KEY INVESTOR INFORMATION

THREADNEEDLE AMERICAN SELECT FUND (THE "FUND")

Class Z Accumulation Shares (GBP) GB00B7HJLD86, a sub-fund of Threadneedle Investment Funds ICVC (the "Company"), regulated by the FCA.
This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The Fund aims to increase the value of your investment over the long term. It currently looks to outperform the S&P 500 Index over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and invests at least 75% of its assets in a concentrated portfolio of shares of American (US) companies.

The Fund selects companies in which the fund manager has a high conviction that the current share price does not reflect the prospects for that business. These companies may be chosen from within any industry or economic sector, with significant sector and share weightings taken at the discretion of the fund manager. There is no restriction on company size, however, investment tends to focus on larger companies, such as those included in the S&P 500.

The S&P 500 Index is regarded as an appropriate performance measure of the US stock market, with around 500 of the largest US listed companies currently included. It provides a helpful benchmark against which the performance of the Fund can be measured and evaluated over time.

The Fund typically invests in fewer than 60 companies, which may include shares of some companies not within the Index. The Fund may also invest in other assets such as cash and deposits, and on occasion hold other funds (including funds managed by Columbia Threadneedle companies).

Income from investments in the Fund will be added to the value of your shares.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading “Investment Objectives, Policies and Other Details of the Funds”.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards — Higher Risk, Typically higher rewards

- The Fund is rated 5 because historically it has shown a medium to high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund has a concentrated portfolio (holds a limited number of investments and/or has a restricted investment universe) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund’s value.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.
