### iShares MSCI Japan SRI UCITS ETF

A sub-fund of iShares IV plc

### USD (Acc) Share Class

ISIN: IE00BYX8XC17

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

## Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI Japan SRI Index, the Fund's benchmark index.
- ▶ The Share Class, via the Fund, aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the benchmark index.
- ▶ The benchmark index measures the performance of equity securities (e.g. shares) issued by Japanese companies with higher environmental, social and governance ("ESG") ratings than other sector peers within the MSCI Pacific Index, based on a series of exclusionary and ratings based criteria.
- ▶ In determining the universe of the benchmark index, companies are excluded if they are identified by the index provider with any tie to controversial weapons as well as manufacturers or producers of nuclear weapons, civilian firearms or tobacco or if their involvement in the following activities exceed revenue thresholds set by the index provider for: alcohol, gambling, tobacco, civilian firearm distributors, nuclear power, adult entertainment, thermal coal, genetically modified organisms and military weapons and/or military weapon support systems and services.
- ▶ The remaining companies are rated by the index provider based on their ability to manage their ESG risks and opportunities and are given a rating which determines their eligibility for inclusion. Companies which are identified as being involved in very serious controversies that have an ESG impact on their operations and/or products and services are excluded. The MSCI Pacific SRI Index targets 25% cumulative coverage of the free float-adjusted market capitalisation for each Global Industry Classification Standard ("GICS") sector within the MSCI Pacific Index, subject to each sector having sufficient eligible companies for inclusion. The benchmark index comprises shares issued by Japanese companies which are constituents of the MSCI Pacific SRI Index. Unlike the MSCI Pacific SRI Index, the benchmark index does not target any specific level of sector coverage in Japan. Constituents are weighted based on their free float-adjusted market capitalisation. Free float-adjusted means that only shares available to international investors, rather than all of a company's issued shares, are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of the company multiplied by the number of shares available to international investors.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities which make up the benchmark index in similar proportions to it.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ The investment manager may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective. FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- ▶ The Fund may invest in American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs), and other funds to gain exposure to the relevant equity securities that make up the Index. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index's ESG rating assessment of an issuer's performance is intended to be relative to the standards of the issuer's industry peers. No exclusion (apart from controversial weapons) is made on the basis of how ethical a particular industry/sector is perceived to be. Investors should therefore make a personal ethical assessment of the Index prior to investing in the Fund.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

## Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

\*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

\*Authorised participants dealing directly with the Fund will pay related transaction costs.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
