## Premier Liberation No. VI Fund – Class B Shares

A sub-fund of Premier Liberation Fund

Class B Income Shares, ISIN no.GB00BN7ZF032

Authorised Corporate Director - Premier Portfolio Managers Ltd.

### Objectives and investment policy

The aim of the Fund is to grow the value of your original investment by more than the average cash deposit over the medium to long term.

The Fund will mainly invest in a broad range of funds from different investment groups. These underlying funds invest in a range of different assets including bonds, company shares, property and alternative assets and which can cover the world's stockmarkets.

The Fund is actively managed which means that the Fund Manager will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

#### Terms explained:

**Accumulation shares:** any income made by the Fund will be reinvested to grow the value of your investment.

**Income shares:** any income made by the Fund will be paid out to you.

**Corporate bonds:** issued by companies and similar to a loan in nature, usually paying a fixed rate of interest.

**Funds:** a general term used to describe collective investment schemes, such as unit trusts, open-ended investment companies and closed-ended investment companies.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is ranked as 4 because it has experienced medium rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The underlying assets held by the funds in which the Fund invests include equities and property both of which tend to experience higher volatility than fixed income or money markets but this is tempered by diversification across some other lower volatility asset classes. The Fund also has some exposure to emerging markets which tend to move in a more volatile fashion than developed markets.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Credit risk:** if the issuer of an underlying security is unable to make income payments or to repay its debt.
- **Liquidity risk:** during difficult market conditions some underlying securities, such as corporate bonds or emerging market equities, may become more difficult to sell at a desired price. Some securities may have special liquidity arrangements within their documentation which allow them to temporarily suspend redemption; the Fund does not currently hold any securities which have suspended redemptions.
- **Operational risk:** arising from investments in overseas markets, in particular emerging markets, which may not have the same level of safekeeping and other controls as UK markets
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
