

31 October 2019

Objective

To generate income and some growth over the long term (5 years or more) by investing in listed closed ended real estate investment trusts ("REITs") and equities (company shares) of companies engaged in real estate activities.

Performance Target: To achieve the return of the FTSE EPRA Nareit Developed (Hedged to GBP) Index + 2% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Portfolio Securities

- The fund invests at least 70% in REITs and equities and equity related securities of real estate related companies listed on global stock exchanges.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments), money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view of a company's prospects to that of the market, and which align with their views regarding future economic and business conditions.
- The FTSE EPRA Nareit Developed (Hedged to GBP) Index as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 6%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the FTSE EPRA Nareit Developed Index (Hedged to GBP) Index.

Derivative Usage

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations while meeting cash inflows or outflows, or to manage currency risk.

Fund Performance *

Price Indexed

The performance of the fund has been calculated over the stated period using bid to bid basis for a UK basic rate tax payer. The performance shown is based on an Annual Management Charge (AMC) of 0.75%. You may be investing in another shareclass with a higher AMC. The charges for different share classes are shown on the next page. For details of your actual charges please contact your financial adviser or refer to the product documentation.

"FTSE®" is a trade mark of the Exchange and the FT, "NAREIT®" is a trade mark of the National Association of Real Estate Investment Trusts and "EPRA®" is a trade mark of EPRA and all are used by FTSE under licence."

Risk Factors

The value of investments and the income from them can fall and investors may get back less than the amount invested.

A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector.

The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
