positions in US short-term interest rates and 10-year futures, and from long positions in Italian BTP futures.

In terms of asset classes, fixed income performed well (up 5%) contributed most of the first quarter's gains while equities were up about 1% and currencies were flat.

The second quarter of 2018 was a volatile one, as markets switched from worrying about relatively minor (cyclical) problems to existential (structural) ones. In particular, May witnessed a bout of EMU break-up concerns, as investors worried that a new Italian government might press for fiscal easing on a scale that would put it on a collision course with other euro-area members – while June saw investors starting to fear the possibility of a global trade war, after President Trump reacted to Chinese retaliatory tariff measures with a suggestion that he might up the stakes. He also hinted that the US might also raise tariffs on European car imports. Markets whipsawed on the news.

For the quarter as a whole, the biggest casualties, in terms of equities, were the Brazilian and Chinese markets – down 15% and 10% respectively. The major markets, by contrast, held their own. The dollar benefitted from safe haven flows – up 5% in trade-weighted terms and up by more than 15% against the Brazilian real, South African rand and Turkish lira – as did German bunds (with their 10-year yields dropping 20 bps as a consequence). US 10-year Treasury yields ended the quarter a little higher than they started it, having sold off most of the first half of the quarter, but rallied most of the second half.

In terms of asset classes, fixed income strategies were responsible for the majority of our second-quarter losses (at a little over 2%), whereas losses in equities were around half this amount, while losses in currencies were around half those made in equities.

The Fund ended June with an equity delta of close to 0.2, and a fixed income delta of -0.1. This means that the fund was long bonds.

GAM Star MBS Total Return

Fund Manager: Gary Singleterry/Tom Mansley

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Ordinary share class) rose 2.5% over the year to 30 June 2018, outperforming its benchmark, the Bank of America Merrill Lynch US Mortgage Backed Securities index which rose 0.1%.

Mortgage rates and general interest rates were stable during the third quarter of 2017, with the 10-year US Treasury rising only three bps, while equity markets continued their strong performance, as the S&P 500 index gained 4.5% for the quarter. Credit spreads narrowed somewhat during the quarter, and the housing market in the US remains strong. The Fed held its target short-term rate steady, but clarified its plan to start shrinking its balance sheet by not reinvesting all of its monthly principal and interest payments on its Treasury and agency MBS portfolios. The plan will result in a slow, gradual reduction in the balance sheet.

The year 2017 finished with strong positive performance in virtually all financial markets, and the lowest volatility we have seen in years. Mortgage rates and general interest rates were virtually unchanged during December and during the year as a whole, with the 10-year treasury ending 2017 only 4 bps different than it began the year in January. Equity markets continued their strong performance, as the S&P 500 index gained 1.1% for the month and generated a strong 21.8% return for the year. Credit spreads were fairly neutral during the month of December, after tightening during the year, and the housing market in the US remains strong. Firm global growth, tame inflation and plentiful central bank liquidity all contributed to a favourable environment for investing in 2017. President Trump signed tax legislation that provides substantive changes to the US Federal tax code, some of which may have an impact on the housing markets. Perhaps the largest potential impact on the housing market is the limitation on the deductibility of state and local taxes to USD 10,000 in exchange for a larger total standard deduction of USD 24,000. We see this as a longer-term negative to the higher end of the housing market, particularly in states with high local and state tax rates, but we believe it is not significant for our strategy, as the securities in the portfolio are much more concentrated on the lower end of the housing market.

The US Federal Reserve raised its target funds rate by 25 bps at its December meeting to its current range of 1.25 – 1.5%. This rate hike was largely expected by the market, so it did not come as a surprise. However, the US Fed also raised its 2018 GDP growth forecast to 2.5% from 2.1%, a steeper increase than was generally expected. We believe this sets the expectation for at least three more rate hikes in 2018. With the spread between the 10-year US Treasury and the two-year US Treasury at 52 bps at year-end, we cannot rule out the possibility of an inverted yield curve later in the tightening cycle. Since most of the portfolio's assets are floating rate, this flattening of the yield curve has not had a material impact on performance.

The first quarter of 2018 brought a major increase in volatility as the US Federal Reserve (the Fed) increased rates once again. March proved to be another difficult month for risk assets globally, with equity markets down in most countries. Tariff skirmishes and tech jitters took a toll on markets throughout the first quarter. Most equity markets experienced their second negative month in a row in March. The S&P 500 was down 2.5%, giving it a year to date performance of negative 0.8%. The Treasury curve flattened in March, but not because of higher short rates; rather, the 10-year Treasury rallied in March to finish the month at 2.74%. The mortgage rate finished the month unchanged in March for most originators, about 50 bps higher than the 2017 close. The housing market continues to be strong. As of January 2018, house prices were up 6.2% on the previous year, according to Case-Shiller. The national home ownership rate ticked up to 64% at year end. We attribute the strong price appreciation to the lack of saleable inventory of homes in many markets. This lack of inventory has shown up in rental vacancy rates, which are still at their lowest levels in over 20 years.

The major market changes during the second quarter of 2018 were the 3.43% rally in the S&P 500 Index, the US Federal Reserve raising its target rate by 25 basis points, and the appreciation of the US dollar. The 10-year US Treasury yield increased by 12 basis points, closing at 2.86%. US mortgage rates rose a similar amount, settling at approximately 4.55%. In addition to having relatively attractive spreads, most post-crisis MBS and ABS are more investor friendly than those pre-crisis. The amount of subordination required for any given rating is substantially higher on post-crisis MBS, and for many structured securities the Dodd-Frank regulations also require the issuer to retain a 5% interest in the security they sell.

In the residential mortgage market, we continue to favour non-agency bonds (in preference to government-guaranteed agency securities) and bonds with floating coupons. The current yield of the portfolio has increased with the rise in short-term rates, since many of the coupons are floating rate. In the commercial sector, the securities in the portfolio are concentrated in apartment complexes and small-balance commercial loans. Our preference for senior bonds continues to mitigate concerns about potential credit spread widening.

Outlook

Mortgage lending criteria are still tight by historical standards, although we see some loosening of credit with new, higher LTV programs by Fannie Mae and Freddie Mac. Delinquency levels continue to fall, and we expect the creditworthiness of the housing market to continue to improve. Due to the current shortage of supply in some housing markets, we expect home prices to continue to increase, at a rate slightly higher than the inflation rate, for the near future. Recurring shortages of skilled labour, not only in the real estate construction business, but in other industrial sectors, could result in increased wage inflation pressure, all of which could be favourable for the housing market. Recently, the Trump administration released a proposal for a broad reorganisation of the federal government which included, among other things, a proposal on GSE reform. The proposal called for more transparency and accountability to taxpayers, minimising the risk of taxpayer-funded bailouts, and ending the conservatorship of Fannie Mae and Freddie Mac. The proposal lacked specific details, and, ultimately, a specific recommendation will require Congressional approval, which makes any near-term change unlikely; however, we view this focus on agency reform as a positive factor for the mortgage market going forward.

30 June 2018

Commentary (Unaudited)

The Fund gained 1.0% over the year to 30 June 2018 (as measured by the USD Institutional class) compared to a rise of 1.7% for its benchmark, the 3 month Libor in USD.

Carry strategies contributed 0.7% to fund returns, driven by strong performance in bond carry, credit carry and the short volatility strategies. Gains were slightly offset by FX carry and commodity carry. Value premia contributed 0.3% to overall fund returns, driven by a strong performance in FX value. Momentum premia were overall negative, detracting 0.4% from performance. Losses were led by FX trend and bond trend, while GTAA Momentum and commodity trend contributed positively.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the Institutional USD Accumulation Class) rose 4.4% over the year to 30 June 2018, outperforming its benchmark, the 3 Month Libor in USD which rose 1.7%.

US dollar (USD) woes continued at the start of the third quarter of 2017. The USD index has now dropped for five consecutive months. Fears of political gridlock grew, as President Trump failed to progress his agenda. The Bank of Canada delivered its first rate hike in seven years. As a result, the Canadian dollar (CAD) rallied 4% against the USD. Mario Draghi took a neutral stance following the ECB conference. The euro continued to strengthen against the USD. Most gains this month came from currency and equity positions.

September was a decidedly risk-on month as equity indices rallied and bonds sold off. Oil prices continued their recent turnaround, rallying strongly over the month as fears of a supply gap continued to grow. The Core Macro programme's return was dominated by equities and bonds this month. The very strong performance in equity indices came primarily from long positions in European stocks. Our long position in gilts was the major underperformer.

Equities maintained their momentum in October following strong Q3 earnings results. The Dow rose 4.3% while the S&P 500 is up 2.2% and the NASDAQ ended up 3.6%. Both the Dow and the S&P had their seventh straight monthly gain. Bonds were generally flat by the end of October having regained early losses in the month. The Core Macro programme's return was dominated by equities and commodities this month. European and Asian equity futures were particularly strong. Within commodities, our long oil and short natural gas positions worked well as did our long copper and aluminium positions in metals. In rates we saw small gains in bonds while short term interest rate futures were flat.

November was a mixed month overall. In Europe, a stronger euro and slower earnings growth combined with the faltering of coalition talks in Germany to weigh heavily on European equity markets and boost European bonds. The main European indices have had a strong showing in 2017, but all lost ground in November. Conversely equity indices in the US and Asia were positive and bonds lost ground. Our long positions in US and Asian equity indices, emerging market FX and European bonds all drove positive performance in November.

Commodities had a strong month in December. The price of Brent crude hit a two-year high as prices were buoyed by lower US inventories and China releasing higher import quotas for 2018. Meanwhile, copper extended its bull run for a second year. Global equity markets rallied strongly driven by the initial excitement around Donald Trump's tax bill. Over in Europe, Spain led European stocks lower after parliamentary elections in Catalonia handed a win to the separatist movement, rekindling fears of the re-emergence of tensions in Spain. Commodities were the best performing asset class for the Fund, largely driven by our positions in Brent and copper. Equity indices in the US, Europe and Asia also generated positive returns. Losses were driven by our long position in Italian government rates.

January saw yet another bumper month for equity markets. Markets rallied to record levels in the US, with the Nasdaq breaking 7000, on the back of the expanding US economy, growth in corporate profits and enthusiasm over recently enacted tax cuts and other business-friendly policies. However there was some retracement and increased volatility in the final few days of the month. The US dollar sold off over the month, posting its worst January in over a decade and closing January at a three-year low. Equity indices were our strongest performers this month. Long positions in the Hang Seng, S&P 500 and Nasdaq all capitalised on the strong rallies.

The constant background of Brexit, oil production cuts and South African political wrangling all faded into irrelevance in February. In the US, a higher than expected rise in hourly earnings and strong employment numbers published on Friday 2 February indicated a potential rise in inflation. This set in course a train of events that saw equities falling 10% in a week, the VIX hitting 50%, and the worst week for systematic macro trading in a very long time. Despite recovering a little over the rest of the month, the GAM Systematic Core Macro Fund ended February down 8.3%.

So what happened? Why did the GAM Systematic Core Macro Fund and almost all other systematic macro funds have one of their worst weeks in history? The simple answer is, of course, that they were long equities in a week when equities went down. But that simple and superficial answer hides more subtle effects. Risk assets have had very low volatility in recent history and, although we have algorithms in place to limit the size of the potential scaling up of the signals, positions in equities have been at the higher end of the range for a while. Furthermore, the equity correction was not preceded by a rise in volatility as they often have been in the past. In addition, in sudden risk-off moves, there is often a strong bid for bonds and other safe haven assets. Although bonds did rally slightly, there was a limit to their attractiveness due to inflation fears being the trigger. Finally, even if bonds had performed well, unlike during previous equities corrections, typical systematic macro models have started to get less long or even short bonds due to continuing rate rises. These effects added up to a bad month for systematic macro.

After a calm start to the month, the second half of March saw strong risk-off sentiment in the markets. Equity markets suffered from a sell-off in tech stocks led by blue chip names. The flare-up in trade war tension between the US and China added further to the risk-off tone. During a two week span, President Trump's administration set up tariffs against China and blocked Chinese takeovers of US companies on the grounds of national security. In the US, an updated inflation outlook at the FOMC meeting, together with hawks replacing moderates in the White House, added to growth rate uncertainties and saw US bond yields trending lower.

During April, market participants appeared to be more comfortable with ongoing geopolitical risks and the trade tensions between China and the US. Some of the volatility seen in previous months remained, but with a slight risk-on sentiment. In the UK, increased growth forecasts sent the FTSE soaring, while the pound dropped amid dovish comments from Bank of England Governor, Mark Carney, that indicated a delayed rate hike. In the US, the Treasury complex sold off amid fears that inflation will overshoot its target level. The US Treasury 10-year yield broke above the psychologically important 3% level for the first time since 2013, driving a strong rally in the dollar during the second half of the month. Oil prices were driven higher by a combination of supply disruptions, strong demand and concerns over Syria and Iran. The portfolio had mixed performance over the course of April but ended down 0.74%, primarily driven by the dollar moves late in the month.

The first half of May was characterised by dollar strength and rallying equity markets after the US 10 year yield broke above the 3% level in April. However, as political events unfolded financial markets were dominated by risks surrounding the Italian general election and the confidence vote on the Spanish Prime Minister Rajoy. The fear of contagion drove demand for safe haven US and German government bonds, coupled with a sharp sell-off in Italian bonds. Oil prices surged following the collapse in Venezuelan oil production and the withdrawal of the United States from the Iran nuclear deal. Towards the end of the month the energy complex partially retraced amid comments from Saudi Arabia and Russia that they are ready to increase production. The prolonged surge in oil prices led to strong gains from our long energy positions. In addition the portfolio suffered small losses in agricultural and precious metals. Conversely base metals contributed positively, particularly long positions in aluminium and nickel which benefited from the US rhetoric on trade tariffs.

As the US administration imposed and threatened further tariffs, risk-on assets were hit by the increasingly hard-line tone coming from the White House in June. Fears of a trade war were felt particularly strongly by Chinese and other Asian markets. A sharp Asian stock market move was mirrored by that in the Chinese currency, with the Hang Seng selling off approximately 5% in June and the renminbi suffering its largest ever monthly decline.

Fund Manager: Cantab Capital Partners LLP

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the Institutional USD Accumulation Class) fell 0.6% over the year to 30 June 2018, underperforming its benchmark, the 3 Month Libor in USD which rose 1.7%.

As we moved into the second half of 2017, investors' focus shifted back to economic factors and away from geopolitical concerns. In the US a strong third quarter US earnings season and progress on tax reforms benefited our momentum and sentiment clusters. Both had a very strong second half of the year. In Japan, the Nikkei 225 reached levels not seen since 1992 and this positive market trend spilled over to individual stocks with high momentum stocks outperforming cheaper and value-orientated stocks. In Europe, a stronger than expected economic recovery helped build a sense that the Eurozone economies had finally turned the corner. This helped our momentum and sentiment clusters also perform well in Europe. Only towards the end of November and December did we see a decline in momentum and sentiment and a recovery in the value cluster. Indeed, our value cluster posted the strongest one day return since the US presidential election at the end of November.

The first quarter of 2018 was challenging for the Fund with the portfolio down 1.17% in March. Performance was mixed by region and strategy. Our momentum and quality strategies performed well in the quarter, while value struggled, bringing down overall performance.

The Fund was up 0.17% in April. This month saw a reversal in the main trends from the first quarter. The strategy gained in both Asia and Europe, both of which had underperformed in the first quarter. The US, which had been the main driver for positive performance in the first quarter, posted negative returns in April. The Fund was down in May. Markets were again unsettled by ongoing geopolitical and trade issues. The on-again off-again summit between President Trump and the North Korean leader Kim Jong Un, and the attempt to form a government by two populist parties in Italy increased investor risk aversion. In addition, the concerns over international trade as the US imposed tariffs on metal imports from the EU, Canada and Mexico also benefited safe haven assets.

June was a challenging month for the Fund which was down 1.17%. Market sentiment took a turn for the worse as concerns over global trade rose and the probability of trade war increased.

The portfolio risk remained roughly the same as last month. The correlation between the three regions remained unchanged after falling since October last year and as a consequence the risk of the strategy has remained unaffected. Across our strategies, our dynamic allocation algorithm did not meaningfully alter the risk allocation. This algorithm, which maximises the diversification between strategies and minimises exposure to factor crowding, made no significant shifts to risk and the largest allocation continues to be to value as this strategy is the most diversifying despite its recent poor performance.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Institutional Accumulation Class) rose 1.1% over the year to 30 June 2018, underperforming its benchmark, the 3 Month Libor in USD which rose 1.7%.

The Fund delivered a positive return in seven of the twelve-months under review, with strong performance in 2017 from engagement in equities and select short bond positions. Losses were limited to an average of 0.5% in negative months.

Contributors over the review period included exposure to US tech names, Nikkei 225 exposure, and emerging market equities with a focus on specialised tech.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Institutional Accumulation Class) rose 3.4% over the year to 30 June 2018, outperforming its benchmark, the 3 Month Libor in USD which rose 1.7%.

The traditionally quieter summer period was interrupted by an upsurge of political risk – led by mounting US-North Korea tensions and terrorist attacks in Spain triggering investor nerves, boosting volatility and pushing some market returns into negative territory. Likewise, Hurricane Harvey's Texas landfall also weighed on sentiment but macroeconomic data remained largely positive, including an upward revision to the 2017 second-quarter US GDP growth which supported US equities. Despite European equities being penalised by the strong euro, economic and earnings momentum remained robust. In bond markets, government bond yields declined over the month due to safe-haven buying amid escalating tensions between the US and North Korea. Despite the lukewarm performance in broader markets, the Fund made decent progress during the month. The main contributor was the GAM Tech Disruptors basket, which consists of a long position in technology large caps versus traditional high street retailers. The commodity space also proved beneficial with a short position in oil adding value and gains in copper driving the long CLP vs. AUD pair higher. Further contributions came from some of the Mortgage Backed Security notes.

The Fund performed well in quarter four of 2017. October proved a strong month for the Fund. Among our main contributors were the long Nikkei position and our GAM Tech Disruptors long-short trade. We also profited from our short Australian dollar vs. the yen as well as being long the Malaysian ringgit against the Swiss franc. Our biggest winners in November were predominantly in the FX space as we benefitted from our short position in Australian dollar vs. yen and the Swedish krona, as well as being long the Malaysian ringgit vs. the Swiss franc. While in December, in the equity space we gained across most of our positions, particularly in long US quality.

Global markets were certainly not initially plagued with the January blues. The major equity markets continued to climb, picking up where we left off last year at the start of the first quarter of 2018 but reversed performance throughout the remaining period of the first quarter. The fundamentals remain strongly supportive with events that might typically be problematic for equity markets, including tightening by the Federal Reserve or political turbulence, are taking second stage to the underlying fundamentals. However, growing confidence among central banks that the strong recovery will bring inflation back towards targets caused most government bond prices to weaken, particularly US Treasuries.

The second quarter of 2018 saw little progress in equities and bonds. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also see-sawed, with yields at first rising, before falling away again, as investors sought refuge in the asset class amid a less certain economic and political outlook. Currency movements – in particular, the rising US dollar – were more notable, and had a sizeable effect on emerging-market economies and related capital markets. Gains were made in MBS, long New Zealand linkers and the US inflation trade, but the Japanese break-evens detracted from performance; the European buybacks equity basket we hold also positively contributed. In addition, there was a positive contribution from GAM Merger Arbitrage, as well as our US alpha long/short equity basket, but losses in our EM earnings momentum long/short basket.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the EUR Institutional Accumulation Class) rose 1.6% over the year to 30 June 2018, outperforming its benchmark, the 3 Month Libor in EUR which fell 0.4%.

The traditionally quieter summer period was interrupted by an upsurge of political risk – led by mounting US-North Korea tensions and terrorist attacks in Spain triggering investor nerves, boosting volatility and pushing some market returns into negative territory. Likewise, Hurricane Harvey's Texas landfall also weighed on sentiment but macroeconomic data remained largely positive, including an upward revision to the 2017 second-quarter US GDP growth which supported US equities. Despite European equities being penalised by the strong euro, economic and earnings momentum remained robust. In bond markets, government bond yields declined over the month due to safe-haven buying amid escalating tensions between the US and North Korea. Despite the lukewarm performance in broader markets, the Fund made decent progress during the month. The main contributor was the GAM Tech Disruptors basket, which consists of a long position in technology large caps versus traditional high street retailers. The commodity space also proved beneficial with a short position in oil adding value and gains in copper driving the long CLP vs. AUD pair higher. Further contributions came from some of the Mortgage Backed Security notes.

The Fund performed well in quarter four of 2017. October proved a strong month for the Fund. Among our main contributors were the long Nikkei position and our GAM Tech Disruptors long-short trade. We also profited from our short Australian dollar vs. the yen as well as being long the Malaysian ringgit against the Swiss franc. Our biggest winners in November were predominantly in the FX space as we benefitted from our short position in Australian dollar vs. yen and the Swedish krona, as well as being long the Malaysian ringgit vs. the Swiss franc. While in December, in the equity space we gained across most of our positions, particularly in long US quality.

Global markets were certainly not initially plagued with the January blues. The major equity markets continued to climb, picking up where we left off last year at the start of the first quarter of 2018 but reversed performance throughout the remaining period of the first quarter. The fundamentals remain strongly supportive with events that might typically be problematic for equity markets, including tightening by the Federal Reserve or political turbulence, are taking second stage to the underlying fundamentals. However, growing confidence among central banks that the strong recovery will bring inflation back towards targets caused most government bond prices to weaken, particularly US Treasuries.

The second quarter of 2018 saw little progress in equities and bonds. The equity market had staged a recovery after the correction of late January, only to see it unwind from mid-June as the trade dispute between the US and its major trading partners escalated. Bonds also see-sawed, with yields at first rising, before falling away again, as investors sought refuge in the asset class amid a less certain economic and political outlook. Currency movements – in particular, the rising US dollar – were more notable, and had a sizeable effect on emerging-market economies and related capital markets. Gains were made in MBS, long New Zealand linkers and the US inflation trade, but the Japanese break-evens detracted from performance; the European buybacks equity basket we hold also positively contributed. In addition, there was a positive contribution from GAM Merger Arbitrage, as well as our US alpha long/short equity basket, but losses in our EM earnings momentum long/short basket.

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 29.5% over the year to 30 June 2018, outperforming its benchmark, the MSCI World Information Technology index which rose 29.0% in USD terms.

The backdrop for technology investing remained very constructive during the third quarter of 2017. This was underpinned by further evidence that trends in key growth themes like mobility, the automation of knowledge work and cloud computing remain very strong. The second quarter earnings season confirmed this with the best level of earnings beats since Q2 2010 according to Goldman Sachs. However, share prices have also risen strongly throughout the year and good news is well priced in. The result is that the market began the quarter with a strong month but performance, while still positive, slowed as the quarter progressed. The quarter's winners for the Fund came from gaming, where we have continued to increase exposure.

The fourth quarter of 2017 followed the trend established for the year, namely a grind higher in risk assets with technology equities as a leading sub-set of that trade. The year passed without the S&P 500 having a pull-back of more than 3% and continuing its record breaking run, adding a further 6.1% in Q4. That was topped by the various technology indices with the Nasdaq 100 up 7.0% and the MSCI World Technology Index up 8.1%. Growth names lagged slightly, rising just 6.2% over the quarter. The main driver of markets was a very strong Q3 reporting season backed up with continued macro growth indicators that maintained a very positive bias. In fact, while technology equities made great progress throughout the year, the earnings growth reported more than matched that growth in many cases and the sector ended the year with only modest gains in relative valuation compared to the broader S&P 500 index. This will come as a surprise to some when seeing 30-50% moves in many large cap names for the year but in truth, according to a study by Sanford Bernstein, the valuation of technology remains at the lower end of historical levels. The Fund's winners in Q4 were GTT, Tencent, Microsoft and Seagate. GTT, the leading contributor, rose 48.3% in the quarter; it is an alternative telecom provider which offers value added services to companies needing to enhance and upgrade their broadband capabilities for an increasingly cloud-based world.

Equity markets got off to a record-breaking start in 2018 as US tax cuts drove demand for shares across the board. However, as is so often the case, travelling can be better than arriving for markets and more structural issues began to darken the skies with bond yields rising sharply as the counter-side of strong growth led to higher interest rates and inflation concerns. At the same time, Trump's posturing on trade with China created a great deal of uncertainty that led to a sharp sell-off in equities from the January record highs. The net effect of a strong start followed by a sell down in February and March was to leave global equity markets slightly lower for the quarter and to put an overly intense focus on the Q4 reporting season as a catalyst for equities to move higher again. The S&P 500 fell 1.2% in Q1 but technology shares as measured by the Nasdaq 100 managed to hold positive territory, rising 2.9%. While less exposure to large-cap internet was a help at the margin, the real boost to performance came from our continued belief in the memory and storage theme, as well as exposure to Software as a Service (SaaS) companies that continue to exhibit tremendous growth.

Equity markets were driven higher across the board in the second quarter of 2018 as better economic data and strong earnings reports outweighed trade war, emerging markets and Brexit concerns. World equities rose just 0.7%, held back by emerging markets, but developed market indices kicked on with technology again leading the way. The Fund outperformed the index for the quarter, the alpha was driven by some debut names in the market: iQiyi in China, DocuSign in the US and Netcompany in Denmark.

The Q2 earnings season was an important driver of continued performance and we expect Q3 reporting to be equally important. While the actual Q2 numbers will likely be very strong we can see that companies may downplay their outlooks, particularly with trade sanctions intensifying. We have taken this into account via positioning changes to reflect the risk to semiconductors in particular as well as taking down overall exposure slightly. There is no concern whatsoever regarding the medium to long term trends in technology – in fact the pace of change is only accelerating. But in the short term, given that earnings will be released in a traditionally low liquidity summer period, we may see increased volatility and we want to be in a position to buy dips.

The top three holdings contributing to performance were Micron Technology, Microsoft and Amazon.Com. The bottom three performers were Criteo Sa, Nokia and Thruvision Group.

GAM Star US All Cap Equity

Fund Manager: Ali Miremadi

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 15.4% over the year to 30 June 2018, compared to its benchmark, the S&P 500 in USD which rose 14.4%.

Supported by broad-based earnings growth, accelerating business activity and an improving global backdrop, US equity markets ended the third quarter of 2017 higher, with the S&P 500 Index delivering an eighth consecutive quarter of gains and closing at a new record. The Fund delivered strong absolute returns during the third quarter, but slightly underperformed the S&P 500 Index. Equity selection detracted from relative returns, driving the portfolio's slight underperformance. Sector positioning aided relative returns.

US equities finished the fourth quarter and the year at all-time highs as robust equity performance was seen across many of the major domestic indices. At the same time, strong returns have been achieved amid an environment of very low volatility, with the combination of the two having reached historic levels. For example, the S&P 500 posted gains each month of 2017 for the first time in its long history. Although US economic fundamentals still argue for later-cycle expansion, investors should temper expectations as full valuations and investor complacency create a sense of market vulnerability. The Fund delivered strong absolute returns during the fourth quarter and outperformed the S&P 500 Index. Equity selection aided relative returns and drove outperformance. Sector positioning challenged relative returns.

2018 started with a bang: January was a remarkably strong month for global equities, whereas the chill winds of February brought the first noticeable market correction since 2011. Early in February a fall of over 5% in stock market indices on a single day, beginning in the US, was the first slide in excess of 3% in more than 400 trading days – the longest such record since the 1930s. The Fund delivered a positive performance for the quarter and outperformed the S&P 500 Index.

After steadily rising for more than fourteen months, the US stock market experienced a reversal amid much higher volatility during the first quarter of 2018. This reversed partially in April as US equities appeared to rally, partly influenced by signs pointing towards a greater push for tax reforms by the current administration. US stocks performed well in May, despite increased geopolitical tensions, the re-introduction of sanctions against Iran, and a further escalation of the trade war which the US is waging with several of its closest trading partners. The technology sector led the way, closely followed by the energy sector; the main laggards were the consumer staples and telecom sectors. Trade pressures continued to weigh on markets in June, with the more cyclical sectors such as financials and industrials lagging, and the more defensive areas such as consumer staples and utilities faring relatively well. Against this backdrop, earnings momentum for the stocks in the Fund continued to be strong, with Adobe, FedEx, Lennar and Nike all reporting quarterly numbers during the month which were ahead of consensus expectations and on balance guided towards a fairly encouraging outlook for the remainder of the year. The Fund delivered strong absolute returns during the second quarter and outperformed the S&P 500 Index.

Little has happened during the month to change our outlook for US equities, which remains broadly positive, though we are cognisant of the fact that, several years into an expansionary phase of the economic cycle, valuations are elevated across the market. While there are many reasons to be positive, given the impact of tax reform on an already strong macroeconomic environment, many economic commentators are getting increasingly nervous over the prospects for the US economy two years down the road, as the likely impact of rising rates takes effect and the pro-growth policies start to wash through. The recent uptick in defensive names and the sell off in cyclically exposed industrials suggest that some market participants may be preparing for a tougher environment, and retreating to dependable names that can offer stable growth in turbulent times. Our strategy, as ever, is to be extremely vigilant and selective in deploying capital, guided by our efforts to determine intrinsic value.

The top three holdings contributing to performance were ServiceNow, Visa and Amazon.com. The bottom three performers were Regeneron Pharmaceuticals, Incyte and Arconic.

GAM Star Worldwide Equity

Fund Manager: Ali Miremadi

30 June 2018

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 7.0% over the year to 30 June 2018, compared to its benchmark, the MSCI World index in USD which rose 11.7%.

The third quarter of 2017 proved a strong quarter for both equity markets and the Fund, with the latter comfortably outperforming its benchmark index. At this time of year companies dust off their presentations and hit the road. We have taken advantage of this phenomenon to see even more management teams during the period than usual: current holdings such as Unilever, Heidelberg, Royal Dutch Shell, Infineon, Rolls Royce, Sacyr, Frontline, Golar LNG, as well as some former holdings such as Nestle, Aegon, Gaslog and NH Hoteles. While it is dangerous to over-generalise, it is clearly the case that the corporate universe at the end of the quarter is in rude health. This seems widespread globally, with Europe, Japan and many emerging markets joining the US in growth.

The Fund again performed well over the fourth quarter of 2017 in absolute terms but underperformed on a relative basis. This was not so much a case of poor performance in the portfolio, but more a reflection of the most popular segments of global stock markets – particularly US technology – motoring ahead into the end of the year. We continue to believe that the value orientation of the Fund will deliver better relative as well as absolute returns over the longer term. During the calendar year, robust outperformance in both Q2 and Q3 ensured that an excess return was delivered over the course of 2017 as a whole.

2018 has started with a bang: January was a remarkably strong month for global equities, whereas the chill winds of February brought the first noticeable market correction since 2011. Early in the month a fall of over 5% in stock market indices on a single day, beginning in the US, was the first slide in excess of 3% in more than 400 trading days – the longest such record since the 1930s. Although outperforming the benchmark, the Fund returned a negative performance for the quarter.

Throughout quarter two of 2018, the US dollar extended its recent strength against most major trading partners. The European Central Bank is to wind down its quantitative tightening policy in the last quarter of 2018. There was an escalation in 'trade war' fears. Emerging markets' currencies and stock markets underperformed. However, markets have caught up with central banks' thinking on the need for higher short-term rates and the global growth environment remains benign. Most emerging markets are no longer dependent on high levels of USD external debt and foreign capital inflows and can generate their own growth. In Europe, a slowdown in growth has recently caused significant underperformance of cyclically-exposed sectors. It now seems a good time to selectively increase weightings to some of these holdings.

We had a relatively active end to the quarter in terms of new purchases in June and had three new additions to the portfolio, two of which are discussed below. We also sold out of our very long term holding in CK Hutchison, the Hong Kong based conglomerate, and also reduced our holdings in both Sumitomo Mitsui Financial Group (in Japan) and Royal Dutch Shell. We initiated a position in Synchrony, the old GE Capital credit card business. The company focuses on store cards, where it is the provider for a large number of partners. The lender has excellent technology, a long track record of managing credit risk effectively, and considerable excess capital; it has both high returns and a very low cost-to-income ratio. The shares are deeply undervalued, trading on a multiple of around 7x 2020 estimated earnings. Auto Trader Group, the UK and Irish based car marketplace, is dominant in its home markets. It has plans to grow in adjacencies within the UK car market, such as helping used-car dealers offer financing to buyers. Auto Trader Group also wants to grow its share of the new car market in the UK and Ireland. The business model is highly cash generative and the bulk of cash flow from operations is used to buy back shares. The shares trade around 15 times 2020 forecast earnings.

The top three holdings contributing to performance were Yoox Net-A-Porter Group, TAG Immobilien and Ubiquiti Networks. The bottom three performers were BNP Paribas, Telecom Italia SpA and Five Point Holdings.

GAM Star Worldwide Equity	US dollar

The Company is an umbrella fund with segregated liability between Funds. Accordingly any liability incurred on behalf of or attributable to any Fund of the Company shall be discharged solely out of the assets of that Fund, and neither the Company nor any director, receiver, examiner, liquidator, provisional liquidator or other person shall apply, nor be obliged to apply, the assets of any such Fund in satisfaction of any liability incurred on behalf of or attributable to any other Fund of the Company, irrespective of when such liability was incurred.

2. Accounting policies

The significant accounting policies and estimations techniques adopted by the Company are as follows:

(a) Basis of preparation of financial statements

These financial statements have been prepared in accordance with FRS 102: the Financial Reporting Standard applicable in the Republic of Ireland, Irish Statute comprising the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”). Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council (“FRC”).

The Companies Act 2014 prescribed formats for financial statements have been adapted to make them more applicable to investment funds. The Company has availed of the exemption available to open ended investment funds that hold a substantial proportion of highly liquid and fair valued investments under FRS 102 and is not presenting cash flow statements. The information required by FRS 102 to be included in a statement of comprehensive income, is in the opinion of the Directors, contained in the Profit and Loss Account of each Fund.

On initial application of FRS 102, in accounting for its financial instruments, a reporting entity is required to apply either a) the full requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments Issues, b) the recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and Measurement and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments, or c) the recognition and measurement provisions of IFRS 9 Financial Instruments and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments.

The Company has chosen to implement the recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments.

In arriving at the results for the year, all amounts in the Profit and Loss Account related to continuing activities for all open Funds and discontinuing activities for the terminating Funds. The open Funds are prepared on a going concern basis where as the terminating Funds are prepared on a non going concern basis. On 27 August 2018 the Directors made a decision to liquidate the GAM Star Absolute Return Bond, GAM Star Absolute Return Bond Defender, GAM Star Absolute Return Bond Plus and GAM Star Dynamic Global Bond. On 18 October 2018, the Directors made the decision to liquidate GAM Star India Equity and GAM Star Keynes Quantitative Strategies. The Directors also expect GAM Star Absolute Return Macro, GAM Star GAMCO US Equity and GAM Star Global Quality to close within the next twelve months. Therefore the financial statements for these Funds are prepared on a non-going concern basis.

Notes to the Financial Statements

2. Accounting policies, continued

(a) Basis of preparation of financial statements, continued

In the opinion of the Directors, the financial statements discloses the information required by the Irish Companies Act 2014.

The financial statements have been prepared for all open Funds under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Investments at fair value

Classification

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception. Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading, as the Company does not designate any derivatives as hedges in a hedging relationship.

Recognition/Derecognition

Purchases and sales are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Measurement

Financial assets and liabilities are initially recognised at fair value, and transaction costs for all financial assets/liabilities carried at fair value through profit or loss are expensed as incurred. Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value.

The computation of realised gains and losses on sales of financial assets and liabilities at fair value through profit or loss is made on the basis of average cost and accounted for in the Profit and Loss Account.

Gains and losses arising from changes in the fair value of the 'financial assets and financial liabilities at fair value through profit or loss' category are included in the Profit and Loss Account in the period in which they arise.

Fair value estimation

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets and liabilities held by the Company is the mid price.

In the case of any security not listed, quoted or dealt with on a regulated market or for which no quotation or value is readily available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined by the Directors or other competent person appointed by the Directors and approved for the purpose by the Depositary, using the market approach which consists of estimating the fair value of these securities using a comparable multiple of revenue for similar guideline public companies.

Shares or units in any collective investment scheme which provides for those shares or units to be redeemed at the option of their holder out of the assets of the undertaking shall be valued at the last published unaudited net asset value per share.

The Company may from time to time invest in financial instruments that are not traded in an active market (for example in over the counter derivatives). The fair value is determined by using valuation techniques. The Company uses a variety of methods and makes

assumptions that are based on market conditions existing at each balance sheet date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Any such securities are disclosed in the portfolio statements.

Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition seldom equal the actual related results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

Debt securities

Debt securities are valued on the basis of dealer supplied quotations or by using a pricing service selected by the Manager. The fair value of the instrument is estimated using valuation techniques if a quoted market price is not available from a broker/dealer or a third party pricing service. Valuation methods include the use of recent unaffiliated market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

To be announced ("TBA") Sales Commitments

Certain Funds may enter into TBA sale commitments to hedge their Fund positions or to sell mortgage backed securities they own under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date.

Financial derivatives

Funds may hold derivatives for investment purposes and/or efficient portfolio management purposes as described in the relevant Supplement to the Prospectus.

(i) Forward foreign currency exchange contract

When entering into a forward foreign currency exchange contract, the Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed price upon an agreed future date. These contracts are valued daily at the forward rate and the Fund's equity therein, representing unrealised gains or losses on the contracts, is included in the Balance Sheet. The unrealised gain/(loss) on open forward exchange contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised and changes in unrealised gains and losses are included in the Profit and Loss Account.

(ii) Futures contract

A futures contract obligates one party to sell and the other party to purchase a specific instrument for an agreed price on an agreed future date. Initial margin deposits made with respect to futures contracts are recognised as assets due from the Fund's broker agent in acquiring the futures position. Subsequent changes in the daily valuation of open contracts are recognised as changes in unrealised gains and losses in the Profit and Loss Account. Variation margin payments are made or received on traded futures as appreciation or depreciation occurs. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. Realised gains or losses are recorded when a contract is closed and are included in the Profit and Loss Account. Futures contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Notes to the Financial Statements

2. Accounting policies, continued

(b) Investments at fair value, continued

(iii) Options contract

An option contract gives the buyer the right, but not the obligation, to buy (call) or sell (put) a financial instrument. Options held by the Funds which are dealt on a recognised market are valued using a settlement price as determined by the recognised market in question. Where a settlement price is not available, the value is the probable realisation value estimated with care and good faith by the Manager. Exchange traded options are valued at the settlement price determined by the relevant exchange. These are valued daily and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Options contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(iv) Credit default swaps

In a credit default swap contract, one party makes payments to another party in exchange for the right to receive a specified return (or to put a security) if a credit event (e.g., default or similar event) occurs with respect to a reference entity or entities. A seller of credit default protection receives periodic payments in return for its obligation to pay the principal amount of a debt security (or other agreed-upon value) to the other party upon the occurrence of a credit event. If no credit event occurs, the seller has no payment obligations so long as there is no early termination. Credit default swap agreements are fair valued on the valuation date using market vendors. The change in fair value, if any, is recorded as changes in unrealised gains and losses in the Profit and Loss Account. Realised gains and losses on maturity or termination are recorded in the Profit and Loss Account. Credit default swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(v) Contracts for difference

Contracts for difference are OTC derivatives which take advantage of the economical benefits which are not afforded through investing directly in certain securities markets. Funds may purchase equity contracts for difference as a means of gaining exposure to the economic performance and cash flows of an equity security without the need for taking or making physical delivery of the security. A contract for difference is a financial instrument linked to an underlying share price. Consequently, no rights are acquired or obligations incurred relating to the underlying share and the Fund may buy or sell depending on the fund manager's view of a company's share price. Contracts for difference are highly leveraged instruments and for a small deposit it is possible for Fund to hold a position much greater than would be possible with a traditional investment. These are valued daily based on quoted market prices at the balance sheet date. Contracts for difference are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

The fair value of contracts for differences is the difference between the opening price and the volume weighted average price of the financial instrument multiplied by the number of shares specified within the contract.

(vi) Interest rate swaps

Interest rate swaps may be used as a substitute for a physical security or a less expensive or more liquid way of obtaining desired exposures. These are valued daily using market vendors and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Interest rate swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Some of the interest rate swaps are centrally cleared positions. In a centrally cleared swap, immediately following execution of the swap agreement, the swap contract is novated to a clearing counterparty and the Funds faces the clearing counterparty through a broker. Upon entering into a centrally cleared swap the Funds are required to deposit initial margin with the broker in the form of cash in an amount that varies depending on the size and risk profile of the swap.

(vii) Total return swaps

Total Return swaps may be used as a substitute for investing in standardised exchange traded funds, futures or options contracts. Total return swaps involve the exchange of the right to receive the total return, dividends or coupons plus capital gains or losses, of a specified reference asset, index or basket of assets against the right to make fixed or floating payments. Any assets to be received by the Funds will be consistent with the investment policies of the Funds. Where the Funds enter into a total return swap on a net basis, the two payment streams are netted out, with the Funds receiving or paying, as the case may be, only the net amount of the two payments. These are valued daily using market vendors, except GAM Systematic Alternative Risk Premia which uses counterparties valuation, and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Total return swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(viii) Inflation swaps

Inflation swaps would typically be used for investment purposes where a fixed payment is exchanged for a variable payment linked to a measure of inflation. These are valued daily using market vendors and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Inflation swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(ix) Swaptions

Swaptions may be used to give Funds the option to enter into an interest rate swap agreement on a specified future date in exchange for an option premium. Swaptions would generally be used to manage the Fund's interest-rate and volatility exposures. They may be used as a substitute for physical securities or a less expensive or more liquid way of obtaining desired exposures. Swaptions are valued daily and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Swaptions are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Notes to the Financial Statements

2. Accounting policies, continued

(c) Income from Investments

Dividend income is recognised on the ex dividend date. All dividends on investments quoted ex dividend up to the Balance Sheet date are included in the Profit and Loss Account.

Bank and other interest receivable is accrued up to this date. Income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Profit and Loss Account, and net of attributable tax credits.

Bond interest income on investments on debt securities is recognised when earned using the effective interest method and is shown in the Profit and Loss Account. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the net carrying amount of the financial asset or liability.

Cash inflows relating to interest payments on swaps are treated as swap income and are shown in the Net gains/(losses) on investments at fair value in the Profit and Loss Account.

(d) Foreign Currency Translation – Functional currency and Presentation currency

The financial statements of the individual Funds are prepared in the functional currency of the respective Fund which is also the presentation currency. The functional currency of each Fund is listed in note 1. The functional currency of the Company is US dollar as this reflects the global exposure of the Funds, their shareholders and the markets in which the Funds are available. The aggregated financial statements of the Company are prepared in the presentation currency of the Company, the US dollar. Amounts of the individual Funds in overseas currencies are translated for the purpose of the aggregation as follows:

- (i) Using average exchange rates (as an approximation of actual) for the year for the Profit and Loss Account.
- (ii) Using average exchange rates (as an approximation of actual) for the year for the proceeds and cost of issue and redemption of shares for the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.
- (iii) Using year end exchange rates for the Balance Sheet.

For the purposes of producing the aggregated financial statements, the notional currency gain or loss on the re-translation of the opening net assets into US dollar, the presentation currency of the Company, is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This figure also includes the notional gain or loss from use of average rates as noted above compared to the year end exchange rates for the Balance Sheet.

Transactions and balances

Foreign currency transactions are translated into the functional currency of the individual Funds using the average exchange rates (as an approximation of actual). Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Profit and Loss Account. Translation differences on non monetary assets and liabilities are recognised in the Profit and Loss Account within net gains/(losses) on investments at fair value line.

(e) Fees and expenses

Fees and expenses are accounted for on an accruals basis and are charged against income and used in determining the distribution.

(f) Allocation of income

All the income of the Funds after deduction of expenses, will be allocated between holders of accumulation shares and holders of income shares in accordance with their respective interests.

(g) Equalisation

An equalisation account is maintained by each Fund so that the amount distributed is the same for all shares of the same type notwithstanding different dates of issue. A sum equal to that part of the price of a share which reflects the net income at the date of issue or redemption is booked to the equalisation account and added or deducted to/from the first dividend or accumulation in the same accounting period as that in which the shares are issued or redeemed.

(h) Redeemable participating shares

The issued redeemable participating share capital is at all times equal to the net asset value of the Company. Redeemable participating shares are redeemable at the shareholders option and are classified as financial liabilities. Redeemable shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's net asset value. The redeemable share is carried at the redemption amount that is payable at the balance sheet date if the holder exercises the right to put the share back to the Company. The movement in the number of participating shares is set out in note 18. Each Fund's Net Asset Value ("NAV") per share is calculated by dividing the NAV of each Fund being the value of its assets less its liabilities by the numbers of shares of each Fund then in issue.

(i) Distributions

Dividend distributions to redeemable participating shareholders are classified as finance costs in the Profit and Loss Account in the year in which they are declared. Where both Income Shares and Accumulation Shares in a Fund are in issue, all income of a Fund after deduction of expenses will be allocated between holders of Accumulation Shares and holders of Income Shares in accordance with their respective interests.

(j) Sundry income

Sundry income includes amounts received by the Company in respect of litigation payments, fee rebates received and in respect of securities lending income. These amounts are recorded on an accruals basis.

(k) Taxes

Liabilities relating to uncertain tax positions are accrued only when such liabilities are probable and can be estimated with reasonable accuracy. This figures are recognised in the Balance Sheet within capital gains tax payable line.

(l) Bank interest expense

Bank interest expenses relate to a bank overdraft which is repayable on demand. This figures are recognised in the Profit and Loss Accounts within bank interest line.

Notes to the Financial Statements

3. Financial risk management

The investment objectives of the Funds may expose the Company to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk (including cash flow risk) both directly through its own assets and liabilities and indirectly through the assets and liabilities of the investee funds.

As outlined in the Prospectus, the Funds are subject to certain investment restrictions and may also use certain derivative financial instruments for both investment purposes and also in an attempt to moderate certain risk exposures. Further, the Board of Directors of the Company have the power to borrow on a temporary basis. Such borrowing will not exceed 10 per cent of a respective Fund's net assets.

Financial risk management of the Company has been delegated by the Board of Directors (which however remains ultimately responsible) to GAM International Management Limited, the Co-Investment Manager. The Board of Directors review the performance of the Company on a quarterly basis and can confirm that there have been no significant changes to risk management procedures since the prior year.

(a) Market price risk

The Funds' investments are susceptible to market price risk arising from uncertainties about future prices. It represents the potential loss the Company might suffer through holding market positions in the face of price movements caused by factors specific to the individual investment or factors affecting all instruments traded in the market.

For those Funds which do not use the Value at Risk ("VaR") approach, the Co-Investment and Delegate Investment Managers use the analysis of the Funds investment by Strategy, Sector and Asset Type which show the concentrations of risk and are disclosed in the relevant Portfolio Statement of each Fund.

The Co-Investment and Delegate Investment Managers manage market risk on an ongoing basis by implementing a set of procedures and controls, for those funds which use the VaR approach, the purpose of which is to manage risk within defined parameters. The Co-Investment Managers regularly review and evaluate each Fund's VaR to assess exposure to market risk. Risk can be calculated using either the commitment approach or VaR method. VaR analysis for each Fund is shown on pages 575 to 576.

Notes to the Financial Statements

i) Sensitivity analysis for Funds

The following market price sensitivity analysis is disclosed for those Funds.

At 30 June 2018 and 30 June 2017 if the fair value of investments had changed by 5% with all other variables held constant, this would have resulted in a change of net assets attributable to holders of redeemable shares and would amount to the following:

	30 June 2018	30 June 2017
GAM Star Absolute Return Bond	€34,744,434	€46,906,226

Notes to the Financial Statements

3. Financial risk management, continued

(b) Currency risks

The Funds may hold assets and liabilities denominated in currencies other than their respective functional currency. Therefore they may be exposed to currency risk, as the value of the assets and liabilities denominated in other currencies may fluctuate due to changes in exchange rates.

The Co-Investment Managers and Delegate Investment Managers monitor the currency exposure each dealing day whether used for hedging or investment purposes in accordance with the Prospectus. Currency exposure used for hedging techniques is normally done in order to remove or reduce currency risks within the relevant Fund where appropriate.

Currency risk sensitivity analysis

At 30 June 2018 and 30 June 2017, had the exchange rate between the functional currency and the non functional currencies arising from changes in the value of monetary assets/(liabilities) and hedging positions of the Funds changed by 5%, with all other variables held constant, the impact on net assets attributable to holders of redeemable shares would be as per the below table. Note that this is only applicable to those Funds that do not use the VaR model. Other Funds may not be listed below as they did not hold monetary assets/(liabilities) in non functional currencies at 30 June 2018 and 30 June 2017.

	30 June 2018	30 June 2017
GAM Star Absolute Return Macro	€3,850,689	€4,158,157

GAM Star Worldwide Equity	US\$341,865	US\$165,328

(c) Net currency hedging

The tables overleaf sets out the Funds' exposure to foreign currency risk, the notional value of the forward foreign currency exchange contracts designed to hedge this exposure and the resulting net unhedged amounts invested in assets denominated in foreign currency.

In addition to currency risk on a Funds' assets, a class of Shares of a Fund may be designated in a currency other than the functional currency of the Fund. Changes in the exchange rate between the functional currency and such designated currency may lead to a depreciation of the value of such Shares as expressed in the designated currency. Depreciation of that nature may also occur as a result of changes in the exchange rate between the designated currency of a particular class and the currency of denomination of the assets of the Fund attributable to that class. The Fund's Investment Manager may or may not try to mitigate these risks by using financial instruments such as forward foreign currency exchange contracts. Although hedging strategies may not necessarily be used in relation to each class of Share within a Fund, the financial instruments used to implement such strategies shall be assets/liabilities of the Fund as a whole. However the gains/losses on and the costs of the relevant financial instruments will accrue solely to the relevant class of Shares of the Fund.

Notes to the Financial Statements

3. Financial risk management, continued

(c) Net currency hedging, continued

For those Funds not shown below, all assets/liabilities are in the functional currency of the Fund and are therefore not subject to foreign currency risk.

Notes to the Financial Statements

3. Financial risk management, continued

(d) Interest rate risk, continued

The majority of the assets of the other Funds are equity shares and other investments which neither pay interest nor have a maturity date. As a result, these Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

The majority of the cash positions of the Company were held with State Street Bank and Trust, earning interest rates which are based on current LIBOR rates less a spread as determined by the Depositary. This interest rate risk is not actively managed.

(e) Credit risk

The Company may be exposed to credit risk, which is the risk that a counterparty to a financial transaction with the Company will be unable to pay amounts in full when due.

For Funds which hold equities, transactions are in exchange traded securities and are settled/paid for upon delivery (DVP Trades) and the risk of default is considered minimal, as security delivery and payment are simultaneous. The trade will fail if either party fails to meet its obligation.

The Company, through the investment in investee funds, may also be exposed to any credit risk which these investee funds have at any point in time. The maximum credit risk which the Company may have in relation to these investments is the value of its investment in the funds.

Investments in bonds and debt income securities are subject to risk (generally lower where securities are rated above investment grade) that payments may not be made by issuers on due dates or at all.

The Co-Investment and Delegate Investment Managers manage credit risk for cash and derivatives by only using approved counterparties that belong to an internationally recognised financial services firm or alternatively command a high market share in a given market segment. The Company's intention would be to net its liabilities due to any counterparty against any asset due from the same counterparty. Details of investments and cash held with various brokers are disclosed in the relevant Portfolio Statement of each Fund and in note 15.

The Company participated in securities lending as disclosed in note 5. The Company ensures that collateral received in respects of securities lent must equal or exceed, in value, at all times, the value of the securities loaned.

The majority of the investments, cash held by each Fund are with the Depositary. Cash and bank balances and margin cash balances are unsecured balances held with the Depositary and counterparties as set out in note 15. Bankruptcy or insolvency of the Depositary or brokers it uses may cause the Company's rights with respect to its cash and investments held by the Depositary or brokers to be delayed or limited. Please refer to note 5 for amounts held as collateral for stock lending as 30 June 2018 and 30 June 2017.

The Company's investments held with the Depositary are held within segregated accounts. Any profit (net of margin held by the Company) on over the counter derivatives due from counterparties is unsecured. At 30 June 2018 and 30 June 2017 the credit rating of the Depositary was equal to A according to Standard & Poor's.

(f) Liquidity risk

The majority of Funds are exposed to daily cash redemptions of redeemable shares and therefore may be exposed to liquidity risk and cash flow risk which is the risk that they will encounter difficulty in liquidating assets to fund redemptions. However, as the Funds invest the majority of their assets in investments that are traded in active markets and can be readily disposed of, liquidity risk and cash flow risk is considered low. The investment managers manage this liquidity risk and cash flow risk through the diversification of investments and investment strategies and through their overall investment approach.

The Company may from time to time invest in derivative contracts traded over the counter and certain other investments, which are not traded in an organised market and may be illiquid. As a result, the Company may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as deterioration in the credit worthiness of any particular issuer. Details of open derivative contracts are disclosed in the relevant Portfolio Statement of each Fund.

The table groupings analyses the Company's Financial Liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows.

All liabilities of the Funds including the net assets attributable to redeemable participating shareholders are due within one month with the exception of the following Funds:

(g) Gains and losses on financial assets and financial liabilities

In the event of liquidity issues, the Company may borrow to meet redemptions. The Directors are also entitled to limit the number of shares of a Fund redeemed on any dealing day to 10% of the total number of shares of that Fund in issue.

The net gains and losses from trading in financial assets and financial liabilities shown in the Profit and Loss Account are analysed in note 13 to the financial statements.

Notes to the Financial Statements

4. Fair value hierarchy

The Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;

Level 2: Inputs other than quoted prices from active markets that are observable for the asset or liability either directly or indirectly, including inputs from markets that are not considered to be active;

Level 3: Inputs that are unobservable and are significant to the valuation.

The Company uses the "market approach" valuation technique to value its investments. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" may require significant judgement but can generally be considered as that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorization of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the risk of that instrument.

Investments typically classified within level 1 include active listed equities, exchange traded derivatives and certain Government bonds. Investments typically classified within level 2 include investments in corporate bonds, certain Government bonds, certain listed equities and over the counter derivatives. Investment funds are also considered level 2 investments if there is evidence that redemptions occurred during the year and there were no restrictions preventing redemptions at the year end. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market information. Investments typically classified within level 3 include certain corporate bonds, private equities and investment funds that have suspended redemptions, created side pocket classes or imposed gates. Within level 3, the use of the market approach generally consists of using comparable market transactions. The level 3 investments fair values of GAM Star Absolute Return Macro and GAM Star Dynamic Global Bond investments in unquoted debt securities are derived from a discounted cash flow model based on contractual future cash flows to be received, discounted at an appropriate rate. The key unobservable input is the discount rate applied to contractual future cash flows, the main element of which is the margin to reflect credit risk. The discount rate is an Interpolated UK Gilt yield matching the average life of the asset plus the purchase price credit spread (400bps).

5. Securities lending

During the year ended 30 June 2018 and 30 June 2017, the Company participated in securities lending with State Street Custodial Services (Ireland) Limited (the "Securities Lending Agent"). The Company and the Securities Lending Agent receive 80 per cent and 20 per cent respectively of the securities lending income.

The Company earned securities lending income of:

	CCY	30 June 2018	30 June 2017
GAM Star Alpha Technology	US\$	25,912	47,513
GAM Star Technology	US\$	429,503	311,226

State Street Custodial Services (Ireland) Limited also received securities lending income of:

	CCY	30 June 2018	30 June 2017
GAM Star Alpha Technology	US\$	6,478	11,878
GAM Star Technology	US\$	107,375	77,807

The value of securities lent and collateral received was:

	CCY	30 June 2018	30 June 2018	30 June 2017	30 June 2017
		Securities lent	Collateral received	Securities lent	Collateral received
GAM Star Alpha Technology	US\$	1,510,751	1,556,262	1,004,272	1,042,766
GAM Star Technology	US\$	30,034,278	31,152,212	8,523,482	8,957,898

The collateral noted above, consisted of sovereign bonds issued by the governments of the following countries: Belgium, Canada, France, Germany, Sweden, Switzerland, the Netherlands, the United Kingdom and the United States of America.

6. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (as amended). It is not chargeable to Irish tax on its income and gains. However, tax can arise on the happening of a "Chargeable Event" in the Company. A Chargeable Event includes any distribution payments to shareholders or any encashment, cancellation, redemption or transfer of Shares.

No Irish tax will arise on the Company in respect of Chargeable Events in respect of a shareholder who is not an Irish Resident and not Ordinarily Resident for tax purposes in Ireland at the time of the Chargeable Event provided that the appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act 1997, (as amended), are held by the Company; and certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations. Following changes introduced by Finance Act 2010, investment undertakings will no longer be required to obtain relevant declarations from shareholders who are neither Irish Resident nor Ordinarily Resident in Ireland where the investment undertaking is not actively marketed to Irish investors and the Irish Revenue have given the investment undertaking the appropriate approval. With effect from 3 April 2010 a chargeable event will not arise if at the time of the chargeable event appropriate equivalent measures have been put in place by the Company to ensure that shareholders in the Company are neither Irish Resident nor Ordinarily Resident in Ireland and the Company has received approval from the Irish Revenue Commissioners to this effect and the approval has not been withdrawn.

Dividends, interest and capital gains (if any) which the Company receives with respect to its investments may be subject to taxes, including withholding taxes, in the countries in which the issuers of the investments are located and such taxes may not be recoverable by the Company or its shareholders.

7. Feeder funds

The aggregate charges of GAM Star Absolute Return Bond and the master fund GAM Multibond Absolute Return Bond Fund are €7,421,127 (30 June 2017: €9,910,331); the aggregate charges of GAM Star Absolute Return Bond Defender and the master fund GAM Multibond Absolute Return Bond Fund Defender are €358,133 (30 June 2017: €455,721), the aggregate charges of GAM Star Absolute Return Bond Plus and the master fund GAM Multibond Absolute Return Bond Fund Plus are €7,490,851 (30 June 2017: €9,894,711).

Notes to the Financial Statements

8. Exchange rates

The average exchange rates used to convert the Statement of Comprehensive income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Share were:

	30 June 2018	30 June 2017
Euro	0.8399	0.9179
Pound sterling	0.7429	0.7890
Japanese yen	110.3912	109.1363

The rates of exchange used to translate assets and liabilities to US dollars at the year end are:

	30 June 2018	30 June 2017

9. Soft commission arrangements

With effect from 1 January 2018 all Delegate Investment Managers and Co-Investment Managers ceased to enter into soft commission arrangements.

Up to the 31 December 2017 and during the year ended 30 June 2017, the Delegate Investment Managers of GAM Star Capital Appreciation US Equity and GAM Star Global Selector entered into soft commission arrangements with third parties under which the third party provides each Delegate Investment Manager with research and research products which are used to assist in the provision of investment services to the relevant Fund.

The Co-Investment Manager in respect of GAM Star Absolute Return Macro, GAM Star Alpha Technology, GAM Star Continental European Equity, GAM Star Emerging Equity, GAM Star European Equity, GAM Star Technology and GAM Star Worldwide Equity entered into commission sharing arrangements with third parties under which the third party commissions are used to provide other third party research products to assist in the provision of investment services to the relevant Fund. No other Fund engaged in soft commission arrangements during the years ended 30 June 2018 and 30 June 2017.

10. Use of derivatives for Efficient Portfolio Management

Subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland, and except as otherwise stated in the investment objective and policies of a Fund, the Investment Managers and/or Co-Investment Manager(s) may employ, for certain Funds, investment techniques and instruments such as futures, options, forward foreign currency exchange contracts and other derivatives for investment purposes or efficient portfolio management. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future, and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank of Ireland.

For UCITS which have engaged in efficient portfolio management techniques, disclosures are required under the Central Bank UCITS Regulations. The Investment Managers of the Funds have identified that all financial derivative instruments are transactions designed to deliver additional returns through Efficient Portfolio Management.

Details of all open transactions at the year end are disclosed in the Portfolio of Investments.

Securities lending transactions

Certain Funds may also utilise stocklending agreements for efficient portfolio management purposes as described above. In such transactions the Fund may temporarily transfer its securities to a borrower, with agreement by the borrower to return equivalent securities to the Fund at a pre-agreed time. Refer to note 5 for further information on securities lending.

Notes to the Financial Statements

11. Significant agreements and transactions with related parties

The Company and the Directors

Andrew Bates is a partner of Dillon Eustace, legal advisers to the Company, and may have an interest in the following transactions and balances with Dillon Eustace:

- The Company paid US\$245,035 (2017: US\$309,512) to Dillon Eustace for legal fees during the year ended 30 June 2018.
- Dillon Eustace received a fee at the annual rate of US\$20,000 (2017: US\$20,000) gross subject to income tax deductions for the provision of a Director to the Company for the year ended 30 June 2018.

David Dillon, Burkhard Poschadel (resigned: 31 December 2017), Daniel O'Donovan and Deborah Reidy (appointed: 2 May 2018) each received a fee at the annual rate of US\$20,000 (2017: US\$20,000) gross subject to income tax deductions for their services as Directors to the Company for the year ended 30 June 2018.

Burkhard Poschadel was also a Director of GAM Fund Management Limited (resigned: 31 December 2017).

Andrew Hanges was a Director of GAM International Management Limited (resigned: 18 May 2018) and is a Director of GAM Multibond. GAM International Management Limited, the Co-Investment Manager of GAM Star Absolute Return Bond, GAM Star Absolute Return Bond Defender and GAM Star Absolute Return Bond Plus also manages GAM Multibond Absolute Return Bond Fund, GAM Multibond Absolute Return Bond Fund Defender and GAM Multibond Absolute Return Bond Plus.

Andrew Hanges was also a Director of GAM (Luxembourg) S.A. (resigned: 5 June 2018). The GAM Star Lux funds held by GAM Star Flexible Global Portfolio have appointed GAM (Luxembourg) S.A. as management company and GAM Capital Management (Switzerland) AG as investment manager. Both GAM (Luxembourg) S.A. and GAM Capital Management (Switzerland) AG are members of the GAM Group.

The Company and the Manager, the Sponsor and the Investment Managers

At the year end, accrued expenses included amounts owing to the Manager, the Sponsor and the Investment Managers of US\$15,424,899 (2017: US\$11,840,979).

See note 5 for details of securities lending income earned by the Manager.

Any such transactions have been entered into the ordinary course of business and on normal commercial terms.

The Directors are not aware of any other related party transactions except for those disclosed in these financial statements.

The Company invests in other funds that are also managed by the investment managers of the Company. These trades have been carried out at arm's length in the ordinary course of business. The terms and returns received by the Company in making these investments were no more favourable than those received by other investors investing into the same share classes. There are no management fees charged on these investments at the Company level.

12. Performance fee

The Co-Investment Manager may be entitled to receive an annual performance fee on certain classes of some Funds. Any performance fee is accrued on each valuation day and paid annually in arrears at the end of June each year and is based on net realised and net unrealised gains and losses of the relevant classes subject to a high water mark and a benchmark where relevant. Therefore the amount outstanding for the performance fee at the end of each year is the same as the amount expensed for that year.

Please refer to Note 14 for details of the performance fee expensed by Fund.

Notes to the Financial Statements

17. Share capital

At 30 June 2018

Authorised

The authorised share capital of the Company is €60,000 divided into 30,000 subscriber shares of €2.00 each and 10,000,000,000 shares of no par value initially designated as unclassified shares.

Subscriber shares

The issued share capital of the Company as at 30 June 2018 is €60,000 divided into 30,000 subscriber shares of €2.00 each, of which €9,529.70 has been paid up and which are beneficially owned by the Manager. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only.

In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund.

Redeemable participating shares

1,814,399,974 (2017: 1,414,353,380) redeemable participating shares of no par value designated in different classes in different Funds have been issued as shares at the discretion of the Manager. The issue price is payable in full on acceptance. The shares carry no preferential or pre-emptive rights.

The movement in the number of redeemable shares for the year ended 30 June 2018 and 30 June 2017 are as follow:

Notes to the Financial Statements

20. Contingent liabilities

The Directors are not aware of any contingent liabilities.

21. Auditors remuneration

The fees charged by the auditors for the period ended 30 June 2018 and the period ended 30 June 2017 are as follows:

	30 June 2018 US\$	30 June 2017 US\$
Auditor's remuneration*		
Statutory audit	735,802	766,352
Tax advisory services	176,812	186,052
	912,614	952,404

* Figures are shown before Value Added Tax.

22. Significant events during the year

A new prospectus was issued on 20 December 2017.

With effect of 11 July 2017 GAM Star Global Equity changed its name to GAM Star Dynamic Growth and GAM Systematic Diversified Macro changed its name to GAM Systematic Core Macro.

On 1 July 2017 GAM Star North of South EM Equity was renamed GAM Star Emerging Equity and Tim Love of GAM International Management Limited replaced Matt Linsey of North of South Capital LLP as Investment Manager.

Effective 31 October 2017 GAM Star Alternative Fixed Income changed its name to GAM Star Absolute Return Macro.

On the 27 November 2017, GAM Sterling Special Bond Inc., GAM Euro Special Bond Inc. and GAM US Dollar Special Bond Inc. merged into the GAM Star Credit Opportunities (GBP), GAM Star Credit Opportunities (EUR) and GAM Star Credit Opportunities (USD), respectively.

Burkhard Poschadel resigned as a Director of the Company with effect from 31 December 2017.

With effect from 1 January 2018 all Delegate Investment Managers and Co-Investment Managers ceased to enter into soft commission arrangements.

Effective from 1 January 2018, the Investment Manager for GAM Star India Equity has changed from New Horizon Wealth Management to GAM International Management Ltd.

Effective from 1 January 2018, the Investment Manager for GAM Star Global Selector has changed from Dalton Investments LLC to GAM International Management Ltd.

Effective from 1 February 2018, the Investment Manager for GAM Star US All Cap Equity and GAM Star Global Quality has changed from Manning & Napier Advisors LLC to GAM International Management Ltd.

Effective from 6 June 2018 GAM Star no longer has sub-funds registered in Hong Kong.

Notes to the Financial Statements

23. Events since year end

On 1 August 2018, the Board of Directors of the Company (the "Board") suspended the calculation of the net asset value and all subscriptions and redemptions relating to the following Funds with effect from 31 July 2018, in order to protect the interests of the shareholders after receiving exceptionally large redemption requests:

- GAM Star Dynamic Global Bond
- GAM Star Absolute Return Bond
- GAM Star Absolute Return Bond Plus
- GAM Star Absolute Return Bond Defender

On 27 August 2018, the Board determined to discontinue the operation of four sub-funds of the Company (collectively the "Funds" comprising the GAM Star Dynamic Global Bond and the following three feeder funds being the GAM Star Absolute Return Bond, the GAM Star Absolute Return Bond Plus and the GAM Star Absolute Return Bond Defender (the "Feeder Funds")) by compulsorily repurchasing all outstanding shares of each Fund on a staggered basis as sufficient cash becomes available to pay shareholders, commencing 4 September 2018 (the "Termination Date"). The decision was taken in accordance with the Articles of Association of the Company on the basis that, given the number of shares of each of the Funds in respect of which that Fund had received repurchase requests exceeded fifty per cent (50%) of the issued shares of that Fund and having regard to the size that each of the Funds would be after such repurchases and having regard to the ability of each Fund to continue to meet its investment objective after such repurchases, that this would be in the interests of any remaining shareholders of the Funds. The decision by the board of directors of GAM Multibond (a Luxembourg domiciled UCITS umbrella scheme) on 23 August 2018 to liquidate as of 31 August 2018 each of the three master funds into which the Feeder Funds invest was also a factor taken into account by the Board in its decision to discontinue the Feeder Funds.

To date the following percentage of shares have been compulsorily repurchased:

	4 September 2018	24 September 2018	21 November 2018
GAM Star Dynamic Global Bond	87%	4%	–
GAM Star Absolute Return Bond	74%	8%	7%
GAM Star Absolute Return Bond Plus	75%	7%	7%
GAM Star Absolute Return Bond Defender	80%	6%	6%

In order to facilitate the above compulsory repurchases of shares, the Board temporarily lifted the suspension of the calculation of the net asset values and all subscriptions and repurchases relating to the above Funds for the three dates.

Following the compulsory repurchase of shares of the above Funds on 21 November 2018, in order to protect the interests of all shareholders in the above Funds, the Board has decided to temporarily re-suspend the calculation of the net asset value and all subscriptions and repurchases relating to the above Fund with effect from 21 November 2018. The Board anticipates that a further payment of repurchase proceeds will take place in the coming months as the above Funds continue to liquidate their portfolios. Please see Report of the Directors for additional information.

On 18 October 2018, the Board in relation to GAM Star India Equity and GAM Star Keynes Quantitative Strategies have concluded that the current and projected assets under management for each sub-fund are no longer sufficient to support their continued operation. The Board have therefore resolved to close the sub-funds and return all invested capital to shareholders. As a result all shareholder positions were redeemed on 15 November 2018.

On 3 December 2018 an extraordinary general meeting of shareholders of GAM Star Global Quality will be held in relation to its proposed merger with GAM Star Worldwide Equity.

On 3 December 2018 an extraordinary general meeting of shareholders of GAM Star GAMCO US Equity will be held in relation to its proposed merger with GAM Star Capital Appreciation US Equity.

24. Approval of Financial Statements

The financial statements were approved by the Board on 3 December 2018.

Statement of Depositary Responsibilities

The Depositary is required under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended), and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015) (together "UCITS Regulations and Central Bank UCITS Regulations") to:

1. ensure that the sale, issue, repurchase, redemption and cancellation of shares effected by or on behalf of the Company are carried out in accordance with the UCITS Regulations and Central Bank UCITS Regulations and in accordance with the Memorandum and Articles of Association.
2. ensure that the value of shares is calculated in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Memorandum and Articles of Association.
3. carry out the instructions of the Company unless they conflict with the UCITS Regulations and Central Bank UCITS Regulations or the Memorandum and Articles of Association.
4. ensure that in transactions involving the Company's assets, any consideration is remitted to it within time limits which are acceptable market practice in the context of a particular transaction.
5. ensure that the Company's income is applied in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Memorandum and Articles of Association.
6. enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders. The Depositary's report shall be delivered to the Company in good time to enable the Company to include a copy of the report in its Annual Report. The Depositary's Report shall state whether in the Depositary's opinion the Company has been managed in that period:
 - (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association and the UCITS Regulations and Central Bank UCITS Regulations; and
 - (ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association and the UCITS Regulations and Central Bank UCITS Regulations.

If the Company does not comply with (i) or (ii) above, the Depositary must state why this is the case and outline the steps which the Depositary has taken to rectify the situation.

7. notify the Central Bank of Ireland promptly of any material breach of the UCITS Regulations and Central Bank UCITS Regulations, conditions imposed by the Central Bank of Ireland or provisions of the prospectus with regard to the Company.

The duties provided for above may not be delegated by the Depositary to a third party. These duties must be carried out in the State.

The Depositary also takes into its custody or under its control all the assets of the Company and holds them in safekeeping for the shareholders.

Report of the Depositary to the Shareholders for the year ended 30 June 2018.

We have enquired into the conduct of GAM Star Fund p.l.c. ('the Company') for the year ended 30 June 2018, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

We draw your attention to page 3 of the Report of the Directors and Note 23 Events since year end. Our opinion is not qualified in this respect.

State Street Custodial Services (Ireland) Limited

78 Sir John Rogerson's Quay
Dublin 2
Ireland

Date: 03 December 2018

Independent auditors' report to the members of GAM Star Fund p.l.c.

Report on the audit of the financial statements

Opinion

In our opinion, GAM Star Fund p.l.c.'s financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 30 June 2018 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Balance Sheet as at 30 June 2018;
- the Profit and Loss Account for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- the Portfolio Statement for each of the Funds as at 30 June 2018; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies.

Our opinion is consistent with our reporting to the Board of Directors.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by IAASA's Ethical Standard were not provided to the Company.

Other than those disclosed in note 21, we have provided no non-audit services to the Company in the period from 1 July 2017 to 30 June 2018.

Our audit approach

Overview

Materiality

- Overall materiality: 50 basis points of Net Assets Value ("NAV") at 30 June 2018 for each of the Company's Funds.

Audit scope

- The Company is an open-ended investment Company with variable capital and engages GAM Fund Management Limited (the "Manager") to manage certain duties and responsibilities with regards to the day-to-day management of the Company. We tailored the scope of our audit taking into account the types of investments within the Funds, the involvement of the third parties referred to below, the accounting processes and controls, and the industry in which the Company operates. We look at each of the Funds at an individual level.

Key audit matters

- Significant events that impacted the audit
- Valuation of certain Level 3 debt securities

Report on the audit of the financial statements, continued

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

Key audit matter	Key audit matter
<p>Significant events that impacted the audit</p> <p>See Report of the Directors and note 23 for significant events since year end.</p> <p>On 31 July 2018, GAM Holding AG, the ultimate parent of the Manager, announced the suspension of the investment director business unit head for the unconstrained/absolute return bond strategy ("ARBF"), following an internal investigation noting that the issues related to some of his risk management procedures and his record keeping in certain instances.</p> <p>On 2 August 2018, GAM Holding AG announced that all subscriptions and redemptions in its ARBF funds have been suspended following high levels of redemptions.</p> <p>On 28 August 2018, GAM Holding AG announced that the ARBF funds have obtained applicable approvals to start the liquidation process.</p> <p>On 25 September 2018, GAM Holding AG further announced that the internal investigation announced on 31 July 2018 commenced following concerns raised by an internal whistle-blower and that the internal investigation, supported by independent external counsel was launched in November 2017 and that in March 2018, the whistle-blower expanded on the initial concerns and contacted the FCA whilst keeping GAM Holding AG informed. This announcement also noted that:</p> <ul style="list-style-type: none"> the potential conduct issues identified by the investigation related to failure to conduct or evidence sufficient due diligence and failure to make accessible internal records of documents in certain instances; and that the investigation concluded that the investment director may have breached the company's signatory policy, may have used his personal email for work purposes and breached the company's gifts and entertainment policy. <p>The Company has 5 ARBF sub-funds as follows:</p> <ul style="list-style-type: none"> GAM Star Dynamic Global Bond Fund; GAM Star Absolute Return Macro Fund; GAM Star Absolute Return Bond Fund; GAM Star Absolute Return Bond Defender Fund; and GAM Star Absolute Return Bond Plus Fund. <p>The aforementioned investment director acted as the portfolio manager for these funds.</p> <p>We consider this to be a key audit matter as it had a significant effect on our audit.</p>	<p>We met with the GAM Holding AG's Chief Financial Officer, General Counsel, and Head of Investments, to obtain an understanding of the issues that were the subject of the investigation.</p> <p>We also met with the external legal counsel that supported the internal investigation.</p> <p>We considered the impact of the issues raised and the results of the investigation on our audit approach and designed additional audit procedures to address our assessment of increased risks of material misstatement in the financial statements. The additional procedures primarily related to the valuation of level 3 debt securities in the funds managed by the portfolio manager that was the subject of the internal investigation. These procedures are further described in the Key Audit Matter below "Valuation of certain Level 3 debt securities".</p>

Report on the audit of the financial statements, continued

Key audit matter	How our audit addressed the key audit matter
<p>Valuation of certain Level 3 debt securities</p> <p>See Portfolio Statement for each fund and refer to notes 2 and 4 to the financial statements.</p> <p>As set out in note 4 to the financial statements, the Company held a number of level 3 debt securities where no quoted market price is available at 30 June 2018. A number of these positions are held by the funds managed by the portfolio manager that was the subject of the internal investigation described in the Key Audit Matter above.</p> <p>The GAM Star Dynamic Global Bond Fund held directly two investments in level 3 debt securities representing 6.12% of the net asset value of that Fund at 30 June 2018. The GAM Star Absolute Return Macro Fund held directly an investment in a level 3 debt security representing 0.44% of the net asset value of that Fund at 30 June 2018. All three of these investments have the same issuer and terms.</p> <p>Management have used a discounted cash flow model to estimate the fair value of these investments. The key assumption used is the discount rate applied to future contractual cash flows. The main unobservable element of the discount rate is the margin to reflect credit risk.</p> <p>Management also requested 3 external brokers to provide indicative broker quotes for these securities as part of their valuation process.</p> <p>In addition to the direct holdings referred to above, the GAM Star Absolute Return Bond Fund, the GAM Star Absolute Return Bond Defender Fund and the GAM Star Absolute Return Bond Plus Funds are Feeder funds that invest in other GAM Funds ("Master Funds") that were also managed by the portfolio manager that was the subject of the investigation. The Master Funds also hold level 3 debt securities from the same issuer and on the same terms as those noted above at 30 June 2018. Through their investment in their respective Master Funds, the GAM Star Absolute Return Bond Fund, the GAM Star Absolute Return Bond Defender Fund and the GAM Star Absolute Return Bond Plus Fund, indirectly held investments in level 3 debt securities representing 5.88%, 3.36% and 7.50% of their net asset values at 30 June 2018.</p> <p>We considered the valuation of the investments referenced above to be a key audit matter because of the judgement involved in estimating their fair value and due to the matters raised in the internal investigation surrounding the portfolio manager.</p>	<p>We performed the following procedures on the level 3 debt securities assisted by our in-house valuation specialists:</p> <ul style="list-style-type: none"> – Obtained the discounted cash flow model prepared by the Co-Investment Manager and understood the inputs and discount rate used in this model; – Agreed the future cash flows used in the discounted cash flow model to the purchase agreement; – Assessed the reasonableness of the discount rate used as follows: <ul style="list-style-type: none"> o Considered the most recent audited financial statements for the corporate debt issuers and the guarantor of the level 3 debt securities; o Considered the most recent credit ratings issued by third party ratings agencies for the corporate debt issuer and guarantor of the level 3 debt securities; and o Considered the reasonableness of the inputs to the discount rate as at 30 June 2018. – Obtained confirmations independently of the indicative broker quotes obtained by Management; – Evaluated the competence, capabilities and objectivity of the brokers providing the indicative quotes obtained by management; – Compared the valuation as provided in the indicative broker confirmations to the valuation estimated by the discounted cash flow model prepared by the Co-Investment Manager; – Obtained confirmations of post year end indicative prices of the level 3 debt securities from the external brokers used by management as part of their valuation process. No material differences were noted since year end to the indicative prices provided at 30 June 2018; and – Considered the disclosures in respect of these investments. <p>We performed the following procedures in relation to the Master Funds managed by the portfolio manager that was the subject of the investigation:</p> <ul style="list-style-type: none"> – Requested and obtained the audited financial statements for the Master Funds; – Requested additional information from the Master Funds' auditors in accordance with the Information Sharing Agreement, including: <ul style="list-style-type: none"> o Results of valuation procedures performed over the relevant level 3 debt securities held on the Master Funds; and o Results of the additional audit procedures designed to address the assessment of increased risks of material misstatement in the financial statements of the Master Funds arising from the investigation. – We considered the consistency of the procedures performed and the results thereon with the work we performed on the level 3 debt securities. <p>We concluded that the assumptions and methodologies adopted by management to calculate the fair value of the level 3 debt securities described here were reasonable.</p>

Report on the audit of the financial statements, continued

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which it operates.

As at 30 June 2018 there are 45 Funds operating. The Company's Balance Sheet, Profit and Loss Account, and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders are an aggregation of the positions and results of the Funds.

The directors control the affairs of the Company and are responsible for the overall investment policy which is determined by them. The Company engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the Company. The Manager has delegated certain responsibilities to the Co-Investment Managers and Delegate Investment Managers (the 'Investment Manager') and to State Street Fund Services (Ireland) Limited (the 'Delegate Administrator'). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Delegate Administrator. The Company has appointed State Street Custodial Services (Ireland) Limited (the "Depository") to act as Depository of the Company's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a Fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the Company's interaction with the Delegate Administrator, and we assessed the control environment in place at the Delegate Administrator.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the Company's Funds as follows:

Overall materiality and how we determined it	50 basis points (2017: 50 basis points) of Net Assets Value ("NAV") at 30 June 2018 for each of the Company's Funds.
Rationale for benchmark applied	We have applied this benchmark because the main objective of the Company is to provide investors with a total return at a Fund level, taking account of the capital and income returns.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 2.5 basis points of each Fund's NAV, for NAV per share impacting differences (2017: 5 basis points of each Fund's NAV, for NAV per share impacting differences) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's and Funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's and Funds' ability to continue as going concerns.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Report of the Directors, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

Report of the Directors

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Report of the Directors for the year ended 30 June 2018 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Report of the Directors.

Report on the audit of the financial statements, continued

Corporate governance statement

- In our opinion, based on the work undertaken in the course of the audit of the financial statements, the description of the main features of the internal control and risk management systems in relation to the financial reporting process included in the Corporate Governance Statement, is consistent with the financial statements and has been prepared in accordance with section 1373(2)(c) of the Companies Act 2014.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit of the financial statements, we have not identified material misstatements in the description of the main features of the internal control and risk management systems in relation to the financial reporting process included in the Corporate Governance Statement.
- In our opinion, based on the work undertaken during the course of the audit of the financial statements, the information required by section 1373(2)(a),(b),(e) and (f) of the Companies Act 2014 is contained in the Corporate Governance Statement.

Responsibilities for the financial statements and the audit

Responsibilities of the Directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on pages 2 and 3, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Appointment

We were appointed by the directors on 20 February 1998 to audit the financial statements for the year ended 30 June 1998 and subsequent financial periods. The period of total uninterrupted engagement is 20 years, covering the years ended 30 June 1998 to 30 June 2018.

Additional Information and Regulatory Requirements (Unaudited)

Remuneration Disclosure

Qualitative disclosures

Decision-making process to determine remuneration policies

Under the GAM Group's framework ultimate responsibility in compensation matters is held by the Board of Directors. The Board is supported in compensation-related issues by the Compensation Committee ("CompC").

- The Board is responsible for establishing the Group Compensation Policy, and with support of the CompC regularly reviewing the Group Compensation Policy in order to meet any important regulatory developments and the objectives of the Group.
- The CompC is delegated with the role of supporting the Board in setting compensation guidelines, establishing share-based compensation plans and approving the aggregate variable compensation expenditure of the Group as well as determining and proposing to the Board the individual total compensation payable to the members of the Board (other than its Chairman) for approval. The CompC regularly reports to the Board on the status of its activities, the development of the compensation architecture within the Group as well as on the operational implementation of this Policy. The CompC consists of at least three members of the Board all of whom are Non-Executive Directors.
- The Compensation Management Committee ('CMC') has delegated authority from the CompC to provide support and advice to the CompC to ensure that the compensation policy and practices across GAM Holding AG Group operate in line with EU regulations that apply to its regulated entities and delegates. The CMC comprises of five members including four senior members from Risk, Legal, Compliance and Human Resources functions of the Group.

GAM Group's compensation philosophy is aligned with the Group's overall long-term objective of sustainable growth and profitability as well as its tolerance for risk. The Group's approach provides for compensation that attracts and retains employees in a given local market and motivates them to contribute to the development and growth of our business. The policy promotes sound and effective risk management and does not encourage inappropriate risk taking.

Link between pay and performance.

As described above, GAM Group operates a Group-wide remuneration policy, which applies to all employees across the Group including the above entities. The compensation structure is simple and straight-forward. It is first and foremost designed to safeguard the long-term success and prosperity of the shareholders. A robust performance management system forms part of the compensation process and enables us to reward success and minimise the possibility of payment for failure.

The composition of the elements within an individual's overall compensation is the result of the function and performance of the individual, including alignment with the Group's risk tolerances, market competitiveness and overall profitability. The Group's total compensation approach comprises fixed and variable compensation.

Fixed compensation includes base salary, which reflects seniority, experience, skills and market conditions, together with fixed allowances for certain employees in Switzerland consistent with customary local practice.

Variable compensation is awarded annually and is dependent on Group, business area and individual performance. Cash bonuses that are driven by activities that leave meaningful amounts of future risk with the Group, either via direct balance sheet exposure or through the potential for other negative income events are prohibited.

For members of the Group Management Board, a portion of variable compensation is paid in the form of deferred, share-based awards, reflecting their accountability for the operating results achieved and the impact of their decisions on the Group's future development.

In addition to members of the Group Management Board, other senior employees of the Group have a portion of their variable compensation deferred to provide alignment with long term interest of clients and shareholders.

Discretionary compensation decisions are based on individual's achievement of pre-set targets and contributions to the Group's development. This fosters a work ethic that is driven by high performance and tangible results.

Identified Staff

The categories of staff for inclusion as Identified staff for GAM Fund Management Limited include:

- Executive and non-executive members of the Board
- Other members of senior management
- Staff responsible for control functions

Directors of this regulated entity do not receive any kind of remuneration linked to their role. Should any remuneration be granted directors in the future, such remuneration will be fixed and not linked to the short-term results of the entity.

Additional Information and Regulatory Requirements (Unaudited)

Remuneration Disclosure, continued

The Identified Staff are identified and reviewed on an annual basis by the CMC in line with the criteria set out under EU regulations, namely:

If, in the performance of their professional activities certain staff of a delegate portfolio manager can have a material impact on the risk profiles of the funds they manage, these employees are considered as "Identified Staff". For this purpose the Group considers the respective delegate portfolio manager as subject to equally effective regulation if they are required by law and regulations or in accordance to internal standards to put in place a remuneration policy, which in accordance to the ESMA Remuneration Guidelines 2013/232 and 2016/575 is considered equivalent in its objectives. The Group's UCITS regulated entities will only delegate its portfolio management to firms, whose remuneration policy complies with the 'equivalence standard' as described.

Quantitative disclosures

The remuneration data provided below reflects amounts paid in respect of the performance year 2017 in relation to the UCITS funds managed by GAM Fund Management Limited.

GAM Fund Management Limited manages the UCITS funds, with a combined AUM of [€21,901m – equal to funds of the Management Company, including those managed by delegates at 31 December 2017].

Total annual remuneration paid to all Management Company employees	€6.6M
Of which fixed:	€5.7M
Of which variable:	€0.9M
Number of Management Company employees	84
Total Remuneration paid to Identified Staff in the Management Company	€2.4M
Of which paid to Senior Management:	€1.7M
Of which paid to other identified staff:	€0.7M
Total annual remuneration paid to employees in delegate(s):	€22.6M
Of which fixed:	€3.0M
Of which variable:	€19.6M

Notes

In the figures above, fixed remuneration relates to salary and pension benefits and variable remuneration includes the annual bonus including any long term incentive awards.

Where relevant, the remuneration information provided in the table above relates to a proportion of the amount of total fixed and variable remuneration paid to employees in the Management Company and its delegate(s) that relates to their UCITS activities.

Additional Information and Regulatory Requirements (Unaudited)

Additional Market Risk Notes

i) Funds which calculate risk using VaR

The VaR model is an estimate of the maximum loss each Fund may experience over any 20 day period, with a probability of 99%. The VaR is calculated by an external service provider using the historical simulation method using three years of weekly historical price data for the underlying securities. The VaR of the portfolio is stress tested on a fortnightly basis by running the VaR using current holdings against historical events. The VaR cannot take into account the fact that future market price movements may bear no relation to historical patterns as future market conditions could vary significantly from those experienced in the past.

VaR is an estimate of the maximum loss a Fund may suffer over a defined period and calculated with a specified confidence level. It is calculated for the investment pool of each Fund.

The level of leverage may be calculated in a number of ways:

Additional Information and Regulatory Requirements (Unaudited)

Additional Market Risk Notes, continued

i) Funds which calculate risk using VaR, continued

Sum of the notionals

This calculation has been disclosed in accordance with Central Bank requirements but it does not take into account any netting and hedging arrangements that a fund has in place. It is a "simple and easy to compute" formula of adding notional amounts without taking account of whether each derivative is used for risk reduction or otherwise, the disclosed sum of the notional amounts represents, in many cases, an inflated figure that fails to indicate the risk levels in a fund. For example, positions that economically offset risk, such as currency hedges, are required to be included in the gross notional calculation even though such transactions would reduce risk in a portfolio, thereby increasing the gross notional amount but actually creating a less risky product for the investor.

10 year equivalents

This is more relevant for fixed income funds and has been provided as a more appropriate leverage calculation for those type of funds. It measures the marginal impact on position value of a small change in interest rates such as a 1 bp move, and then to express that impact in terms of the quantity of the current 10-year note that would have the same sensitivity to rate moves.

	Leverage calculated at 30 June 2018 using		Leverage calculated at 30 June 2017 using	
	Sum of the notionals %	10 Year Equivalent unless otherwise indicated %	Sum of the notionals %	10 Year Equivalent unless otherwise indicated %

Additional Information and Regulatory Requirements (Unaudited)

Changes to the Prospectus

A new prospectus was issued on 11 July 2017 and addendum added on 8 September 2017 and 31 October 2017 to include:

Prospectus dated 11 July 2017

Material changes

1. Change to investment strategy of GAM Systematic Global Equity Market Neutral (the "Fund") to reflect the improved investment process of the delegate investment manager of the Fund. Increase in the leverage of the Fund as it is envisaged that the leverage will increase as a result of the change in investment policy.
2. Change of name of GAM Systematic Diversified Macro to GAM Systematic Core Macro and GAM Star Global Equity to GAM Star Dynamic Growth.
3. The use of derivatives within GAM Star Flexible Global Portfolio (the "Fund") was amended to allow the Fund to use Total Return Swaps.
4. The investment objectives and policies of the GAM Star Credit Opportunities (USD), GAM Star Credit Opportunities (EUR) and GAM Star Credit Opportunities (GBP) (the "Funds") were clarified such that it is not the intention of the investment manager of the Funds to invest in equity and equity linked securities but that any such holding of equity and equity linked securities will result from a corporate event. The ability of the Funds to invest in contingent convertible notes was also clarified.
5. Change in dealing frequency of GAM Star Global Rates from weekly to daily and removal of the notice period of 1 business day for redemptions.
6. Removal of the notice period of 5 business days for redemptions in respect of GAM Star Emerging Market Rates and the reduction in the performance fee from 20% to 10%.
7. The investment policies of GAM Star Asian Equity, GAM Star Asia-Pacific Equity and GAM Star China Equity (the "Funds") were amended to allow the Funds to invest in China A shares via Shenzhen Stock Connect.
8. GAM Capital Management (Switzerland) AG terminated as co-investment manager of GAM Star Composite Global Equity (the "Fund") on 30 June 2017 with GIML managing the Fund from 1 July 2017.
9. The investment policy of the GAM Star Emerging Equity (the "Fund") was amended to allow the Fund to invest in China A shares via Shenzhen Stock Connect.

Second Addendum dated 31 October 2017 to the Prospectus dated 11 July 2017

Material changes

1. Change of name of GAM Star Alternative Fixed Income to GAM Star Absolute Return Macro.

A new prospectus was issued on 20 December 2017 and addendum added on 1 February 2018 and 3 April 2018 to include:

Prospectus dated 20 December 2017

Material changes

1. Change to investment policy of the below listed sub-funds to allow them to comply with certain provisions of the German Investment Tax Act 2018 (as may be amended).
 - GAM Star Asian Equity
 - GAM Star Asia-Pacific Equity
 - GAM Star Capital Appreciation US Equity
 - GAM Star China Equity
 - GAM Star Continental European Equity
 - GAM Star Dynamic Growth
 - GAM Star Emerging Equity
 - GAM Star European Equity
 - GAM Star GAMCO US Equity
 - GAM Star Japan Equity
 - GAM Star US All Cap Equity
 - GAM Star Worldwide Equity
2. Establishment of R class shares within all sub-funds.
3. Establishment of new non-UK RFS share class for GAM Star Flexible Global Portfolio.
4. The resignation of Dalton Investments LLC as delegate investment manager of GAM Star Global Selector (the "Fund") with effect from 31 December 2017 with GAM Investment Management Limited managing the Fund.
5. The resignation of New Horizon Wealth Management as delegate investment manager of GAM Star India Equity (the "Fund") with effect from 31 December 2017 with GAM Investment Management Limited managing the Fund.
6. Additional wording added to the Markets in Financial Instruments Directive "MiFID II".

Second Addendum dated 3 April 2018 to the prospectus dated 20 December 2017

Material changes

1. With effect from 1 April 2018, GAM Fund Management Limited replaced GAM Limited as Global Distributor of the Company.
2. Establishment of ZIII classes and ZIII hedged classed for GAM Star MBS Total Return.

Additional Information and Regulatory Requirements (Unaudited)

Securities Financing Transactions

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU) No. 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs and total return swaps ("TRSs").

Securities lending

The below table details the value of securities on loan as a proportion of the Funds' total lendable assets and NAV as at 30 June 2018 and the income/returns earned for the year ended 30 June 2018. Total lendable assets are those assets held within the portfolio of the sub-funds that utilise security lending.

Fund	Currency	Securities on loan	
		% of lendable assets	% of NAV
GAM Star Alpha Technology	US\$	16.65	9.29
GAM Star Technology	US\$	13.09	9.45

Please refer to Note 5 for details on how the total income earned on securities lending transactions is split between the Company and the Securities Lending Agent and how much income was earned by each party during the year ended 30 June 2018.

The following tables detail the value of securities on loan and associated collateral received, analysed by borrowing counterparty as at 30 June 2018:

GAM Star Alpha Technology

Counterparty	Country of establishment	Securities on loan US\$	Non-cash Collateral received US\$
JP Morgan Securities Plc	United States	102,872	108,375
Morgan Stanley & Co International Plc	United Kingdom	79,564	94,221
UBS AG	United Kingdom	1,328,315	1,353,666
		1,510,751	1,556,262

GAM Star Technology

Counterparty	Country of establishment	Securities on loan US\$	Non-cash Collateral received US\$
JP Morgan Securities Plc	United States	2,037,274	2,146,250
Morgan Stanley & Co International Plc	United Kingdom	1,375,836	1,629,279
UBS AG	United Kingdom	26,621,168	27,376,683
		30,034,278	31,152,212

There were only three counterparties in use for Security lending purposes as at 30 June 2018. All securities lending contracts are settled on a bi-lateral basis. Non-cash collateral received in relation to securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the type, quality and maturity tenor of non-cash collateral received and posted by the Funds in respect of securities lending transactions as at 30 June 2018.

Fund	Collateral type	Currency	Maturity Tenor			Total
			Less than one year	One to five years	Greater than five years	
GAM Star Alpha Technology	Sovereign debt	US\$	748,030	625,677	182,555	1,556,262
GAM Star Technology	Sovereign debt	US\$	10,316,842	10,360,545	10,474,825	31,152,212

The maturity tenor analysis for Sovereign Debt securities received as collateral is based on the contractual maturity date. All non-cash collateral received by the Funds is held by the Depositary (or through its delegates) as at 30 June 2018.

The following table lists the ten largest issuers* by value of non-cash collateral received by the Funds across securities lending transactions as at 30 June 2018.

Fund	Collateral issuer	Value US\$	% of NAV
GAM Star Alpha Technology	US Government	1,556,262	9.57
GAM Star Technology	US Government	31,152,212	9.80

* There were no other issuers of non-cash collateral as at 30 June 2018.

Barclays Bank	United Kingdom	1,700	–
Goldman Sachs International	United Kingdom	9,378	–
JP Morgan Securities Plc	United States	(19,512)	170,000
		(8,434)	170,000

Additional Information and Regulatory Requirements (Unaudited)

Securities Financing Transactions, continued

All total return swaps held by the Funds are settled as Bi-Lateral contracts.

All derivative instruments (including total return swaps) are entered into by the Funds under an International Swaps and Derivatives Associations, Inc. Agreement ("ISDA Agreement") or similar agreement. An ISDA Agreement is a bilateral agreement between the Funds and a counterparty that governs all derivative instruments (including total return swaps) entered into by the parties. The parties' exposures under the ISDA Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all derivative instruments entered into by the Funds under the ISDA Agreement, not just total return swaps. All collateral received/posted by the Funds in relation to the ISDA Agreement is cash as at 30 June 2018. All of the cash balances have an open maturity. The cash collateral received and disclosed above is custodied with the depositary. Cash collateral received may be reinvested in accordance with the requirements of the Central Bank at the discretion of the Investment Manager.

The following tables disclose the returns of the swaps per Fund.

Fund	Net gains/losses US\$	Net return US\$
GAM Star Keynes Quantitative Strategies	(213,541)	(213,541)
GAM Systematic Alternative Risk Premia	1,839,296	1,839,296
GAM Star Tactical Opportunities	1,538,959	1,538,959
GAM Star Target Return	442,817	442,817
GAM Star Target Return Plus	173,980	173,980
	3,781,511	3,781,511

The costs incurred when entering a Swap transaction are incorporated into the price so cannot be disclosed separately.

Additional Information and Regulatory Requirements (Unaudited)

General Information

The Company

GAM Star Fund p.l.c. (the “Company”), an investment company with variable capital and segregated liability between Funds, is authorised by the Central Bank of Ireland (“the Central Bank”) as an undertaking for collective investment in transferable securities (“UCITS”) under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 211 of 2011) as amended.

The Manager

The Manager of the Company is GAM Fund Management Limited.

Dealing days

Shares may be purchased or sold on any day which is a business day in Dublin or alternatively such business day as stated in the Prospectus. In the case of all Funds, dealing will be at least twice a month. The Net Asset Value per share of each Fund will be determined on each Dealing Day at 23:00 hrs (UK time) or such other time as the Manager may determine in the base currency of the relevant Fund.

Application for shares

All applications should be made directly to the Manager or via the German information and distribution agent of the Company, the Austrian paying agent of the Company, or via the Swiss representative of the Company. Shares will be purchased on the relevant Dealing Day and a contract note will be sent to the purchaser. Prospective shareholders should note that the price of shares may go down as well as up.

Redemption of shares

Requests for redemption of shares and requests for the switch of shares can be submitted via the German paying agent of the Company, the Austrian paying agent of the Company, the Swiss representative of the Company or directly to the Manager. This should be done in writing by post, by facsimile, by email or by telephone.

Income distributions

Income distributions are normally made within two months of period end.

Availability of Prices

Prices are available from GAM Fund Management Limited, on www.gam.com and the Irish Stock Exchange.

Reports

Annual and semi-annual reports are issued.

Purchases and Sales

Please contact the Manager, the Swiss representative or other local GAM Contacts to obtain a complete list of all purchases and sales for any Fund free of charge.

Prospectus

Further details concerning the Funds are contained in the Prospectus and Prospectus Addendum, the Key Investor Information Documents of the Company and the Articles of Incorporation. Copies of these, as well as copies of the annual and semi-annual reports, are available on application to the Manager, to the UK facilities agent, the German and Austrian information agent as well as to the Swiss representative free of charge.

Place of performance and forum in Switzerland

In the case of shares which are distributed in Switzerland or from Switzerland, the place of performance and the forum are at the domicile of the Swiss representative of the Fund in Zürich.

Reporting Fund Status (relevant to UK Shareholders only)

It is the policy of the Company to apply to HM Revenue and Customs (“HMRC”) for certification of all Share classes (with the exception of GAM Star Alpha Spectrum and the non UK RFS Classes of the relevant Funds) as reporting funds as defined in the Offshore Funds (Tax) Regulations 2009.

GAM Star Fund p.l.c. is authorised as a UCITS pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 1989 and is subject to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015) and is a recognised scheme under the Financial Services and Markets Act 2000.

These financial statements are issued by the Company and made available to the shareholders by the Manager, which is regulated by the Central Bank of Ireland in respect of its fund administration and management activities. The Manager does not conduct investment business in the UK nor does it intend doing so. As the Manager is not an authorised person for the purposes of the Financial Conduct Authority, the contents of this report have been approved for issue in the UK by GAM London Limited, 20 King Street, London SW1Y 6QY (authorised and regulated by the Financial Conduct Authority) for the provision of investment services.

This report is not an invitation to subscribe for shares in any Funds described herein and is by way of information only. Subscriptions will only be received and shares issued on the basis of the current Prospectus for the Company. Shares in the Company are not available for sale in any jurisdiction in which such a sale would be prohibited. This document is not available for distribution in any jurisdiction where such distribution would be prohibited. Without limiting the generality of the preceding statement, in particular, shares in the Company are not available to US residents generally.

Investment involves risk. Please refer to the Prospectus for details of the risk factors, including those associated with investments in emerging markets and financial derivative instruments. Past performance is not a guide to future performance. The price of shares can go down as well as up and may be affected by changes in the rates of exchange. An investor may not get back the amount invested. No recommendation is made positive or otherwise regarding the individual securities mentioned in this document.

This document is intended solely for the use of the person to whom it is sent and may not be reproduced for any other person.
