

The Scottish Oriental Smaller Companies Trust plc

Client Update

31 May 2024

Investment Objective

To achieve long-term capital growth by investing mainly in smaller Asian quoted companies with market capitalisations under US\$5,000m at the time of investment, or the equivalent. For investment purposes, the investment region includes Australasia, China, Hong Kong, India, Indonesia, Japan, Malaysia, Pakistan, Philippines, Singapore, South Korea, Sri Lanka, Taiwan, Thailand and Vietnam. Countries in other parts of Asia may be considered with approval of the Board.

Investment Review

Philippine Seven rose after reporting strong earnings results and a higher-than-expected cash dividend translating to around a 9% yield on the last closing price. Uni-President China gained after management guided for solid sales growth and margin expansion this year, driven by an improving product mix and easing cost pressures. On the negative side, earnings at Mahanagar Gas missed the market's expectations due to lower gross margins, though gas sales volumes were solid. Mitra Adiperkasa fell on concerns about market share losses at Starbucks due to the boycott of some Western brands following the recent war in the Middle East. Other brands (like Unilever) have shown signs of improvement, which we believe should happen at Starbucks as well.

What are the risks?

Investing includes certain risks including:

- **The value of investments and any income from them may go down as well as up and are not guaranteed. Investors may get back significantly less than the original amount invested.**
- **Emerging Markets:** May not provide the same level of investor protection as a developed market; they may involve a higher risk than investing in developed markets.
- **Currency:** The Trust invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Trust.
- **Smaller Companies:** The Trust typically invests in smaller company shares which can be more unpredictable and more difficult to sell than those of larger company shares.
- **Leverage:** The Trust may be leveraged due to: i) borrowings; or ii) the use of derivatives to hedge currency exposure. The amount of leverage employed is disclosed on the Trust's website from time to time. Higher leverage increases the potential risk of loss.
- Investment trust share prices may not fully reflect NAV.

†For an overview of the terms of investment, risks, returns and costs and charges please refer to the Key Information Document and the Trust's Investor Disclosure Statement. If you are in any doubt as to the suitability of the Trust for your investment needs please seek investment advice.
