

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General Global Inflation Linked Bond Index Fund Class I Income - ISIN: GB00BBHXM10

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide a mixture of income and growth (if the income is reinvested) by tracking the performance of the Bloomberg Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index.
- The Fund will invest predominantly in bonds (a type of loan which pays interest) included in the Index. These bonds will have a pre-set rate of income (either set at a fixed level or varying in a predetermined way).
- The Fund's investments will closely match those that make up the Index and this will be achieved through investing in a sample selection of the bonds in the Index. The bonds are issued in the relevant national currency by governments around the world (excluding the UK). The interest and capital returns on these bonds will be linked to local inflation rates.
- The bonds that the Fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- 35% or more of the Fund can be invested in United States government or public bonds.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- It will also use currency derivatives for investment purposes to manage the effect of fluctuations in exchange rates with sterling, in order to maintain accurate tracking.
- The Fund may also invest in other bonds, deposits, money market instruments and cash.

Other information:

- Your units will be income units. Income from the Fund's investments will be paid out to you every six months (as interest). This will reduce your capital growth accordingly.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in sterling (British pounds).
- This Fund is designed for investors looking for income and growth from an investment in global inflation linked bonds excluding those issued by the UK government.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower risk ← → Higher risk
Potentially lower rewards Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
 - The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - There may be differences in performance between the fund's assets and the derivatives used to manage the fluctuation of exchange rates with Sterling. This could result at times in the fund being over protected or under protected against these fluctuations.
 - This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

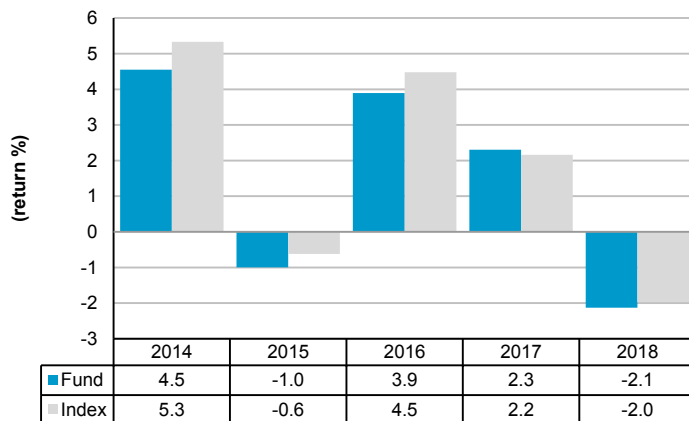

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.27%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
 - The ongoing charges figure is based on the latest available expenses at December 2018. This figure may change in the future.
 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.18% higher than the selling price at 31 December 2018.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested. The figures do not take account of any bid-offer spread or dilution levy or any transaction costs.
- The performance has been calculated in Sterling (British pounds).
- The Fund will not replicate the performance of its benchmark index perfectly. This is because the Fund will incur drags on performance such as expenses, tax and transactions costs, which the benchmark index is not subject to.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2013.
- This unit class launched in 2013.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Global Services SE, UK Branch.
- You can obtain further information about the Fund including copies of its prospectus and the latest annual and semi-annual reports at www.legalandgeneral.com/reports.
