## The Company

The Invesco Global Investment Series is an investment company with variable capital, incorporated in England and Wales on 8 May 2003.

The Company is a "UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Sub-Funds may be formed by the Manager, subject to regulatory approval. Any changes to Sub-Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 August 2018, the Company consisted of six Sub-Funds: Invesco Global Balanced Index Fund (UK) Invesco Global Equity Fund (UK) Invesco Global Equity Income Fund (UK) Invesco Global ex UK Core Equity Index Fund (UK) Invesco Global ex UK Enhanced Index Fund (UK) Invesco Global Opportunities Fund (UK)

#### **Accounting Periods**

Annual accounting date Interim accounting date Distribution payable on 31 August 28 February 31 October

The following Sub-Funds may also pay an interim distribution on 30 April:

Invesco Global Equity Income Fund (UK) Invesco Global ex UK Enhanced Index Fund (UK)

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

#### Securities Financing Transactions Regulation

This Regulation requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

During the year from 1 September 2017 to 31 August 2018, none of the Sub-Funds entered into any SFTs and/or TRS. Should this change in the future, the interim and annual reports for the Company will disclose all required information on the use of SFTs and TRS by the Company.

Please refer to the Prospectus for further details on SFTs and TRS.

## **Remuneration Policy**

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2017, to include a detailed process for the determination of Identified Staff and align it with the requirements of the UCITS Directive.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invesco.co.uk). Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UCITS related activities of the Manager in respect of performance year (1 January 2017 to 31 December 2017) is £102.87m of which £56.09m is fixed remuneration and £46.78m is variable remuneration. The number of beneficiaries is 455.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UCITS it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UCITS related activities for the performance year (1 January 2017 to 31 December 2017) is  $\pounds$ 24.01m of which  $\pounds$ 4.88m is paid to Senior Management and  $\pounds$ 19.13m is paid to other Identified Staff.

## Fund Name Changes

Effective 1 October 2018, the Manager has renamed the range of UK domiciled ICVC funds it operates. The move to a unified global brand – Invesco – causes "Invesco Perpetual" products to now be referred to as "Invesco" products. To implement this, each of the ICVC Series managed by the Manager, including the Company, have been renamed to remove the word "Perpetual". Each of the Sub-Funds within each Company has been renamed to remove the word "Perpetual" and to add the suffix "(UK)". The suffix "(UK)" only relates to the domicile of the Sub-Fund and is unrelated to their investment strategy.

## **Risk Profile**

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The Sub-Funds' performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Invesco Global Balanced Index Fund (UK)'s performance may be adversely affected by variations in interest rates.

Although the Invesco Global Equity Fund (UK) and the Invesco Global Opportunities Fund (UK) invest mainly in established markets, they can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

As one of the key objectives of the Invesco Global Equity Income Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

Although the Invesco Global Opportunities Fund (UK) does not actively pursue a concentrated portfolio, it may have a concentrated number of holdings on occasions. Accordingly, the Sub-Fund may carry a higher degree of risk than a Sub-Fund which invests in a broader range of companies or takes smaller positions in a relatively large number of holdings.

As the Invesco Global Opportunities Fund (UK) may invest to a limited extent in certain securities listed in China, which can involve significant regulatory constraints this may affect the liquidity and/or the investment performance.

The Sub-Funds may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Sub-Funds. The Managers, however, will ensure that the use of derivatives within the Sub-Funds does not materially alter the overall risk profile of the Sub-Funds.

All risks are contained within the Prospectus.

## Holdings in other Sub-Funds of the Company

As at 31 August 2018, no Sub-Funds held shares in any other Sub-Fund of the Company.

## Liability

The Company is structured by having different Sub-Funds. The assets and liabilities of each Sub-Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Sub-Fund will not be available to meet the liabilities of another Sub-Fund within the Company.

The Shareholders are not liable for the debts of the Company.

## **ISA Eligibility**

The Invesco Global Equity Fund (UK), Invesco Global Equity Income Fund (UK), Invesco Global ex UK Enhanced Index Fund (UK) and the Invesco Global Opportunities Fund (UK) qualify for stocks and shares ISA investment.

None of the Sub-Funds qualify for cash ISA investment.

**Certification of the Annual Report by the Manager** In accordance with the requirements of the Financial Services (Open-Ended Investment Companies) Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

**Director - Douglas Sharp** 

**Director - Graeme Proudfoot**

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Sub-Funds' risk and reward profiles, please refer to the most up to date relevant Sub-Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invesco.co.uk or by contacting us.

## 1 Accounting Policies

a)	<b>Basis of preparation</b> The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014.
<b>b)</b> i)	<b>Recognition of revenue</b> Dividends on quoted ordinary shares and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared.
ii) iii)	Interest on bank balances and deposits is recognised on an accruals basis. Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flows on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these
iv)	securities and dealt with as part of the revenue of the Company. All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits.
c)	<b>Stock dividends</b> Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amoun by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital.
d)	<b>Special dividends and share buy-backs</b> The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Company's distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount.
e)	<b>Underwriting commission</b> Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Company is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares.
f)	<b>Expenses</b> All expenses, except for those relating to the purchase and sale of investments, are charged initially against revenue and are accounted for on an accruals basis.
g)	<b>Revenue allocation to share classes</b> Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class.
h)	<b>Measurement basis</b> The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities.
i)	Basis of valuation of investments All investments are valued at their fair value as at the balance sheet date.
	All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the

the circumstances. The estimates and the assumptions used are under continuous review by the

Manager with particular attention paid to the carrying value of the investments.

j)	<b>Exchange rates</b> Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the period. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions
k)	<b>Taxation and deferred taxation</b> Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset.
1)	<b>Efficient portfolio management</b> Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in 'Revenue' or 'Expenses' in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in 'Net capital gains' in the Statement of Total Return. Any positions on such transactions open at the year end are reflected in the Balance Sheet at their marked to market value.
m)	<b>Dilution adjustment</b> The need to apply a dilution adjustment will depend on the volume of sales (where they are issued or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustmen on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, it is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Sub-Funds i the Invesco Global Investment Series:
	<ul> <li>where over a dealing period a Sub-Fund has experienced a large level of net issues or redemption relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Sub-Fund in question (as calculated at the last valuation point); or</li> <li>where the Manager considers it necessary to protect the interests of the Shareholders of the Company.</li> </ul>
	On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Sub-Fund which may otherwise constrain the future growth of the Sub-Fund in question.
	Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments I Sub-Fund and an indication of the frequency of application of such adjustments.

## 2 Distribution Policies

The Sub-Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Company's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Sub-Fund accumulations and distributions are paid as dividend distributions.

In calculating the amount to be distributed, the following Sub-Funds allocate the Manager's ongoing charge to capital, thereby increasing the amount available for distribution:

Invesco Global Equity Income Fund (UK)

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Sub-Fund.

## 3 Dealing Charges and Research Payments

The cost of the execution service provided by brokers may be included as part of the spread between the bid and offer price or paid through a separate dealing commission. Dealing commissions are used in the equity securities market, whilst the fixed income market includes the cost of execution in the spread. Prior to 3 January 2018, it was market practice for investment managers to enter into dealing commission arrangements under which as well as paying for execution, part of the commission would be used to pay for research services. This was in accordance with regulation.

The European Union legal framework governing financial markets, known as the Markets in Financial Instruments Directive (MiFID I), has been replaced by a revised Directive (the recast MiFID) and new Regulation (MiFIR) - referred to together as MiFID II. MiFID II became effective on 3 January 2018, part way through the period covered by this Report. MiFID II changes the way investment managers operate their businesses. In particular, under MiFID II firms can either pay for research material/services out of their own resources or from a separate research payment account (RPA). From 3 January 2018, the Manager, the Investment Adviser and any sub-adviser pay for all external research materials/services procured for the Sub-Funds out of their own resources across equity, fixed income, derivatives and currency securities. They do not operate a RPA.

## 4 Shareholders' Sub-Funds

The Manager's entry charge and Fund Management Fee (FMF) are as follows:

Entry Charge %	Fund Management Fee %
lo Trail class 0.0	0.70

	ChargéIo Trail class0.0rail classes5.0Io Trail classes0.0c classes0.0c classes0.0rail classes5.0Io Trail classes5.0Io Trail classes0.0c classes0.0c classes0.0c classes0.0c classes0.0lo Trail classes0.0Io Trail classes0.0Io Trail classes0.0c classes0.0c classes0.0

With effect from 2 July 2018, the entry charge was removed from the No Trail, Z and Y share classes.

References in this report to Trail classes mean the Accumulation Shares and Income Shares.

The net assets attributable to each share class, the net assets value per share and the number of shares in issue of each share class are shown in the comparative tables of each Sub-Fund. These can be found on:

Invesco Global Balanced Index Fund (UK)	page 17
Invesco Global Equity Fund (UK)	pages 33 to 36
Invesco Global Equity Income Fund (UK)	pages 52 to 55
Invesco Global ex UK Core Equity Index Fund (UK)	page 72
Invesco Global ex UK Enhanced Index Fund (UK)	pages 88 to 90
Invesco Global Opportunities Fund (UK)	pages 111 to 112

Each share class has the same rights on a winding up of the Company.

#### 5 Generic Risk Factors

In pursuing their investment objectives, the Sub-Funds of the Company hold a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from their operations.

Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Sub-Fund's holding of financial instruments are set out below together with the Manager's policy for managing these risks.

## **Investing in Financial Derivative Instruments**

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Sub-Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Sub-Fund concerned. Transactions in derivatives are used in the Sub-Funds for efficient portfolio management. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of the Sub-Fund.

#### Market price risk

The Sub-Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Sub-Funds securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

#### **Currency exchange risk**

The Sub-Funds may invest in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

#### Liquidity risk

The Sub-Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Sub-Funds may not be able to sell some securities at a fair price within a timely manner.

In order to mitigate this risk, a substantial proportion of the Sub-Funds assets consist of readily realisable assets.

#### **Counterparty risk**

The Sub-Funds may enter into derivative transactions or place cash in bank deposits with counterparties who may not be able to fulfil their responsibility by completing their side of the transactions. As a result, the Sub-Funds could experience delays in liquidating positions and significant losses, including declines in the value of the investment during the period in which the Sub-Funds seeks to enforce their rights or inability to realise any gain on investments.

In order to mitigate this risk, the Sub-Funds conduct trades through reputable counterparties.

#### **Investing in a Concentrated Portfolio**

Certain Sub-Funds may have concentrated portfolios (holding a limited number of investments and/or large positions in relatively small number of stocks). If one or more of those investments decline or are otherwise adversely affected, it may have a more pronounced effect on the Sub-Fund's net asset value than if a larger number of investments were held or if the Sub-Fund had fewer larger positions. Accordingly they may carry a higher degree of risk and NAV volatility than a Sub-Fund which invests in a broad range of companies and/or does not take large positions in a relatively small number of stocks.

## 5 Generic Risk Factors continued

#### **Partial Investment in Emerging Markets**

Sub-Funds that invest mainly in established markets, may also invest in emerging and developing markets, where difficulties in dealing, settlement and custody problems could arise.

Investments in emerging markets may be more volatile than investments in more developed markets. Some of these markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well developed regulatory systems and disclosure standards may be less stringent than those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed markets. The following is a brief summary of some of the more common risks associated with emerging markets investment:

## Lack of Liquidity

The acquisition and disposal of securities may be more expensive, time consuming and generally more difficult than in more developed markets. Many emerging markets are small, have low trading volumes, low liquidity and significant price volatility.

## Settlement and Custody Risks

Settlement and custody systems in emerging markets are not as well developed as those in developed markets. Standards may not be as high and supervisory and regulatory authorities not as sophisticated. As a result there may be a risk that settlement could be delayed and that cash or securities could be disadvantaged.

## Investment and Remittance Restrictions

In some cases, emerging markets may restrict the access of foreign investors to securities. As a result, certain equity securities may not always be available to a Sub-Fund because the maximum permitted number of or investment by foreign Shareholders has been reached. In addition, the outward remittance by foreign investors of their share of net profits, capital and dividends may be restricted or require governmental approval and there can be no guarantee that additional restrictions will not be imposed.

## - Accounting

Accounting, auditing and financial reporting standards, practices and disclosure requirements applicable to companies in emerging markets differ from those applicable in more developed markets in respect of the nature, quality and timeliness of the information disclosed to investors and, accordingly, investment possibilities may be difficult to properly assess.

#### Taking charges from capital

Where the investment objective of a Sub-Fund is to treat the generation of income as a higher priority than capital growth, or the generation of income and capital growth have equal priority, all or part of the ongoing charge as well as other fees and expenses of the Sub-Fund may be taken from capital instead of income. The Sub-Fund takes such fees and expenses from capital in order to manage the level of income paid and/or available to Shareholders. This may result in capital erosion or may constrain capital growth.

## 5 Generic Risk Factors continued

#### **Calculation methods of the Risk Exposure**

Following the assessment of the investment policy of each Sub-Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk (VaR) for the assessment of the global exposure of each Sub-Fund.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Sub-Fund is compared to that of a benchmark or reference portfolio. With this approach the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Sub-Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) ("ESMA Guidelines").

The Absolute VaR of a UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the (VaR of the UCITS)/(2\* VaR of the reference portfolio) is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of 500 business days (ESMA Guidelines require at least 250 business days);
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Sub-Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Sub-Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Sub-Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

## 5 Generic Risk Factors continued

## Calculation methods of the Risk Exposure continued

The table below details the VaR approach for each Sub-Fund and, for those Sub-Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 31 August 2018, as well as the daily average level of leverage for each Sub-Fund during the one year period ending 31 August 2018.

					Global Ex	posure				Lev	erage

## 6 Investment Objective and Policy

The investment objective and policy of each Sub-Fund can be found on:

Invesco Global Balanced Index Fund (UK)	page 15
Invesco Global Equity Fund (UK)	page 31
Invesco Global Equity Income Fund (UK)	page 50
Invesco Global ex UK Core Equity Index Fund (UK)	page 70
Invesco Global ex UK Enhanced Index Fund (UK)	page 86
Invesco Global Opportunities Fund (UK)	page 109

The Sub-Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Sub-Fund's investment objective, to fund redemptions of shares in that Sub-Fund, for the efficient management of the Sub-Fund in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Sub-Fund. They may also borrow, provided such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

## 7 Base Currency

The base currency of the Company is Sterling and is taken to be the 'functional currency' of the Company.

## 8 Bank Balances and Overdrafts

Bank balances and overdrafts are held by the Custodian, and are subject to the Custodian's variable credit and debit interest rates respectively.

## 9 Borrowings

The borrowing facilities available to the Company as at 31 August 2018 comprise a bank overdraft facility of up to 10% of the value of the Company (31 August 2017 - 10%).

#### 10 Transactions and Balances with Related Parties

Invesco Fund Managers Limited (and its associates), as Manager, is a related party and acts as principal in respect of all transactions in the shares of the Company.

Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4, within each Sub-Fund. Management fee rebates are disclosed in notes 2 and 3 within each Sub-Fund. Amounts due at the end of the accounting year for Fund Management Fees are disclosed in note 10 within accrued expenses, within each Sub-Fund.

Invesco Fund Managers Limited and its associates (including other authorised investment companies managed by Invesco Fund Managers Limited) held the following shareholdings in the Sub-Funds:

Investment report for the year

## The Investment Objective and Policy of the Invesco Global Balanced Index Fund (UK)

The Sub-Fund aims to achieve long term capital growth with some income generation from investment primarily through a portfolio of investments in global equities and bonds. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Global Balanced Index Fund changed its name to Invesco Global Balanced Index Fund (UK) effective 1 October 2018. The Sub-Fund objective and strategy remain unchanged.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 17 for Accumulation shares (No Trail) as the figure above is based on the quoted 12pm price and the figure shown on page 17 is based on the close of business bid price. Invesco Composite Index data source: Eagle Pace, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

<sup>&</sup>lt;sup>1</sup> The Invesco Composite Index is calculated by reference to the FTSE All-Share ex Investment Trusts Index (50%), the MSCI World ex UK Index (Net Total Return) (25%), the FTSE Actuaries UK Conventional Gilts All Stocks Index (15%) and 3 Month LIBOR (10%), expressed in Sterling and total return. These indices, in the proportions indicated, are in line with the expected asset allocation of the Sub-Fund.

Investment report for the year

## Strategy, review and outlook

The Sub-Fund rose by 3.3% over the twelve months to the end of August 2018, compared to a rise of 5.5% on the Invesco Composite Index.<sup>1</sup> This placed the Sub-Fund in the fourth quartile of its peer group, the IA Mixed Investment 40-85% Shares Sector NR, which ended the period an average 4.9% higher.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Accumulation (No Trail) share class. Invesco Composite Index<sup>1</sup> data source: Eagle Pace, total return, in Sterling.

Past performance is not a guide to future returns.

Our performance is generated through a quantitative bottom-up investment process driven by a Multi-Factor Model based on four factors: Earnings Momentum, Price Momentum, Quality and Value. Relative risk is controlled with the help of an optimiser, an analysis tool that recommends trades to maximise portfolio exposure to the selected stocks within pre-determined risk/return parameters. In terms of portfolio construction, we tightly constrain the risk taken in sectors, countries and currencies.

The Sub-Fund consists of global equities, bonds and cash. The weighting of the three asset classes in the Sub-Fund is determined by our Tactical Asset Allocation Model. The equity range is between 50% and 85% and the bond range between 0% and 40%. Over 50% of the Sub-Fund will always be invested in UK assets (Internal guidelines only that are subject to change). The Sub-Fund's weighting in equities fluctuated slightly during the review period. In which we had a mostly moderately bullish signal for global equities. Our view is based on attractive valuation and a low level of risk aversion. Bond allocation over the last twelve months ranged between 8% and 18%.

Our disciplined portfolio construction and risk management process forms the basis for meeting the Sub-Fund's risk and return targets. Looking at the sources of active return, stock selection weighed on performance. Especially, our exposure to stocks with attractive Value scores and stock specific events detracted. While Momentum and Quality factors had a positive impact on relative performance. From a country perspective, our overweight in Nordic countries contributed positively, while an underweight in the US contributed negatively.

Our diversified and disciplined approach to stock selection favours companies that, in our view, are attractively valued, have good earnings and price momentum and have management that acts in the interest of shareholders. We believe that we can add value through the systematic application of fundamental and behavioural insights. Disciplined portfolio construction and cost-effective trading are integral to our investment process, which we believe should help us preserve value added through stock selection and reduce the probability of significant underperformance.

#### Michael Fraikin and Alexander Uhlmann, Fund Managers

Where Michael Fraikin and Alexander Uhlmann have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

<sup>1</sup> The Invesco Composite Index is calculated by reference to the FTSE All-Share ex Investment Trusts Index (50%), the MSCI World ex UK Index NR (25%), the FTSE Actuaries UK Conventional Gilts All Stocks Index (15%) and 3 Month GBP LIBOR (10%), expressed in Sterling and total return. These indices, in the proportions indicated, are in line with the expected asset allocation of the Sub-Fund.

The Sub-Fund's ten largest investments are	%

## Notes to the financial statements

Refer to pages 06 to 14 for notes applicable to the financial statements of all Sub-Funds.

## 1 Accounting policies

The Sub-Fund's Accounting Policies, Distribution Policies and Generic Risk Factors are set out on pages 06 to 07 and 09 to 13.

2 Net capital gains	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Derivative securities	(190)	311
Foreign currency gains/(losses)	32	(10)
Non-derivative securities	408	9,190
Net capital gains	250	9,491

3 Revenue	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Bank interest	3	-
Bond interest	248	247
Derivative income	23	3
Management fee rebates	63	63
Non-taxable overseas dividends	715	753
Taxable overseas dividends	35	-
UK dividends	1,353	1,181
UK REIT dividends	10	5
US REIT dividends	17	95
	2,467	2,347

4 Expenses	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Payable to the Manager, associates of the Manager and agents of either of them:		
Fund Management Fee <sup>1</sup>	583	583
	583	583
<b>Other expenses:</b> VAT - prior period adjustment	_	(1)
	-	(1)
Total expenses	583	582

<sup>1</sup> Total audit fees of £5,995 (2017 - £5,995) exclusive of VAT payable to the auditors for the year ended 31 August 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Interest payable and similar charges	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Derivative expense	48	17
Interest	3	-
	51	17

6 Taxation	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
a) Analysis of charge for the year		
Overseas tax	65	84
Total tax charge	65	84

There is no corporation tax charge for the year (2017 - Nil).

## b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Net revenue before taxation	1,833	1,748
Corporation tax at 20% (2017 - 20%)	367	350
Effects of:		
Movement in excess expenses	54	37
Overseas tax	65	84
Prior year adjustment	(5)	-
Relief on overseas tax expensed	(2)	-
Revenue not subject to tax	(414)	(387)
Total tax charge	65	84

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

### c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £1,072,000 (2017 - £800,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £214,000 (2017 - £160,000) has not been recognised.

7 Distributions	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Accumulations payable 31 October 2018 Amounts deducted on redemption of shares Amounts received on issue of shares	1,697 102 (31)	1,621 92 (49)
	1,768	1,664
The distributable amount has been calculated as follows: Net revenue after taxation	1,768	1,664
	1,768	1,664

Notes to the financial statements

8 Debtors	31.8.18 £'000	31.8.17 £'000
Accrued revenue	499	430
Amounts receivable for issue of shares	22	24
Overseas tax recoverable	29	25
	550	479

9 Cash and bank balances	31.8.18 £'000	31.8.17 £'000
Amounts held at futures clearing houses and brokers	70	111
Cash and bank balances	1,936	4,892
	2.006	5,003

10 Other creditors	31.8.18 £'000	31.8.17 £'000
Accrued expenses	49	51
Amounts payable for redemption of shares	175	114
	224	165

## 11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2017 - Nil).

## 12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 14. Management fee rebates are disclosed in note 3. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year of £1,481,000 (2017 - Nil) and amounts paid in respect of purchases in the accounting year of £1,485,000 (2017 - Nil) are included within the figures disclosed in note 14. Amounts due at the end of the accounting year for Fund Management Fees of £49,000 (2017 -  $\pm$ 51,000) are disclosed in note 10 within accrued expenses.

#### 13 Generic Risk factors

The value of investments and income from them can fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments.

The Sub-Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

#### a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

## 13 Generic Risk factors continued

## b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.18	F7 000	0
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	57,820	8
within level 1;	20,506	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	78,326	8
31.8.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	60,027	7
within level 1;	20,903	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	80,930	7

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument and level 2: Valuation techniques using observable inputs other than quoted prices within level 1. The investments classified as level 2 mainly comprise Gilts and investments related to daily priced open-ended funds. Gilts are valued using prices provided by the primary vendor and validated to the secondary vendor. The open-ended funds are valued at their fair value at noon, the last business day prior to the Sub-Fund's year end.

# **14 Portfolio transaction costs** for the year 1 September 2017 to 31 August 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	37,821	9	0.02	63	0.17
Collective investment schemes	1,485		-	-	-
Total purchases	39,306	9		63	
Total purchases including transaction costs	39,378				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct) Collective investment schemes	40,802 1,481	11	0.03		-
Total sales	42,283	11		-	
Total sales net of transaction costs	42,272				
Derivative transaction costs		2		-	
Total transaction costs		22		63	
Total transaction costs as a % of average net assets		0.03%		0.07%	

Notes to the financial statements

## 14 Portfolio transaction costs continued

for the year 1 September 2016 to 31 August 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	44,129	9	0.02	90	0.20
Debt instruments (direct)	4,027	-	-	-	-
Total purchases	48,156	9		90	
Total purchases including transaction costs	48,255				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct) Debt instruments (direct)	46,129 3,249	9 -	0.02	1 -	-
Total sales	49,378	9		1	
Total sales net of transaction costs	49,368				
Derivative transaction costs		-		-	
Total transaction costs		18		91	
Total transaction costs as a % of average net assets		0.02%		0.11%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.04% (2017 - 0.06%).

Notes to the financial statements

	Accumulation shares (No Trail
Opening shares	43,357,022
Shares issued	2,064,816
Shares redeemed	(5,863,236)
Shares converted	-
Closing shares	39,558,602

## 16 Post balance sheet events

There are no post balance sheet events that require disclosure or adjustments to the financial statements.

## **Invesco Global Balanced Index Fund (UK)** Distribution table

## Distribution table

for the year 1 September 2017 to 31 August 2018

Distribution payable 31 October 2018	Net revenue pence per share	Equalisation pence per share	Net distribution payable 31.10.18 pence per share	Net distribution paid 31.10.17 pence per share
Accumulation shares (No Trail) Group 1 Group 2	4.2890 2.7884	- 1.5006	4.2890 4.2890	3.7392 3.7392

Group 1: shares purchased prior to 1 September 2017 Group 2: shares purchased on or after 1 September 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

## Investment report for the year

## The Investment Objective and Policy of the Invesco Global Equity Fund (UK)

The Sub-Fund aims to achieve capital growth by investing in equities quoted on world stock markets. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Global Equity Fund changed its name to Invesco Global Equity Fund (UK) effective 1 October 2018. The Sub-Fund objective and strategy remain unchanged.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 34 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 34 is based on the close of business bid price. MSCI AC World Index NR<sup>2</sup> data source: Lipper, net total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- <sup>1</sup> Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- <sup>2</sup> Reference benchmark for performance comparison purposes only.

Investment report for the year

## Strategy, review and outlook

The Sub-Fund rose by 6.2% over the twelve months to the end of August 2018, compared to a rise of 10.5% by the benchmark, the MSCI AC World Index NR<sup>1</sup>. This placed the Sub-Fund in the fourth quartile of its peer group, the IA Global Sector NR, which ended the period an average of 10.6% higher.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. The figures do not reflect the entry charge paid by individual investors. MSCI AC World Index NR<sup>1</sup> data source: Lipper, net total return, in Sterling.

Past performance is not a guide to future returns.

Global equity markets delivered strong returns over the review period, on the back of a de-escalation of risk to the global economy. Chinese policy makers have moved to push back against a potential disorderly depreciation of the Yuan, Mexico and the US have made progress on trade negotiations, and speculation mounted that the Trump administration would continue to de-escalate global trade skirmishes. Markets will need more clarity from the White House on its plans, however, before the outlook for trade and its impact on global growth can be fully assessed. Whilst they are some warning signs of more difficult economic conditions ahead (a flattening US yield curve for example, which as an economic indicator suggests little difference between short-term and long-term rates for bonds of the same credit quality) overall we consider the global economic outlook at present to be relatively benign with modest economic growth and few signs of significant inflationary pressure.

Sub-Fund performance was driven largely by our underweight position in the technology sector versus the reference index, in particular e-commerce companies. These companies pay no dividends and appear expensive to us on many metrics, however investors' willingness to pay up for companies with robust revenue growth remains resolute. For many technology stocks, particularly e-commerce-related, we cannot make the valuation work or at least the risk/reward we see of owning them just now is so negatively skewed we do not want to commit capital to them. The Sub-Fund's underweight exposure to consumer discretionary also negatively impacted performance. The sector's growth has been fuelled mostly by Amazon, of course, the largest component of the sector, and often thought of as a technology stock.

We want to emphasise, however, that our investment process remains the same. We have not felt the need to chase after performing, momentum-driven equities, many of which we see as grossly overvalued.

In terms of regional exposure, the US equity market was the strongest performer of all the major regions and the Sub-Fund's underweight exposure to the US detracted from returns. Meanwhile, European equity markets were weak driven by the banks. Italy had been the focus since May with the election of the populist government and its ongoing budget negotiations. Italian financial stocks suffered as a result, not helped by their exposure to Turkey. The Sub-Fund's large position in Europe as well as stock selection had a negative impact on performance. Performance was also driven by emerging market weakness and by concerns around Brazil and Mexico specifically. These concerns were accentuated by political uncertainties and currency depreciation in Brazil, and the uncertainty around the US-Mexico trade deal.

Performance strength came from the Sub-Fund's energy holdings which gained as Brent crude pushed through \$80 a barrel in June 2018 for the first time in three and a half years as stocks shook off fears of a market decline and supply worries gripped the oil markets. The US's adoption of a harder line on Iran and the economic crisis faced by Venezuela, another oil exporter, sparked a rally in crude prices, which boosted share prices. Our optimism for the sector, however, is not based on expectations for oil prices. Rather that we see many companies trading at attractive valuations relative their history and other sectors of the market.

The construction of the Sub-Fund's portfolio is entirely driven by stock selection, seeking to invest in the best investment ideas from anywhere in the world. Our approach seeks to identify companies trading at a discount to their long term intrinsic value. Such discounts are often caused by the trading activities of shorter term market participants. We seek to exploit these pricing anomalies.

## Nick Mustoe (lead) and Global Equity Group<sup>2</sup>, Henley Investment Centre

Where Nick Mustoe and the fund managers in Global Equity Group have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

## Notes to the financial statements

Refer to pages 06 to 14 for notes applicable to the financial statements of all Sub-Funds.

### 1 Accounting policies

The Sub-Fund's Accounting Policies, Distribution Policies and Generic Risk Factors are set out on pages 06 to 07 and 09 to 13.

2 Net capital gains	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Foreign currency gains/(losses)	82	(195)
Forward currency contracts	(30)	1
Non-derivative securities	54,309	285,270
Net capital gains	54,361	285,076

3 Revenue	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Bank interest	12	-
Non-taxable overseas dividends	31,482	30,896
Stock dividends	-	479
Taxable overseas dividends	1,474	1,635
UK dividends	8,383	8,311
	41,351	41,321

4 Expenses	01.9.17 to 31.8.18 £′000	01.9.16 to 31.8.17 £'000
Payable to the Manager, associates of the Manager and agents of either of them:		
Fund Management Fee <sup>1</sup>	23,117	22,127
	23,117	22,127
<b>Other expenses:</b> VAT - prior period adjustment	_	5
	-	5
Total expenses	23,117	

<sup>1</sup> Total audit fees of £6,423 (2017 - £6,423) exclusive of VAT payable to the auditors for the year ended 31 August 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Interest payable and similar charges	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Interest	1	2

6 Taxation	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
a) Analysis of charge for the year	2 007	2 570
Overseas tax <sup>1</sup> Total tax charge	3,007 3,007	3,570

There is no corporation tax charge for the year (2017 - Nil).

### b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Net revenue before taxation	18,233	19,187
Corporation tax at 20% (2017 - 20%)	3,647	3,837
Effects of: Movement in excess expenses Overseas tax <sup>1</sup> Prior year adjustment Relief on overseas tax expensed Revenue not subject to tax	4,382 3,007 (18) (38) (7,973)	4,131 3,570 - (31) (7,937)
Total tax charge	3,007	3,570

<sup>1</sup> Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

### c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £274,439,000 (2017 - £252,528,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £54,888,000 (2017 - £50,506,000) has not been recognised.

7 Distributions	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Accumulations and distributions payable 31 October 2018 Amounts deducted on redemption of shares Amounts received on issue of shares	14,947 360 (58)	15,331 351 (34)
	15,249	15,648
The distributable amount has been calculated as follows:		
Net revenue after taxation	15,226	15,617
Equalisation on conversions	23	31
	15,249	15,648

Notes to the financial statements

8 Debtors	31.8.18 £'000	31.8.17 £'000
Accrued revenue	3,009	4,303
Amounts receivable for issue of shares	26	132
Foreign currency contracts awaiting settlement	1,539	1,579
Overseas tax recoverable	231	751
Sales awaiting settlement	-	24,086
	4.805	30.851

9 Cash and bank balances	31.8.18 £'000	31.8.17 £'000
Cash and bank balances	7.071	4,766

10 Other creditors	31.8.18 £'000	31.8.17 £'000
Accrued expenses	1,956	1,955
Amounts payable for redemption of shares	1,876	851
Foreign currency contracts awaiting settlement	1,548	1,570
Purchases awaiting settlement	1,539	19,067
	6.919	23,443

### 11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2017 - Nil).

### 12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 14. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £1,956,000 (2017 - £1,955,000) are disclosed in note 10 within accrued expenses.

### 13 Generic Risk factors

Although the Sub-Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

#### a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

### 13 Generic Risk factors continued

### b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	1,497,976	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	1,497,976	-
31.8.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	1,521,171	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	1,521,171	-

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

## **14 Portfolio transaction costs** for the year 1 September 2017 to 31 August 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	381,690	202	0.05	359	0.09
Total purchases	381,690	202		359	
Total purchases including transaction costs	382,251				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct) Debt instruments (direct)	459,971 3	208	0.05	36	0.01
Total sales	459,974	208		36	
Total sales net of transaction costs	459,730				
Derivative transaction costs		-		-	
Total transaction costs		410		395	
Total transaction costs as a % of average net assets		0.03%		0.02%	

Notes to the financial statements

### 14 Portfolio transaction costs continued

for the year 1 September 2016 to 31 August 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	274,291	432	0.16	241	0.09
Total purchases	274,291	432		241	
Total purchases including transaction costs	274,964				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	374,666	428	0.11	79	0.02
Total sales	374,666	428		79	
Total sales net of transaction costs	374,159				
Derivative transaction costs		-		-	
Total transaction costs		860		320	
Total transaction costs as a % of average net assets		0.06%		0.02%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.04% (2017 - 0.05%).

<b>Y Income shares</b> Group 1 Group 2	4.8021 3.4716	- 1.3305	4.8021 4.8021	4.5406 4.5406

Group 1: shares purchased prior to 1 September 2017 Group 2: shares purchased on or after 1 September 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

### The Investment Objective and Policy of the Invesco Global Equity Income Fund (UK)

The Sub-Fund aims to generate a rising level of income, together with long-term capital growth, investing primarily in global equities. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Global Equity Income Fund changed its name to Invesco Global Equity Income Fund (UK) effective 1 October 2018. The Sub-Fund objective and strategy remain unchanged.

Performance				Perc	entage growth

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 53 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 53 is based on the close of business bid price. MSCI World Index NR<sup>2</sup> data source: Lipper, net total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- <sup>1</sup> Effective 18 April 2016, the primary share class changed from Income share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- <sup>2</sup> Reference benchmark for performance comparison purposes only.

Investment report for the year

### Strategy, review and outlook

The Sub-Fund rose by 6.2% over the twelve months to the end of August 2018, compared to a rise of 12.1% by the benchmark, the MSCI World Index NR<sup>1</sup>. This placed the Sub-Fund in the third quartile of its peer group, the IA Global Equity Income Sector NR, which ended the period an average of 5.8%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. The figures do not reflect the entry charge paid by individual investors. MSCI World Index NR<sup>1</sup> data source: Lipper, net total return, in Sterling.

Past performance is not a guide to future returns.

Global equity markets delivered strong returns over the review period, on the back of a de-escalation of risk to the global economy. Chinese policy makers have moved to push back against a potential disorderly depreciation of the Yuan, Mexico and the US have made progress on trade negotiations, and speculation mounted that the Trump administration would continue to de-escalate global trade skirmishes. Markets will need more clarity from the White House on its plans, however, before the outlook for trade and its impact on global growth can be fully assessed. Whilst they are some warning signs of more difficult economic conditions ahead (a flattening US yield curve for example, which as an economic indicator suggests little difference between short-term and long-term rates for bonds of the same credit quality) overall we consider the global economic outlook at present to be relatively benign with modest economic growth and few signs of significant inflationary pressure.

Sub-Fund performance was driven largely by our underweight position in the technology sector versus the reference index, in particular e-commerce companies. These companies pay no dividends and appear expensive to us on many metrics, however investors' willingness to pay up for companies with robust revenue growth remains resolute. For many technology stocks, particularly e-commerce-related, we cannot make the valuation work or at least the risk/reward we see of owning them just now is so negatively skewed we do not want to commit capital to them. The Sub-Fund's underweight exposure to consumer discretionary also negatively impacted performance. The sector's growth has been fuelled mostly by Amazon, of course, the largest component of the sector, and often thought of as a technology stock. We want to emphasise, however, that our investment process remains the same. We have not felt the need to chase after performing, momentum-driven equities, many of which we see as grossly overvalued.

The Sub-Fund's telecoms exposure was also an area of weakness, BT in particular. Its share price struggled due to pressures around its large pension deficit and enterprise business. In terms of regional exposure, the US equity market was the strongest performer of all the major regions and the Sub-Fund's underweight exposure to the US detracted from returns. Meanwhile, European equity markets were weak driven by the banks, which negatively impacted our financials exposure. Italy had been the focus since May with the election of the populist government and its ongoing budget negotiations. Italian financial stocks suffered as a result, not helped by their exposure to Turkey. The Sub-Fund's large position in Europe as well as stock selection had a negative impact on performance.

Performance strength came from the Sub-Fund's energy holdings which gained as Brent crude pushed through \$80 a barrel in June 2018 for the first time in three and a half years as stocks shook off fears of a market decline and supply worries gripped the oil markets. The US's adoption of a harder line on Iran and the economic crisis faced by Venezuela, another oil exporter, sparked a rally in crude prices, which boosted share prices. Our optimism for the sector, however, is not based on expectations for oil prices. Rather that we see many companies trading at attractive valuations relative their history and other sectors of the market.

Both country and sector exposures are as a result of our bottom-up stock selection process. The Sub-Fund reflects the most attractive risk-adjusted share price upside opportunities that we have identified through our research process.

## Nick Mustoe (lead) and Global Equity Income Group<sup>2</sup>, Henley Investment Centre

Where Nick Mustoe and the fund managers in Global Equity Income Group have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

- <sup>1</sup> Reference benchmark for performance comparison purposes only.
- <sup>2</sup> The Global Equity Income Group, Henley Investment Centre, comprises Chief Investment Officer Nick Mustoe (lead), Fund Managers Tim Marshall, Andrew Hall, Simon Clinch, Stephanie Butcher, Tim Dickson and Tony Roberts, Investment Strategist Martin Weiss and Product Manager Arwel Green.

## Notes to the financial statements

Refer to pages 06 to 14 for notes applicable to the financial statements of all Sub-Funds.

### 1 Accounting policies

The Sub-Fund's Accounting Policies, Distribution Policies and Generic Risk Factors are set out on pages 06 to 07 and 09 to 13.

2 Net capital gains	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Foreign currency gains/(losses)	90	(237)
Forward currency contracts	(16)	_
Non-derivative securities	26,472	122,593
Net capital gains	26,546	122,356

3 Revenue	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Bank interest	14	-
Non-taxable overseas dividends	26,795	23,127
Taxable overseas dividends	43	-
UK dividends	5,840	6,926
	32,692	30,053

4 Expenses	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Payable to the Manager, associates of the Manager and agents of either of them:		
Fund Management Fee <sup>1</sup>	9,604	8,939
	9,604	8,939
<b>Other expenses:</b> VAT - prior period adjustment	-	(28)
	_	(28)
Total expenses	9,604	8,911

<sup>1</sup> Total audit fees of £6,423 (2017 - £6,423) exclusive of VAT payable to the auditors for the year ended 31 August 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5	Interest payable and similar charges	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
	erest	-	2

6 Taxation	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
a) Analysis of charge for the year Overseas tax	2,805	3,075
Total tax charge	2,805	3,075

There is no corporation tax charge for the year (2017 - Nil).

### b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Net revenue before taxation	23,088	21,140
Corporation tax at 20% (2017 - 20%)	4,618	4,228
Effects of:		
Movement in excess expenses	1,906	1,783
Overseas tax	2,805	3,075
Prior year adjustment	4	-
Relief on overseas tax expensed	(1)	-
Revenue not subject to tax	(6,527)	(6,011)
Total tax charge	2,805	3,075

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

### c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £58,799,000 (2017 - £49,268,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £11,760,000 (2017 - £9,854,000) has not been recognised.

7 Distributions	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Accumulations and distributions paid 30 April 2018 Accumulations and distributions payable 31 October 2018	8,995 21,224	8,461 17,973
Amounts deducted on redemption of shares Amounts received on issue of shares	30,219 537 (875)	26,434 840 (298)
	29,881	26,976
The distributable amount has been calculated as follows:		
Net revenue after taxation Fund Management Fee taken to capital Tax relief on expenses taken to capital VAT recoverable taken to capital	20,283 9,604 (6)	18,065 8,939 - (28)
	29,881	26,976

Notes to the financial statements

8 Debtors	31.8.18 £'000	31.8.17 £'000
Accrued revenue	2,615	3,591
Amounts receivable for issue of shares	1,248	569
Foreign currency contracts awaiting settlement	-	870
Overseas tax recoverable	523	520
	4,386	5,550

9 Cash and bank balances	31.8.18 £'000	31.8.17 £'000
Cash and bank balances	11,638	5,008

10 Other creditors	31.8.18 £'000	31.8.17 £'000
Accrued expenses	862	775
Amounts payable for redemption of shares	493	576
Foreign currency contracts awaiting settlement	-	868
Purchases awaiting settlement	-	870
	1.355	3,089

#### 11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2017 - Nil).

#### 12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 14. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £862,000 (2017 - £775,000) are disclosed in note 10 within accrued expenses.

#### **13 Generic Risk factors**

As one of the key objectives of the Sub-Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth. Although the Sub-Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

### a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

### 13 Generic Risk factors continued

### b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	932,984	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	932,984	-
31.8.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	841,304	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	841,304	-

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

### 14 Portfolio transaction costs

for the year 1 September 2017 to 31 August 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	287,415	129	0.04	496	0.17
Total purchases	287,415	129		496	
Total purchases including transaction costs	288,040				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	222,955	114	0.05	29	0.01
Total sales	222,955	114		29	
Total sales net of transaction costs	222,812				
Derivative transaction costs		-		-	
Total transaction costs		243		525	
Total transaction costs as a % of average net assets		0.03%		0.06%	

Notes to the financial statements

### 14 Portfolio transaction costs continued

for the year 1 September 2016 to 31 August 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	214,246	291	0.14	74	0.03
Total purchases	214,246	291		74	
Total purchases including transaction costs	214,611				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	295,693	260	0.09	31	0.01
Total sales	295,693	260		31	
Total sales net of transaction costs	295,402				
Derivative transaction costs		-		-	
Total transaction costs		551		105	
Total transaction costs as a % of average net assets		0.07%		0.01%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.04% (2017 - 0.05%).

Group 1: shares purchased prior to 1 March 2018 Group 2: shares purchased on or after 1 March 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

## Invesco Global ex UK Core Equity Index Fund (UK)

Investment report for the year

### The Investment Objective and Policy of the Invesco Global ex UK Core Equity Index Fund (UK)

The Sub-Fund aims to achieve long term capital growth from investment primarily through a portfolio of investments in global companies, excluding the UK. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Global ex UK Core Equity Index Fund changed its name to Invesco Global ex UK Core Equity Index Fund (UK) effective 1 October 2018. The Sub-Fund objective and strategy remain unchanged.

Performance				Perce	ntage growth

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 72 for Accumulation shares (No Trail) as the figure above is based on the quoted 12pm price and the figure shown on page 72 is based on the close of business bid price. MSCI World ex UK Index NR data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

## Invesco Global ex UK Core Equity Index Fund (UK)

Investment report for the year

### Strategy, review and outlook

The Sub-Fund rose by 11.6% over the twelve months to the end of August 2018, compared to a rise of 12.7% by the benchmark MSCI World ex UK Index NR. This placed the Sub-Fund in the second quartile of its peer group, the IA Global Sector NR, which ended the period an average 10.6% higher.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Accumulation (No Trail) share class. MSCI World ex UK Index NR data source: Lipper, net total return, in Sterling.

Past performance is not a guide to future returns.

Our performance is generated through a quantitative bottom-up investment process driven by a Multi-Factor Model based on four factors: Earnings Momentum, Price Momentum, Quality and Value. Relative risk is controlled with the help of an optimiser, an analysis tool that recommends trades to maximise portfolio exposure to the selected stocks within pre-determined risk/return parameters. In terms of portfolio construction, we tightly constrain the risk taken in sectors, countries and currencies.

Despite continuing concerns about trade tensions and increased political and economic uncertainty in 2018, the global equity markets ended the last twelve months in positive territory. Moreover, the US main equity market continued its longest bull run in history. While markets enjoyed a good start into the new year supported by strength in corporate earnings, a pick-up in economic growth and optimism over US tax cuts, global equity markets witnessed a sharp correction in the first half of February. The catalyst for the weakness was an increase in government yields in major markets, especially in the US.

In terms of relative performance, the Sub-Fund has underperformed its reference benchmark over the last twelve months. Within the investment team's factors, our Momentum and Quality factors contributed positively to the relative performance. Contrarily, the companies that were favoured by our Value factor underperformed the broad market throughout the period. Additionally, stock specific events and the Sub-Fund's exposure to lower capitalized stocks detracted from performance. In terms of individual stock performance, overweight positions relative to the reference benchmark in Valero Energy, ConocoPhillips and UPM-Kymmene contributed positively. Conversely, underweight positions in Amazon and Microsoft weighed on the Sub-Fund's performance. Residual factors such as active weights in countries, currencies or sectors are tightly managed relative to the Sub-Fund's reference benchmark and had a negative impact on relative performance.

Over the last few months we have made a number of adjustments within the Sub-Fund. We bought Bank of Montreal and Hyatt Hotels with trade weights of 0.6% and 0.9%, respectively. Additionally, we increased our position in HollyFrontier, a US energy company, by 1.3%. On the other hand, we sold out of West Fraser Timber and Cochlear which had portfolio weightings of 0.9% and 0.7%, respectively. Furthermore, we decreased our holdings in JPMorgan Chase by 1.2%.

Our diversified and disciplined approach to factor selection favours companies that, in our view, are attractively valued, have good earnings and price momentum and have management that acts in the interest of shareholders. We believe that we can add value through the systematic application of fundamental and behavioural insights. Disciplined portfolio construction and cost-effective trading are integral to our investment process, which we believe should help us preserve value added from stock selection and reduce the probability of significant underperformance.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

### Notes to the financial statements

Refer to pages 06 to 14 for notes applicable to the financial statements of all Sub-Funds.

#### 1 Accounting policies

The Sub-Fund's Accounting Policies, Distribution Policies and Generic Risk Factors are set out on pages 06 to 07 and 09 to 13.

2 Net capital gains	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Derivative securities	62	133
Foreign currency (losses)/gains	(25)	27
Non-derivative securities	4,482	7,617
Net capital gains	4,519	7,777

3 Revenue	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Bank interest	2	-
Non-taxable overseas dividends	984	1,154
Derivative income	8	-
US REIT dividends	53	147
	1,047	1,301

4 Expenses	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
<b>Payable to the Manager, associates of the Manager</b> <b>and agents of either of them:</b> Fund Management Fee <sup>1</sup>	338	343
	338	343
Total expenses	338	343

<sup>1</sup> Total audit fees of £5,995 (2017 - £5,995) exclusive of VAT payable to the auditors for the year ended 31 August 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5	Interest payable and similar charges	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
	erest	-	-

6 Taxation	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
<ul> <li>Analysis of charge for the year</li> <li>Overseas tax</li> </ul>	125	176
Total tax charge	125	176

There is no corporation tax charge for the year (2017 - Nil).

#### b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Net revenue before taxation	709	958
Corporation tax at 20% (2017 - 20%)	142	192
Effects of:		
Movement in excess expenses	65	39
Overseas tax	125	176
Prior year adjustment	(8)	-
Relief on overseas tax expensed	(2)	-
Revenue not subject to tax	(197)	(231)
Total tax charge	125	176

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

#### c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of  $\pounds 2,336,000$  (2017 -  $\pounds 2,011,000$ ). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of  $\pounds 467,000$  (2017 -  $\pounds 402,000$ ) has not been recognised.

7 Distributions	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Accumulations and distributions payable 31 October 2018 Amounts deducted on redemption of shares Amounts received on issue of shares	547 50 (13)	743 57 (18)
The distributable amount has been calculated as follows:	584	782
Net revenue after taxation	584 584	782 782

Notes to the financial statements

8 Debtors	31.8.18	31.8.17
	£'000	£'000
Accrued revenue	71	81
Overseas tax recoverable	32	64
	103	145

9 Cash and bank balances	31.8.18	31.8.17
	£'000	£'000
Amounts held at futures clearing houses and brokers	-	58
Cash and bank balances	642	1,623
	642	1,681

10 Other creditors	31.8.18	31.8.17
	£'000	£'000
Accrued expenses	29	29
Amounts payable for redemption of shares	87	122
Corporation tax	5	5
	121	156

#### 11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2017 - Nil).

#### 12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 14. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £29,000 (2017 - £29,000) are disclosed in note 10 within accrued expenses.

#### 13 Generic Risk factors

The value of investments and income from them can fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

#### a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

#### 13 Generic Risk factors continued

#### b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	48,271	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	48,271	-
31.8.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	47,944	8
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	47,944	8

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

**14 Portfolio transaction costs** for the year 1 September 2017 to 31 August 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	34,555	7	0.02	6	0.02
Total purchases	34,555	7		6	
Total purchases including transaction costs	34,568				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	38,701	8	0.02	1	0.00
Total sales	38,701	8		1	
Total sales net of transaction costs	38,692				
Derivative transaction costs		1		-	
Total transaction costs		16		7	
Total transaction costs as a % of average net assets		0.04%		0.01%	

#### **Invesco Global ex UK Core Equity Index Fund (UK)** Notes to the financial statements

#### 14 Portfolio transaction costs continued

for the year 1 September 2016 to 31 August 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	35,921	7	0.02	2	0.01
Total purchases	35,921	7		2	
Total purchases including transaction costs	35,930				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	41,895	9	0.02	1	-
Total sales	41,895	9		1	
Total sales net of transaction costs	41,885				
Derivative transaction costs		-		-	
Total transaction costs		16		3	
Total transaction costs as a % of average net assets		0.03%		0.01%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (2017 - 0.06%).

### **Invesco Global ex UK Core Equity Index Fund (UK)** Distribution table

#### **Distribution table**

for the year 1 September 2017 to 31 August 2018

Distribution payable 31 October 2018	Net revenue pence per share	Equalisation pence per share	Net distribution payable 31.10.18 pence per share	Net distribution paid 31.10.17 pence per share
<b>Accumulation shares (No Trail)</b> Group 1 Group 2	3.0575 1.9585	- 1.0990	3.0575 3.0575	3.6877 3.6877

Group 1: shares purchased prior to 1 September 2017 Group 2: shares purchased on or after 1 September 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

#### The Investment Objective and Policy of the Invesco Global ex UK Enhanced Index Fund (UK)

The Sub-Fund aims to achieve long term capital growth and outperform the MSCI World ex UK Index (net total return) (the "Index") by investing primarily in a portfolio of investments in global companies, excluding the UK. The Sub-Fund aims to outperform the Index net of fees over a full market cycle (typically 5-10 years). There is no guarantee that the Sub-Fund will achieve its target and an investor may not get back the full amount invested. The Sub-Fund seeks to achieve its objective following a systematic investment process, with a high correlation to the Index. The Sub-Fund uses a range of factors to evaluate the relative attractiveness of a stock together with an assessment of risk, to build a portfolio that shares the broad characteristics of the Index. The Sub-Fund is actively managed and will not replicate the Index in its entirety. The Sub-Fund will primarily invest in equities, and may also invest in cash, cash equivalents, money market instruments, warrants, collective investment schemes and other transferable securities. The Sub-Fund may enter into financial derivative instruments for efficient portfolio management purposes only.

Invesco Perpetual Global ex UK Enhanced Index Fund changed its name to Invesco Global ex UK Enhanced Index Fund (UK) effective 1 October 2018. The Sub-Fund objective and strategy remain unchanged.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 88 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 88 is based on the close of business bid price. MSCI World ex UK Index NR data source: Lipper, net total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

<sup>1</sup> Effective 28 July 2016, the primary share class changed from Accumulation share (No Trail) class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 28 July 2016, for the years prior to this launch date, performance figures are based on the Accumulation share (No Trail) class, without any adjustment for fees.

Investment report for the year

#### Strategy, review and outlook

The Sub-Fund rose by 13.3% over the twelve months to the end of August 2018, compared to a rise of 12.7% by the benchmark MSCI World ex UK Index NR. This placed the Sub-Fund in the first quartile of its peer group, the IA Global Sector NR, which ended the period an average of 10.6% higher.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. MSCI World ex UK Index NR data source: Lipper, net total return, in Sterling.

Past performance is not a guide to future returns.

Our performance is generated through a quantitative bottom-up investment process driven by a Multi-Factor Model based on four factors: Earnings Momentum, Price Momentum, Quality and Value. Relative risk is controlled with the help of an optimiser, an analysis tool that recommends trades to maximise portfolio exposure to the selected stocks within pre-determined risk/return parameters. In terms of portfolio construction, we tightly constrain the risk taken in sectors, countries and currencies.

Despite continuing concerns about trade tensions and increased political and economic uncertainty in 2018, the global equity markets ended the last twelve months in positive territory. Moreover, the US main equity market continued its longest bull run in history. While markets enjoyed a good start into the new year supported by strength in corporate earnings, a pick-up in economic growth and optimism over US tax cuts, global equity markets witnessed a sharp correction in the first half of February. The catalyst for the weakness was an increase in government yields in major markets, especially in the US.

In terms of relative performance, the Sub-Fund outperformed its reference benchmark over the last twelve months. The contribution from the investment team's factors was positive over the last twelve months, and was primarily driven by strong contributions from our Momentum-related factors. The persistent strength of our Earnings Momentum factor continued and added the most to the performance. Additionally, positions that were based on attractive Quality scores and strong Price Momentum delivered positive results. However, stocks that were favoured by our Value factor weighed on relative performance. Overweight positions in Boeing and an underweight in General Electric added the most in terms of relative performance while an underweight in Amazon detracted from relative performance. Residual factors like active country and currency allocation as well as sector allocation and the remaining style factors had no significant impact on the relative performance.

We have increased positions in L'Oréal and Novartis with portfolio weightings of 0.8% and 0.4%, respectively. Conversely, we sold the Sub-Fund's 0.2% position in Public Storage and reduced our positions in OMV and Comcast by 0.6% and 0.5%, respectively. Our diversified and disciplined approach to factor selection favours companies that, in our view, are attractively valued, have good earnings and price momentum and have management that acts in the interest of shareholders. We believe that we can add value through the systematic application of fundamental and behavioural insights. Disciplined portfolio construction and cost-effective trading are integral to our investment process, which we believe should help us preserve value added through stock selection and reduce the probability of significant underperformance.

#### Michael Fraikin and Alexander Uhlmann, Fund Managers

Where Michael Fraikin and Alexander Uhlmann have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

The Sub-Fund's ten largest investments are	
Apple	3.10

<sup>1</sup> Effective 28 July 2016, the Fund Management Fee for the Accumulation shares (No Trail) reduced from 0.37% to 0.25%.

<sup>2</sup> Z Accumulation shares were issued at 200p on 28 July 2016. The operating charges and direct transaction costs percentages figures disclosed have been annualised. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Bank interest	6	1
Derivative income	42	-
Non-taxable overseas dividends	5,486	10,087
Non-US overseas REIT dividends	1	8
Stock dividends	-	30
Taxable overseas dividends	6	31
UK dividends	-	1
US REIT dividends	246	469
	5,787	10,627

4 Expenses	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Payable to the Manager, associates of the Manager and agents of either of them:		
Fund Management Fee <sup>1</sup>	724	1,049
	724	1,049
Other expenses:		
VAT - prior period adjustment	-	(5)
	-	(5)
Total expenses	724	1,044

<sup>1</sup> Total audit fees of £5,995 (2017 - £5,995) exclusive of VAT payable to the auditors for the year ended 31 August 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5	Interest payable and similar charges	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
	erest	-	-

6 Taxation	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
<ul> <li><b>Analysis of charge for the year</b></li> <li>Overseas tax<sup>1</sup></li> </ul>	760	1,308
Total tax charge	760	1,308

There is no corporation tax charge for the year (2017 - Nil).

#### b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Net revenue before taxation	5,063	9,583
Corporation tax at 20% (2017 - 20%)	1,013	1,917
Effects of:		
Movement in excess expenses	120	109
Overseas tax <sup>1</sup>	760	1,308
Prior year adjustment	(27)	-
Relief on overseas tax expensed	(8)	(1)
Revenue not subject to tax	(1,098)	(2,025)
Total tax charge	760	1,308

<sup>1</sup> Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

#### c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of  $\pounds$ 6,204,000 (2017 -  $\pounds$ 5,606,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of  $\pounds$ 1,241,000 (2017 -  $\pounds$ 1,121,000) has not been recognised.

7 Distributions	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Accumulations and distributions paid 30 April 2018 Accumulations and distributions payable 31 October 2018	3,014 748	3,161 5,197
Amounts deducted on redemption of shares Amounts received on issue of shares	3,762 653 (112)	8,358 11 (94)
	4,303	8,275
The distributable amount has been calculated as follows: Net revenue after taxation	4,303	8,275
	4,303	8,275

Notes to the financial statements

8 Debtors	31.8.18 £'000	31.8.17 £'000
Accrued revenue	102	728
Amounts receivable for issue of shares	14	501
Overseas tax recoverable	147	343
	263	1.572

9 Cash and bank balances	31.8.18 £'000	31.8.17 £'000
Amount held at futures clearing houses and brokers	29	309
Cash and bank balances	1,396	8,963
	1,425	9,272

10 Other creditors	31.8.18 £'000	31.8.17 £'000
Accrued expenses	14	95
Amounts payable for redemption of shares	103	-
Corporation tax	36	36
	153	131

#### 11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2017 - Nil).

#### 12 Related parties

Related party interests in the sub fund are disclosed in note 10 of the notes applicable to the financial statements of all sub funds on page 14. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £14,000 (2017 - £95,000) are disclosed in note 10 within accrued expenses.

#### 13 Generic Risk factors

The value of investments and income from them can fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

#### a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

#### 13 Generic Risk factors continued

#### b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	68,993	3
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	68,993	3
31.8.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	444,926	30
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	444.926	30

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

## **14 Portfolio transaction costs** for the year 1 September 2017 to 31 August 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	128,934	31	0.02	32	0.02
Total purchases	128,934	31		32	
Total purchases including transaction costs	128,997				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct) In specie transfer	114,963 394,998	25 -	0.02	4 -	0.00
Total sales	509,961	25		4	
Total sales net of transaction costs	509,932				

Derivative transaction costs	1	-
Total transaction costs	57	36
Total transaction costs as a % of average net assets	0.02%	0.01%

Notes to the financial statements

#### 14 Portfolio transaction costs continued

for the year 1 September 2016 to 31 August 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	188,061	20	0.01	15	0.01
Total purchases	188,061	20		15	
Total purchases including transaction costs	188,096				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	167,934	18	0.01	4	-
Total sales	167,934	18		4	
Total sales net of transaction costs	167,912				
Derivative transaction costs		-		-	
Total transaction costs		38		19	
Total transaction costs as a % of average net assets		0.01%		0.00%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (2017 - 0.05%).

Notes to the financial statements

Y Income shares Group 1 Group 2	2.7696 1.2456	- 1.5240	2.7696 2.7696	2.7057 2.7057

Group 1: shares purchased prior to 1 March 2018 Group 2: shares purchased on or after 1 March 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

## The Investment Objective and Policy of the Invesco Global Opportunities Fund (UK)

The Sub-Fund aims to achieve long-term capital growth through a portfolio of primarily global equities. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Global Opportunities Fund changed its name to Invesco Global Opportunities Fund (UK) effective 1 October 2018. The Sub-Fund objective and strategy remain unchanged.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 112 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 112 is based on the close of business bid price. MSCI AC World Index NR<sup>2</sup> data source: Lipper, net total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- <sup>1</sup> Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- <sup>2</sup> Reference benchmark for performance comparison purposes only.

Investment report for the year

## Strategy, review and outlook

The Sub-Fund rose by 4.6% over the twelve months to the end of August 2018, compared to a return of 10.5% by the benchmark, the MSCI AC World Index NR<sup>1</sup>. This placed the Sub-Fund in the fourth quartile of its peer group, the IA Global Sector NR, which ended the period an average of 10.6% higher.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. The figures do not reflect the entry charge paid by individual investors. MSCI AC World Index NR<sup>1</sup> data source: Lipper, net total return, in Sterling.

Past performance is not a guide to future returns.

Global equity markets delivered strong returns over the review period, on the back of a de-escalation of risk to the global economy. Chinese policy makers have moved to push back against a potential disorderly depreciation of the Yuan, Mexico and the US have made progress on trade negotiations, and speculation mounted that the Trump administration would continue to de-escalate global trade skirmishes. Markets will need more clarity from the White House on its plans, however, before the outlook for trade and its impact on global growth can be fully assessed. Whilst they are some warning signs of more difficult economic conditions ahead (a flattening US yield curve for example, which as an economic indicator suggests little difference between short-term and long-term rates for bonds of the same credit quality) overall we consider the global economic outlook at present to be relatively benign with modest economic growth and few signs of significant inflationary pressure.

The Sub-Fund's performance over the twelve months was largely driven by its exposure to the consumer discretionary area. Weakness came from stocks including JD.com. JD's underperformance was linked to the wider underperformance of Chinese and Chinarelated stocks caused by concerns around Trump's trade war narrative. JD was caught up in this despite what we think are continued efforts to develop the customer offering.

Health care was another area of weakness, driven by individual stocks, such as Bayer. Bayer's share price fell due to a court case in the US which they lost. We have lived through litigation in various sectors over the years, the market hates uncertainty and currently there is a degree of uncertainty. However, we believe the reaction in the share price is far too aggressive and we have added to the holding to maintain our overall portfolio weight.

Over the past six months in particular, Sub-Fund performance has been hurt by three key things: stock-specific risks such as Bayer (as detailed above); exposure to emerging market weakness (both direct and indirect) and by concerns around Brazil specifically, accentuated by political uncertainties and currency depreciation; and by the Sub-Fund's underweight exposure to the US equity market and US Dollar versus the reference index, particularly in the case of technology stocks. We believe that the significant outperformance of the US equity market versus the rest of the world and the US dollar from mid-April this year suggest that investors are still concerned about risks to the global economy- particularly in respect of trade. This is reflected in the performance and valuation of sectors such as autos which are deemed to be most at risk from a trade war. The outperformance of the US equity market has been matched by the underperformance of almost all other areas including emerging markets, Asia, sterling, and emerging market currencies.

Performance strength over the twelve months came from the Sub-Fund's energy holdings which gained as Brent crude pushed through \$80 a barrel in June 2018 for the first time in three and a half years as stocks shook off fears of a market decline and supply worries gripped the oil markets. The US's adoption of a harder line on Iran and the economic crisis faced by Venezuela, another oil exporter, sparked a rally in crude prices, which boosted share prices. Our optimism for the sector, however, is not based on expectations for oil prices. Rather that we see many companies trading at attractive valuations relative their history and other sectors of the market.

This focused Sub-Fund is entirely driven by bottom-up stock selection, seeking to invest in the best investment ideas from anywhere in the world. The Sub-Fund has a core of what we believe are sustainable growth, cash generative names and strong franchises. The Sub-Fund also has a number of turnaround investments and investments with company-specific issues, which we believe the market is mis-pricing and where we believe there is share price upside potential.

#### Stephen Anness (lead) and Andrew Hall, Fund Managers

Other expenses:		
VAT - prior period adjustment	-	(7)
	-	(7)
Total expenses	2,901	2,648

<sup>1</sup> Total audit fees of £6,206 (2017 - £6,206) exclusive of VAT payable to the auditors for the year ended 31 August 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Interest payable and similar charges	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Interest	3	2

6 Taxation	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
<ul> <li>Analysis of charge for the year</li> <li>Overseas tax</li> </ul>	603	504
Total tax charge	603	504

There is no corporation tax charge for the year (2017 - Nil).

### b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Net revenue before taxation	3,805	2,211
Corporation tax at 20% (2017 - 20%)	761	442
Effects of:		
Movement in excess expenses	422	499
Overseas tax	603	504
Prior year adjustment	(9)	-
Relief on overseas tax expensed	(27)	-
Revenue not subject to tax	(1,147)	(941)
Total tax charge	603	504

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

#### c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £19,744,000 (2017 - £17,638,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £3,949,000 (2017 - £3,527,000) has not been recognised.

7 Distributions	01.9.17 to 31.8.18 £'000	01.9.16 to 31.8.17 £'000
Accumulations and distributions payable 31 October 2018	3,233	1,839

Accrued expenses	254	234
Amounts payable for redemption of shares	217	467
Purchases awaiting settlement	106	-
	577	701

#### 11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2017 - Nil).

## 12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 14. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £254,000 (2017 - £234,000) are disclosed in note 10 within accrued expenses.

## 13 Generic Risk factors

Although the Sub-Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Sub-Fund may invest to a limited extent in certain securities listed in China, which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance.

Although the Sub-Fund does not actively pursue a concentrated portfolio, it may have a concentrated number of holdings on occasions. Accordingly, the Sub-Fund may carry a higher degree of risk than a Sub-Fund which invests in a broader range of companies or takes smaller positions in a relatively large number of holdings.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

#### a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

## 13 Generic Risk factors continued

## b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.8.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	248,526	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	248,526	-
31.8.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	232,710	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	232,710	-

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

## **14 Portfolio transaction costs** for the year 1 September 2017 to 31 August 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	160,211	149	0.09	112	0.07
Total purchases	160,211	149		112	
Total purchases including transaction costs	160,472				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	149,813	111	0.07	27	0.02
Total sales	149,813	111		27	
Total sales net of transaction costs	149,675				
Derivative transaction costs		-		-	
Total transaction costs		260		139	
Total transaction costs as a % of average net assets		0.10%		0.06%	

Notes to the financial statements

## 14 Portfolio transaction costs continued

for the year 1 September 2016 to 31 August 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	78,298	135	0.17	121	0.15
Total purchases	78,298	135		121	
Total purchases including transaction costs	78,554				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	93,913	93	0.10	13	0.01
Total sales	93,913	93		13	
Total sales net of transaction costs	93,807				
Derivative transaction costs		-		-	
Total transaction costs		228		134	
Total transaction costs as a % of average net assets		0.11%		0.06%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.08% (2017 - 0.09%).

# **Invesco Global Opportunities Fund (UK)** Notes to the financial statements

**15 Share movement** for the year 1 September 2017 to 31 August 2018

	Accumulation shares	Accumulation shares (No Trail)	Z Accumulation shares	Y Accumulatior shares
Opening shares	55,051,296	1,182,406	17,237,524	22,304,720
Shares issued	2,556,808	50,026	3,667,420	5,410,605
Shares redeemed	(3,897,820)	(464,771)	(4,798,332)	(1,556,682)
Shares converted	(384,404)	(3,084)	(10,806)	185,081
Closing shares	53,325,880	764,577	16,095,806	26,343,724

## 16 Post balance sheet events

There are no post balance sheet events that require disclosure or adjustments to the financial statements.

## **Invesco Global Opportunities Fund (UK)** Distribution table

## **Distribution table**

for the year 1 September 2017 to 31 August 2018

Distribution payable 31 October 2018	Net revenue pence per share	Equalisation pence per share	Net distribution payable 31.10.18 pence per share	Net distribution paid 31.10.17 pence per share
Accumulation shares Group 1 Group 2	1.1219 0.9127	- 0.2092	1.1219 1.1219	0.4374 0.4374
Accumulation shares (No Trail) Group 1 Group 2	4.7923 2.3707	- 2.4216	4.7923 4.7923	2.7943 2.7943
<b>Z Accumulation shares</b> Group 1 Group 2	7.4857 4.4493	- 3.0364	7.4857 7.4857	4.7184 4.7184
<b>Y Accumulation shares</b> Group 1 Group 2	5.2881 3.1508	- 2.1373	5.2881 5.2881	3.3689 3.3689

Group 1: shares purchased prior to 1 September 2017 Group 2: shares purchased on or after 1 September 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

## Invesco Global Investment Series (the "Company") Regulatory statements

# Statement of the Manager's Responsibilities in relation to the Financial Statements

The Collective Investment Schemes sourcebook ("COLL") requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the accounts as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

## Statement of Depositary's Responsibilities in relation to the Financial Statements

The Depositary is responsible for the safekeeping of all of the property of the Company (other than tangible moveable property) which is entrusted to it.

It is the duty of the Depositary to take reasonable care to ensure that the Company is managed in accordance with the COLL, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) ("the OEIC Regulations") and the Company's Instrument of Incorporation in relation to the pricing of, and dealings in, the shares of the Company, the application of the revenue of the Company, and the investment and borrowing powers of the Company.

## Depositary's Report to Shareholders

Having carried out such procedures as we considered necessary to discharge our responsibilities and duties as Depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation of shares in the Company, the calculation of the price of the Company's shares and the application of the Company's revenue in accordance with the COLL and, where applicable, the OEIC Regulations and the Instrument of Incorporation of the Company; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

126 Invesco Global Investment Series

## Invesco Global Investment Series (the "Company")

Independent Auditors' Report to the Shareholders of Invesco Global Investment Series (the "Company")

#### Report on the audit of the financial statements

#### Opinion

In our opinion, Invesco Global Investment Series' financial statements:

- give a true and fair view of the financial position of the Company and each of the Sub-Funds as at 31 August 2018 and of the net revenue/expenses and the net capital gains/(losses) on the scheme property of the Company and each of the Sub-Funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco Global Investment Series (the "Company") is an Open Ended Investment Company ('OEIC') with six Sub-Funds. The financial statements of the Company comprise the financial statements of each of the Sub-Funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise the Balance Sheets as at 31 August 2018; the Statement of Total Return and the Statement of Change in Net Assets Attributable to Shareholders for the year then ended; the Distribution tables; the notes applicable to the financial statements.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

## Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (UK) require us to report to you when:

- the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Authorised Corporate Director has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's or any of the Sub-Funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's or any of the Sub-Funds' ability to continue as a going concern.

#### Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

## Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

## Invesco Global Investment Series (the "Company")

Independent Auditors' Report to the Shareholders of Invesco Global Investment Series (the "Company") continued

## Responsibilities for the financial statements and the audit

#### Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 126, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the Sub-Funds' ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual Sub-Fund, or has no realistic alternative but to do so.

## Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

## Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

### Other required reporting

#### Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

## Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
