Key risks

The value of equities may go down as well as up in response to the performance of individual companies and general market conditions,

sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
The Sub-Fund is not expected to track the

performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
