

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

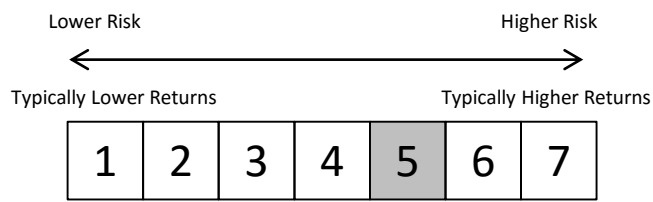

## Margetts International Strategy ‘R’ Acc (ISIN : GB00B8FN1Z15)

This fund is managed by Margetts Fund Management Ltd.

### Objective and Investment Policy

- The fund aims to achieve capital growth over the medium and longer term.
- The fund will invest into a range of funds which primarily have exposure to global equity markets.
- The manager has discretion over the assets held within the fund. As a means of monitoring performance the manager will review performance against the IA (Investment Association) Global benchmark and the FTSE World index.
- The maximum underlying exposure to shares is 100%.
- In the event that the manager believes that significant market falls could occur, the fund may sell investments and hold a high proportion of cash or holdings similar to cash.
- Income arising from the fund will be automatically reinvested and reflected in the price of units.
- You may redeem shares in the fund usually on each business day.
- Derivatives and forward transactions may be used for hedging purposes only. The prices of these instruments can change very quickly and are based on the movement of another asset. Hedging means that they can only be used to reduce the effect of an existing exposure such as currency in order to reduce overall risk.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 6 years.

### Risk and Reward Profile

The following risks may not be fully captured by the risk score:

- The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile.
- The risk and reward score is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The fund is designed with a medium risk investment strategy and is expected to fall to a similar degree as global stock markets during periods of market falls.
- The fund could hold significant cash or near cash weightings. If investment markets generally rose during this period, against the manager’s expectation, then the fund performance would be reduced.
- The fund is actively managed and the manager will use its skill and judgement to identify investments which offer value. There is no guarantee that the manager will be successful.
- The fund may be exposed to currencies other than the base currency and is subject to currency fluctuations which could result in losses to the fund.

## Charges for this fund
