

# Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**ASI (SLI) Strategic Bond Fund, a Sterling denominated unit trust, Platform 1 Income Units (ISIN: GB00B6W21135). This fund is managed by Aberdeen Standard Fund Managers Limited.**

## OBJECTIVES AND INVESTMENT POLICY

### Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in government and corporate bonds issued anywhere in the worlds.

**Performance Target:** To exceed the Investment Association's Sterling Strategic Bond Sector average return over 1 year (after charges) and be top quartile over three years. The performance target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the performance target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund.

### Investment Policy

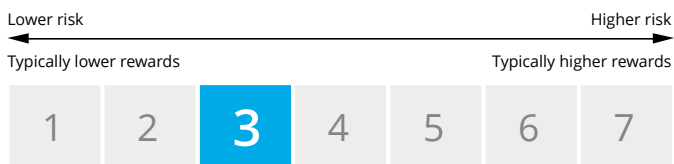

#### Portfolio Securites

- The fund will invest at least 80% in bonds issued anywhere in the world by governments, sub-sovereigns and corporations.
- The fund may also invest in investment grade, emerging market, high yield, inflation-linked, convertible, asset backed and mortgage backed bonds.
- At least 80% of the fund's investments will be in Sterling or will be subjected to techniques to reduce (hedge) risk related to currency movements on non-Sterling investments. The fund has some flexibility to seek returns from currencies.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments) and money-market instruments and cash.

#### Management Process

- The management team use their discretion (active management) to identify bonds and derivatives after analysing a company's prospects and creditworthiness alongside global economic and market conditions. They make flexible allocations across bonds and derivatives.

## RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- The fund invests in mortgage- and asset-backed securities which are subject to prepayment, extension, liquidity and default risk.
- Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid. For example, a coco bond can lose some or all of its value instantaneously if a trigger, such as the issuer experiencing capital shortfalls, occurs.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market

- The team also seek to reduce the risk of losses and the expected change (as measured by annual volatility) in the value of the fund, is not ordinarily expected to exceed 8%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the average fund of the Investment Association's Sterling Strategic Bond Sector over the long term.
- Please note: The fund's ability to buy and sell bonds and the associated costs can be affected during periods of market stress which could include periods where interest rates move sharply.

#### Derivatives and Techniques

- The fund will make routine use of derivatives to reduce risk, reduce cost and/ or generate extra income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.
- Derivatives can be used to generate growth, consistent with the fund's risk profile, if market prices are expected to rise ("long positions") or fall ("short positions").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

**Recommendation:** the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	0.79%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

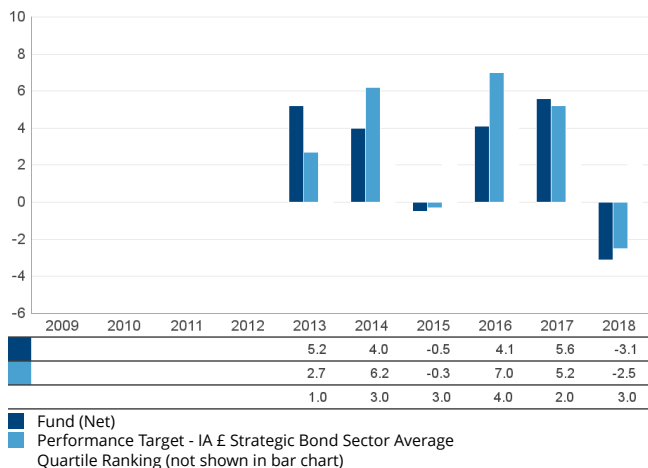

The ongoing charges figure reflects the amount based on expenses for the year ending 31/1/2018. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

For more information about charges, please see the Prospectus which is available at [www.standardlifeinvestments.com](http://www.standardlifeinvestments.com).

## PAST PERFORMANCE

ASI (SLI) Strategic Bond Fund, Platform 1 Income unit, 31 December 2018

% Returns

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 2009. The share/unit class was launched in 2012.

From 7 August 2019 the fund name was amended from Standard Life Investments Strategic Bond Fund to ASI (SLI) Strategic Bond Fund.
