

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Merian Global Equity Income Fund (IRL) R (GBP) Accumulation Shares (IE00BYM83B10)

A sub fund of Merian Global Investors Series Plc. Managed by Merian Global Investors (UK) Limited

OBJECTIVES AND INVESTMENT POLICY

Objective: a total return comprised of income and capital growth by investing in shares (i.e. equities) of companies listed or located throughout the world.

Policy: the Fund will invest at least 70% in company shares and similar investments listed or located anywhere in the world. This may include emerging markets.

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns and reducing the overall costs and/or risks of the Fund.

Portfolio construction is driven by systematic analysis of companies against several distinct characteristics including stock price valuation, balance sheet quality, growth characteristics, efficient use of capital, analyst sentiment and supportive market trends to identify attractively priced investment opportunities.

The Fund will look to invest in companies that produce regular cash flows through dividends (dividends are the proportion of company profits paid out to shareholders) and with good prospects for growth to deliver positive total returns.

The MSCI ACWI with net dividends re-invested is a point of reference against which the performance of the Fund may be measured. The Fund is managed having regard to the Index; however the Fund does not track the Index.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can buy and sell shares on business days where retail banks are open for business in Dublin and London (excluding Saturdays, Sundays and public holidays).

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards Typically higher rewards

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 5 have in the past shown moderately high volatility. With a fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.

Currency risk - the Fund is denominated in US Dollars but holds assets denominated in other currencies. This share class is denominated in British Pounds. The value of your shares may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the Fund uses derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

CHARGES

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
<i>This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.</i>	
Charges taken from the Fund over a year	
Ongoing charge	1.20%
Charges taken from the Fund under specific conditions	
Performance fee	None

The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.

The ongoing charges figure is an estimate based on the expected total charges as the figure based on last year's expenses is no longer representative. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking and may vary from year to year.

It is not the intention for a switching charge (2.50%) to apply but the Fund reserves the right to impose a switching charge in the future.

You can find out more details about the charges by looking at the *Fees and Expenses* section of the prospectus.

PAST PERFORMANCE

■ R (GBP) Accumulation Shares

■ MSCI ACWI with net dividends re-invested

Past performance is not a guide to future performance.

The past performance shown does not take into account any entry or exit charges but does take into account the ongoing charge, as shown in the Charges section.

The value of the class is calculated in British Pounds. The Index is in British Pounds.

The Fund launched on 31 July 2015. This class started to issue shares on 31 July 2015.

PRACTICAL INFORMATION

The Fund's assets are held with its depositary, Citi Depositary Services Ireland Designated Activity Company.
