Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with distributions reinvested, if any. Sales charges, taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Exchange rate movements between the share class currency and the fund base currency may affect returns.

MSCI Index returns are shown with net dividends reinvested.

Index returns are calculated in US Dollars and converted to GBP using an exchange rate determined by an independent third party.

The indicative benchmark of the fund is not a formal benchmark but is shown for comparison purposes.

Risks - The following risks are materially relevant to the fund (refer to prospectus for further details):

Country risk (China) - all investments in China are subject to risks similar to those for other emerging markets investments. In addition, investments that are purchased or held in connection with a QFII licence or the Stock Connect program may be subject to additional risks. **Currency risk** - changes in currency exchange rates could reduce investment gains or increase investment losses. **Emerging markets risk** - emerging markets are less established than developed markets and therefore involve higher risks. **Issuer concentration risk** - to the extent that a fund invests a large portion of its assets in securities from a relatively small number of issuers, its performance will be more strongly affected by events affecting those issuers. **Small and mid-cap risk** - stocks of small and mid-size companies can be more volatile than stocks of larger companies. **Volatility risk** - the performance of the fund has a risk of high volatility.
