M&G Dividend Fund

a sub-fund of M&G Investment Funds (3)

Sterling Class I – Accumulation shares ISIN no. GB00B7BX4821

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide:

- a combination of capital growth and income, net of the ongoing charge figure, that is higher than that of the FTSE All-Share Index over any five-year period;
- an annual dividend yield higher than that of the FTSE All-Share Index; and
- an income distribution that increases every year.

Core investment: At least 70% of the fund is invested directly in the shares of companies, across any sector and of any size, that are based, listed or do most of their business, in the UK.

Other investments: The fund may invest in the shares of non-UK companies, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives: The fund may use derivatives to reduce the risks and costs of managing the fund.

Strategy in brief: The fund employs a disciplined approach to investment which concentrates on the analysis and selection of individual companies. The emphasis on dividend yield helps to identify shares that are relatively cheap and to avoid those that are expensive. From the universe of high-yielding stocks, the fund manager identifies companies that are competitive, with a strong business franchise and that have attractive dividend growth prospects.

Benchmark: FTSE All-Share Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

You can find more information about the objective and investment policy of the fund in the Prospectus.

Risk and reward profile

• The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 5 because its Net Asset Value has shown medium to high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature
