

Architas MA Active Progressive Fund Factsheet

This factsheet is for information purposes only and is not designed to provide advice on the suitability of an investment for your personal financial situation. It has been produced to provide you with information on the fund including fund objective, where the fund invests and past performance. **If you have any questions regarding the information within this factsheet, you are recommended to speak to a financial adviser.**

Investment Objective and Policy Summary. The Fund aims to achieve capital and income growth over the medium to long term.

The Fund will invest in both UK and overseas authorised collective investment schemes. The Fund will invest in a mix of collective investment schemes but they will be primarily funds investing in the UK and primarily in equities but with the option to invest in some fixed interest investments. The Fund may also invest in other transferable securities, money market instruments, warrants, derivatives and deposits directly and/or indirectly through collective investment schemes. Use may be made of stock-lending, borrowing, cash holdings, hedging and other investment techniques permitted in the COLL Sourcebook.

Any investment using derivatives adheres to the guidance laid down regarding efficient portfolio management in order to reduce risk; to reduce cost; or to generate additional capital or income in a manner consistent with the Fund's risk profile. This fund is a fund of funds.

The fund is permitted to invest over 35% of its assets in securities issued by a single local, national or supra national government. Each fund can invest entirely in units of collective investment schemes. Source: State Street Banque SA. The Fund performance figures take into account the annual management charges, but not the initial charges that would be payable. These charges have the effect of reducing the past performance figures shown above. Figures are on a single pricing basis and assume income is reinvested. Past performance is not a guide to future performance. The value of investments and any income from them can go down as well as up and is not guaranteed. This may be due to market fluctuations or changes in exchange rates, or both. This means that investors may not get back the original amount invested.
