JPM Sterling Corporate Bond Fund I - Gross Income a Share Class of JPM Sterling Corporate Bond Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B014H654

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objective and Investment Policy

Investment Objective: The Fund's investment objective is to achieve a return based on a combination of income and capital growth by investing primarily in high quality Sterling denominated bonds (or other bonds hedged back to Sterling).

Investment Policy: The Fund's investment policy will focus on investment grade corporate issues. The Fund may also invest in below investment grade securities, including corporate and emerging market bonds when the Investment Adviser believes these offer significant opportunities.

The Fund may use financial derivative instruments (derivatives) for investment purposes or efficient portfolio management including hedging, where appropriate.

Although most of the non-Sterling securities will be hedged back to Sterling, the Investment Adviser will also use opportunities in the foreign exchange market to maximise returns.

Redemption and Dealing: Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Adviser has the discretion to buy and sell investments on behalf of the Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Fund is Markit iBoxx GBP Non-Gilts Index.

The benchmark is a point of reference against which the performance of the Fund may be measured. The Fund will bear some resemblance to its benchmark.

Distribution Policy: This Share Class will distribute income.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 3 because its Net Asset Value has shown low to medium fluctuations historically.

Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.
- ▶ Bond funds may not behave like direct investments in the underlying bonds themselves. By investing in bond funds, the certainty of receiving a regular fixed amount of income for a defined period of time with the prospect of a future known return of capital is lost.
- ▶ The value of bonds and other debt securities may change significantly depending on market, economic and interest rate conditions as well as the creditworthiness of the issuer. Issuers of bonds and other debt securities may fail to meet payment obligations (default) or the credit rating of bonds and other debt securities may be downgraded. These risks are typically increased for below investment grade and certain unrated securities, which may also be subject to higher volatility and be more difficult to sell than investment grade securities.

- ▶ Bonds and other debt securities with a lower credit rating may have a higher risk of defaulting which may in turn have an adverse effect on the performance of Funds which invest in them.
- ▶ Investing in contingent convertible securities may adversely impact the Fund should specific trigger events occur (as specified in the terms of the security) and the Fund may be at increased risk of capital loss. This may be as a result of the contingent convertible security converting to equities at a discounted share price, the value of the contingent convertible security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- ▶ The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The ACD is required to disclose in Appendix A of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.
- ▶ Bond funds will normally distribute a combination of coupon and the expected discount/premium on the securities. Therefore, a Fund's distribution will comprise income received and an element of projected capital gains or losses. This could result in an element of capital gain being taxed as income in the hands of an investor.
- ▶ To the extent that any underlying assets of the Fund are denominated in a currency other than Sterling and are not hedged back to Sterling, movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.
