Managing Risk in the Fund

The SVS Cornelian Cautious Fund is managed within Cornelian risk level B on a risk scale of A to E (with A being the lowest and E being the highest risk). The Fund is one of a range of funds designed to achieve their RPI+ objectives whilst each being managed below an upper expected risk limit. This upper expected risk limit is expressed using the upper expected volatility of the Fund calculated by an independent third party and is based on the historical volatility of the asset classes held in the Fund. The upper expected volatility limit may change from time to time. The Fund's upper expected volatility is not the same as the Fund's actual (or historic) share price volatility.
