Past performance is not a guide to future returns. Source: Invesco, Bloomberg L.P., FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in EUR. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee. For share classes with fewer than five 12 month periods since launch, performance data does not exist for some of the periods covered in the standardised 12 month performance table.

¹EURO iSTOXX High Dividend Low Volatility Index NR, the benchmark index aims to screen all securities from the broad EURO STOXX® Index for their 12 month historical dividend yield and their 12 month historical volatility. The top 75 stocks with the highest 12 month dividend yield are selected, with a maximum of 10 stocks per country. All eligible securities are then ranked according to their 12 month historical volatility in ascending order. The top 50 securities with the lowest realised volatility form the benchmark index. The constituents are weighted according to their 12 month historical dividend yield and a cap of 3% per constituent is applied. At each rebalancing, modifications are made to stock weights, which ensures as well diversification across individual stocks and sectors.

Top ETF holdings (%)		(Total holdings: 50)
Name	Weight	
Telefonica Deutschland	3.80	
Aegon N.V.	3.49	
Christian Dior	3.12	
Daimler	3.07

Investment risk

The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.

Important information

This document contains information that is for discussion purposes only, and is intended for investors in the UK and Ireland only.

All investment decisions must be based only on the most up to date legal offering documents. The legal offering documents (fund and share class specific Key Investor Information Document (KIID), prospectus, annual & semi-annual reports, articles) are available free of charge on our website etf.invesco.com and from the issuers or relevant information agent.

This document is marketing material and is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication.

This document should not be considered financial advice. Persons interested in acquiring the product should inform themselves as to (i) the legal requirements in the countries of their nationality, residence, ordinary residence or domicile; (ii) any foreign exchange controls and (iii) any relevant tax consequences.

Any calculations and charts set out herein are indicative only, make certain assumptions and no guarantee is given that future performance or results will reflect the information herein. For details on fees and other charges, please consult the prospectus, the KIID and the supplement of each product.

Please note there is no guarantee the targets will be achieved.

UCITS ETF's units / shares purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units / shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units / shares and may receive less than the current net asset value when selling them.

Glossary

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Ongoing charge: is based on annualised expenses. It excludes portfolio transaction costs.

Hedged: Foreign exchange forward contracts are used to hedge asset classes, i.e., to protect them against currency fluctuations. The objective is to achieve a performance that is just as great as the performance of the underlying currency.

Replication Method: Strategy employed by the fund to achieve its objective. Physical funds invest directly in constituents of the benchmark index

UCITS: An abbreviation for "Undertakings for Collective Investment in Transferable Securities". In a European legal context, these are investment funds that invest in legally defined types of securities and other financial instruments (securities funds).

UK Reporting Status: Indicates whether or not the fund has United Kingdom fund tax status, this can lead to a UK investor receiving favourable tax rates on any gain or disposal of holdings in the fund

ISA: Individual Savings Account. A type of investment account in the UK in which the tax on income is lower than usual, and there is no tax on profits made from an increase in the value of shares

SIPP: Self-Invested Pension Plan. A type of UK pension for which a person makes their own investment decisions

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

Preferred securities: A term used in the US for shares that are given precedence over other shares.
