Tracking Error

Each of the funds listed in the table employs a “passive” investment strategy designed to replicate the performance of its benchmark index. Some of the funds attempt to fully replicate the index by holding all of the component securities, in approximately the same proportion as their weighting in the index. Other funds instead use an index sampling process, holding a representative sample of securities which approximates the full index in terms of key risk factors and other characteristics.

Tracking error measures the volatility of the return difference between the fund and the index. It is calculated as the standard deviation of the tracking difference between the fund and the index (gross of fees for the trailing 36-month period, or since the fund’s inception if it does not have 36 months of performance history). Realised (ex-post) tracking error may vary from the anticipated tracking error, depending on a range of circumstances. These include transaction costs, securities lending income and withholding tax differences. The anticipated tracking error and realised tracking error are not expected to vary significantly under normal circumstances.

Fund	For the Year Ended 30 June 2020		Explanation for Divergence
	Anticipated Tracking Error	Realised Tracking Error	
DAX UCITS ETF ^{1,3}	0.300	0.168	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
Euro STOXX 50 UCITS ETF ¹	0.400	0.242	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE 100 UCITS ETF ¹	0.200	0.053	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE 250 UCITS ETF ¹	0.200	0.061	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE All-World UCITS ETF ²	0.200	0.076	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE All-World High Dividend Yield UCITS ETF ²	0.200	0.096	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE Developed Asia Pacific ex Japan UCITS ETF ¹	0.300	0.096	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE Developed Europe UCITS ETF ¹	0.300	0.132	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE Developed Europe ex UK UCITS ETF ¹	0.300	0.173	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE Developed World UCITS ETF ²	0.200	0.078	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE Emerging Markets UCITS ETF ¹	0.400	0.154	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
FTSE Japan UCITS ETF ¹	0.500	0.588	The difference in tracking error resulted from the March 2018 Good Friday holiday; the underlying Japanese equity market was open for trading as it does not observe the holiday while the benchmark remained open.
FTSE North America UCITS ETF ¹	0.200	0.045	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
S&P 500 UCITS ETF ¹	0.200	0.033	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
EUR Corporate Bond UCITS ETF ²	0.300	0.104	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
EUR Eurozone Government Bond UCITS ETF ²	0.300	0.107	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
Global Aggregate Bond UCITS ETF ^{1,5}	0.200	0.196	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
U.K. Gilt UCITS ETF ²	0.400	0.170	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
USD Corporate 1–3 Year Bond UCITS ETF ^{2,4}	0.300	0.259	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
USD Corporate Bond UCITS ETF ²	0.500	0.359	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
USD Emerging Markets Government Bond UCITS ETF ²	0.300	0.296	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.
USD Treasury Bond UCITS ETF ²	0.400	0.225	The fund has tracked its benchmark within acceptable tolerances of its anticipated tracking error.

1 The fund seeks to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index.

2 The fund attempts to select those securities that will create the representative sample that tracks the performance of the index as closely as possible.

3 Tracking error is calculated based on daily returns during the time period since inception and then annualised. This Fund launched on 17 July 2018.

4 Tracking error is calculated based on daily returns during the time period since inception and then annualised. This Fund launched on 22 May 2018.

5 Tracking error is calculated based on daily returns during the time period since inception and then annualised. This Fund launched on 18 June 2019.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Company Statement of Changes in Net Assets

	Total US Dollars (\$) Year Ended 30 June 2020	Total US Dollars (\$) Year Ended 30 June 2019
Increase/(Decrease) in Net Assets		
Net Increase/(Decrease) in Net Assets From Operations	(274,534,245)	1,674,807,592
Capital Transactions		
Subscriptions	21,980,306,771	8,629,954,933
Redemptions	(10,726,654,808)	(7,369,661,458)
Total Capital Transactions ¹	11,253,651,963	1,260,293,475
Total Increase/(Decrease) for the Year	10,979,117,718	2,935,101,067
Net Assets		
Beginning of Year	41,716,494,173	39,042,979,493
Foreign Exchange Translation Adjustment ²	(192,886,621)	(261,586,387)
End of Year	52,502,725,270	41,716,494,173

¹ Capital Transactions include income equalisation adjustments as shown in the Company Statement of Operations.

² Individual sub-fund financial statements are presented in the base currency of each sub-fund. For the purpose of calculating the Company Vanguard Funds plc US dollars total, the EUR-based sub-funds and GBP-based sub-funds have been translated into US dollars at the following exchange rates:

	Daily exchange rate as at 30 June 2020	Daily exchange rate as at 30 June 2019	Average rate for the year ended 30 June 2020	Average rate for the year ended 30 June 2019
EUR-based sub-funds	1.1232	1.1388	1.1058	1.1407
GBP-based sub-funds	1.2356	1.2727	1.2604	1.2942

The resulting translation adjustment represents the difference in exchange rates applied to the net assets at the beginning of the year and an exchange rate differential in consolidating the Statement of Operations at the average rate for the year.

This adjustment is solely for the purposes of reporting a fund total in US dollars and has no effect on any individual sub-fund.

The accompanying notes form an integral part of the financial statements.

Vanguard DAX UCITS ETF

Managed by The Vanguard Global Advisors, LLC

Investment Objective

Vanguard DAX UCITS ETF seeks to track the performance of the DAX Index, a widely recognised index of the 30 largest German blue chip stocks traded on the Frankfurt Stock Exchange.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned -1.29%.
- Five of the index's sectors posted positive returns for the year, led by utilities and technology. Consumer services, consumer goods and industrials were the biggest detractors.
- As was announced earlier, after the close of the period Vanguard DAX UCITS ETF changed its name to Vanguard Germany All Cap UCITS ETF and its benchmark to the FTSE Germany All Cap Index.

All returns in the commentary above are in euros.

Benchmark: DAX Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
EUR Distributing	-1.10%	-1.88%
Benchmark	-1.29	-2.07
Tracking Difference*	0.19	

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: 17 July 2018.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator").

¹ The fund was launched on 17 July 2018.

² Capital Transactions include income equalisation adjustments as shown in the Statement of Operations.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard Euro STOXX 50 UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard Euro STOXX 50 UCITS ETF seeks to track the performance of the Euro STOXX 50 Index, a widely recognised index of the largest 50 companies in the euro zone.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- In this environment, the ETF's benchmark index returned -5.05% for the 12 months ended 30 June 2020.
- Five of the index's ten sectors posted double-digit negative returns, with oil & gas, financials and telecommunications the worst performers. Technology, utilities and health care recorded double-digit positive returns.
- By market, only the Netherlands and the United Kingdom posted positive returns. Belgium/Luxembourg and Spain were the worst performers.
- Vanguard Euro STOXX 50 UCITS ETF was liquidated after the close of the period, on 25 August 2020.

All returns in the commentary above are in euros.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: 24 October 2017.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard FTSE 100 UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE 100 UCITS ETF seeks to track the performance of the FTSE 100 Index, a widely recognised benchmark of the UK market's most highly capitalised blue-chip companies.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned -13.83%.
- Seven of the ten sectors in the index posted negative returns. Oil & gas, financials and technology performed the worst. Health care, utilities and industrials recorded positive returns.

All returns in the commentary above are in British pounds.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE 250 UCITS ETF seeks to track the performance of the FTSE 250 Index, a widely recognised benchmark of mid-capitalised companies of the United Kingdom.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned -10.03%.
- Six of the ten sectors in the index recorded negative returns, notably oil & gas, consumer services and industrials. Utilities, health care, basic materials and technology posted positive returns.

All returns in the commentary above are in British pounds.

Benchmark: FTSE 250 Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)		
	One Year	Five Years	Ten Years or Since Inception ¹
GBP Accumulating	-10.14%	—	-8.27%
Benchmark	-10.03	—	-8.16
Tracking Difference*	-0.11		
GBP Distributing	-10.14%	2.02%	4.42%
Benchmark	-10.03	2.16	4.58
Tracking Difference*	-0.11		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: GBP Accumulating, 14 May 2019; GBP Distributing, 30 September 2014.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard FTSE All-World UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE All-World UCITS ETF seeks to provide long-term growth of capital by tracking the performance of the FTSE All-World Index, a market capitalisation-weighted index of common stocks of large- and mid-cap companies in developed and emerging markets.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned 2.12%.
- Six of the ten sectors in the index recorded negative returns. Financials and oil & gas detracted most from the index's return. Technology stocks, which returned nearly 35%, contributed most to the index's modest gain, followed by health care stocks.
- From a market perspective, the United States, which accounted for more than half the index, added the most to its return. China and Japan also were among the top contributors, though on a much smaller scale. The United Kingdom weighed most heavily on the index's result, with Brazil and Australia also among the largest detractors.

All returns in the commentary above are in US dollars.

Benchmark: FTSE All-World Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)

USD Distributing	2.12%	6.40%	9.20%
Benchmark	2.12	6.42	9.18
Tracking Difference*	0.00		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 23 July 2019; USD Distributing, 22 May 2012.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard FTSE All-World High Dividend Yield UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE All-World High Dividend Yield UCITS ETF seeks to track the performance of the FTSE All-World High Dividend Yield Index, a free-float-adjusted market capitalisation-weighted index of common stocks of companies, excluding real estate trusts, in developed and emerging markets that pay dividends that are generally higher than average.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned -10.63%, as many companies trimmed their dividends in the weak economic environment triggered by the coronavirus.
- Eight of the index's ten sectors recorded negative returns. Financials and oil & gas detracted the most. Health care and technology were the only positive contributors.
- By market, the United States, which accounted for close to 40% of the index, weighed most heavily on its return, followed by the United Kingdom. Of the nearly 50 countries and regions in the index, only Taiwan and Switzerland made meaningful positive contributions to return.

All returns in the commentary above are in US dollars.

Tracking Difference*	0.00		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 24 September 2019; USD Distributing, 21 May 2013.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

¹ The FTSE All-World High Dividend Yield UCITS ETF was advised on 6 September 2019 that the Fund's index provider, FTSE Russell, identified REITs which were inadvertently included in the Fund's benchmark index during the March 2019 rebalancing. According to the published index methodology, real estate trusts should have been excluded. As of 6 September 2019, the Fund held 66 REITs representing approximately 3% of net assets. Once the Fund was made aware of the error, it sold out of these positions as soon as practicable (all positions were sold out as at 17 September 2019). Inclusion of these securities in the index, and their subsequent sale, did not have a material impact on the performance of the Fund.

Vanguard FTSE Developed Asia Pacific ex Japan UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE Developed Asia Pacific ex Japan UCITS ETF seeks to track the performance of the FTSE Developed Asia Pacific ex Japan Index, a widely recognised benchmark of the large- and mid-capitalised companies of the developed markets of the Asia-Pacific region, excluding Japan.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- Global bonds experienced high volatility as well but produced solid returns for the period.
- In this environment, the ETF's benchmark index returned -8.35% for the 12 months ended 30 June 2020.
- The Australia and Hong Kong markets detracted most from returns, while South Korea and New Zealand were net contributors.
- Eight of ten industry sectors posted negative results. Financials and industrials eroded returns the most. Technology and health care recorded gains and helped offset the declines.

All returns in the commentary above are in US dollars.

Benchmark	-8.35	3.33	2.00
Tracking Difference*	-0.01		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 24 September 2019; USD Distributing, 21 May 2013.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard FTSE Developed Europe UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE Developed Europe UCITS ETF seeks to track the performance of the FTSE Developed Europe Index, a widely recognised benchmark of stock market performance of European developed countries that is composed of the stocks of large- and mid-capitalised companies in developed Europe.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned -5.15%.
- By market, Denmark, China and Portugal turned in double-digit positive performances. The United Kingdom, which accounts for about a quarter of the index, was the biggest detractor.
- Seven of the index's ten sectors generated negative returns. Financials and oil & gas detracted most. Health care and technology were the top contributors.

All returns in the commentary above are in euros.

Benchmark: FTSE Developed Europe Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)		
	One Year	Five Years	Ten Years or Since Inception ¹
EUR Accumulating	—	—	-6.62%
Benchmark	—	—	-6.75
Tracking Difference*			0.13
EUR Distributing	-5.01%	1.63%	4.88%
Benchmark	-5.15	1.39	4.62
Tracking Difference*	0.14		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: EUR Accumulating, 23 July 2019; EUR Distributing, 21 May 2013.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard FTSE Developed Europe ex UK UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE Developed Europe ex UK UCITS ETF seeks to track the performance of the FTSE Developed Europe ex UK Index, a widely recognised market capitalisation-weighted index of stock market performance of European developed countries, excluding the United Kingdom, that is composed of the stocks of large- and mid-cap companies in that region.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned -1.52%.
- By market, France, which had the index's largest weighting, detracted most from returns. Switzerland, with the second-largest weighting, made the biggest positive contribution.
- Six of the ten sectors in the index posted negative returns, with oil & gas and financials the worst performers. Technology, health care, utilities and basic materials recorded positive returns.

All returns in the commentary above are in euros.

Benchmark	—	—	-3.21
Tracking Difference*			0.22
EUR Distributing	-1.28%	3.17%	5.10%
Benchmark	-1.52	2.77	4.67
Tracking Difference*	0.24		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: EUR Accumulating, 23 July 2019; EUR Distributing, 30 September 2014.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard FTSE Developed World UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE Developed World UCITS ETF seeks to track the performance of the FTSE Developed Index, a widely recognised benchmark of large- and mid-capitalisation companies in global developed markets.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned 2.82%.
- Six of the index's ten sectors recorded negative returns. Financials and oil & gas detracted the most. Technology stocks returned about 35% and were the index's leading contributors, followed by health care stocks.
- Among markets, the United States, which accounted for more than 60% of the index, added the most to its return. Japan and Switzerland also made solid contributions. The United Kingdom detracted the most, while Australia and France also were among the biggest laggards.

All returns in the commentary above are in US dollars.

Benchmark: FTSE Developed Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)		
	One Year	Five Years	Ten Years or Since Inception ¹
USD Accumulating	—	—	2.35%
Benchmark	—	—	2.27
Tracking Difference*			0.08
USD Distributing	2.89%	6.92%	6.64%
Benchmark	2.82	6.85	6.57
Tracking Difference*	0.07		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 24 September 2019; USD Distributing, 30 September 2014.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

¹ Capital Transactions include income equalisation adjustments as shown in the Statement of Operations.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard FTSE Emerging Markets UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE Emerging Markets UCITS ETF seeks to track the performance of the FTSE Emerging Index, a free-float market capitalisation-weighted index of large- and mid-cap companies in multiple emerging markets in Europe, Asia, Africa, Central and South America and the Middle East.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned -3.60%.
- Seven of the index's ten sectors recorded negative returns. Financials, the largest sector in the index, returned about -22% and detracted the most, followed by oil & gas and basic materials. Technology, which returned more than 32%, contributed most. Consumer services and health care also posted double-digit returns.
- China, the largest market in the index, added the most to its return. Taiwan was the only other market that recorded a gain. Brazil, India and South Africa detracted the most.

All returns in the commentary above are in US dollars.

Benchmark: FTSE Emerging Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)		
	One Year	Five Years	Ten Years or Since Inception ¹

Benchmark	—	—	-0.68
Tracking Difference*			-0.13
USD Distributing	-3.80%	2.39%	3.51%
Benchmark	-3.60	2.57	3.66
Tracking Difference*	-0.20		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 24 September 2019; USD Distributing, 22 May 2012.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard FTSE Japan UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE Japan UCITS ETF seeks to track the performance of the FTSE Japan Index, a widely recognised benchmark of large- and mid-capitalised companies in Japan.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
 - Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
 - Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
 - Global bonds experienced high volatility as well but produced solid returns for the period.
 - In this environment, the ETF's benchmark index returned 3.24% for the 12 months ended 30 June 2020.
 - Five of ten industry sectors posted positive results, with health care, technology and industrials contributing most to returns. Financial stocks detracted most.
- All returns in the commentary above are in US dollars.

Benchmark	—	—	-5.40
Tracking Difference*			-0.07

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: EUR Hedged Accumulating and USD Hedged Accumulating, 31 January 2020; USD Accumulating, 24 September 2019; USD Distributing, 21 May 2013.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard FTSE North America UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard FTSE North America UCITS ETF seeks to track the performance of the FTSE North America Index, a market capitalisation-weighted index of large- and mid-cap companies in the United States and Canada.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- Global bonds experienced high volatility as well but produced solid returns for the period.
- In this environment, the ETF's benchmark index returned 7.05% for the 12 months ended 30 June 2020.
- The United States, which makes up approximately 95% of the index, contributed most to returns. Canadian stocks detracted slightly.
- Six of ten industry sectors posted positive results, with technology, consumer services and health care adding most to returns. Financials and oil & gas detracted most.

All returns in the commentary above are in US dollars.

Benchmark	7.05	9.71	9.27
Tracking Difference*	0.22		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 23 July 2019; USD Distributing, 30 September 2014.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

¹ Capital Transactions include income equalisation adjustments as shown in the Statement of Operations.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard Global Liquidity Factor UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard Global Liquidity Factor UCITS ETF seeks to provide long-term capital appreciation.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements. The ETF is actively managed and seeks to invest as described in the prospectus. The table shows how the fund's total return compares with the return of a market index that has investment characteristics similar to those of the fund.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- The ETF invests primarily in US and foreign stocks from developed markets that have lower liquidity characteristics than those in the benchmark index. The investment adviser uses a quantitative model with a rules-based active approach. It favours stocks with low trading volumes and other measures of trading liquidity, including price impact and trading share and dollar volumes based on percentage turnover. These measures have been shown to be components of long-run stock market returns.
- For the 12 months ended 30 June 2020, the ETF underperformed its benchmark index, which returned 1.92%. Three of the ten sectors contributed positively to relative performance. Selection in health care and an underweight allocation to oil & gas boosted returns; an underweight to technology, selection in consumer services and an overweight to financials hurt results the most.
- Among markets, stock selection in the United States, which accounted for about two-thirds of the ETF's holdings, detracted the most from relative performance. The United Kingdom, Australia and Canada contributed the most.

All returns in the commentary above are in US dollars.

Benchmark: FTSE Developed All Cap Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD Accumulating	-6.87%	6.04%
Benchmark	1.92	8.10

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

¹ Since-inception returns: 9 December 2015.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard Global Minimum Volatility UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard Global Minimum Volatility UCITS ETF seeks to provide long-term capital appreciation.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements. The ETF is actively managed and seeks to invest as described in the prospectus. The table shows how the fund's total return compares with the return of a market index that has investment characteristics similar to those of the fund.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- The ETF invests primarily in US and foreign stocks. It seeks to achieve lower volatility than that of the global equities market, subject to a set of controls designed to foster portfolio diversification and liquidity. The investment adviser uses a quantitative model with a rules-based active approach that considers stocks' risk and diversification characteristics. These measures have been shown to be components of long-run stock market returns. The ETF seeks to hedge most of its currency exposure back to the US dollar to further reduce volatility.
- For the 12 months ended 30 June 2020, the ETF underperformed its benchmark index, which returned 3.19%. Three of the ten sectors contributed positively to relative performance, with an underweight to oil & gas helping results the most. An underweight to technology and selection in financials and consumer services detracted the most.
- Among countries, stock selection in the United States, which accounted for about half the ETF's holdings, detracted the most, while South Africa, Australia and France contributed the most.

All returns in the commentary above are in US dollars.

Benchmark: FTSE Global All Cap Index 100% Hedged

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD-Hedged Accumulating	-7.40%	5.74%
Benchmark	3.19	8.67

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

¹ Since-inception returns: 9 December 2015.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard Global Momentum Factor UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard Global Momentum Factor UCITS ETF seeks to provide long-term capital appreciation.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements. The ETF is actively managed and seeks to invest as described in the prospectus. The table shows how the fund's total return compares with the return of a market index that has investment characteristics similar to those of the fund.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- The ETF invests primarily in US and foreign stocks from developed markets that have higher momentum characteristics than those of the benchmark index. The investment adviser uses a quantitative model with a rules-based active approach that favours stocks with relatively strong recent performance. This is assessed in terms of both non-risk-adjusted and risk-adjusted returns over the short and intermediate terms. These measures have been shown to be components of long-run stock market returns.
- For the 12 months ended 30 June 2020, the ETF outperformed its benchmark index, which returned 1.92%. Five of the ten sectors contributed positively to relative performance. Selection in health care and financials and an underweight allocation to oil & gas helped the most, while consumer services, technology and industrials were the biggest detractors.
- Among markets, Canada and the United Kingdom contributed the most to relative performance. The United States, which accounted for about 60% of the ETF's holdings, was the biggest detractor.

All returns in the commentary above are in US dollars.

Benchmark: FTSE Developed All Cap Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD Accumulating	2.92%	7.42%
Benchmark	1.92	8.10

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

¹ Since-inception returns: 9 December 2015.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard Global Value Factor UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard Global Value Factor UCITS ETF seeks to provide long-term capital appreciation.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements. The ETF is actively managed and seeks to invest as described in the prospectus. The table shows how the fund's total return compares with the return of a market index that has investment characteristics similar to those of the fund.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- The ETF invests primarily in US and foreign stocks from developed markets that have higher value characteristics than those of the benchmark index. The investment adviser uses a quantitative model with a rules-based active approach that favours stocks with lower prices relative to their fundamental measures of value. These measures, including price/book and price/earnings ratios, estimated future earnings and operating cash flow, have been shown to be components of long-run stock market returns.
- For the 12 months ended 30 June 2020, the ETF underperformed its benchmark index, which returned 1.92%. All ten sectors detracted from relative performance. An underweight allocation to technology and selection in financials and consumer services hurt results the most. Positions in telecommunications held up better than those in other sectors.
- The United States, which accounted for about 60% of the ETF's holdings, detracted the most from relative performance. Australia contributed the most.

All returns in the commentary above are in US dollars.

Benchmark: FTSE Developed All Cap Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD Accumulating	-19.42%	1.12%
Benchmark	1.92	8.10

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

¹ Since-inception returns: 9 December 2015.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard S&P 500 UCITS ETF

Investment Objective

Vanguard S&P 500 UCITS ETF seeks to track the performance of the Standard & Poor's 500 Index, a widely recognised benchmark of US stock market performance that is composed of the stocks of large US companies.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed. However, the unprecedented scale of the response from policymakers, the start of numerous trials for vaccines and treatments and the lifting of some lockdown restrictions in countries hit early on by the virus helped lift investor sentiment. Strength in US stocks helped offset declines in both developed markets outside the United States and emerging markets.
- Global bonds experienced high volatility as well but produced solid returns for the period.
- In this environment, the ETF's benchmark index returned 6.87% for the 12 months ended 30 June 2020.
- Five of the index's 11 industry sectors posted positive results, led by information technology, consumer discretionary and communication services. Energy and financial stocks lost the most ground, eroding returns.

All returns in the commentary above are in US dollars.

Benchmark: S&P 500 Index¹

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)		
	One Year	Five Years	Ten Years or Since Inception ²
USD Accumulating	7.15%	—	10.06%
Benchmark	6.87	—	9.78
Tracking Difference*	0.28		
USD Distributing	7.15%	10.31%	13.04%
Benchmark	6.87	10.05	12.77
Tracking Difference*	0.28		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ The return of the S&P 500 UCITS ETF is adjusted by 15% for the withholding tax on dividends paid by US securities. The return of the S&P 500 Index is adjusted by 30%.

² Since-inception returns: USD Accumulating, 14 May 2019; USD Distributing, 22 May 2012.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard EUR Corporate Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard EUR Corporate Bond UCITS ETF seeks to track the performance of the Bloomberg Barclays Euro-Aggregate: Corporates Index, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, euro-denominated, investment-grade corporate bonds with maturities greater than 1 year and a minimum issue size of €300 million.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets. For the period, US bonds performed better than their European and Asian counterparts.
- With European corporate bond yields low and their spread versus European Treasuries widening, the ETF's benchmark returned -0.42% for the 12 months ended 30 June 2020.
- Among the largest constituents in the index, Italy, Belgium and Switzerland held up the best, while Spain and France were among the laggards.
- By sector, bonds issued by utilities and financial institutions held up better than those issued by industrial companies. Higher-rated and longer-dated investment-grade bonds tended to perform best.

All returns in the commentary above are based in euros.

EUR Distributing	-0.73%	2.22%
Benchmark	-0.42	2.30
Tracking Difference*	-0.31	

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: EUR Accumulating, 19 February 2019; EUR Distributing, 24 February 2016.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard EUR Eurozone Government Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard EUR Eurozone Government Bond UCITS ETF seeks to track the performance of the Bloomberg Barclays Euro-Aggregate: Treasury Index, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, euro-denominated euro zone treasury securities with maturities greater than 1 year and a minimum issue size of €300 million.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets. For the period, US bonds performed better than their European and Asian counterparts.
- Despite a substantial amount of negative-yielding euro zone government debt, European Central Bank action helped the ETF's benchmark return 2.77% for the 12 months ended 30 June 2020.
- Among the countries with large weightings in the index, Italy stood out with a return of more than 6%. Austria and Belgium also outperformed, while Spain, Portugal and Germany were among the laggards.
- From a credit-quality perspective, bonds on the lowest rung of the investment-grade ladder significantly outperformed. By maturity, long-dated bonds returned the most.

All returns in the commentary above are based in euros.

Benchmark: Bloomberg Barclays Euro-Aggregate: Treasury Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹

EUR Distributing	2.68%	2.33%
Benchmark	2.77	2.42
Tracking Difference*	-0.09	

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: EUR Accumulating, 19 February 2019; EUR Distributing, 24 February 2016.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard Global Aggregate Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

The Vanguard Global Aggregate Bond UCITS ETF seeks to track the performance of the Bloomberg Barclays Global Aggregate Float Adjusted and Scaled Index Hedged, a widely recognised benchmark designed to reflect the characteristics of the global aggregate bond universe.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned 5.34%.
- Two heavyweights in the index, the United States and the United Kingdom, outperformed. Spain, South Korea and Japan were among the laggards.
- Treasuries, which account for a little more than half of the index, performed roughly in line with it. Corporate bonds outperformed, with utilities leading the way; mortgage-backed securities underperformed.
- From a credit-quality perspective, results were mixed. By maturity, long-dated bonds significantly outperformed.

All returns in the commentary above are based in British pounds.

Benchmark	6.52	6.75
Tracking Difference*	-0.11	

Each benchmark is in its respective currency.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: 18 June 2019.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Net Assets		
Beginning of Year/Period	265,223,632	—
End of Year/Period	820,529,838	265,223,632

¹ The fund was launched on 18 June 2019.

² Capital Transactions include income equalisation adjustments as shown in the Statement of Operations.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard U.K. Gilt UCITS ETF

Sub-managed by Vanguard Asset Management, Limited

Investment Objective

Vanguard U.K. Gilt UCITS ETF seeks to track the performance of the Bloomberg Barclays Sterling Gilt Float Adjusted Index, a market-weighted index of UK government fixed income securities denominated in pounds sterling.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets. For the period, US bonds performed better than their European and Asian counterparts.
- Thanks in part to action by the Bank of England, the ETF's benchmark returned 12.93% for the 12 months ended 30 June 2020.
- There was a significant divergence in performance by maturity. For example, gilts maturing in less than 5 years returned about 2%, while longer-dated bonds performed very strongly.
- Gilts significantly outperformed the broad UK investment-grade bond market.

All returns in the commentary above are based in British pounds.

Benchmark: Bloomberg Barclays Sterling Gilt Float Adjusted Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)		
	One Year	Five Years	Ten Years or Since Inception ¹
GBP Accumulating	12.86%	—	12.13%
Benchmark ²	12.93	—	12.23
Tracking Difference*	-0.07		
GBP Distributing	12.86%	6.52%	5.26%
Benchmark ²	12.93	6.63	5.37
Tracking Difference*	-0.07		

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: GBP Accumulating, 19 February 2019; GBP Distributing, 22 May 2012.

² Bloomberg Barclays Global Aggregate U.K. Government Float Adjusted Index through 31 March 2016, Bloomberg Barclays Sterling Gilt Float Adjusted Index thereafter.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard USD Corporate 1–3 Year Bond UCITS ETF seeks to track the performance of the Bloomberg Barclays Global Aggregate Corporate - United States Dollar Index 1–3 Year, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, US dollar-denominated corporate debt securities with maturities of between 1 and 3 years.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets. For the period, US bonds performed better than their European and Asian counterparts.
- US Treasury yields declined dramatically across the maturity spectrum in the first quarter of 2020, especially those at the short end as the Federal Reserve slashed its federal funds rate. For the ETF's fiscal year, the yield of the 2-year US Treasury note fell 161 basis points to 0.15%, and the yield of the bellwether 10-year US Treasury note declined 135 basis points to 0.66%. (A basis point is one-hundredth of a percentage point.) The average yield spread between US corporate bonds and US Treasuries ended the period wider.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned 4.43%.
- By sector, bonds issued by utilities and financial institutions outperformed those issued by industrial companies. From a credit-quality perspective, results were mixed.

All returns in the commentary above are based in US dollars.

Benchmark: Bloomberg Barclays Global Aggregate Corporate - United States Dollar Index 1–3 Year

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD Accumulating	4.04%	4.77%
Benchmark	4.43	5.15
Tracking Difference*	-0.39	
USD Distributing	4.04%	4.36%
Benchmark	4.43	4.65
Tracking Difference*	-0.39	

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 19 February 2019; USD Distributing, 22 May 2018.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

¹ Capital Transactions include income equalisation adjustments as shown in the Statement of Operations.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard USD Corporate Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard USD Corporate Bond UCITS ETF seeks to track the performance of the Bloomberg Barclays Global Aggregate Corporate - United States Dollar Index, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, US dollar-denominated investment-grade corporate bonds with maturities greater than 1 year and a minimum issue size of \$250 million.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets. For the period, US bonds performed better than their European and Asian counterparts.
- US Treasury yields declined dramatically across the maturity spectrum in the first quarter of 2020, especially those at the short end as the Federal Reserve slashed its federal funds rate. For the ETF's fiscal year, the yield of the 2-year US Treasury note fell 161 basis points to 0.15%, and the yield of the bellwether 10-year US Treasury note declined 135 basis points to 0.66%. (A basis point is one-hundredth of a percentage point.) The average yield spread between US corporate bonds and US Treasuries ended the period wider.
- For the 12 months ended 30 June 2020, the ETF's benchmark returned 9.15%.
- By sector, bonds issued by utilities outperformed those issued by industrial companies and financial institutions. From a credit-quality perspective, returns were mixed. And by maturity, longer-dated bonds significantly outperformed.

All returns in the commentary above are based in US dollars.

Benchmark: Bloomberg Barclays Global Aggregate Corporate - United States Dollar Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD Accumulating	8.98%	11.61%
Benchmark	9.15	11.84
Tracking Difference*	-0.17	
USD Distributing	8.98%	6.37%
Benchmark	9.15	6.35
Tracking Difference*	-0.17	

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 19 February 2019; USD Distributing, 24 February 2016.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

¹ Capital Transactions include income equalisation adjustments as shown in the Statement of Operations.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard USD Emerging Markets Government Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard USD Emerging Markets Government Bond UCITS ETF seeks to track the performance of the Bloomberg Barclays EM USD Sovereign + Quasi-Sov Index, a widely recognised benchmark designed to reflect the total universe of US dollar-denominated publicly traded debt (with maturities greater than 1 year and a minimum issue size of \$500 million) issued by sovereign and quasi-sovereign emerging-market issuers. Quasi-sovereign issuers include entities that are government-guaranteed and/or government-sponsored, entities that are more than 50% government-owned and local authorities.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets. For the period, US bonds performed better than their European and Asian counterparts.
- For the 12 months ended 30 June 2020, the ETF's benchmark index returned 2.23%.
- More than half of the ETF's holdings at the end of the fiscal year consisted of sovereign debt, which returned about 0.3%. The remainder was mostly securities issued by government agencies, which returned more than 5%.
- Among the countries with the largest weightings in the index, oil producers Russia, Saudi Arabia and Qatar outperformed. The laggards included Argentina, South Africa and Mexico.
- By credit quality, higher-rated bonds returned the most. By maturity, long bonds outperformed.

All returns in the commentary above are based in US dollars.

Benchmark: Bloomberg Barclays EM USD Sovereign + Quasi-Sov Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD Accumulating	2.02%	5.64%
Benchmark	2.23	5.93
Tracking Difference*	-0.21	
USD Distributing	2.02%	4.89%
Benchmark	2.23	5.06
Tracking Difference*	-0.21	

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 19 February 2019; USD Distributing, 6 December 2016.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Vanguard USD Treasury Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC

Investment Objective

Vanguard USD Treasury Bond UCITS ETF seeks to track the performance of the Bloomberg Barclays Global Aggregate U.S. Treasury Float Adjusted Index, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, US dollar-denominated US Treasury securities with maturities greater than 1 year and a minimum issue size of \$300 million.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- It was a challenging fiscal year. Amid easing concerns about global growth and trade tensions and continuing accommodative monetary policies across much of the world, a number of stock market indices climbed to record highs in February. Then as the coronavirus began to spread outside of China, many governments moved to shutter nonessential businesses and restrict trade and travel. That led to a swift and sharp downturn in global economic activity, especially in sectors requiring face-to-face interaction, and a spike in unemployment rates.
- Many central banks acted swiftly to limit the economic damage from the virus, slashing short-term interest rates, ramping up bond purchases to keep longer-term rates low and providing liquidity to financial markets. Governments atop the world's largest economies committed trillions of dollars in spending, loans and loan guarantees to blunt the pandemic's impact.
- Global stocks initially plummeted as large swaths of the economy closed, but they clawed back the gains made earlier in the period as investor sentiment brightened.
- Global bonds experienced high volatility as well but produced solid returns for the period. Liquidity in the bond markets eroded and yield spreads widened between corporates and Treasuries in March, as the outlook for the economy worsened. However, the unprecedented scale of the response from policymakers helped lift markets. For the period, US bonds performed better than their European and Asian counterparts.
- US Treasury yields declined dramatically across the maturity spectrum in the first quarter of 2020, especially those at the short end as the Federal Reserve slashed its federal funds rate. For the ETF's fiscal year, the yield of the 2-year US Treasury note fell 161 basis points to 0.15%, and the yield of the bellwether 10-year US Treasury note declined 135 basis points to 0.66%. (A basis point is one-hundredth of a percentage point.)
- For the 12 months ended 30 June 2020, the ETF's benchmark returned 10.45%, outpacing the US investment-grade bond market.
- Intermediate-term US Treasuries returned about 7%, while their long-term counterparts returned more than 25%.

All returns in the commentary above are based in US dollars.

Benchmark: Bloomberg Barclays Global Aggregate U.S. Treasury Float Adjusted Index

	Total Returns Based on NAV Periods Ended 30 June 2020 (Annualised for periods over one year)	
	One Year	Ten Years or Since Inception ¹
USD Accumulating	10.42%	11.08%
Benchmark	10.45	11.19
Tracking Difference*	-0.03	
USD Distributing	10.42%	3.67%
Benchmark	10.45	3.76
Tracking Difference*	-0.03	

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* In tracking the performance of the index, the fund attempts to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor. Tracking difference in the table above is in percentage points.

¹ Since-inception returns: USD Accumulating, 19 February 2019; USD Distributing, 24 February 2016.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

There are no recognised gains or losses arising in the year other than those included above. In arriving at the results for the year, all amounts relate to continuing operations. The accompanying notes form an integral part of the financial statements.

Notes to the Financial Statements

1. General Information. Vanguard Funds plc (the “Company”), an open-ended investment company with variable capital, was incorporated in Ireland as a public limited company on 24 May 2011. The Company is authorised by the Central Bank of Ireland (the “Central Bank”) as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”).

The Company issues shares as “ETF Shares” that are intended to be actively traded on a secondary market.

2. Presentation of Financial Statements. The Company is organised as an umbrella fund with segregated liabilities between sub-funds. During the year ended 30 June 2020 the Company had 26 constituent funds (each a “Fund”, collectively the “Funds”):

	Commenced Operations
Vanguard DAX UCITS ETF (the “DAX UCITS ETF”) ¹	17 July 2018
Vanguard Euro STOXX 50 UCITS ETF (the “Euro STOXX 50 UCITS ETF”) ²	24 October 2017
Vanguard FTSE 100 UCITS ETF (the “FTSE 100 UCITS ETF”)	22 May 2012
Vanguard FTSE 250 UCITS ETF (the “FTSE 250 UCITS ETF”)	30 September 2014
Vanguard FTSE All-World UCITS ETF (the “FTSE All-World UCITS ETF”)	22 May 2012
Vanguard FTSE All-World High Dividend Yield UCITS ETF (the “FTSE All-World High Dividend Yield UCITS ETF”)	21 May 2013
Vanguard FTSE Developed Asia Pacific ex Japan UCITS ETF (the “FTSE Developed Asia Pacific ex Japan UCITS ETF”)	21 May 2013
Vanguard FTSE Developed Europe UCITS ETF (the “FTSE Developed Europe UCITS ETF”)	21 May 2013
Vanguard FTSE Developed Europe ex UK UCITS ETF (the “FTSE Developed Europe ex UK UCITS ETF”)	30 September 2014
Vanguard FTSE Developed World UCITS ETF (the “FTSE Developed World UCITS ETF”)	30 September 2014
Vanguard FTSE Emerging Markets UCITS ETF (the “FTSE Emerging Markets UCITS ETF”)	22 May 2012
Vanguard FTSE Japan UCITS ETF (the “FTSE Japan UCITS ETF”)	21 May 2013
Vanguard FTSE North America UCITS ETF (the “FTSE North America UCITS ETF”)	30 September 2014
Vanguard Global Liquidity Factor UCITS ETF (the “Global Liquidity Factor UCITS ETF”)	9 December 2015
Vanguard Global Minimum Volatility UCITS ETF (the “Global Minimum Volatility UCITS ETF”)	9 December 2015
Vanguard Global Momentum Factor UCITS ETF (the “Global Momentum Factor UCITS ETF”)	9 December 2015
Vanguard Global Value Factor UCITS ETF (the “Global Value Factor UCITS ETF”)	9 December 2015
Vanguard S&P 500 UCITS ETF (the “S&P 500 UCITS ETF”)	22 May 2012
Vanguard EUR Corporate Bond UCITS ETF (the “EUR Corporate Bond UCITS ETF”)	24 February 2016
Vanguard EUR Eurozone Government Bond UCITS ETF (the “EUR Eurozone Government Bond UCITS ETF”)	24 February 2016
Vanguard Global Aggregate Bond UCITS ETF (the “Global Aggregate Bond UCITS ETF”)	18 June 2019
Vanguard U.K. Gilt UCITS ETF (the “U.K. Gilt UCITS ETF”)	22 May 2012
Vanguard USD Corporate 1–3 Year Bond UCITS ETF (the “USD Corporate 1–3 Year Bond UCITS ETF”)	22 May 2018
Vanguard USD Corporate Bond UCITS ETF (the “USD Corporate Bond UCITS ETF”)	24 February 2016
Vanguard USD Emerging Markets Government Bond UCITS ETF (the “USD Emerging Markets Government Bond UCITS ETF”)	6 December 2016
Vanguard USD Treasury Bond UCITS ETF (the “USD Treasury Bond UCITS ETF”)	24 February 2016

1 The DAX UCITS ETF changed its name to Vanguard Germany All Cap UCITS ETF and its benchmark to the FTSE Germany All Cap Index on 18 September 2020.

2 On 26 May 2020 the Fund was approved for termination.

The following Funds received Central Bank approval but have not yet commenced trading:

	Central Bank Approval
Vanguard EUR Corporate 1–3 Year Bond UCITS ETF	18 January 2018
Vanguard GBP Corporate Bond UCITS ETF	22 December 2015
Vanguard Global Multifactor UCITS ETF	29 April 2019

The financial statements are prepared in accordance with accounting standards generally accepted in Ireland, including Financial Reporting Standard (“FRS”) 102, Irish statute comprising the Companies Act 2014, as amended, the UCITS Regulations, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “CBI UCITS Regulations”) and the Listing Rules of the Euronext Dublin Exchange. Accounting standards generally accepted in Ireland in preparing financial statements which present a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council (the “FRC”).

The Company has determined that the arrangement, headings and sub-headings of the financial statements require adaptation from the requirements in the Companies Act 2014 to more appropriately reflect the Company’s business as an investment fund.

A Statement of Changes in Net Assets has been presented in place of a Cash Flow Statement due to the exemption contained in FRS 102, Section 7.1A.

The information required by FRS 102 to be included in a statement of comprehensive income is contained in the Statement of Operations of each Fund and the Company.

These financial statements have been prepared on the historical cost convention, as modified by the revaluation of financial assets and liabilities at fair value through profit or loss ("FVTPL"). As a result of the pending termination, the Euro STOXX 50 UCITS ETF is no longer considered a going concern, and its financial statements have been prepared on a liquidation basis which continues to reflect the fair value of assets and liabilities since unitholders are entitled to receive a pro rata share of the fair value of net assets after paying or providing for all liabilities and obligations as of the termination date.

3. Significant Accounting Policies.

(a) Critical Accounting Estimates and Judgements. The preparation of these financial statements requires the use of certain accounting estimates and requires the Company to exercise judgement when applying the Funds' accounting policies. The estimates and associated judgements are based on historical experience and various other facts that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements concerning the classification of financial assets and liabilities, the carrying values of financial instruments, as well as the fair value of certain financial instruments in instances where information is not readily apparent from other sources.

(b) Revenue Recognition. Dividends, whether cash or stock, are recognised when the securities are quoted ex-dividend. Special dividends are treated as either capital or revenue depending on the facts of each particular case.

In the case of debt securities, any difference between acquisition cost and maturity value is recognised as revenue over the life of the security using the effective yield basis of calculating amortisation. Revenue from debt securities is accounted for on a basis which takes account of the amortisation of any discount or premium between the purchase price and the expected final maturity price over the remaining life of the security.

The treatment of returns from derivatives is dependent upon the nature of the transaction and considers both motives and circumstances to determine whether returns should be treated as capital or revenue. Where positions are undertaken to protect or enhance capital, the returns are considered capital. Similarly, where positions are undertaken for generating or protecting revenue, the returns are considered revenue. Where positions generate total returns, an apportionment of any such return between capital and revenue is made to properly reflect the nature of the transaction.

Revenue is recognised gross of any withholding taxes incurred.

Bank interest is recognised on an accrual basis.

Securities lending revenue is accounted for on an accrual basis.

(c) Taxation. Current tax is recognised as the amount of income tax paid or payable in respect of the taxable overseas net profit. Deferred taxation is provided on all timing differences that have originated but not reversed by the reporting date. Deferred tax is measured at the rates expected to apply for the period in which the timing differences will reverse. Deferred taxes are not discounted to reflect the time value of money and are only recognised to the extent they are expected to crystallise.

Withholding taxes on foreign dividends and capital gains have been provided for in accordance with the Funds' understanding of the applicable countries' tax rules and rates. Foreign capital gains tax is accounted for based upon net unrealised gains.

(d) Financial Assets and Financial Liabilities. FRS 102 requires a reporting entity to apply either (a) the full requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments Issues; (b) the recognition and measurement provisions of International Accounting Standards ("IAS") 39, Financial Instruments: Recognition and Measurement ("IAS 39"), and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments; or (c) the recognition and measurement provisions of International Financial Reporting Standards ("IFRS") 9, Financial Instruments, and the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments. The Company has elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of FRS 102.

Classification and Measurement. Financial assets and financial liabilities, including derivative investments, are classified and measured at fair value through profit and loss ("FVTPL") from the launch date. Obligations for net assets attributable to holders of redeemable shares are presented at the redemption amount, which approximates their fair value. All other financial assets and liabilities are measured at amortised cost, which approximates fair value.

Recognition and Derecognition. Purchases and sales of financial instruments are recognised on the trade date, being the date on which the Company commits itself to the purchase or sale. Financial instruments at FVTPL are initially recognised when the Funds become party to the contractual provisions of the instrument. Financial instruments are derecognised when the contractual rights to the cash flows from the instruments expire, or when substantially all the risks and rewards of ownership have been transferred. Realised gains and losses are specifically identified when securities are derecognised. Premiums received on expired options are realised as gains, while premiums paid on expired options are realised as losses. Premiums on exercised options will result in gains or losses by either increasing the proceeds received when selling the underlying security or decreasing the cost basis when purchasing the underlying security.

Equities. Equities (including warrants and rights) are valued at the latest available last traded value at period-end. Instruments traded on a recognised market are valued on the basis of valuations provided by a principal market maker or a pricing service. When applicable, unlisted and suspended instruments are based on the Investment Manager's assessment of their net realisable value or the last traded price from broker-dealers for non-exchange-trade purposes.

Fixed Income. Fixed income securities traded in recognised markets are valued using the latest bid prices on the securities exchange in which they are principally traded or using valuations based on a matrix system (which considers such factors as security prices, yields, maturities, and ratings), both as furnished by independent pricing services.

Derivatives. Futures contracts are valued in an active market if quoted prices are readily and regularly available; this represents the amount that would be required to close the position. Forward currency contracts are valued at the closing prices of the forward currency contract rates in the London foreign exchange markets on a daily basis as provided by a reliable bank or dealer.

(e) Fair Value Measurement. The Funds classify financial instruments measured at fair value using a three-level hierarchy. Instruments are categorised in their entirety based on the lowest level input that is significant to the fair value measurement. Assessing the significance and observability of a particular input requires significant judgement specific to an asset or liability. Inputs are considered to be observable when they are readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Level 1 – Quoted prices in active markets for identical securities.

Level 2 – Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – Significant unobservable inputs (including the fund's own assumptions used to determine the fair value of investments).

(f) Transaction Costs. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment. These costs include fees and commissions paid to agents, advisors, brokers and dealers. Transaction costs incurred in the purchase and sale of securities designated at FVTPL are expensed on an accrual basis.

(g) Foreign Currency. All transactions in foreign currencies are translated into each Fund's functional currency at the exchange rates prevailing on the date of the transaction. At the reporting date, monetary assets and liabilities denominated in foreign currencies are translated at the prevailing exchange rates. Gains and losses arising on translation are included in total return and are reported on a net basis.

The functional currency of each Fund is:

In preparing the aggregate Company financial statements, all transactions have been translated into USD at the prevailing exchange rates in effect.

Fund	Currency	Fund	Currency
DAX UCITS ETF	Euro (€)	Global Liquidity Factor UCITS ETF	US dollar (\$)
Euro STOXX 50 UCITS ETF	Euro (€)	Global Minimum Volatility UCITS ETF	US dollar (\$)

FTSE Japan UCITS ETF	US dollar (\$)	USD Emerging Markets Government Bond UCITS ETF	US dollar (\$)
FTSE North America UCITS ETF	US dollar (\$)	USD Treasury Bond UCITS ETF	US dollar (\$)

(h) Cash and Bank Overdrafts. Cash is composed of demand deposits with financial institutions or bank overdrafts. Bank overdrafts, when applicable, are presented as current liabilities. Cash held or pledged as collateral against financial transactions or derivative instruments is not included within Cash and Bank Overdrafts but is segregated and presented separately on the Statement of Assets and Liabilities as Cash Collateral.

In respect to share issuances or redemptions, the Company operates an umbrella cash account. Monies received or proceeds due will be held and transmitted through this account and are included in Cash and Bank Overdrafts.

Margin. Upon entering into futures contracts, cash deposits are required (initial margin) in an amount equal to a certain percentage of the contract value. Subsequent payments (variation margin) are made or received by the Funds each day. Margin against these derivative instruments is not included within Cash or Bank Overdrafts but is segregated and presented separately as Futures Margin Cash or Futures Margin Cash Due to Broker, as applicable.

(i) Redeemable Participating Shares. Redeemable participating shares provide Shareholders with the right to redeem their shares for cash and are classified as financial liabilities.

(j) Trade Date Reporting. Investment transactions for financial statement purposes as at 30 June 2020 are accounted for on the trade date. This is different from the basis used for the daily dealing net asset value, which is accounted for using the trade date plus one business day.

(k) Offsetting. Financial assets and liabilities are offset and the net amount reported when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. As at 30 June 2020, there were no financial assets or liabilities offset.

(l) **Equalisation.** Equalisation occurs to reflect the pro rata payment of distributions based on the time period over which shares have been owned by an investor. If shares are purchased when the Funds have accrued income but not yet declared a distribution, the Funds will credit to the equalisation account the portion of the purchase price representing income accrued but directly attributable to those shares. Conversely, if shares are redeemed when the Funds have accrued income but not yet declared a distribution, the Funds will deduct from the equalisation account the portion of the redemption price representing income accrued but directly attributable to those shares. Equalisation is accounted for through the Statement of Operations as a finance cost.

4. Risk Management Policies.

Price Risk. Price risk is the risk that the value of financial instruments will fluctuate because of changes in the market. The Investment Manager considers the asset allocation of the portfolio in order to minimise the risk associated with particular countries or industry sectors while continuing to follow the stated investment objective.

The investment objective for an index fund is to seek to track as closely as reasonably possible the performance of the benchmark indices. In order to achieve this objective, an index fund invests primarily in securities held in the relevant benchmark index. An index fund places limitations on the amount by which a holding may deviate from the proportion in the benchmark to limit the market risk from mismatched positions.

All investments present a risk of loss of capital. The Investment Manager assesses market risk volatility to ensure that the effect of using financial derivative instruments is not significant enough to cause disproportionate losses to overall value. The Investment Manager moderates this risk through careful selection of financial instruments.

Currency Risk. Currency risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in currency exchange rates. Local interest rates and monetary policy, as well as other government fiscal and labour policies, can also adversely impact currency values. The Funds may enter into foreign currency contracts for hedging purposes, which can include the economic hedging of all or a portion of the currency exposure of an investment or group of investments. The Funds may also enter into these contracts for non-hedging purposes, which can include increasing the exposure to a foreign currency, or the shifting of exposure to foreign currency fluctuations from one country to another.

All currency-hedged share classes for the year ended 30 June 2020 are listed in the following table:

Fund	Currency
Global Aggregate Bond UCITS ETF	
EUR-Hedged Accumulating	EUR
EUR-Hedged Distributing	EUR
GBP-Hedged Accumulating	GBP
GBP-Hedged Distributing	GBP
USD-Hedged Accumulating	USD
Global Minimum Volatility UCITS ETF	
USD-Hedged Accumulating	USD
FTSE Japan UCITS ETF	
EUR-Hedged Accumulating	EUR
USD-Hedged Accumulating	USD

All currency-hedged share classes for the year ended 30 June 2019 are listed in the following table:

Fund	Currency
Global Aggregate Bond UCITS ETF	
EUR-Hedged Accumulating	EUR
EUR-Hedged Distributing	EUR
GBP-Hedged Accumulating	GBP
GBP-Hedged Distributing	GBP
Global Minimum Volatility UCITS ETF	
USD-Hedged Accumulating	USD

Each hedged share class incorporates a currency hedge, which acts as a buffer against the impact of currency fluctuations for investors for whom the base currency is hedged share class-specific currency.

Interest Rate Risk. Revenue on fixed income securities may be affected by changes in interest rates relevant to particular securities or as a result of the Investment Manager being unable to secure similar returns on the expiry of contracts or sale of securities. The value of fixed rate securities may be affected by interest rate movements or the expectation of such movements in the future. Interest receivable on bank deposits or payable on bank overdraft positions will also be affected by fluctuations in interest rates.

For Funds with exposure to interest rate risk, the tables below summarise the percentage of each Fund's holdings by maturity:

Fund	30 June 2020						
	Under 1 Year	1–5 Years	5–10 Years	10–15 Years	15–20 Years	20–25 Years	Over 25 Years

Management of Market Risk (Including Price, Currency and Interest Rate Risks). The Investment Manager performs daily reviews of portfolio attributes, such as sector diversification, maturity and credit quality, and makes adjustments where necessary to ensure that the risk components closely match those of the respective benchmarks. In addition, the Investment Manager and Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator") perform daily checks of performance against the respective benchmarks. Potential tracking errors are raised and discussed by the Investment Manager and the Administrator for investigation and resolution. Market impact, currency discrepancies and interest rate exposure are investigated as possible causes. Currency positions are reconciled daily and discrepancies are immediately resolved. Procedures are established with the Investment Manager to trade currency as closely as possible to the close of the markets, so as to obtain exchange rates that closely approximate the rates used in the daily valuation.

Market disruptions associated with the COVID-19 pandemic have had a global impact, and uncertainty exists as to the long-term implications. Such disruptions can adversely affect assets of the Funds and thus performance of the Funds.

Market Risk Sensitivity Analysis. Market risk exposures to the Funds are measured using value at risk (VaR), which estimates the maximum expected loss over a defined period given a specified confidence level. The VaR methodology is a statistically defined, probability-based approach that takes into account estimates for market volatilities and correlations between assets in the portfolio. Risks can be measured consistently across markets and products, and risk measures can be aggregated to arrive at a single risk number. For the purpose of this annual report, a one-year historical (ex-post) absolute VaR calculation has been completed for each Fund as set out below. The calculation includes a 95% confidence interval with a 260-trading-day (one-year) VaR period, or since the Fund's inception if it does not have 260 trading days of performance history. That is, under normal market conditions and assuming no changes to Fund holdings, there is a 95% probability that the value of Fund assets will not decrease by more than the calculated value over a one-year period.

1 The Fund was launched on 17 July 2018.

2 The Fund was launched on 18 June 2019.

Global exposure is measured using the commitment approach, which considers the full constituents of the portfolio. The Investment Manager will observe the regulatory limit and any internal risk limits which may be appropriate for the portfolio.

The use of derivatives may expose the Funds to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard securities. Leveraged derivative positions can therefore increase Fund volatility. The leverage is calculated on a gross exposure basis, by taking the sum of the notional values of the derivatives used by a Fund, without netting, and is expressed as a percentage of the net asset value. Certain Funds may use index futures contracts to a limited extent, to maintain full exposure to the index, maintain liquidity and minimise transaction costs. The Funds did not employ any significant leverage during the year.

Liquidity Risk. Liquidity risk is the risk that sufficient cash cannot be raised to meet liabilities when due. One of the key liquidity factors influencing the Funds is exposure to cash redemptions of redeemable participating shares. Hence the Funds invest the large majority of their assets in investments that are traded in active markets and can ordinarily be readily disposed. However, liquidity risk will occur if an issuer becomes credit-impaired or if the relevant market becomes illiquid. In such a case, it may not be possible to initiate or liquidate a position at a price deemed by the Investment Manager to be demonstrating fair value. Liquidity risk may be temporary or may last for extended periods. The Funds invest in securities that form part of the benchmark indices. Benchmark indices are constructed from index rules requiring securities to have a specified minimum trading volume, which, although not guaranteeing liquidity, provides indication of the liquid nature of the securities underlying the Funds. The Funds are exposed to withdrawals and contributions that are invested to ensure that exposures to the benchmark indices are maintained in order to meet the investment objective of the Funds.

Index futures contracts may be used to a limited extent, to maintain full exposure to the index, maintain liquidity and minimise transaction costs. The Funds may equitise cash holdings from inflows and outflows by purchasing futures contracts to immediately invest incoming cash to the market, or selling futures in response to cash outflows, thereby simulating a fully invested position in the underlying index while maintaining a cash balance for liquidity.

Management of Liquidity Risk. In order to meet redemption requests and raise cash from the portfolio, the Investment Manager receives daily reports of share capital activity from the Administrator. The Investment Manager incorporates cash forecasts into the daily management of the portfolio and monitors cash balances daily.

Credit Risk. Credit risk is the risk that a counterparty to a transaction or an issuer of a financial instrument will fail to pay interest and principal when due, or that perceptions of the issuer's ability to make such payments will cause the price of an investment to decline. Significant investment in debt securities or use of over-the-counter derivative contracts to a material degree will generally increase credit risk.

Credit risk exposure is also created through interactions with brokers and custodians. However, transactions in listed securities are settled and paid for upon delivery of securities using only approved brokers. The risk of default is therefore considered minimal because securities are delivered only when the broker has made payment and the broker is paid for purchases only once the securities have been received by Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depository").

Credit risk may also arise from assets of the Funds which are substantially all held by the Depository. Bankruptcy or insolvency of the Depository may cause certain rights with respect to securities and other positions held to be delayed or limited. As of 30 June 2020, the Depository has a long-term credit rating of A+ from Fitch (30 June 2019: A+). Additionally, the Depository ensures there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. All securities held in custody by the Depository are segregated

from the Depositary's own assets, whether in a vault, in segregated accounts on the books of sub-custodians, or in an account maintained at a central securities depository. The Depositary maintains segregated accounts per client on its own books as well as on the books of sub-custodians in local markets, where possible.

For Funds invested in debt securities the following is an analysis of the concentration of issuer credit ratings:

Fund	30 June 2020

Management of Credit Risk. Credit risk is managed by investment policies which restrict or place limits on acceptable portfolio and net asset concentrations as well as exposure to certain instruments, credit institutions, and counterparties. The Investment Manager performs daily reviews of portfolio attributes, such as sector diversification and credit quality, and makes adjustments where necessary to ensure that the credit risk components closely match those of the respective benchmarks. Credit ratings of debt instruments and counterparties are monitored and evaluated periodically by the Investment Manager; an approved counterparty list is maintained, and trading with approved counterparties is enforced.

5. Taxation. Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares, or appropriation or cancellation of shares of a Shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer. Any tax arising on a chargeable event is a liability of the Shareholders, albeit it is paid by the Company (although if the Company fails to deduct the correct amount of tax it becomes ultimately a liability of the Company).

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish tax resident shareholders who have provided the necessary signed statutory declarations.

Dividends, interest and capital gains received on investments may be subject to withholding or other taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable.

The Funds have filed tax reclaims for previously withheld taxes on dividends earned in certain European Union countries. These filings are subject to various administrative and judicial proceedings within these countries. Such tax reclaims received during the year, if any, are included in Foreign Withholding Tax. No other amounts for additional tax reclaims are reflected in the financial statements due to the uncertainty as to the ultimate resolution of proceedings, the likelihood of receipt of these reclaims and the potential timing of payment.

6. Distribution Policy. The following table presents the payment frequency with respect to distributing share classes. If a dividend has not been declared, income and gains of such Fund will be reflected in the net asset value per share.

1 The Fund was launched on 17 July 2018.

7. Net Asset Value Per Share. The net asset value per share of each share class is calculated by dividing the total net assets of each share class by the number of shares in issue.

8. Share Capital. The Company has variable share capital consisting of 5,000,000,000,002 authorised shares divided into two Subscriber Shares (US\$1.00 par value) and 5,000,000,000,000 (five trillion) redeemable participating shares (no par value).

The Directors may issue shares of any class and create new classes of shares on such terms as the Directors may from time to time determine in relation to any Fund and in accordance with the requirements of the Central Bank. Shares may be divided into different classes to accommodate different subscription, redemption or fee arrangements, dividend provisions, or charges.

Subscriber Shares. There are two Subscriber Shares in issue, which are held by nominees for the Investment Manager. Subscriber Shares do not entitle the holders thereof to any dividend and on a winding-up entitle the holder to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The Subscriber Shares do not form part of the Shareholders' funds and are not included in the net asset value of the Company.

Members who are individuals may attend and vote at general meetings in person or by proxy. Members who are corporations may attend and vote at general meetings by appointing a representative or proxy. Subject to any special terms as to voting upon which any shares may be issued or may for the time being be held, at any general meeting on a show of hands every Shareholder who (being an individual) is present in person or (being a corporation) is present by duly authorised representative shall have one vote. On a poll every such holder present as aforesaid or by proxy shall have one vote for every share held.

1 The Fund was launched on 17 July 2018.

2 The Fund was launched on 18 June 2019.

9. Credit Facility. The Funds and certain other funds managed by the Manager or its affiliates participate in an annually renewable USD \$4.3 billion (2019: \$4.3 billion) committed credit facility. Each participating Fund is individually liable for its borrowings under the credit facility. Borrowings may be utilised for temporary or emergency purposes, and are subject to the participating fund's regulatory and contractual borrowing restrictions. Participating Funds are allocated an annual commitment fee of 0.10% of the undrawn facility amount as well as certain administrative fees. Any fees allocated to the Funds are paid by the Manager. Interest and direct borrowing costs associated with draws on the credit facility are charged to the Funds and recorded in the Statement of Operations.

Any borrowings under this facility denominated in euros bear interest at the Euro Interbank Offered Rate plus an applicable margin, while borrowings under this facility in denominations other than euros bear interest at a rate equal to the higher of the one-month London Interbank Offered Rate (or an acceptable alternate rate, if necessary), federal funds effective rate, or overnight bank funding rate plus an agreed-upon spread.

The Funds did not have any borrowings outstanding at 30 June 2020 or at any time during the year then ended (30 June 2019: none).

10. Efficient Portfolio Management. Investment techniques and financial derivative instruments (FDIs) may be employed for efficient portfolio management purposes, including hedging against market movements, currency exchange or interest rate risks. Any investment technique or use of FDIs must be one which is reasonably believed by the Investment Manager to be economically appropriate in that it is realised in a cost-effective way. Realised and unrealised gains or losses arising from financial derivative transactions are accounted for through the Statement of Operations as Net Gain/(Loss) on Investment Instruments.

Securities lending is also used for efficient portfolio management. The securities lending agent is Brown Brothers Harriman & Co. All operational costs in support of the lending programme are borne by the lending agent and paid directly out of any lending agent fees. Securities lending revenue is net of any lending agent fees paid.

Securities on loan by the Funds and the value of collateral held in respect of the securities were:

12. Related Party Transactions.

Manager. Vanguard Group (Ireland) Limited is the Funds' Manager and acts as a principal in respect of all transactions of shares in the Funds. For its services, the Manager receives a fixed single fee per share class (the "Management Fees") calculated on a daily basis and paid monthly. Out of the fees received, the Manager pays for any sub-advisers, as well as the costs of administration including audit, depositary, legal, registration and regulatory fees associated with the Funds. As a result, the Manager anticipates that the ongoing charges figure ("OCF") of each share class will closely track the Management Fees. In the event that the costs and expenses of the Company or any Fund exceed the OCF, the Manager will be responsible for discharging any excess out of its own assets. The Manager, in its sole discretion, may voluntarily waive all or part of its fee, and any such waiver could be discontinued at any time and without notice.

Any amounts due from or to the Manager at the end of the year are disclosed in the Statement of Assets and Liabilities. Amounts paid to the Manager in respect to fees for the year are disclosed in the Statement of Operations.

The Annual Management Fees of certain share classes, in certain Funds, were reduced during the period. The table below presents the amounts in effect during the period and as at 30 June 2020:

Fund	1 January 2019– 22 October 2019	23 October 2019– 30 June 2020	Fund	1 January 2019– 22 October 2019	23 October 2019– 30 June 2020

1 The Fund was launched on 17 July 2018.

2 The Fund was launched on 18 June 2019.

Directors' Fees. Aggregate director fees paid by the Manager out of the management fees for the year ended 30 June 2020 were US\$401,823 (30 June 2019: US\$275,834), of which US\$none (30 June 2019: US\$none) was outstanding at the year-end.

The Company had eight Directors as at 30 June 2020, three of whom were independent. The interests of the Directors in related parties are as follows:

Mr James M. Norris is a Managing Director of Vanguard International, a division within The Vanguard Group, Inc.; Mr Sean P. Hagerty is Managing Director of Vanguard Asset Management, Limited.; Mr Michael Miller retired as a Managing Director of The Vanguard Group, Inc., in 2015.; Mr Richard Wane is Managing Director, Ireland.; Mr Thomas Merz is Head of Distribution, Europe.; Ms Tara Doyle is a partner in the legal advisory firm acting as the Manager's Secretary and serving the activities of the Manager.

Investment Manager. Vanguard Global Advisers, LLC, is the Investment Manager of the Company and is compensated by the Manager. The Investment Manager or the Manager, at their discretion, may appoint other companies from within the Vanguard Group of Companies to provide investment management and advisory services with respect to the Funds.

Investments by Affiliates. As at 30 June 2020, Vanguard FTSE North America UCITS ETF owned 4,182 shares valued at US\$1,185,304 of Vanguard S&P 500 ETF, which is managed by the Investment Manager (30 June 2019: Vanguard FTSE North America UCITS ETF owned 4,182 shares valued at US\$1,125,586 of Vanguard S&P 500 ETF).

The following amounts were held by affiliates of the Manager, expressed as a percentage of total net assets:

Fund	30 June 2020	30 June 2019
FTSE 100 UCITS ETF	4.23%	4.19%
FTSE 250 UCITS ETF	1.32%	1.06%
FTSE North America UCITS ETF	1.94%	2.76%
Global Aggregate Bond UCITS ETF	25.72%	75.37%
S&P 500 UCITS ETF	2.30%	1.70%
UK Gilt UCITS ETF	2.39%	1.42%

Inter-Fund Trading. The table below details the inter-fund trades between the Company and other funds also managed by the Investment Manager or its affiliates during the year ended 30 June 2020. There were no amounts outstanding between these parties as at the balance sheet date.

Fund	Year Ended 30 June 2020

18. Auditors' Remuneration. The statutory audit fee (including out-of-pocket expenses incurred by the auditors in connection with their work) paid by the Manager out of the OCF on behalf of the Company for the year amounted to US\$329,964 (30 June 2019: US\$364,195). There were no other fees paid to the auditors other than the statutory audit fee.

19. Events During the Year Ended 30 June 2020.

There were no events during the year requiring additional recognition or disclosure in the financial statements.

20. Events Since the Statement of Assets and Liabilities Date.

Thomas Merz resigned as Director on 17 August 2020.

The Euro STOXX 50 UCITS ETF was liquidated on 25 August 2020.

The U.S. Treasury 0–1 Year Bond ETF was launched on 2 September 2020.

The DAX UCITS ETF changed its name to Vanguard Germany All Cap UCITS ETF and its benchmark to the FTSE Germany All Cap Index on 18 September 2020.

21. Approval of the Financial Statements. The Financial Statements were approved by the Directors on 28 October 2020.

Report From the Directors

The Board of Directors (the “Directors”) submits its annual report together with the audited financial statements for Vanguard Funds plc (the “Company”) for the year ended 30 June 2020.

Directors’ Responsibilities Statement

The Directors are responsible for preparing the Annual Report and the financial statements in accordance with Irish law and regulations.

Irish company law requires the Directors to prepare financial statements giving a true and fair view of the state of affairs of the Company and the profit or loss of the Company for each year. Under that law the Directors have elected to prepare the financial statements in accordance with Irish Generally Accepted Accounting Practice (accounting standards issued by the Financial Reporting Council and promulgated by the Institute of Chartered Accountants in Ireland and Irish law).

In preparing those financial statements, the Directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and accounting estimates that are reasonable and prudent;
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- State whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards.

The Directors are responsible for keeping adequate accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements are prepared in accordance with accounting standards generally accepted in Ireland and comply with the Companies Act 2014, as amended, and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”). They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors have the power, under the Memorandum and Articles of Association of the Company, to determine the time and place at which payment for shares must be made. Accordingly, the Directors in exceptional circumstances have discretion to accept subscription monies after the dealing

time specified in the Prospectus. In exercising this discretion, the Directors will take into account legal considerations, timing considerations and other relevant considerations.

The financial statements are published at www.vanguard.co.uk. The Directors together with the Manager and Investment Manager are responsible for the maintenance and integrity of the website as far as it relates to the Company. The work carried out by the auditors does not involve consideration of the maintenance and integrity of the website and accordingly, the auditors accept no responsibility for any changes that have occurred to the financial statements presented on the website. Legislation in the Republic of Ireland governing the presentation and dissemination of the financial statements may differ from legislation in other jurisdictions.

Statement of Relevant Audit Information

The Directors in office at the date of this report have each confirmed that:

- As far as he/she is aware, there is no relevant audit information of which the Company’s auditor is unaware; and
- He/she has taken all the steps that he/she ought to have taken as a director in order to make himself/herself aware of any relevant audit information and to establish that the Company’s auditor is aware of that information.

Directors’ Compliance Statement

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014, as amended). As required by Section 225(2) of the Companies Act 2014, as amended, the Directors acknowledge that they are responsible for securing the Company’s compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014, as amended, and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors’ opinion, designed to secure material compliance with the Company’s relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company’s relevant obligations.

Accounting Records

The measures taken by the Directors to secure compliance with the Company’s obligations to keep adequate accounting records are the use of appropriate systems and procedures, appointment of an administrator and employment of competent persons. The accounting records are kept at the Administrator, 30 Herbert Street, Dublin 2, Ireland.

Corporate Governance Statement

The Company is subject to and complies with Irish statute comprising the Companies Act 2014, as amended, and with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations"), the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "CBI UCITS Regulations") and the Listing Rules of the Euronext Dublin Exchange. The Board of Directors has assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies, as published by the Irish Funds Industry Association in December 2011 (the "Corporate Governance Code"). The Board of Directors has adopted all corporate governance practices and procedures of the Corporate Governance Code with effect from 31 December 2012. In this regard, the Board of Directors has assessed its corporate governance practices and procedures as being consistent with those of the Corporate Governance Code for the year ended 30 June 2020.

Each of the service providers engaged by the Company is subject to its own corporate governance requirements. A copy of the Corporate Governance Code is available at <http://files.irishfunds.ie/1432820468-corporate-governance-code-for-collective-investment-schemes-and-management-companies.pdf>.

Financial Reporting Process Description of Main Features

The Board is responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board has established processes regarding internal control and risk management systems to ensure its effective oversight of the financial reporting process. These include appointing the Administrator, Brown Brothers Harriman Fund Administration Services (Ireland) Limited, to maintain the books and records. The Administrator is authorised and regulated by the Central Bank of Ireland and must comply with the rules imposed by the Central Bank of Ireland. The Administrator is also contractually obliged to prepare for review and approval by the Board the annual report, including financial statements intended to give a true and fair view, and the half-yearly financial statements. The Board evaluates and discusses significant accounting and reporting issues as the need arises. From time to time the Board also examines and evaluates the Administrator's financial accounting and reporting routines and monitors and evaluates the external auditors' performance, qualifications and independence.

The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Board.

Risk Assessment

The Board is responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The Board has also put in place processes to identify changes in accounting rules and recommendations and to ensure that these changes are accurately reflected in the Company's financial statements.

Control Activities

The Administrator maintains control structures to manage the risks over financial reporting. These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report. Examples of control activities exercised by the Administrator include analytical review procedures, reconciliations and automated controls over IT systems. The method of valuing securities and other assets when prices are not available from external independent sources is detailed in Note 3 of the Notes to the Financial Statements.

Information and Communication

The Company's policies and the Board's instructions with relevance for financial reporting are updated and communicated via appropriate channels, such as e-mail, correspondence and meetings, to ensure that all financial reporting information requirements are met in a complete and accurate manner.

Monitoring

The Board receives regular presentations and reviews reports from the Depositary, Investment Manager and Administrator. The Board also has an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Capital Structure

No person has a significant direct or indirect holding of securities in the Company. No person has any special rights of control over the Company's share capital. There are no restrictions on voting rights.

Powers of the Directors

With regard to the appointment and replacement of Directors, the Company is governed by its Articles of Association, Irish statute comprising the Companies Act 2014, as amended, and with the UCITS Regulations and the Listing Rules of the

Euronext Dublin Exchange as applicable to investment funds. The Articles of Association themselves may be amended by special resolution of the shareholders.

The Board is responsible for managing the business affairs of the Company in accordance with the Articles of Association. The Directors may delegate certain functions to the Administrator and other parties, subject to supervision and direction by the Directors. The Directors have delegated the day-to-day administration of the Company to the Administrator and the investment management and distribution functions to the Investment Manager. Consequently none of the Directors is an executive Director.

The Articles of Association provide that the Directors may exercise all the powers of the Company to borrow money, to mortgage or charge its undertaking, property or any part thereof and may delegate these powers to the Investment Manager.

The Directors may, at any time and from time to time, temporarily suspend the calculation of the Net Asset Value of a particular Fund and the issue, repurchase and conversion of Shares in any of the following instances:

- (a) during any period (other than ordinary holiday or customary weekend closings) when any market or Recognised Exchange is closed and which is the main market or Recognised Exchange for a significant part of investments of the relevant Fund, or in which trading thereon is restricted or suspended;
- (b) during any period when an emergency exists as a result of which disposal by the Company of investments which constitute a substantial portion of the assets of the relevant class is not practically feasible; or it is not possible to transfer monies involved in the acquisition or disposition of investments at normal rates of exchange; or it is not practically feasible for the Directors or their delegate fairly to determine the value of any assets of the relevant Fund;
- (c) during any breakdown in the means of communication normally employed in determining the price of any of the investments of the relevant Fund or of current prices on any market or Recognised Exchange;
- (d) when for any reason the prices of any investments of the relevant class cannot be reasonably, promptly or accurately ascertained;
- (e) during any period when remittance of monies which will or may be involved in the realisation of or in the payment for any of the investments of the relevant class cannot, in the opinion of the Directors, be carried out at normal rates of exchange;

(f) for the purpose of winding up the Company or terminating any Fund; or

(g) if any other reason makes it impossible or impracticable to determine the value of a substantial portion of the investments of the Company or any Fund.

Notice of any such suspension and notice of the termination of any such suspension shall be given immediately to the Central Bank of Ireland and to the relevant stock exchanges and will be communicated to applicants for Shares or to Shareholders requesting the repurchase of Shares at the time of application or filing of the written request for such repurchase. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.

Registered Shares may be transferred by instrument in writing. The instrument of transfer must be accompanied by a certificate from the transferee that it is not acquiring such Shares on behalf of or for the benefit of a US Person. In the case of the death of one or joint Shareholders, the survivor or survivors will be the only person or persons recognised by the Administrator as having any title to or interest in the Shares registered in the names of such joint Shareholders. The Directors may decline to register a transfer if they are aware or reasonably believe the transfer would result in the beneficial ownership of Shares by a person in contravention of any restrictions on ownership imposed by the Directors or might result in legal, regulatory, pecuniary, taxation or material administrative disadvantage to the relevant Fund or Shareholders generally.

Shareholder Meetings

The Annual General Meeting of the Company will usually be held in Dublin, normally during the month of December or such other date as the Directors may determine. Notice convening the Annual General Meeting in each year at which the audited financial statements of the Company will be presented (together with the Directors' and Auditors' reports of the Company) will be sent to Shareholders at their registered addresses not less than 21 clear days before the date fixed for the meeting. Other general meetings may be convened from time to time by the Directors in such manner as provided by Irish law.

Each of the Shares entitles the holder to attend and vote at meetings of the Company and of the Fund represented by those Shares. Matters may be determined by a meeting of Shareholders on a show of hands unless a poll is requested by any Shareholder having the right to vote at the meeting or unless the chairman of the meeting requests a poll. Each Shareholder has one vote on a show of hands. Each Share gives the holder one vote in relation to any matters relating

to the Company which are submitted to Shareholders for a vote by poll. No class of Shares confers on the holder thereof any preferential or preemptive rights or any rights to participate in the profits and dividends of any other share class or any voting rights in relation to matters relating solely to any other share class.

Any resolution to alter the class rights of the Shares requires the approval of three-quarters of the holders of the shares represented or present and voting at a general meeting of the class. The quorum for any general meeting of the class convened to consider any alteration to the class rights of the Shares shall be such number of Shareholders being two or more persons whose holdings comprise one-third of the Shares.

Each of the Shares other than Subscriber Shares entitles the Shareholder to participate equally on a pro-rata basis in the dividends and net assets of the Fund in respect of which the Shares have been issued, save in the case of dividends declared prior to becoming a Shareholder.

Management Shares entitle the Shareholders holding them to attend and vote at all general meetings of the Company but do not entitle the holders to participate in the dividends or net assets of the Company.

Composition and Operation of Board and Committees

There are eight Directors currently, three of whom are independent of the Investment Manager. The Directors may be removed by the Shareholders by ordinary resolution in accordance with the procedures established under the Irish Companies Act 2014, as amended. The Board of Directors meets at least quarterly.

An audit committee has been formed as a sub-committee of the Board of Directors. There are no other sub-committees of the Board of Directors.

Directors

The names of the persons who served as Directors at any time during the year ended 30 June 2020 are set out below:

Peter Blessing¹ (Irish)

James M. Norris (American)

William Slattery¹ (Irish)

Michael S. Miller (American)

Sean P. Hagerty (American)

Tara Doyle¹ (Irish)

Richard Wane (British)

Thomas Merz² (Swiss)

Directors' and Secretary's Interests

None of the Directors, the Company Secretary, or their families hold or held any beneficial interests in the Company at 30 June 2020 or during the year to the date of this report.

Transactions Involving Directors

There are no contracts or arrangements of any significance in relation to the business of the Company in which the Directors or the Company Secretary had any interest as defined in the Companies Act 2014, as amended, at any time during the year ended 30 June 2020. Ms Tara Doyle, an independent director of the Company, is a Shareholder and officer of the Company's Secretary and a Partner in the Manager's legal adviser.

Results, Activities and Future Developments

A detailed review of the year and factors which contributed to the performance for the year is included in each of the Funds' Profiles. Details of the assets, liabilities and financial position of the Company and results for the year ended 30 June 2020 are set out in the Statement of Assets and Liabilities and Statement of Operations for each Fund.

Principal Risks and Uncertainties

The Directors draw your attention to the principal risks affecting the Funds, which are outlined in Note 4 of the Notes to the Financial Statements.

The Directors have also considered other risks, which can be seen in the Additional Information From the Directors.

Dividends

Dividends that have been declared during the year can be found in Note 6 in the Notes to the Financial Statements.

Events Since the Year-End

Thomas Merz resigned as Director on 17 August 2020.

On behalf of the Board,

Richard Wane
Sean Hagerty
28 October 2020

¹ Served in an independent, non-executive capacity during the year.

² Resigned as a Director on 17 August 2020.

Additional Information From the Directors (unaudited)

Potential Implications of Brexit

The United Kingdom (“UK”) left the European Union (“EU”) on 31 January 2020, with a transition period that will end on 31 December 2020, unless extended (the “Transition Period”). Therefore, the UK has ceased to be an EU Member State but, during the Transition Period, the UK continues to be treated as an EU Member State and EU law continues to apply. The exact nature and extent of the UK’s future relationship with the EU, following the Transition Period, remains uncertain.

Political instability and economic uncertainty may lead to speculation and subsequent market volatility, particularly for assets denominated in British pounds. Vanguard continues to encourage investors to follow its core investing principles, including maintaining long-term discipline. The implications of Brexit extend well beyond the UK economy and financial markets, affecting multinational organisations globally. Vanguard remains committed to safeguarding our investors’ assets and their long-term interests and has devoted significant resources to developing plans to manage the impact of Brexit.

Coronavirus (COVID-19)

Market disruptions associated with the COVID-19 pandemic have had a global impact, and uncertainty exists as to the long-term implications. Such disruptions can adversely affect assets of the Funds and thus performance of the Funds. Vanguard continues to encourage investors to follow its core investment principles, including maintaining long-term discipline. Vanguard is committed to safeguarding the assets of investors and their long-term interests.

Remuneration Disclosure

Vanguard personnel providing services to the Manager are subject to the Vanguard European Remuneration Policy (the “Remuneration Policy”). The Remuneration Policy includes the remuneration requirements of the UCITS V Directive (2014/91/EU).

The governance of remuneration within Vanguard Europe is undertaken through a tiered structure, including Vanguard’s Global Remuneration Committee and the European Remuneration Committee (“ERC”). The Global Remuneration Committee also operates at The Vanguard Group level and oversees the overall compensation programmes of The Vanguard Group. The ERC is responsible for implementing the remuneration programmes in accordance with our total rewards philosophy and global organisation, including overseeing the Remuneration Policy.

The Remuneration Policy provides for an appropriate balance of fixed salary; benefits, such as pension; and annual bonus and long-term incentive arrangements. Incentives are based on the overall business performance of The Vanguard Group, or individual, team, business unit and fund performance. The incentive plans are reviewed and approved by the ERC (and other applicable groups) in order to ensure that plans appropriately assess financial and non-financial performance and do not encourage conflicts of interest, and to ensure that risk or compliance issues are appropriately reflected.

The ERC also reviews and approves the list of UCITS code staff annually. Identified code staff are notified and understand the code staff responsibilities.

Under the UCITS V Directive, the Manager is required to disclose information relating to the remuneration paid to its staff for the financial year, split into fixed and variable remuneration. The table below presents the aggregate total remuneration paid to staff who provide services to the Funds and the aggregate total remuneration paid to all relevant UCITS code staff.

	Headcount ¹	Total Remuneration (£000) ^{2,3}
Funds, of which	33	3,113
Fixed Remuneration	33	2,316
Variable Remuneration	33	797
Performance Fees	n/a	n/a
Code Staff	2	744
Fixed Remuneration	2	298
Variable Remuneration	2	446
Performance Fees	n/a	n/a

1 This is the total number of employees who are employed through Vanguard Group Investment Limited.

2 The staff in this table provide services to the Irish Funds.

3 The remuneration disclosed is the total remuneration earned for the 2019 Irish Funds fiscal year.

Remuneration reflects fixed pay (salary) and performance-related pay (annual and long-term incentives). Individual incentive outcomes under the plans are based on performance assessed by reference to an appropriate balance of quantitative and qualitative measures, such as behaviour, including compliance with all applicable policies. The individual incentive outcome is fully discretionary and, if appropriate, outcomes based on financial performance can be overridden based on the qualitative measures.

Connected Persons Transactions

Transactions carried out with the Company by the Investment Manager, Manager, Depository, Investment Adviser and/or associated or group companies of these ("Connected Persons") during the year ended 30 June 2020 were carried out as if negotiated at arm's length and were in the best interests of the Company's Shareholders. The Directors of the Company are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that all transactions entered into by the Company with Connected Persons are carried out as if negotiated at arm's length and in the best interests of the Company's Shareholders.

Diversity Report

With respect to diversity, the Company has no employees and the only individuals engaged directly by it are its Directors. When there is a vacancy on the Company's Board of Directors (the "Board"), in line with the Company's Diversity Policy, the objective is to ensure that the Board is diversified with an appropriate mix as regards age, gender and educational/professional backgrounds, while achieving compliance by all individuals with regulatory requirements and an overall composition with the requisite experience and skills.

There have been no vacancies on the Company's Board over the reporting period.

Securities Financing Transactions Regulation

Securities Financing Transactions Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps.

An SFT is defined as per Article 3(11) of the SFTR as:

- A repurchase/reverse repurchase agreement,
- Securities or commodities lending and securities or commodities borrowing,
- A buy-sell back transaction or sell-buy back transaction, or
- A margin lending transaction.

As at 30 June 2020, the Company had a securities lending programme as a type of SFT under the scope of the SFTR.

Global Data:

The amounts of securities on loan as at 30 June 2020 are as follows:

Fund	Loan Amount	Proportion of NAV (%)	% of Lendable Assets

Return/Costs:

The securities lending agent appointed is Brown Brothers Harriman & Co. All securities lending revenue, with the exception of a minimal lending agent fee, is received directly into the Funds.

All operational costs in supporting the lending programme are borne by the lending agent and paid directly out of the agent lender fee received.

The current securities lending income split between the relevant Fund and the securities lending agent for the year ended 30 June 2020 is as follows:

Fund	Returns	Amount	% Overall Returns
DAX UCITS ETF	To Fund:	€5,824	93
	To Lending Agent:	€448	7

Report of the Depositary to the Shareholders

We have enquired into the conduct of Vanguard Funds plc (the "Company") for the year ended 30 June 2020 in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Memorandum and Articles of Association and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations, and
- (ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

Independent Auditors' Report to the members of Vanguard Funds plc

Report on the audit of the financial statements

Opinion

In our opinion, Vanguard Funds plc's financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 30 June 2020 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report, which comprise:

- the Company Statement of Assets and Liabilities and the Statement of Assets and Liabilities for each of the Funds as at 30 June 2020;
- the Company Statement of Operations and the Statement of Operations for each of the Funds for the year then ended;
- the Company Statement of Changes in Net Assets and the Statement of Changes in Net Assets for each of the Funds for the year then ended;
- the Statement of Investments for each of the Funds as at 30 June 2020; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies.

Our opinion is consistent with our reporting to the Audit Committee.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by IAASA's Ethical Standard were not provided to the Company.

We have provided no non-audit services to the Company in the period from 1 July 2019 to 30 June 2020.

Our audit approach

Overview

Materiality

- Overall materiality: 50 basis points of Net Assets Value ("NAV") at 30 June 2020 for each of the Company's Funds.

Audit scope

- The Company is an open-ended investment Company with variable capital and engages Vanguard Group (Ireland) Limited (the "Manager") to manage certain duties and responsibilities with regards to the day-to-day management of the Company. We tailored the scope of our audit taking into account the types of investments within the Funds, the involvement of the third parties referred to below, the accounting processes and controls, and the industry in which the Company operates. We look at each of the Funds at an individual level.

Key audit matters

- Existence and valuation of financial assets at fair value through profit or loss.

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

Key audit matter	How our audit addressed the key audit matter
<p>Existence and valuation of financial assets at fair value through profit or loss</p> <p>Refer to the Statement of Investments for each of the Funds and the accounting policies set out in note 3 (a) Critical Accounting Estimates and Judgements and note 3 (d) Financial Assets and Financial Liabilities.</p> <p>The financial assets at fair value through profit or loss included in the Statements of Assets and Liabilities as at 30 June 2020 are valued at fair value in line with Generally Accepted Accounting Practice in Ireland.</p> <p>This is considered a key audit matter as it represents the principal element of the financial statements.</p>	<p>We obtained independent confirmation from the Depositary or other counterparties of the investment portfolios held as at 30 June 2020, agreeing the amounts held to the accounting records.</p> <p>We tested the valuation of the investment portfolios by independently agreeing the valuation of investments to third party vendor sources.</p> <p>No material misstatements were identified as a result of the procedures we performed.</p>

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which it operates.

As at 30 June 2020 there are 26 Funds operating. The Company's Company Statement of Assets and Liabilities, Company Statement of Operations, and Company Statement of Changes in Net Assets are an aggregation of the positions and results of the Funds.

The directors control the affairs of the Company and are responsible for the overall investment policy which is determined by them. The Company engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the Company. The Manager delegated certain responsibilities to Vanguard Global Advisers LLC (the "Investment Manager") and to Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Administrator. The Company has appointed Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") to act as Depositary of the Company's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the Company's interaction with the Administrator, and we assessed the control environment in place at the Administrator.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the Company's Funds as follows:

<i>Overall materiality and how we determined it</i>	50 basis points (2019: 50 basis points) of Net Asset Value ("NAV") at 30 June 2020 for each of the Company's Funds.
<i>Rationale for benchmark applied</i>	We have applied this benchmark because the main objective of the Company is to provide investors with a total return at a fund level, taking account of the capital and income returns.

We agreed with the Audit Committee that we would report to them misstatements identified during our audit above 5 basis points of each fund's NAV, for NAV per share impacting differences (2019: 5 basis points of each fund's NAV, for NAV per share impacting differences) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's and Funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's and Funds' ability to continue as going concerns.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial

statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Report From the Directors, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

Report From the Directors

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Report From the Directors for the year ended 30 June 2020 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Report From the Directors.

Corporate governance statement

- In our opinion, based on the work undertaken in the course of the audit of the financial statements, the description of the main features of the internal control and risk management systems in relation to the financial reporting process included in the Corporate Governance Statement is consistent with the financial statements and has been prepared in accordance with section 1373(2)(c) of the Companies Act 2014.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit of the financial statements, we have not identified material misstatements in the description of the main features of the internal control and risk management systems in relation to the financial reporting process included in the Corporate Governance Statement.
- In our opinion, based on the work undertaken during the course of the audit of the financial statements, the information required by section 1373(2)(a),(b),(e) and (f) of the Companies Act 2014 and regulation 6 of the European Union (Disclosure of Non-Financial and Diversity Information by certain large undertakings and groups) Regulations 2017 is contained in the Corporate Governance Statement.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Directors' Responsibilities Statement set out on page 573, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect

a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Appointment

We were appointed by the directors on 6 June 2012 to audit the financial statements for the year ended 30 June 2012 and subsequent financial periods. The period of total uninterrupted engagement is 9 years, covering the years ended 30 June 2012 to 30 June 2020.

Additional Information for Investors in the Federal Republic of Germany

Deutsche Bank AG, Taunusanlage 12, 60325 Frankfurt am Main, Federal Republic of Germany, has undertaken the function of Paying and Information Agent for the Company in the Federal Republic of Germany (the "German Paying and Information Agent").

Applications for the redemptions and conversion of shares may be sent to the German Paying and Information Agent.

All payments to investors, including redemption proceeds and potential distributions, may, upon request, be paid through the German Paying and Information Agent.

The Prospectus together with its supplements, the key investor information documents, the Memorandum of Association of the Company and the annual and semiannual reports may be obtained, free of charge, in hard copy form at the office of the German Paying and Information Agent during normal opening hours. Issue, redemption and conversion prices of the shares and notices to Shareholders are also available, free of charge, from the German Paying and Information Agent. The statement of changes in the composition of the investment portfolio is also available free of charge upon request at the office of the German Paying and Information Agent.

Issue, redemption and conversion prices of the share classes of each of the seeded sub-funds will be published under <https://www.vanguard.co.uk/uk/mvc/investments/etf#pricetab>. Notices to Shareholders will be sent by personalised letter to the shareholders.

Deutsche Borse AG, Deutsche Borse Group and their licensors, research partners or data providers have no relationship to Vanguard, other than the licensing of the DAX Index and the related trademarks for use in connection with Vanguard DAX UCITS ETF.

Deutsche Borse AG, Deutsche Borse Group and their licensors, research partners or data providers do not: sponsor, endorse, sell or promote Vanguard DAX UCITS ETF; recommend that any person invest in Vanguard DAX UCITS ETF or any other securities; have any responsibility or liability for or make any decisions about the timing, amount or pricing of Vanguard DAX UCITS ETF; have any responsibility or liability for the administration, management or marketing of Vanguard DAX UCITS ETF; consider the needs of Vanguard DAX UCITS ETF or the owners of Vanguard DAX UCITS ETF in determining, composing or calculating the DAX Index or have any obligation to do so.

Deutsche Borse AG, Deutsche Borse Group and their licensors, research partners or data providers give no warranty, and exclude any liability (whether in negligence or otherwise), in connection with Vanguard DAX UCITS ETF or its performance. Deutsche Borse AG does not assume any contractual relationship with the purchasers of Vanguard DAX UCITS ETF or any other third parties. Specifically, Deutsche Borse AG, Deutsche Borse Group and their licensors, research partners or data providers do not give any warranty, express or implied, and exclude, in particular, any liability about: the results to be obtained by Vanguard DAX UCITS ETF, the owner of Vanguard DAX UCITS ETF or any other person in connection with the use of the DAX Index and the data included in the DAX Index; the accuracy, timeliness, and completeness of the DAX Index and its data; the merchantability and the fitness for a particular purpose or use of the DAX Index and its data; the performance of Vanguard DAX UCITS ETF generally. Deutsche Borse AG, Deutsche Borse Group and their licensors, research partners or data providers give no warranty and exclude any liability, for any errors, omissions or interruptions in the DAX Index or its data. Under no circumstances will Deutsche Borse AG, Deutsche Borse Group or their licensors, research partners or data providers be liable (whether in negligence or otherwise) for any lost profits or indirect, punitive, special or consequential damages or losses, arising as a result of such errors, omissions or interruptions in the DAX Index or its data or generally in relation to Vanguard DAX UCITS ETF, even in circumstances where Deutsche Borse AG, Deutsche Borse Group or their licensors, research partners or data providers are aware that such loss or damage may occur.

The licensing Agreement between Vanguard and Deutsche Borse AG is solely for their benefit and not for the benefit of the owners of Vanguard DAX UCITS ETF or any other third parties.

STOXX Limited, Deutsche Borse Group and their licensors, research partners or data providers have no relationship to Vanguard, other than the licensing of the Euro STOXX 50 Index and the related trademarks for use in connection with Vanguard Euro STOXX 50 UCITS ETF. STOXX, Deutsche Borse Group and their licensors, research partners or data providers do not: sponsor, endorse, sell or promote Vanguard Euro STOXX 50 UCITS ETF, recommend that any person invest in Vanguard Euro STOXX 50 UCITS ETF or any other securities, have any responsibility or liability for or make any decisions about the timing, amount or pricing of Vanguard Euro STOXX 50 UCITS ETF, have any responsibility or liability for the administration, management or marketing of Vanguard Euro STOXX 50 UCITS ETF, consider the needs of Vanguard Euro STOXX 50 UCITS ETF or the owners of Vanguard Euro STOXX 50 UCITS ETF in determining, composing or calculating the Euro STOXX 50 Index or have any obligation to do so. STOXX, Deutsche Borse Group and their licensors, research partners or data providers give no warranty, and exclude any liability (whether in negligence or otherwise), in connection with Vanguard Euro STOXX 50 UCITS ETF or its performance. STOXX does not assume any contractual relationship with the purchasers of Vanguard Euro STOXX 50 UCITS ETF or any other third parties. Specifically, STOXX, Deutsche Borse Group and their licensors, research partners or data providers do not give any warranty, express or implied, and exclude any liability about: the results to be obtained by Vanguard Euro STOXX 50 UCITS ETF, the owner of Vanguard Euro STOXX 50 UCITS ETF or any other person in connection with the use of the Euro STOXX 50 Index and the data included in the Euro STOXX 50 Index; the accuracy, timeliness, and completeness of the Euro STOXX 50 Index and its data; the merchantability and the fitness for a particular purpose or use of the Euro STOXX 50 Index and its data; the performance of Vanguard Euro STOXX 50 UCITS ETF generally. STOXX, Deutsche Borse Group and their licensors, research partners or data providers give no warranty and exclude any liability, for any errors, omissions or interruptions in the Euro STOXX 50 Index or its data. Under no circumstances will STOXX, Deutsche Borse Group or their licensors, research partners or data providers be liable (whether in negligence or otherwise) for any lost profits or indirect, punitive, special or consequential damages or losses arising as a result of such errors, omissions or interruptions in the Euro STOXX 50 Index or its data or generally in relation to Vanguard Euro STOXX 50 UCITS ETF, even in circumstances where STOXX, Deutsche Borse Group or their licensors, research partners or data providers are aware that such loss or damage may occur. The licensing Agreement between Vanguard and STOXX is solely for their benefit and not for the benefit of the owners of Vanguard Euro STOXX 50 UCITS ETF or any other third parties.

BLOOMBERG is a trademark and service mark of Bloomberg Finance L.P. BARCLAYS is a trademark and service mark of Barclays Bank Plc, used under license. Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited (BISL) (collectively, Bloomberg), or Bloomberg's licensors, own all proprietary rights in the Bloomberg Barclays Indices.

Neither Barclays Bank Plc, Barclays Capital Inc., or any affiliate (collectively Barclays) or Bloomberg is the issuer or producer of the Vanguard Funds and neither Bloomberg nor Barclays has any responsibilities, obligations or duties to investors in the Vanguard Funds. The Indices are licensed for use by The Vanguard Group, Inc. (Vanguard) as the sponsor of the Vanguard Funds. Bloomberg and Barclays' only relationship with Vanguard in respect of the Indices is the licensing of the Indices, which are determined, composed and calculated by BISL, or any successor thereto, without regard to the Issuer or the Vanguard Funds or the owners of the Vanguard Funds.

Additionally, Vanguard may for itself execute transaction(s) with Barclays in or relating to the Indices in connection with the Vanguard Funds. Investors acquire the Vanguard Funds from Vanguard and investors neither acquire any interest in the Indices nor enter into any relationship of any kind whatsoever with Bloomberg or Barclays upon making an investment in the Vanguard Funds. The Vanguard Funds are not sponsored, endorsed, sold or promoted by Bloomberg or Barclays. Neither Bloomberg nor Barclays makes any representation or warranty, express or implied regarding the advisability of investing in the Vanguard Funds or the advisability of investing in securities generally or the ability of the Indices to track corresponding or relative market performance. Neither Bloomberg nor Barclays has passed on the legality or suitability of the Vanguard Funds with respect to any person or entity. Neither Bloomberg nor Barclays is responsible for and has not participated in the determination of the timing of, prices at, or quantities of the Vanguard Funds to be issued. Neither Bloomberg nor Barclays has any obligation to take the needs of the Issuer or the owners of the Vanguard Funds or any other third party into consideration in determining, composing or calculating the Indices. Neither Bloomberg nor Barclays has any obligation or liability in connection with administration, marketing or trading of the Vanguard Funds.

The licensing agreement between Bloomberg and Barclays is solely for the benefit of Bloomberg and Barclays and not for the benefit of the owners of the Vanguard Funds, investors or other third parties. In addition, the licensing agreement between Vanguard and Bloomberg is solely for the benefit of Vanguard and Bloomberg and not for the benefit of the owners of the Vanguard Funds, investors or other third parties.

NEITHER BLOOMBERG NOR BARCLAYS SHALL HAVE ANY LIABILITY TO THE ISSUER, INVESTORS OR TO OTHER THIRD PARTIES FOR THE QUALITY, ACCURACY AND/OR COMPLETENESS OF THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN OR FOR INTERRUPTIONS IN THE DELIVERY OF THE BLOOMBERG BARCLAYS INDICES. NEITHER BLOOMBERG NOR BARCLAYS MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER, THE INVESTORS OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN. NEITHER BLOOMBERG NOR BARCLAYS MAKES ANY EXPRESS OR IMPLIED WARRANTIES, AND EACH HEREBY EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN. BLOOMBERG RESERVES THE RIGHT TO CHANGE THE METHODS OF CALCULATION OR PUBLICATION, OR TO CEASE THE CALCULATION OR PUBLICATION OF THE BLOOMBERG BARCLAYS INDICES, AND NEITHER BLOOMBERG NOR BARCLAYS SHALL BE LIABLE FOR ANY MISCALCULATION OF OR ANY INCORRECT, DELAYED OR INTERRUPTED PUBLICATION WITH RESPECT TO THE BLOOMBERG BARCLAYS INDICES. NEITHER BLOOMBERG NOR BARCLAYS SHALL BE LIABLE FOR ANY DAMAGES, INCLUDING, WITHOUT LIMITATION, ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY LOST PROFITS AND EVEN IF ADVISED OF THE POSSIBILITY OF SUCH, RESULTING FROM THE USE OF THE BLOOMBERG BARCLAYS INDICES OR ANY DATA INCLUDED THEREIN OR WITH RESPECT TO THE VANGUARD FUNDS.

None of the information supplied by Bloomberg or Barclays and used in this publication may be reproduced in any manner without the prior written permission of both Bloomberg and Barclays Capital, the investment banking division of Barclays Bank Plc.
