The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

M&G Dividend Fund  
a sub-fund of M&G Investment Funds (3)  
Sterling Class I – Accumulation shares ISIN no. GB00B7BX4821  
Managed by M&G Securities Limited

## Objective and investment policy

**Objective:** The fund aims to provide:

- an annual dividend yield higher than that of the FTSE All-Share Index;
- an income distribution that increases every year; and
- a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than that of the FTSE All-Share Index over any five-year period.

**Core investment:** At least 70% of the fund is invested directly in the shares of companies across any sector and of any size that are based, listed or do most of their business, in the UK.

**Other investments:** The fund may also invest in the shares of non-UK companies, other funds (including funds managed by M&G), cash or assets that can be turned into cash quickly.

**Derivatives:** The fund may use derivatives with the aim of reducing risks and costs of managing the fund.

**Strategy in brief:** The fund employs a disciplined approach to investment which concentrates on the analysis and selection of individual companies. The emphasis on dividend yield helps to identify shares that are relatively cheap and to avoid those that are expensive. From the universe of high-yielding stocks, the fund manager identifies companies that are competitive, with a strong business franchise and that have attractive dividend growth prospects.

**Benchmark:** FTSE All-Share Index  
The fund manager makes active investment decisions for the fund. The benchmark is a target which the fund seeks to outperform. The target benchmark is used solely to measure the fund's performance and income objective.

For unhedged share classes, the benchmark is shown in the share class currency.

**Glossary terms**  
*Dividend yield:* Annual income distributed as a percentage of the share price.

**Other information**  
You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.  
In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

## Risk and reward profile

- The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.
- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

### The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 1 August 2019.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs.
