## Royal London Cash Plus Fund (Income - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BMNR1F35  
Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The investment objective of the Fund is to produce an attractive level of capital growth and income.

**Policy** The Fund invests in cash, deposits, money market instruments and government bonds with shorter maturities. The Fund may use derivatives, but for efficient portfolio management purposes only. Where relevant, investments will be screened to ensure they meet the Fund's predefined ethical criteria.

**Recommendation** Investors who seek income or a short-term investment option.

### Concepts to understand

**Bonds** Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

**Money market instruments** Investments that pay interest, have a short duration and are designed to maintain a stable value.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

The Fund is ranked in risk category 2 because its unit price has shown a low level of volatility historically. The SRR1 was calculated using some synthetic data and may not be a reliable indication of the future risk profile. As an investment, money market instruments are typically less volatile than bonds and shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Counterparty Risk** Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

*For more about fund risks, see the "Risk Factors" section in the Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))*

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

**Entry charge** 0.00%

**Exit charge** 0.00%

### Charges taken from the fund over a year:

**Ongoing charge** 0.15%

### Charges taken from the fund under specific conditions:

**Performance fee** none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charges figure is based on expenses for the year ending 31 October 2018. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more about charges, see the expenses section in the full Prospectus and supplement ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))

## Past performance

The graph shows fund performance over the past 5 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 22 June 2011 and the share class on 12 June 2014.

The Royal London Cash Plus Fund  
(Income - Class Y Shares) in GBP

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.
