iShares J.P. Morgan ESG \$ EM Bond UCITS ETF

A sub-fund of iShares II plc

USD (Dist) Share Class

ISIN: IE00BDDRDW15

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Funds' investments, which reflects the return of the J.P. Morgan ESG EMBI Global Diversified Index, the Fund's benchmark index (Index).
 - ▶ The Share Class, via the Fund, aims to invest so far as possible and practicable in fixed income (FI) securities (such as bonds) that make up the Index.
 - ▶ The Index measures the performance of a sub-set of US Dollar denominated fixed and/or floating rate emerging market bonds issued by sovereign or quasi sovereign entities that are part of the J.P. Morgan EMBI Global Diversified Index (the "Parent Index"). The Index includes only bonds that meet the index provider's socially responsible investing ("SRI") requirements and environmental, social and governance ("ESG") rating criteria and criteria for an emerging market country.
 - ▶ The Parent Index does not apply a minimum credit rating requirement (i.e. a specified level of creditworthiness) to its constituents and bonds that are in default may be included. Bonds must have at least two and a half years until maturity, a minimum amount outstanding of USD 500 million and must settle internationally through Euroclear or another institution domiciled outside the issuing country.
 - ▶ The investable universe of the Index and the weighting of a security within the index is determined by ESG rules and eligibility criteria applied by the index provider. Issuers within the Parent Index are rated based on their ESG credentials through an ESG scoring methodology that allocates an ESG rating band (with 1 being the highest and 5 being the lowest) for each company. Bonds labelled 'Green' under the Climate Bonds Initiative are upgraded to the next ESG rating band unless the company is in ESG rating band 5. The Index excludes: (a) quasi sovereign entities that are identified by the index provider as (i) having any involvement in thermal coal, tobacco or weapons; and (ii) being violators of the United Nations Global Compact corporate sustainability principles; and (b) sovereign and quasi sovereign entities that score in ESG rating band 5. The weighting of the Index constituents is determined through applying the ESG rating band of a company as a multiplier to the market capitalisation weighting of a security in the Parent Index (i.e. ESG rating band 1 inherits 100% of its value from the Parent Index, ESG rating band 2 inherits 80% of its value from the Parent Index etc.). Each country is capped at 10%. The Index rebalances on a monthly basis.
 - ▶ The Fund's investments will, at the time of purchase, comply with the SRI and/or ESG rating requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
 - ▶ The Fund uses optimising techniques to achieve a similar return to its Index. These may include the strategic selection of certain securities that make up the Index or other FI securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
 - ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
 - ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
 - ▶ Your shares will be distributing shares (i.e. income will be paid on the shares semi-annually).
 - ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
 - ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.
- For more information on the Fund, Share Class, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Fixed income securities issued or guaranteed by government entities in emerging markets generally experience higher 'Credit Risk' than developed economies.
 - Non-investment grade fixed income securities are more sensitive to changes in interest rates and present greater 'Credit Risk' than higher rated fixed income securities.
 - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
