## May Factsheet

Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2019

All other data as at 07-Jun-2019

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss. Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment. Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund. Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

### KEY BENEFITS

- 1 Exposure to the largest economy in the Gulf region.
- 2 Direct investment into large- and mid-cap stocks covering approximately 85% of the Saudi stock market.
- 3 Use as part of a broader equity portfolio to seek growth.

Performance is not shown as the Fund has a performance history of less than 1 year. You should read the Prospectus and the Key Investor Information Document (KIID) for each fund in which you want to invest.

**Key Risks: Important Information:** The value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The value of equities and equity-related securities can be affected by daily stock market movements.

## GLOSSARY

**Total Expense Ratio (TER):** A measure of the total costs associated with managing and operating a fund. The TER consists primarily of the management fee plus other expenses such as trustee, custody, or operating expenses. It is expressed as a percentage of the fund's total net asset value.

**Distribution yield:** The distribution yield represents the ratio of distributed income over the last 12 months to the fund's current Net Asset Value.

**Product Structure:** Indicates whether the fund buys the actual underlying securities in the index (i.e. Physical) or whether the fund gains exposure to those securities by buying derivatives, such as swaps (known as 'Synthetic'). Swaps are a form of contract that promises to provide the return of the security to the fund, but the fund does not hold the actual security. This can introduce a risk that the counterparty defaults on the "promise" or contract.

**Methodology:** Indicates whether the product is holding all index securities in the same weight as the index (replicating) or whether an optimised subset of index securities is used (optimised/sampled) in order to efficiently track index performance.
