DISTRIBUTION YIELD (AS AT 31 MAY 2019)

Share class	Yield
Sterling W (Inc.)	7.63%

Distribution yield reflects the amounts that a fund may be expected to distribute over the forthcoming twelve months as a percentage of the fund's current price as at the date shown. Distribution yield is based on a snapshot of the portfolio as at the date shown. It does not include the impact of any initial charge and investors may be subject to tax on distributions.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- Emerging Markets have additional risks due to less-developed market practices.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- Certain share classes are denominated in a different currency from the base currency (i.e. the reporting currency) of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- Certain share classes use techniques to try to reduce the effects of changes in the exchange rate between the share class currency and the base currency of the Fund. These techniques may not eliminate all the currency risk.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

The fund can invest 35% of net assets in different Transferable Securities and Money Market Instruments issued or guaranteed by any EU Member State, its local authorities, non-EU Member States or public international bodies of which one or more EU Member States are members.

Before subscribing, investors should read the most recent Prospectus, financial reports and KIID for each fund in which they want to invest. Go to www.bnymellonim.com
