Report of the Authorised Corporate Director (the "Manager")

#### The Company

The Invesco Fixed Interest Investment Series is an investment company with variable capital, incorporated in England and Wales on 8 May 2003.

The Company is a "UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 October 2019, the Company consisted of eight Funds:

Invesco Corporate Bond Fund (UK) Invesco Distribution Fund (UK)

Invesco European High Income Fund (UK)

Invesco Global Bond Fund (UK)

Invesco Global Financial Capital Fund (UK)

Invesco High Yield Fund (UK)

Invesco Monthly Income Plus Fund (UK)

Invesco Tactical Bond Fund (UK)

#### **Accounting Periods**

Annual accounting date Interim accounting date

30 April 31 October

Invesco Corporate Bond Fund (UK), Invesco Global Bond Fund (UK), Invesco Global Financial Capital Fund (UK) and Invesco Tactical Bond Fund (UK) will make distribution payments on 31 December (interim) and 30 June (final).

Invesco High Yield Fund (UK) will make distribution payments quarterly on 30 September, 31 December, 31 March and 30 June (final).

Invesco Distribution Fund (UK), Invesco European High Income Fund (UK) and Invesco Monthly Income Plus Fund (UK) will make monthly distributions, with the payment date being the last day of the month following the end of the distribution period.

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

#### **Securities Financing Transactions Regulation**

This Regulation requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

During the period from 1 May 2019 to 31 October 2019, none of the Funds entered into any SFTs and/or TRS. Should this change in the future, the interim and annual reports for the Company will disclose all required information on the use of SFTs and TRS by the Company.

Please refer to the Prospectus for further details on SFTs and TRS.

#### Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2018, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invesco.co.uk).

Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UCITS related activities of the Manager in respect of performance year (1 January 2018 to 31 December 2018) is £76.21m of which £44.70m is fixed remuneration and £31.51m is variable remuneration. The number of beneficiaries is 379.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UCITS it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UCITS related activities for the performance year (1 January 2018 to 31 December 2018) is £18.62m of which £4.16m is paid to Senior Management and £14.46m is paid to other Identified Staff.

Report of the Authorised Corporate Director (the "Manager")

#### Fund Events

On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

#### Launch of New 'D' Share Classes on 24 October 2019

New share classes, D Accumulation shares and D Income shares were launched at 200p per share for the Invesco Corporate Bond Fund (UK).

Further details can be obtained from the most up to date relevant fund and share class specific Key Investor Information Document(s).

The prices of shares will appear on our website (www.invesco.co.uk). This is the primary method of price publication. The prices of shares may also be obtained by calling 0800 085 8677 during the Manager's normal business hours.

#### Brevit

The UK has voted to leave the EU, an event commonly referred to as Brexit. The exit date may be shortened or extended upon agreement between the UK and EU27. At the date of this report, discussions remain ongoing between the UK and EU27 as to the precise nature of the future relationship. It is not certain at this stage whether a withdrawal agreement will be finalised or if the UK will leave the EU under a no-deal scenario. The Authorised Corporate Director does not believe that Brexit under any of these scenarios will present significant issues that cannot be mitigated given that no Fund is passported into Europe, Shareholders are predominantly UK-based and core counterparties of and service providers to the Company have contingency arrangements available as necessary to ensure that activities can continue with minimal disruption. In addition, on 30 January 2019, EU27 national regulators and the UK's Financial Conduct Authority agreed Memoranda of Understanding in the event of a no-deal Brexit scenario on various matters related to the conduct of financial services and trading activities.

The Company's Manager, Invesco Fund Managers Limited "IFML", is part of a global group and has been committed for many years to meeting clients' needs across Europe in both EU and non-EU countries. The change in the UK's status from an EU to a non-EU country will not change the group's focus or commitment to serve its clients across Europe. IFML is monitoring developments closely, through a Brexit Steering Committee, and will take advantage of the Memoranda of Understanding to ensure that the impact on clients and the Company is minimal.

Report of the Authorised Corporate Director (the "Manager")

#### **Risk Profile**

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The securities that the Funds invest in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds.

The Funds have the ability to make use of financial derivatives (complex instruments) – significant use in the case of the Invesco Tactical Bond Fund (UK) – which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. The leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested, resulting in the Fund being exposed to a greater loss than the initial investment.

The Funds may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss. The Funds' performance may be adversely affected by variations in interest rates. The performance of the Invesco European High Income Fund (UK), the Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

As one of the key objectives of the Invesco Distribution Fund (UK), the Invesco European High Income Fund (UK), the Invesco Global Financial Capital Fund (UK), Invesco High Yield Fund (UK) and Invesco Monthly Income Plus Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

As the Invesco Tactical Bond Fund (UK) can rapidly change its holdings across the fixed income and debt spectrum and cash, this can increase its risk profile.

As the Invesco Global Financial Capital Fund (UK) is a theme-based Fund, which only invests in fixed interest and other debt securities and shares of banks and other financial institutions, investors should be prepared to accept a higher degree of risk than for a Fund that is more widely diversified across different sectors.

The Invesco Corporate Bond Fund (UK), Invesco Distribution Fund (UK), Invesco European High Income Fund (UK), Invesco High Yield Fund (UK), Invesco Monthly Income Plus Fund (UK) and Invesco Tactical Bond Fund (UK) may invest in contingent convertible bonds and the Invesco Global Financial Capital Fund (UK) can invest in contingent convertible bonds, which may result in significant risk of capital loss based on certain trigger events.

Although the Invesco Global Bond Fund (UK) invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) have the ability to invest more than 35% of its value in securities issued by a single government or public international body.

All risks are contained within the Prospectus.

#### Holdings in other Funds of the Company

As at 31 October 2019, no Funds held shares in any other Fund of the Company.

#### Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders are not liable for the debts of the Company.

#### **ISA Eligibility**

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

**Certification of the Interim Report by the Manager** In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invesco.co.uk or by contacting us.

Notes applicable to the unaudited financial statements of all Funds

#### 1 Accounting Policies

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014.

All other accounting policies used to prepare the interim financial statements are as per the audited financial statements for the year ended 30 April 2019.

Invesco Tactical Bond Fund (UK)	page 116

The Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Fund's investment objective, to fund redemptions of shares in that Fund, for the efficient management of the Fund in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Fund. They may also borrow, providing such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

Investment report for the period

#### The Investment Objective and Policy of the Invesco Corporate Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in investment grade corporate debt securities. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including government, unrated and non-investment grade corporate debt securities), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

<sup>&</sup>lt;sup>2</sup> This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Investment report for the period

#### Strategy, review and outlook

The Fund returned 3.7% over the six months to the end of October 2019. This placed the Fund in the fourth quartile of its peer group, the IA £ Corporate Bond Sector NR, which returned 5.0%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for bond markets. Government bonds were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. The strong performance of government bonds helped corporate bonds to also rally. The main catalyst for the rally was an expectation of, and subsequent implementation of, easier monetary policy by central banks.

The low level of yields and supportive central bank backdrop led to a surge in corporate bond issuance during September. Bloomberg report that in total \$308 billion was raised in the debt markets - the first month issuance has topped \$300 billion. Despite the positive tone, there were some company specific events that highlighted the more challenging environment some companies continue to face.

The Fund delivered a positive return over the period. All sectors made a positive contribution to Fund performance with telecoms, insurance, banks and utilities making the largest contribution. The Fund captured a large part of the movement lower in corporate bond yields. However, because the Fund has a relatively low sensitivity to interest rate changes, gains were limited.

We continue to position the Fund defensively with a high allocation to cash and government bonds. Duration is maintained at a level roughly half that of the Sterling market. This reflects our view that interest rate risk does not at current levels provide a good balance of risk and return. We used the periods of market volatility over the six months as an opportunity to add exposure to bonds that had re-priced and that we thought offered value. One of the sectors where we increased exposure was AT1 bank bonds. Subordinated financials remain the largest sectoral allocation in the Fund. Elsewhere, we are also finding opportunities within the telecoms and utility sectors.

Investment report for the period

#### The Investment Objective and Policy of the Invesco Distribution Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets globally in corporate and government debt securities (including investment grade, non-investment grade and unrated) and up to 40% of its assets in shares or other equity related securities of companies globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

### Investment report for the period

#### Strategy, review and outlook

The Fund returned 3.2% over the six months to the end of October 2019. This placed it in the second quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector NR, which returned 2.3%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for both bond and equity markets. Government bonds were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. The strong performance of government bonds helped corporate bonds to also rally. The main catalyst for the rally was the expectation of, and subsequent implementation of, easier monetary policy by central banks.

The low level of yields and supportive central bank backdrop led to a surge in corporate bond issuance during September. Bloomberg report that in total \$308 billion was raised in the debt markets – the first month issuance has topped \$300 billion. Despite the positive tone, there were some company specific events that highlighted the more challenging environment some companies continue to face. Toward the end of the period, equity markets saw a pivot away from more 'defensive' parts of the market and into more 'cyclical' and economically-sensitive equities.

Both the Fund's equity and bond allocations added to Fund returns over the six month period. Some of the highest contributing equities were Smith and Nephew, Pennon and Compass. Within the bond allocation, the highest contribution to performance came from the allocation to bonds within the financial sector. There were also significant contributions from the allocation to the telecoms sector.

The financial sector, particularly the subordinated debt of high quality European banks, remains the Fund's largest sectoral exposure. Outside of this our largest allocations are to the insurance, utility and telecommunication sectors. In view of the positive equity performance year-to-date we took the opportunity to take some profits, which reduced the equity allocation to 34%. This allocation is predominately held in UK equities. To take advantage of some the valuation opportunities and to diversify some of the UK specific risk around 5% is held in global equities.

## Paul Causer, Paul Read and Ciaran Mallon, Fund Managers

#### Invesco European High Income Fund (UK)

Investment report for the period

#### The Investment Objective and Policy of the Invesco European High Income Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets in European government and corporate debt securities (including investment grade, non-investment grade and unrated) and up to 60% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in Europe. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including non European securities), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

<sup>&</sup>lt;sup>2</sup> This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

#### Invesco European High Income Fund (UK)

Investment report for the period

#### Strategy, review and outlook

The Fund returned 2.1% over the six months to the end of October 2019, placing it in the third quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector NR, which returned 2.3%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for both bond and equity markets. Government bonds were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. The strong performance of government bonds helped corporate bonds to also rally. The main catalyst for the rally was the expectation of, and subsequent implementation of, easier monetary policy by central banks.

The low level of yields and supportive central bank backdrop led to a surge in corporate bond issuance during September. Bloomberg report that in total \$308 billion was raised in the debt markets – the first month issuance has topped \$300 billion. Despite the positive tone, there were some company specific events that highlighted the more challenging environment some companies continue to face.

Toward the end of the period, equity markets saw a pivot away from more 'defensive' parts of the market and into more 'cyclical' and economicallysensitive equities.

The Fund benefitted from positive performance from both its bond and equity allocations. Within the bond portfolio the biggest contribution to performance came from the holdings in the financial sector.

The Fund's high yield bond exposure is focused on higher quality companies that we consider have a lower risk of default. We also have significant exposure to subordinated bonds within the financial sector. These are junior bonds within a company's capital structure that may have some equity like features. The Fund's overall interest rate sensitivity (duration) remains low. Around 36% of the Fund is currently invested in equity. Our focus for this allocation is on stocks with strong cash flow generation, which we believe can maintain or grow dividends. The Fund currently has a high allocation to cash and other highly liquid assets.

# Paul Causer, Paul Read and Stephanie Butcher, Fund Managers

Investment report for the period

#### The Investment Objective and Policy of the Invesco Global Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in debt securities (including investment grade, non-investment grade and unrated) issued by governments, supranational bodies, other public entities as well as by companies, globally. The Fund will take active currency positions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund uses derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Income share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Income share class, without any adjustment for fees.

<sup>&</sup>lt;sup>2</sup> This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

#### Investment report for the period

#### Strategy, review and outlook

The Fund returned 3.6% over the six months to the end of October 2019. This placed it in the third quartile of its peer group, the IA Global Bonds Sector NR, which returned 3.8%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for bond markets. Government bonds were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. In turn, this strong performance helped corporate bonds to also rally.

Central banks were an important influence on sentiment over the six months. Having opened the door to more accommodative policy in the spring, both the US Federal Reserve (Fed) and European Central Bank (ECB) eased policy over the summer. The Fed cut US interest rates by 25bps while the ECB announced a package of measures including the resumption of quantitative easing.

Against this backdrop, government bond yields in many countries fell to record lows. For example, during August the yield on all German government bonds fell below zero for the first time. Meanwhile in the US, the yield on ten year government bonds fell below those of two year government bonds. This event is viewed by many as a signal that the economy is heading for recession.

The Fund is mainly invested in government bonds (both developed and emerging markets). Currently this exposure includes both conventional and inflation linked government bonds. Additional exposure is held in investment grade corporate bonds and some corporate emerging market bonds where we can benefit from the extra yield available. Currency markets provide a further source of potential return for the Fund.

The Fund benefitted from the strong performance of government bond markets. The highest contribution to returns came from holdings in US government bonds. Euro government bond holdings were another positive with Italian government bonds the best performing. Emerging market exposure provided more mixed contributions. Positive returns from holdings in Mexican and Indonesian bonds were offset by losses from the holdings in Argentina and Turkey.

#### Invesco Global Financial Capital Fund (UK)

Investment report for the period

#### The Investment Objective and Policy of the Invesco Global Financial Capital Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in capital instruments which include debt securities (including non-investment grade, unrated and contingent convertible bonds), shares and other equity related securities issued by banks and other financial institutions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), government debt securities, deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 30%. Such level might be exceeded or might be subject to changes in the future.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

This is a Comparator Benchmark. The Benchmark is a blend of indices that represent the type of bonds and equities that the Fund may invest in and therefore, the Fund's performance can be compared against it. However, the Fund is actively managed and is not constrained by any benchmark. The Invesco Composite Index is calculated by reference to 50% ICE BofAML Global Financial Index GBPHedged (Total Return), 30% ICE BofAML Contingent Capital Index GBP-Hedged (Total Return) and 20% FTSE All World Financials Index GBP-Hedged (Total Return).

#### Invesco Global Financial Capital Fund (UK)

#### Investment report for the period

#### Strategy, review and outlook

The Fund returned 2.4% over the six months to the end of October 2019.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for the financial sector. Strong performance from government bond market helped corporate bonds including the financial sector to also rally. Performance was strongest for the more junior tiers of bank capital.

One of the key drivers of returns was the move toward easier monetary policy by central banks. Having opened the door to more accommodative policy in the spring, both the US Federal Reserve (Fed) and European Central Bank (ECB) eased policy over the summer. The Fed cut US interest rates by 25bps while the ECB announced a package of measures including the resumption of quantitative easing.

Fund performance was skewed toward more junior bonds. An improved political backdrop and a view within the market that Italy was one of the main beneficiaries of the European Central Bank's new programme of quantitative easing, helped to make Italian banks one of the biggest contributors to returns.

The Fund is invested across the capital structure of banks, insurers and other financials, but has a focus on subordinated bonds. To fully exploit opportunities in the sector the Fund also invests in equities with exposure currently focused on a select group of European banks.

Investment report for the period

#### The Investment Objective and Policy of the Invesco High Yield Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in corporate and government debt securities which are either non-investment grade or unrated. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including investment grade debt securities), equities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

<sup>&</sup>lt;sup>2</sup> This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

#### Investment report for the period

#### Strategy, review and outlook

The Fund returned 3.4% over the six months to the end of October 2019. This placed the Fund in the first quartile of its peer group, the IA  $\mathfrak E$  High Yield Sector NR, which returned 2.4%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for bond markets. Government bonds were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. The strong performance of government bonds helped corporate bonds to also rally. The main catalysts for the rally was the expectation of and subsequent implementation of easier monetary policy by central banks.

The low level of yields and supportive central bank backdrop led to a surge in corporate bond issuance during September. Bloomberg report that in total \$308 billion was raised in the debt markets – the first month issuance has topped \$300 billion. Despite the positive tone, there were some company specific events that highlighted the more challenging environment some companies continue to face. One of the most high-profile was Thomas Cook, which collapsed as it was unable to secure additional funding to continue trading.

Fund performance over the period benefitted from positive contributions across a broad range of sectors. The highest contribution came from exposure to banks. An improved political backdrop and a view within the market that Italy was one of the main beneficiaries of the European Central Bank's new programme of quantitative easing, helped to make Italian banks one of the biggest contributors to returns. Outside of the financial sector, the Fund's exposure to the retail, oil and food sectors made the largest contributions.

The core of the Fund is invested in companies that we think are dominant within their industry or sector and that have predictable cash flows. Typically, but not always these bonds will be at the higher quality end of the high yield spectrum. Looking at the Fund by sector, the largest allocation is currently bonds issued by banks. Outside of the financial sector, our largest allocations are to bonds within the food, retail and telecoms sectors.

Investment report for the period

#### The Investment Objective and Policy of the Invesco Monthly Income Plus Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets globally in corporate and government debt securities (including investment grade, non-investment grade and unrated) and shares or other equity related securities of companies. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Income share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Income share class, without any adjustment for fees.

<sup>&</sup>lt;sup>2</sup> This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Investment report for the period

#### Strategy, review and outlook

The Fund returned 2.7% over the six months to the end of October 2019. This placed it in the third quartile of its peer group, the IA  $\pounds$  Strategic Bond Sector NR, which returned 3.7%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for both bond and equity markets. Government bond markets were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. In turn, this strong performance helped corporate bonds to also rally. The main catalysts for the rally was the expectation of and subsequent implementation of easier policy.

The low level of yields and supportive central bank backdrop led to a surge in corporate bond issuance during September. Bloomberg report that in total \$308 billion was raised in the debt markets – the first ever month issuance has topped \$300 billion. Despite the positive tone, there were some company specific events that highlighted the more challenging environment some companies continue to face. One of the most high-profile was Thomas Cook, which collapsed as it was unable to secure additional funding to continue trading. Toward the end of the period, equity markets saw a pivot away from more 'defensive' parts of the market and into more 'cyclical' and economically-sensitive equities.

The Fund benefitted from positive performance from both its bond and equity allocation. However, the highest contribution came from the bond portfolio. Within this, holdings in banks and corporate high yield added the most to returns.

The Fund is invested in a diversified portfolio of higher yielding and investment grade bonds. The Fund's high yield exposure is focused on higher quality companies that we consider have a lower risk of default. The subordinated bonds of companies within the financial sector are currently the Fund's largest exposure by sector. These are junior bonds within a company's capital structure that may have some equity like characteristics. During the period we took advantage of some of the recent strong performance to reduce the Fund's equity exposure to 8%. Within the remaining allocation we continue to favour companies that we believe offer visibility of revenues, profits and cash flows, which are managed for the primary purpose of delivering shareholder value in the form of a sustainable and growing dividend.

Investment report for the period

### The Investment Objective and Policy of the Invesco Tactical Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund has a flexible allocation to corporate and government debt securities (including investment grade, non-investment grade and unrated) and cash. Depending on market conditions the Fund may invest up to 100% of its net assets in cash, cash equivalents, short-term debt securities and money market instruments. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, collective investment schemes (including funds managed by the Invesco group) and deposits. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

<sup>&</sup>lt;sup>2</sup> This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

## Investment report for the period

### Strategy, review and outlook

The Fund returned 2.0% over the six months to the end of October 2019. This compares to a return of 0.4% for the Fund's benchmark, UK 3-month Treasury Bills.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to 31 October 2019 was a period of positive performance for bond markets. Government bonds were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. In turn, this strong performance helped corporate bonds to also rally.

Central banks were an important influence on sentiment over the six months. Having opened the door to more accommodative policy in the spring, both the US Federal Reserve (Fed) and European Central Bank (ECB) eased policy over the summer. The Fed cut US interest rates by 25bps while the ECB announced a package of measures including the resumption of quantitative easing.

Against this backdrop, government bond yields in many countries fell to record lows. For example, during August the yield on all German government bonds fell below zero for the first time. Meanwhile in the US, the yield on ten year government bonds temporarily fell below those of two year government bonds. This event, which has since reversed, is viewed by many as a signal that the economy is heading for recession.

Fund performance benefitted from the allocation to both government and corporate bonds. The highest contribution came from the Fund's holdings in the financial sector. In terms of government markets the highest contribution came from the allocation to US and Italian government bonds.

Fund positioning remains defensive with a low level of interest rate sensitivity and a high allocation to liquidity maintained through government bonds, short-term corporate bonds and cash. This positioning reduces the impact of changes in interest rate expectations and should enable us to take advantage of opportunities when they arise. The financial sector remains the largest of our corporate bond exposures. In our view, the regulatory changes and balance sheet improvements made by the banks along with relatively attractive yields mean that this sector continues to provide an attractive balance of risk and reward. We also hold some bonds issued by insurance companies.
