^{*} These collectively comprise the Authorised Corporate Director's Report.

Report of the Authorised Corporate Director (the "Manager")

The Company

The Invesco Smaller Companies and Markets Investment Series is an investment company with variable capital, incorporated in England and Wales on 8 May 2003.

The Company is a "UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 July 2019, the Company consisted of six Funds:

Invesco Emerging European Fund (UK) Invesco European Smaller Companies Fund (UK) Invesco Global Emerging Markets Fund (UK) Invesco Global Smaller Companies Fund (UK) Invesco Japanese Smaller Companies Fund (UK) Invesco UK Smaller Companies Equity Fund (UK)

Accounting Periods

Annual accounting date 31 July Interim accounting date 31 January Distribution payable on 30 September

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Securities Financing Transactions Regulation

This Regulation requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

During the year from 1 August 2018 to 31 July 2019, none of the Funds entered into any SFTs and/or TRS. Should this change in the future, the interim and annual reports for the Company will disclose all required information on the use of SFTs and TRS by the Company.

Please refer to the Prospectus for further details on SFTs and TRS.

Fund Name Changes

Effective 1 October 2018, the Manager has renamed the range of UK domiciled ICVC funds it operates. The move to a unified global brand – Invesco – causes "Invesco Perpetual" products to now be referred to as "Invesco" products. To implement this, each of the ICVC Series managed by the Manager, including the Company, have been renamed to remove the word "Perpetual". Each of the Funds within each Company has been renamed to remove the word "Perpetual" and to add the suffix "(UK)". The suffix "(UK)" only relates to the domicile of the Fund and is unrelated to their investment strategy.

Fund Events

On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk. The objectives currently shown within these financial statements are those objectives that were in place as at 31 July 2019.

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2018, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invesco.co.uk). Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UCITS related activities of the Manager in respect of performance year (1 January 2018 to 31 December 2018) is £76.21m of which £44.70m is fixed remuneration and £31.51m is variable remuneration. The number of beneficiaries is 379.

Report of the Authorised Corporate Director (the "Manager")

Remuneration Policy (Unaudited) continued The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UCITS it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration

takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UCITS related activities for the performance year (1 January 2018 to 31 December 2018) is £18.62m of which £4.16m is paid to Senior Management and £14.46m is paid to other Identified Staff.

The prices of shares will appear on our website (www.invesco.co.uk). This is the primary method of price publication. The prices of shares may also be obtained by calling 0800 085 8677 during the Manager's normal business hours.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The Funds may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Funds. The Manager, however, will ensure that the use of derivatives within the Funds does not materially alter the overall risk profile of the Funds.

The Invesco Emerging European Fund (UK) and the Invesco Global Emerging Markets Fund (UK) invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise. The Invesco Global Emerging Markets Fund (UK) and the Invesco Global Smaller Companies Fund (UK) may invest to a limited extent in certain securities listed in China, which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the Fund. The Invesco Emerging European Fund (UK) will invest directly in Russia, which can involve significant risks to capital. Although the Invesco Emerging European Fund (UK) does not actively pursue a concentrated portfolio, it may have a concentrated number of holdings on occasions. Accordingly, the Fund may carry a higher degree of risk than a Fund which invests in a broader range of companies or takes smaller positions in a relatively large number of holdings. Although the Invesco Global Smaller Companies Fund (UK) invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise. The performance of the Invesco Emerging European Fund (UK), Invesco European Smaller Companies Fund (UK), Invesco Global Emerging Markets Fund (UK), Invesco Global Smaller Companies Fund (UK) and Invesco Japanese Smaller Companies Fund (UK) may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

Report of the Authorised Corporate Director (the "Manager")

Risk Profile continued

The Invesco European Smaller Companies Fund (UK), Invesco Global Smaller Companies Fund (UK), Invesco Japanese Smaller Companies Fund (UK) and Invesco UK Smaller Companies Equity Fund (UK) invests in smaller companies which may result in a higher level of risk then a fund that invests in larger companies. Securities of smaller companies may be subject to abrupt price movements and may be less liquid, which may mean they are not easy to buy or sell.

All risks are contained within the Prospectus.

Brexit

On 31 October 2019 the UK is due to leave the EU, an event commonly referred to as Brexit. The current exit date may be shortened or extended upon agreement between the UK and EU27. At the date of this report, discussions remain ongoing between the UK and EU27 as to the precise nature of the future relationship. It is unclear at this stage whether a withdrawal agreement will be reached or if the UK will leave the EU under a no-deal scenario. The Authorised Corporate Director does not believe that Brexit under any of these scenarios will present significant issues that cannot be mitigated given that no Fund is passported into Europe, Shareholders are predominantly UK-based and core counterparties of and service providers to the Company have contingency arrangements available as necessary to ensure that activities can continue with minimal disruption. In addition, on 30 January 2019, EU27 national regulators and the UK's Financial Conduct Authority agreed Memoranda of Understanding in the event of a no-deal Brexit scenario on various matters related to the conduct of financial services and trading activities.

The Company's Manager, Invesco Fund Managers Limited "IFML", is part of a global group and has been committed for many years to meeting clients' needs across Europe in both EU and non-EU countries. The change in the UK's status from an EU to a non-EU country will not change the group's focus or commitment to serve its clients across Europe. IFML is monitoring developments closely, through a Brexit Steering Committee, and will take advantage of the Memoranda of Understanding to ensure that the impact on clients and the Company is minimal.

Holdings in other Funds of the Company

As at 31 July 2019, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Certification of the Annual Report by the Manager In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

1	2	3	4	5	6	7		

The risk category for this Fund changed from 5 to 6 on 30 April 2019.

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invesco.co.uk or by contacting us.

Notes applicable to the financial statements of all Funds

1 Accounting Policies

a) Basis of preparation

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014.

b) Recognition of revenue

- i) Dividends on quoted ordinary shares, collective investment schemes and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared.
- ii) Interest on bank balances and deposits is recognised on an accruals basis.
- iii) Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flows on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these securities and dealt with as part of the revenue of the Company.
- iv) All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits.

c) Stock dividends

Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital.

d) Special dividends and share buy-backs

The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Company's distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount.

e) Underwriting commission

Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Company is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares.

f) Expenses

All expenses, except for those relating to the purchase and sale of investments, are charged initially against revenue and are accounted for on an accruals basis.

g) Revenue allocation to share classes

Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class.

h) Measurement basis

The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities.

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

i) Basis of valuation of investments

All investments are valued at their fair value as at the balance sheet date.

All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments.

j) Exchange rates

Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the period. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions.

k) Taxation and deferred taxation

Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset. Overseas capital gains tax is accounted for on a cash basis.

I) Efficient portfolio management

Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in 'Revenue' or 'Expenses' in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in 'Net capital gains/losses' in the Statement of Total Return. Any positions on such transactions open at the year end are reflected in the Balance Sheet at their marked to market value.

m) Dilution adjustment

The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Funds in the Invesco Smaller Companies and Markets Investment Series:

- where over a dealing period a Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Fund in question (as calculated at the last valuation point); or
- where the Manager considers it necessary to protect the interests of the Shareholders of the Company.

On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Fund which may otherwise constrain the future growth of the Fund in question.

Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Fund and an indication of the frequency of application of such adjustments.

2 Distribution Policies

The Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Company's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Fund accumulations and distributions are paid as dividend distributions.

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Fund.

Notes applicable to the financial statements of all Funds

3 Dealing Charges and Research Payments

The cost of the execution service provided by brokers may be included as part of the spread between the bid and offer price or paid through a separate dealing commission. Dealing commissions are used in the equity securities market, whilst the fixed income market includes the cost of execution in the spread. Prior to 3 January 2018, it was market practice for investment managers to enter into dealing commission arrangements under which as well as paying for execution, part of the commission would be used to pay for research services. This was in accordance with regulation.

The European Union legal framework governing financial markets, known as the Markets in Financial Instruments Directive (MiFID I), has been replaced by a revised Directive (the recast MiFID) and new Regulation (MiFIR) - referred to together as MiFID II. MiFID II became effective on 3 January 2018. MiFID II changes the way investment managers operate their businesses. In particular, under MiFID II firms can either pay for research material/services out of their own resources or from a separate research payment account (RPA). From 3 January 2018, the Manager, the Investment Adviser and any sub-adviser pay for all external research materials/services procured for the Funds out of their own resources across equity, fixed income, derivatives and currency securities. They do not operate a RPA.

4 Shareholders' Funds

The Manager's entry charge and Fund Management Fee (FMF) are as follows:

		Entry Charge %	Fund Management Fee %

Each share class has the same rights on a winding up of the Company.

Notes applicable to the financial statements of all Funds

5 Generic Risk Factors

In pursuing their investment objectives, the Funds of the Company hold a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from its operations.

Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Funds' holding of financial instruments are set out below together with the Manager's policy for managing these risks.

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Fund concerned. Transactions in derivatives are used in the Funds for efficient portfolio management and investment purposes. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of the Fund.

Market price risk

The Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such, the prices of and the income generated by the Funds' securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Currency exchange risk

The Funds may invest in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Custody risk

The assets owned by each Fund are held on trust for the Fund by a custodian that is also regulated by the Financial Conduct Authority. The Financial Conduct Authority requires that the custodian ensures that there is legal separation of non-cash assets held under custody and that records are maintained that clearly identify the nature and amount of all assets under custody, the ownership of each asset and where the documents of title to that asset are located. In case of a potential bankruptcy of the custodian, cash positions in the Funds are not protected and there may be a delay in regaining full control of the non-cash assets.

Liquidity risk

The Funds may be affected by a decrease in market liquidity for the securities in which it invests, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner.

In order to mitigate this risk, a substantial proportion of the Funds' assets consist of readily realisable assets.

Counterparty risk

The Funds may enter into derivatives transactions or place cash in bank deposit accounts, which would expose the Funds to the credit of its counterparties and their ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Funds could experience delays in liquidating positions and significant losses, including declines in the value of investments during the period in which the Funds seek to enforce its rights, inability to realise any gains on its investments during such period and fees and expenses incurred in enforcing its rights.

In order to mitigate this risk, the Funds conduct trades through reputable counterparties.

Notes applicable to the financial statements of all Funds

5 Generic Risk Factors continued

Investing in a Concentrated Portfolio

Certain Funds may have concentrated portfolios (holding a limited number of investments and/or large positions in relatively small number of stocks). If one or more of those investments decline or are otherwise adversely affected, it may have a more pronounced effect on the Fund's net asset value than if a larger number of investments were held or if the Fund had fewer larger positions. Accordingly they may carry a higher degree of risk and NAV volatility than a Fund which invests in a broad range of companies and/or does not take large positions in a relatively small number of stocks.

Investment in Emerging Markets

Investments in emerging markets may be more volatile than investments in more developed markets. Some of these markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well developed regulatory systems and disclosure standards may be less stringent than those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed markets. The following is a brief summary of some of the more common risks associated with emerging markets investment:

Lack of Liquidity

The acquisition and disposal of securities may be more expensive, time consuming and generally more difficult than in more developed markets. Many emerging markets are small, have low trading volumes, low liquidity and significant price volatility.

Settlement and Custody Risks

Settlement and custody systems in emerging markets are not as well developed as those in developed markets. Standards may not be as high and supervisory and regulatory authorities not as sophisticated. As a result there may be a risk that settlement could be delayed and that cash or securities could be disadvantaged.

Investment and Remittance Restrictions

In some cases, emerging markets may restrict the access of foreign investors to securities. As a result, certain equity securities may not always be available to a Fund because the maximum permitted number of or investment by foreign Shareholders has been reached. In addition, the outward remittance by foreign investors of their share of net profits, capital and dividends may be restricted or require governmental approval and there can be no guarantee that additional restrictions will not be imposed.

Accounting

Accounting, auditing and financial reporting standards, practices and disclosure requirements applicable to companies in emerging markets differ from those applicable in more developed markets in respect of the nature, quality and timeliness of the information disclosed to investors and, accordingly, investment possibilities may be difficult to properly assess.

Investment in Smaller Companies

Funds investing in smaller companies invest in transferable securities which may be less liquid than the securities of larger companies, as a result of inadequate trading volume or restrictions on trading. Securities in smaller companies may possess greater potential for capital appreciation, but also involve risks, such as limited product lines, markets and financial or managerial resources and trading in such securities may be subject to more abrupt price movements than trading in the securities of larger companies.

Notes applicable to the financial statements of all Funds

5 Generic Risk Factors continued

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk (VaR) for the assessment of the global exposure of each Fund.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Fund is compared to that of a benchmark or reference portfolio. With this approach the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) ("ESMA Guidelines").

The Absolute VaR of a UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the (VaR of the UCITS)/(2* VaR of the reference portfolio) is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%:
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of two years;
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

5 Generic Risk Factors continued

Calculation methods of the Risk Exposure continued

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The table below details the VaR approach for each Fund and, for those Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 31 July 2019, as well as the daily average level of leverage for each Fund during the one year period ending 31 July 2019.

6 Investment Objective and Policy

The investment objective and policy of each Fund can be found on:

Invesco Emerging European Fund (UK)	page 16
Invesco European Smaller Companies Fund (UK)	page 34
Invesco Global Emerging Markets Fund (UK)	page 53
Invesco Global Smaller Companies Fund (UK)	page 72
Invesco Japanese Smaller Companies Fund (UK)	page 98
Invesco UK Smaller Companies Equity Fund (UK)	page 113

The Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Fund's investment objective, to fund redemptions of shares in that Fund, for the efficient management of the Fund in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Fund. They may also borrow, provided such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

7 Base Currency

The base currency of the Company is Sterling and is taken to be the 'functional currency' of the Company.

8 Bank Balances and Overdrafts

Bank balances and overdrafts are held by the Custodian, and are subject to the Custodian's variable credit and debit interest rates respectively.

9 Borrowings

The borrowing facilities available to the Company as at 31 July 2019 comprise a bank overdraft facility of up to 10% of the value of the Company (31 July 2018 - 10%).

Investment report for the year

The Investment Objective and Policy of the Invesco Emerging European Fund (UK)

The Fund aims to achieve long-term capital growth from investment primarily in shares of companies in emerging European countries, which includes Russia. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Emerging European Fund changed its name to Invesco Emerging European Fund (UK) effective 1 October 2018. The Fund objective and strategy remain unchanged at this time. On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk. The objectives currently shown within these financial statements are those objectives that were in place as at 31 July 2019.

MSCI Emerging Markets Eastern Europe Index NR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

² Reference benchmark for performance comparison purposes only.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Investment report for the year

Strategy, review and outlook

The Fund increased by 18.4% over the twelve months to the end of July 2019, compared to a 22.8% gain in the benchmark MSCI Emerging Markets Eastern Europe Index NR¹.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. MSCI Emerging Markets Eastern Europe Index NR¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Emerging European equity markets registered healthy gains over the review period. The biggest driver of Fund performance came from our holdings in Russian oil and gas companies with Gazprom, Novatek and LUKOIL being our largest stock contributors. Banking stocks led by Sberbank of Russia also did reasonably well along with metal and mining companies such as MMC Norilsk Nickel. Outside of Russia, Greece and Hungary contributed positively although positions held in Turkey and Poland detracted from performance.

Relative returns to the benchmark's significant strength were a result of the index's concentration in the Russian energy sector. In contrast, the Fund seeks to diversify risk by investing across a wider variety of emerging countries in the region, including Turkey, Israel and Kazakhstan. We believe the different growth drivers and factor exposures from investing in these countries will provide a better risk-adjusted return for investors in the long run.

We believe the region of emerging Europe is home to some well-run and cash generative companies with strong earnings potential, operating in markets that are underpinned by the growing affluence of a widening consumer base.

Our largest country exposure is in Russia, where equity valuations remain cheap in historical terms in our view, trading below their long-term averages, as measured by traditional metrics such as price-to-book and price earnings ratios. Earnings estimate revisions continue to be positive and the country has healthy fiscal balances. Russia also offers the best dividend yield of any major emerging market country. After being in the works for several months the US administration finally announced fresh sanctions on Russia during July. These were less severe and narrower in scope than widely expected.

The Fund also has significant investments in Poland but not in local banks. This is on the grounds that their valuations are too demanding when taking into account the competitive nature of the domestic market, which compresses bank margins and limits profitability in our view. Instead, we selectively invest in businesses that are more exposed to the country's strong economic growth, for example retailers.

From a sector perspective the Fund is tilted towards industrials, real estate as well as consumer-related stocks. The Fund maintains significant exposure to financials and energy companies, which together comprise more than half of the portfolio, though these two sectors represent our largest underweight positions versus the benchmark.

Income shares (No Trail) Change in net assets per share Opening net asset value per share Return before operating charges* Operating charges Return after operating charges Distributions Retained distributions on accumulation shares Closing net asset value per share *After direct transaction costs of Performance Return after charges Other information Closing net asset value (£'000) Closing number of shares Operating charges Direct transaction costs Performance fee	(pence per share) 100.92 17.74 (1.44) 16.30 (4.50) - 112.72 (0.05) 16.15% 7 6,468 1.42%	(pence per share) 92.33 12.85 (1.44) 11.41 (2.82) - 100.92 (0.07) 12.36% 22 21,354 1.42%	(pence per share) 74.35 21.60 (1.27) 20.33 (2.35) - 92.33 (0.15) 27.34% 19 20,636 1.42%

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

Notes to the financial statements

5	Interest payable and similar charges	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
	erest	1	_

6 Taxation	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
a) Analysis of charge for the year		
Corporation tax	62	-
Deferred tax	26	_
Double taxation relief	(62)	-
Overseas tax	156	124
Total tax charge	182	124

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2018 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Net revenue before taxation	1,440	1,342
Corporation tax at 20% (2018 - 20%)	288	268
Effects of: Double taxation relief Movement in excess expenses Overseas tax ¹ Relief for overseas tax treated as an expense Revenue not subject to tax	(88) (76) 156 6 (104)	(116) 124 (27) (125)
Total tax charge	182	124

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Deferred tax charge	26	-
Deferred tax at the end of the year	26	_

At the year end there is no potential deferred tax asset (2018 - £78,000) due to no losses (2018 - £391,000). Accordingly, no tax assets have been recognised (2018 - Nil).

7 Distributions	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Accumulations and distributions payable 30 September 2019	988	1,206
Amounts deducted on redemption of shares	426	116
Amounts received on issue of shares	(156)	(104)
	1,258	1,218
The distributable amount has been calculated as follows:		
Net revenue after taxation	1,258	1,218
	1,258	1,218

Notes to the financial statements

8 Debtors	31.7.19 £'000	31.7.18 £'000
Accrued revenue	272	354
Amounts receivable for issue of shares	58	113
Overseas tax recoverable	64	53
	394	520

-	Cash and bank balances	31.7.19 £'000	31.7.18 £'000
	h and bank balances	56	609

10 Other creditors	31.7.19 £'000	31.7.18 £'000
Accrued expenses	32	54
Amounts payable for redemption of shares	86	107
Deferred taxation	26	_
	144	161

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2018 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 10 of the notes applicable to the financial statements of all Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £32,000 (2018 - £54,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As the Fund invests in emerging and developing markets, investors should be prepared to accept a higher degree of risk than for a Fund with a broader investment mandate as there is the potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise. The Fund has a large exposure to Russia, which can involve significant risks to capital as a result from current or potential economic sanctions from the US or the EU, in addition to other risks associated with emerging and developing markets. As the Fund has a concentrated number of holdings, investors should be prepared to accept higher risks.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 09 to 13.

a) Counterparty risk

The Fund was not exposed to any counterparty risk as at the balance sheet date (2018 - Nil).

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.19		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	25,741	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	25,741	-
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	43,963	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	43,963	-

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

1 /	Double	transaction

Notes to the financial statements

14 Portfolio transaction costs continued for the year 1 August 2017 to 31 July 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	11,373	14	0.12	5	0.04
Total purchases	11,373	14		5	
Total purchases including transaction costs	11,392				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	8,901	11	0.12	-	0.00
Total sales	8,901	11		-	
Total sales net of transaction costs	8,890				
Derivative transaction costs		-		-	
Total transaction costs		25		5	
Total transaction costs as a % of average net assets		0.06%		0.01%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.15% (2018 - 0.16%).

Y Income shares Group 1 Group 2	12.8658 9.3215	- 3.5443	12.8658 12.8658	8.2506 8.2506

Group 1: shares purchased prior to 1 August 2018

Group 2: shares purchased on or after 1 August 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco European Smaller Companies Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco European Smaller Companies Fund (UK)

The Fund aims to achieve capital growth through a portfolio of investments primarily in smaller European companies, excluding the United Kingdom. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual European Smaller Companies Fund changed its name to Invesco European Smaller Companies Fund (UK) effective 1 October 2018. The Fund objective and strategy remain unchanged at this time. On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk. The objectives currently shown within these financial statements are those objectives that were in place as at 31 July 2019.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 37 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 37 is based on the close of business bid price. EMIX Smaller European Companies Ex UK Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² Reference benchmark for performance comparison purposes only.

Invesco European Smaller Companies Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -8.9% in the twelve months ending 31 July 2019, while the EMIX Smaller European Companies Ex UK Index TR¹ benchmark returned -1.2%, and the IA European Smaller Companies Sector NR averaged a return of -2.8%, placing the Fund in the fourth quartile of its peer group.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. EMIX Smaller European Companies Ex UK Index TR¹ source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

So why has performance been poor over the period?

Firstly, we have had a few key holdings perform poorly - Energy stocks (e.g. Borr Drilling, Golar, Wentworth Resources) in particular have detracted most. Falling oil prices over the period led to a sell-off in related names making Energy one of the worst performing sectors in the market. Given the sector makes up approximately a quarter of the Fund, this has been a significant drag to performance.

Other notable underperformers include; Biom'Up, a biotech firm specialising in developing and manufacturing medical devices; AMG Advanced Metallurgical, specialty metals producer; Basware, a cloud-software company. Despite some of the short-term headwinds that these companies have faced, we remain confident in the long-term prospects.

Secondly, taking their lead from bond markets, most equity investors have only been interested in what they perceive to be "safety", i.e. high quality/growth companies and sectors with low volatility of earnings and strong balance sheets - in short, those companies not correlated with the economy. We have chosen - for valuation reasons - to tilt our portfolio towards cyclical companies (companies whose performance is more closely linked to the business cycle) as this is where we are finding the most attractive valuations. This has been unfavourable in the current climate where uncertainty and fear (Brexit, US-China trade wars, recession fears, etc.) have been the driving force in investor sentiment.

Our conviction remains extremely high that following a valuation discipline is the best way to control long-term risk for our clients. As doubt in the market seems to reflect excessive fear rather than reality, we must ask ourselves what constitutes true investment risk? If assets perceived to be 'low risk' are trading at all time high relative valuations, are they really 'defensive'? Equally, if cyclical stocks are trading at historically low valuations, does that constitute risk or opportunity?

Our investment approach is based on individual stock picking and driven by valuation. We continue to look for robust businesses that can withstand any volatility in global activity levels and possess strong fundamentals. We favour companies which have good growth prospects and have what we view as competitive advantages relative to peers. Many of the companies we hold in the Fund are considered to be disruptive and innovative in their sectors, offering an attractiveness which is not priced into valuations in our view.

Adrian Bignell, Fund Manager

Total expenses

Notes to the financial statements

5	Interest payable and similar charges	01.8.18	01.8.17
		to 31.7.19	to 31.7.18
		£'000	£'000
Inte	erest	1	1

6 Taxation	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
a) Analysis of charge for the year		
Overseas tax	114	132
Total tax charge	114	132

There is no corporation tax charge for the year (2018 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2018 -lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Net revenue before taxation	749	926
Corporation tax at 20% (2018 - 20%)	150	185
Effects of:		
Movement in excess expenses	397	509
Overseas tax ¹	114	132
Relief for overseas tax treated as an expense	(8)	(6)
Revenue not subject to tax	(539)	(688)
Total tax charge	114	132

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £34,421,000 (2018 - £32,436,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £6,884,000 (2018 - £6,487,000) has not been recognised.

7 Distributions	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Accumulations and distributions paid 30 September 2019	636	802
Amounts deducted on redemption of shares	7	(8)
Amounts received on issue of shares	(2)	5
	641	799
The distributable amount has been calculated as follows:		
Net revenue after taxation	635	794
Equalisation on conversions	6	5
	641	799

Notes to the financial statements

8 Debtors	31.7.19 £'000	31.7.18 £'000

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2018 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 10 of the notes applicable to the financial statements of all Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £177,000 (2018 - £223,000) are disclosed in note 10 within accrued expenses.

Notes to the financial statements

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than funds that can invest in larger company sizes. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to buy or sell securities.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 09 to 13.

a) Counterparty risk

The Fund was not exposed to any counterparty risk as at the balance sheet date (2018 - Nil).

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

Derivative transaction costs		19		-	
Total transaction costs		194		42	
Total transaction costs as a % of average net assets		0.10%		0.02%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.46% (2018 - 0.60%).

Invesco European Smaller Companies Fund (UK)Distribution table

Distribution table

for the year 1 August 2018 to 31 July 2019

Distribution paid 30 September 2019	Net revenue pence per share	Equalisation pence per share	Net distribution paid 30.9.19 pence per share	Net distribution paid 30.9.18 pence per shares
Accumulation shares Group 1 Group 2	0.5428	-	0.5428	0.6074
	0.5428	0.0000	0.5428	0.6074
Accumulation shares (No Trail) Group 1 Group 2	2.1616	-	2.1616	2.3850
	1.8347	0.3269	2.1616	2.3850
Z Accumulation shares Group 1 Group 2	4.2922	-	4.2922	4.7197
	2.9676	1.3246	4.2922	4.7197
Y Accumulation shares Group 1 Group 2	2.8165 2.0427	- 0.7738	2.8165 2.8165	3.0933 3.0933

Group 1: shares purchased prior to 1 August 2018 Group 2: shares purchased on or after 1 August 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco Global Emerging Markets Fund (UK)

The Fund aims to achieve capital growth primarily through a portfolio of shares in companies established and/or operating in countries where, in the opinion of the Manager, there is an emerging market. Exposure to such markets will partially be obtained through indirect investment in securities traded on other markets. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Global Emerging Markets Fund changed its name to Invesco Global Emerging Markets Fund (UK) effective 1 October 2018. The Fund objective and strategy remain unchanged at this time. On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk. The objectives currently shown within these financial statements are those objectives that were in place as at 31 July 2019.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 56 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 56 is based on the close of business bid price. MSCI Emerging Markets Index NR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² Reference benchmark for performance comparison purposes only.

Investment report for the year

Strategy, review and outlook

The Fund increased by 3.9% over the twelve months to the end of July 2019, compared to a 4.8% gain for the benchmark MSCI Emerging Markets Index TR¹. This placed the Fund in the fourth quartile of its peer group, the IA Global Emerging Markets Sector NR, which rose by an average of 7.7%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. MSCI Emerging Markets Index NR¹ source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Our holdings in India and Russia drove absolute performance with Brazil and Taiwan other notable contributors. Financials, especially banks, and technology stocks generated healthy returns. By contrast, our holdings in communication services detracted from performance. From a stock perspective, India's ICICI Bank, Banco do Brasil and Taiwan's MediaTek were our largest contributors.

Relative performance was held back by the disappointing returns generated by a couple of our Chinese holdings; Baidu and non-index stock BitAuto. However, some of this impact was negated by favourable stock selection in India and having an overweight position in Russia versus its benchmark weighting.

Trade dissonance and a murkier global growth outlook are providing fresh challenges for equity markets. While trade talks are set to resume between the US and China, uncertainty over tariffs and future trading relationships look likely to persist for the foreseeable future. With forward-looking indicators in many countries showing signs of weakening, several central banks have cut interest rates.

To ensure growth stability, we believe that the People's Bank of China has scope to ease monetary policy on an incremental basis in 2019. However, there is a risk that trade tensions could spill over into deeper aspects of China's bilateral relationship with the US. This uncertainty could prompt the authorities in China to further support economic activity.

We seek to invest in companies whose share prices are substantially below our estimate of fair value. We continue to look for new ideas in unloved areas of the market. While there is continuing uncertainty over trade tensions and the strength of the global economy, Asia remains the biggest driver of global growth, with solid economic and corporate fundamentals. We believe there is an impressive trend of greater capital discipline being displayed by companies across the region and that balance sheets on the whole remain strong.

In terms of Fund positioning we favour financials and technology stocks. We have exposure to banks across several countries, including India, Russia and Korea but are underweight financials in China. In the latter we are tilted more towards companies in the communication services sector, for example NetEase and Baidu.

William Lam and Ian Hargreaves, Fund Managers

Where William Lam and Ian Hargreaves have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

Effective 31 December 2018, William Lam and lan Hargreaves became joint-managers of the Fund.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

Notes to the financial statements

5	Interest payable and similar charges	01.8.18	01.8.17
		to 31.7.19	to 31.7.18
		£'000	£'000
Inte	erest	3	1

6 Taxation	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
a) Analysis of charge for the year Indian capital gains tax Overseas tax	103 829	- 998
Total tax charge	932	998

There is no corporation tax charge for the year (2018 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2018 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Net revenue before taxation	4,616	4,624
Corporation tax at 20% (2018 - 20%)	923	925
Effects of: Indian capital gains tax Movement in excess expenses Overseas tax ¹ Relief for overseas tax treated as an expense Revenue not subject to tax	103 448 829 (36) (1,335)	- 681 998 (29) (1,577)
Total tax charge	932	998

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £20,073,000 (2018 - £17,839,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £4,015,000 (2018 - £3,567,000) has not been recognised.

7 Distributions	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Accumulations and distributions paid 30 September 2019 Amounts deducted on redemption of shares Amounts received on issue of shares	3,323 660 (196)	3,713 98 (185)
	3,787	3,626
The distributable amount has been calculated as follows: Net revenue after taxation Indian capital gains tax	3,684 103	3,626
	3,787	3,626

Notes to the financial statements

8 Debtors	31.7.19 £'000	31.7.18 £′000

Amounts payable for redemption of shares	838	171
Foreign currency contracts awaiting settlement	498	54
Purchases awaiting settlement	361	178
	1,957	758

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2018 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 10 of the notes applicable to the financial statements of all Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £260,000 (2018 - £355,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As the Fund invests in emerging and developing markets, investors should be prepared to accept a higher degree of risk than for a Fund with a broader investment mandate as there is the potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 09 to 13.

a) Counterparty risk

The Fund was not exposed to any counterparty risk as at the balance sheet date (2018 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.19		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	253,665	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	253,665	-
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	377,817	-
within level 1;	-	_
Level 3: Valuation techniques using unobservable inputs.	-	-
	377,817	_

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

	Transaction				
Purchases (excluding derivatives)	Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	109,163	62	0.06	72	0.07
Total purchases	109,163	62		72	
Total purchases including transaction costs	109,297				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	228,995	113	0.05	208	0.09
Total sales	228,995	113		208	
Total sales net of transaction costs	228,674				
Derivative transaction costs		-		-	
Total transaction costs		175		280	
Total transaction costs		0.06% 0.09%			

Notes to the financial statements

14 Portfolio transaction costs continued for the year 1 August 2017 to 31 July 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	126,908	161	0.13	84	0.07
Total purchases	126,908	161		84	
Total purchases including transaction costs	127,153				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	131,576	158	0.12	98	0.07
Total sales	131,576	158		98	
Total sales net of transaction costs	131,320				
Derivative transaction costs		-		-	
Total transaction costs		319		182	
Total transaction costs as a % of average net assets		0.08%		0.05%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.16% (2018 - 0.19%).

Group 1: shares purchased prior to 1 August 2018

Group 2: shares purchased on or after 1 August 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco Global Smaller Companies Fund (UK)

The Fund aims to achieve capital growth through a portfolio of investments in international securities. The Fund intends to invest mainly in shares of smaller companies, which are quoted on the world's stock markets. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Global Smaller Companies Fund changed its name to Invesco Global Smaller Companies Fund (UK) effective 1 October 2018. The Fund objective and strategy remain unchanged at this time. On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk. The objectives currently shown within these financial statements are those objectives that were in place as at 31 July 2019.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 75 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 75 is based on the close of business bid price. MSCI AC World Small Cap Index NR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Investment report for the year

Strategy, review and outlook

The Fund rose 4.8% over the twelve months to the end of July 2019, compared to a return of 3.1% for the benchmark MSCI AC World Small Cap Index TR^1 . This placed the Fund in the third quartile of its peer group, the IA Global Sector NR, which returned an average of 10.0%. Smaller companies underperformed larger companies during the period, reflecting greater concern by investors about the state of the global economy to which smaller companies in general are more sensitive.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. MSCI AC World Small Cap Index TR¹ source: Lipper, total return, in Sterling terms.

Past performance is not a guide to future returns.

Global equity markets delivered positive returns over the review period despite concerns over a slowing global economy. Back in the fourth quarter of 2018 markets were led lower by the US as concerns over economic slowdown and high stock market valuations intensified. The December slump was among the worst in history and the US equity market was on track for the biggest December fall since the Great Depression of 1931. Markets regained some of the lost ground in the first quarter of 2019 until May when escalating trade tensions left markets assessing the implications for slower economic growth once again. China hit back at Washington with its own retaliatory tariffs. The escalation in the trade war between the world's two largest economies drew investors back to so-called 'safe-haven' assets. In a reversal of sentiment, optimism guided global equity markets in June and July amid interest rate cuts by central banks (in particular the first interest rate cut by the US Federal Reserve (Fed) in more than a decade). Speculation lingered, however, that a trade deal between the US and China remained elusive.

Against this backdrop, the Fund outperformed the reference MSCI AC World Small Cap Index TR over the twelve months. The companies held within the US sleeve did well as the team's focus on high quality companies with lower than average leverage was rewarded. Its relatively small allocation to the US was negative though as the US equity market performed better than the reference index. However, we see more opportunities outside the US, given how expensive that market has become in relative terms.

The Fund remains globally diversified and we continue to prefer markets such as the UK, Europe and Asia Pacific ex-Japan, where we have large positions.

Our Asia Pacific ex-Japan holdings have also delivered positive performance for the Fund, benefiting from optimism around an improvement in US-China relations. The steps that China has taken to support its slowing economy boosted sentiment further. Our European small cap holdings also did well, and the Fund's large exposure to Europe was beneficial. Sentiment has improved and European stocks in general were driven by suggestions that the European Central Bank (ECB) would further loosen monetary policy (to stimulate economic growth). Furthermore, an increasingly dovish tone suggests an interest rate cut may also be on the agenda.

Brexit uncertainty continued to weigh on UK domestic equity valuations though the stocks we hold in the UK performed well and beat the benchmark. We believe that risks now are more than priced in to equity valuations and there may be considerable upside to UK small caps if valuations normalise following a sensible resolution to the exit from the European Union.

Nick Mustoe (lead) and the Invesco Global Smaller Companies Group, Henley Investment Centre², Fund Managers

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

Notes to the financial statements

5	Interest payable and similar charges	01.8.18 to 31.7.19	01.8.17 to 31.7.18
		£'000	£′000
Inte	erest	2	1

6 Taxation	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
a) Analysis of charge for the year Indian capital gains tax Overseas tax	173 1,348	- 1,148
Total tax charge	1,521	1,148

There is no corporation tax charge for the year (2018 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2018 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.18 to 31.7.19 £′000	01.8.17 to 31.7.18 £'000
Net revenue before taxation	5,993	4,558
Corporation tax at 20% (2018 - 20%)	1,199	912
Effects of: Indian capital gains tax Movement in excess expenses Overseas tax¹ Prior year adjustment Relief for overseas tax treated as an expense Revenue not subject to tax	173 1,415 1,348 69 (37) (2,646)	1,808 1,148 - (8) (2,712)
Total tax charge	1,521	1,148

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £81,194,000 (2018 - £74,120,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £16,239,000 (2018 - £14,824,000) has not been recognised.

7 Distributions	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000

	11,074	7,171

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2018 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 10 of the notes applicable to the financial statements of all Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £755,000 (2018 - £874,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than for a Fund with a broader investment mandate. Although the Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 09 to 13.

a) Counterparty risk

The Fund was not exposed to any counterparty risk as at the balance sheet date (2018 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.19		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	699,778	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	105	-
	699,883	-
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	813,315	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	1,908	-
	815,223	-

The majority of financial investments are classified as level 1: Unadjusted quoted prices in an active market for an identical instrument. Investments classified as level 3: Valuation techniques using unobservable inputs mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis Management assess the investment company's progress against milestones expected
 at the time of investment in order to determine whether an adjustment is required to the transaction price
 to determine fair value.
- Multiples Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets Management determine the fair value based on the net asset value of the underlying portfolio company.

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company.
- Consideration of seniority of the securities held and terms of repayment upon realisation.
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding.
- Consideration of any outstanding payments to be made by Invesco.
- Industry statistics or events (such as mergers and acquisitions).

Invesco Global Smaller Companies Fund (UK) Notes to the financial statements

14 Portfolio transaction costs

for the year 1 August 2018 to 31 July 2019 Purchases (excluding derivatives)	Transaction Value	Commissions	96	Taxes	%
	2000	_ 000	70	_ 000	,,
Equity instruments (direct)	300,966	144	0.05	213	0.07

Total purchases including					

transaction costs	301,323				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	429,811	211	0.05	97	0.02
Total sales	429,811	211		97	
Total sales net of transaction costs	429,503				
Derivative transaction costs		-		-	
Total transaction costs		355		310	
Total transaction costs as a % of average net assets		0.05%		0.04%	

Notes to the financial statements

14 Portfolio transaction costs continued for the year 1 August 2017 to 31 July 2018

	Transaction Value	Commissions		Taxes	
Purchases (excluding derivatives)	5,000	£'000	%	£'000	%
Equity instruments (direct)	346,351	207	0.06	269	0.08
Total purchases	346,351	207		269	
Total purchases including transaction costs	346,827				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	330,355	221	0.07	63	0.02
Total sales	330,355	221		63	
Total sales net of transaction costs	330,071				
Derivative transaction costs		-		-	
Total transaction costs		428		332	
Total transaction costs as a % of average net assets		0.05%		0.04%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.30% (2018 - 0.28%).

Y Income shares Group 1 Group 2	3.2055 2.4742	- 0.7313	3.2055 3.2055	2.4777 2.4777

Group 1: shares purchased prior to 1 August 2018

Group 2: shares purchased on or after 1 August 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco Japanese Smaller Companies Fund (UK)

The Fund aims to achieve capital growth, primarily through a portfolio of investments in smaller Japanese companies. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual Japanese Smaller Companies Fund changed its name to Invesco Japanese Smaller Companies Fund (UK) effective 1 October 2018. The Fund objective and strategy remain unchanged at this time. On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk. The objectives currently shown within these financial statements are those objectives that were in place as at 31 July 2019.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 101 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 101 is based on the close of business bid price. Russell Nomura Small Cap Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

² Reference benchmark for performance comparison purposes only.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Investment report for the year

Strategy, review and outlook

The Fund fell 3.8% over the twelve months in Sterling terms to the end of July 2019, underperforming the benchmark Russell Nomura Small Cap Index TR¹ which returned -4.6%. This placed the Fund in the second quartile of its peer group, the IA Japanese Smaller Companies Sector NR, which declined by an average of 4.6%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. Russell Nomura Small Cap Index TR¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Sector allocation, which is a by-product of bottom-up stock picking with a focus on growth potentials, worked well while stock selection detracted from relative returns. At the sector level, being overweight Pharmaceutical and Information & Communication combined with zero exposure to Banks added value. Meanwhile zero exposure to Land Transportation and Foods adversely impacted performance. At the stock level, the top contributor was PeptiDream, a bio venture developing innovative new-drug finding platform. The company has been posting sales and profit growth backed by progress in both new and existing new drug development programmes. On the negative front, MTG, a personal care brand tapping growing Asian markets, underperformed as its earnings growth momentum slowed down due to a decline in sales for inbound tourists combined with an increase in upfront spending for future growth. The Fund closed the position in July 2019 upon the announcement of inappropriate accounting practices.

During the period, the external factors took centre stage. Japanese equities initially rose with the Nikkei 225 Index hitting the highest level since November 1991 in October 2018. However, Japanese stocks fell in tandem with global stock markets amid a multitude of concerns, including a global economic slowdown, persistent global trade disputes and profits peaking among high-tech names, toward the end of 2018. In early 2019 stock markets recovered, but mounting concerns over the US trade issues combined with the yen appreciation against the US dollars amid increasing expectations for the US Federal Reserve's rates cuts weighed on Japanese equity markets once again. Such risk-off sentiment hit small-cap stocks, especially the Tokyo Stock Exchange Mothers, which consists of internet, high-tech and biotechnology start-ups.

Looking ahead, we are carefully monitoring these external factors, including slowing global economic growth, a trade and technology war between the US and China, central banks' monetary policies to tackle macro and political uncertainty, as well as the receded risk appetite which has been curbing money flows into high-growth small-cap markets in Japan. Meanwhile, our approach as a bottom-up stock picker remains the same, focusing on high growth companies in the small-cap space, which possess own growth themes, and particularly keen on achieving significant earnings growth for the next several years. The Fund continues to emphasise stocks that fit within our investment themes: the fourth industrial revolution, energy revolution, social changes caused by low-birth rate and ageing population, social infrastructure and capital market activity for growth. Example of such stock includes PeptiDream, Riso Kyoiku, a provider of academic tutoring and exam preparation expanding its education service coverage, and Elan, a provider of daily living and nursing care product delivery service for elderly people in a hospital and nursery home.

Total expenses

Total audit fees of £8,250 (2018 - £6,206) exclusive of VAT payable to the auditors for the year ended 31 July 2019 are borne out of the Fund Management Fee.

Notes to the financial statements

5	Interest payable and similar charges	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
	erest	-	-

6 Taxation	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
a) Analysis of charge for the year		
Overseas tax	80	75
Total tax charge	80	75

There is no corporation tax charge for the year (2018 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2018 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Net expenses before taxation	(140)	(321)
Corporation tax at 20% (2018 - 20%)	(28)	(64)
Effects of: Movement in excess expenses Overseas tax Revenue not subject to tax	187 80 (159)	215 75 (151)
Total tax charge	80	75

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £19,385,000 (2018 - £18,451,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £3,877,000 (2018 - £3,690,000) has not been recognised.

7 Distributions	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2018 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 10 of the notes applicable to the financial statements of all Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of $\pounds72,000$ (2018 - $\pounds100,000$) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than funds that can invest in larger company sizes. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to buy or sell securities.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 09 to 13.

a) Counterparty risk

The Fund was not exposed to any counterparty risk as at the balance sheet date (2018 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.19		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	57,225	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	57,225	-
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	79,687	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	79,687	-

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

14 Portfolio transaction costs continued

for the year 1 August 2017 to 31 July 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	62,515	36	0.06	-	-
Total purchases	62,515	36		-	
Total purchases including transaction costs	62,551				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	49,788	51	0.10	-	-
Total sales	49,788	51		-	
Total sales net of transaction costs	49,737				
Derivative transaction costs		-		-	
Total transaction costs		87		-	
Total transaction costs as a % of average net assets		0.11%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.34% (2018 - 0.30%).

15 Share movement

for the year 1 August 2018 to 31 July 2019

	Accumulation shares	Accumulation shares (No Trail)	Z Accumulation shares	Y Accumulation shares

Invesco Japanese Smaller Companies Fund (UK)Distribution table

Distribution table

for the year 1 August 2018 to 31 July 2019

Distribution payable 30 September 2019	Net revenue pence per share	Equalisation pence per share	Net distribution payable 30.9.19 pence per share	Net distribution paid 30.9.18 pence per share
Accumulation shares Group 1 Group 2	0.0000 0.0000	0.0000	0.0000 0.0000	0.0000
Accumulation shares (No Trail) Group 1 Group 2	0.0000 0.0000	0.0000	0.0000 0.0000	0.0000
Z Accumulation shares Group 1 Group 2	0.5722 0.5722	0.0000	0.5722 0.5722	0.0000
Y Accumulation shares Group 1 Group 2	0.5657 0.5657	0.0000	0.5657 0.5657	0.0000

Group 1: shares purchased prior to 1 August 2018 Group 2: shares purchased on or after 1 August 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco UK Smaller Companies Equity Fund (UK)

The Fund aims to achieve capital growth in the UK. The Fund intends to invest primarily in shares of smaller companies in the UK. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

Invesco Perpetual UK Smaller Companies Equity Fund changed its name to Invesco UK Smaller Companies Equity Fund (UK) effective 1 October 2018. The Fund objective and strategy remain unchanged at this time. On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk. The objectives currently shown within these financial statements are those objectives that were in place as at 31 July 2019.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 116 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 116 is based on the close of business bid price. Numis Smaller Companies Extended ex Investment Companies Index TR^2 data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

² Reference benchmark for performance comparison purposes only.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Investment report for the year

Strategy, review and outlook

The Fund delivered a return of 2.7% over the twelve months to the end of July 2019, compared to a fall of 6.1% by the Numis Smaller Companies Extended ex Investment Companies Index TR¹. This placed the Fund in the first quartile of its peer group, the IA UK Smaller Companies Sector NR, which fell by an average of 5.9%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. Numis Smaller Companies Extended ex Investment Companies Index TR¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

The UK equity market provided a small positive return over the period, performance which masks underlying periods of significant volatility. Market performance was impacted by both the escalation of domestic political tensions and growing global concerns regarding trade wars and global economic growth.

The value of Sterling fell to significant lows against both the US dollar and Euro over the period. The Bank of England raised the base interest rate to 0.75% in August 2018, but indicated that there would be no further increases until the United Kingdom's exit from the European Union had been finalised.

Against this challenging backdrop the Fund's holdings in media businesses Future and 4imprint provided a strong contribution to returns. Future provided the standout return, releasing a series of strong trading updates throughout the year. These updates prompted material upgrades to analyst estimates and sharp rises in the company's share price. Meanwhile promotional merchandiser 4imprint released a strong full year statement during March 2019, prompting some analysts to upgrade their estimates. The company had increased its advertising spend, which proved more successful than had been anticipated by the market.

The Fund's holding in AJ Bell also provided a significant positive contribution to returns. The investment platform successfully completed its initial public offering (IPO) in December, listing for the first time on the London Stock Exchange. The fund manager was extremely supportive of the IPO, which saw significant gains realised for the portfolio.

Despite the portfolio's positive performance over the year there were some holdings that provided a negative return. The most notable detractor was Patisserie. Shares in the company were suspended from trading in October 2018, following the discovery of a fraud in the company's accounts. This is a highly unusual and frustrating situation and the criminal investigation into the fraud remains ongoing.

The outlook for the UK continues to be clouded by political uncertainty, particularly around Brexit. The Bank of England has signalled that further interest rate rises are unlikely until the outcome is known.

In light of this ongoing uncertainty, the fund manager retains a preference for stocks with "self-help" characteristics that gives them the potential to grow independently of the economy. This can include the restructuring of underperforming businesses, sector consolidation, roll-out strategies or market share gains led by innovation. Fortunately, the breadth and diversity of the smaller companies sector enables the manager to find a steady stream of such investments. Therefore, despite the uncertain outlook, he remains confident in the positioning of the Fund.

Notes to the financial statements

Refer to pages 06 to 15 for notes applicable to the financial statements of all Funds.

1 Accounting policies

The Fund's Accounting Policies, Distribution Policies and Generic Risk Factors are set out on pages 06 to 07 and 09 to 13.

2 Net capital gains	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Non-derivative securities	8,709	60,971
Net capital gains	8,709	60,971

3 Revenue	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Bank interest	49	11
Management fee rebates	32	55
Non-taxable overseas dividends	751	526
UK dividends	12,988	13,028
UK REIT dividends	479	521
	14,299	14,141

4 Expenses	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Payable to the Manager, associates of the Manager and agents of either of them: Fund Management Fee ¹	8,323	9,309
	8,323	9,309
Total expenses	8,323	9,309

Total audit fees of £8,250 (2018 - £9,423) exclusive of VAT payable to the auditors for the year ended 31 July 2019 are borne out of the Fund Management Fee.

Notes to the financial statements

5	Interest payable and similar charges	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
	erest	-	_

6 Taxation	01.8.18 to 31.7.19 ε'000	01.8.17 to 31.7.18 £'000
a) Analysis of charge for the year Overseas tax	_	_
Total tax charge	_	_

There is no corporation tax charge for the year (2018 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2018 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Net revenue before taxation	5,976	4,832
Corporation tax at 20% (2018 - 20%)	1,195	966
Effects of: Movement in excess expenses Revenue not subject to tax	1,553 (2,748)	1,745 (2,711)
Total tax charge	-	_

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £124,277,000 (2018 - £116,514,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £24,856,000 (2018 - £23,303,000) has not been recognised.

7 Distributions	01.8.18 to 31.7.19 £'000	01.8.17 to 31.7.18 £'000
Accumulations and distributions paid 30 September 2019	5,859	4,762
Amounts deducted on redemption of shares	348	178
Amounts received on issue of shares	(210)	(99)
	5,997	4,841
The distributable amount has been calculated as follows:		
Net revenue after taxation	5,976	4,832
Equalisation on conversions	21	9
	5,997	4,841

Notes to the financial statements

8 Debtors	31.7.19 £'000	31.7.18 £'000

Amounts receivable for issue of shares	498	31
Sales awaiting settlement	1	_
	1,130	920

9	Cash and bank balances	31.7.19	31.7.18
		£'000	£′000
Cas	sh and bank balances	19,410	19,238

10 Other creditors	31.7.19 £′000	31.7.18 £'000
Accrued expenses	711	807
Amounts payable for redemption of shares	568	457
Purchases awaiting settlement	12	-
	1,291	1.264

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2018 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 10 of the notes applicable to the financial statements of all Funds on page 15. Amounts received in respect of sales in the accounting year of £4,851,000 (2018 - £3,647,000) are included within the figures disclosed in note 14. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £711,000 (2018 - £807,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than funds that can invest in larger company sizes. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to buy or sell securities.

The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 09 to 13.

a) Counterparty risk

The Fund was not exposed to any counterparty risk as at the balance sheet date (2018 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.19		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	605,817	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	605,817	-
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	655,516	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	6,421	-
	661,937	-

The majority of financial investments are classified as level 1: Unadjusted quoted prices in an active market for an identical instrument. Investments classified as level 3: Valuation techniques using unobservable inputs mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies Note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis Management assess the investment company's progress against milestones expected
 at the time of investment in order to determine whether an adjustment is required to the transaction price
 to determine fair value.
- Multiples Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets Management determine the fair value based on the net asset value of the underlying portfolio company.

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company.
- Consideration of seniority of the securities held and terms of repayment upon realisation.
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding.
- Consideration of any outstanding payments to be made by Invesco.
- Industry statistics or events (such as mergers and acquisitions).

Invesco UK Smaller Companies Equity Fund (UK) Notes to the financial statements

Total transaction costs as a % of average net assets		0.02%		0.05%	

Notes to the financial statements

14 Portfolio transaction costs continued for the year 1 August 2017 to 31 July 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	121,148	69	0.06	317	0.26
Total purchases	121,148	69		317	
Total purchases including transaction costs	121,534				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	154,134	117	0.08	0	0.00
Debt instruments (direct)	3	_		_	_
Collective investment schemes	3,651	4	0.11	0	0.00
Total sales	157,788	121		0	
Total sales net of transaction costs	157,667				
Derivative transaction costs		-		-	
Total transaction costs		190		317	
Total transaction costs as a % of average net assets		0.03%	0.05%		

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 1.00% (2018 - 0.92%).

Y Income shares Group 1 Group 2	4.6678 2.0289	- 2.6389	4.6678 4.6678	3.9432 3.9432

Group 1: shares purchased prior to 1 August 2018

Group 2: shares purchased on or after 1 August 2018

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Regulatory statements

Statement of the Manager's Responsibilities in relation to the Financial Statements

The Collective Investment Schemes sourcebook ("COLL") requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent:
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary's Responsibilities in relation to the Financial Statements

The Depositary is responsible for the safekeeping of all of the property of the Company (other than tangible moveable property) which is entrusted to it.

It is the duty of the Depositary to take reasonable care to ensure that the Company is managed in accordance with the COLL, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) ("the OEIC Regulations") and the Company's Instrument of Incorporation in relation to the pricing of, and dealings in, the shares of the Company, the application of the revenue of the Company, and the investment and borrowing powers of the Company.

Depositary's Report to Shareholders

Having carried out such procedures as we considered necessary to discharge our responsibilities and duties as Depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation of shares in the Company, the calculation of the price of the Company's shares and the application of the Company's revenue in accordance with the COLL and, where applicable, the OEIC Regulations and the Instrument of Incorporation of the Company; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

Independent Auditors' Report to the Shareholders of Invesco Smaller Companies and Markets Investment Series (the "Company")

Report on the audit of the financial statements

Opinion

In our opinion, Invesco Smaller Companies and Markets Investment Series' financial statements:

- give a true and fair view of the financial position of the Company and each of the Funds as at 31 July 2019 and of the net revenue/(expenses) and the net capital gains/(losses) of the scheme property of the Company and each of the Funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco Smaller Companies and Markets Investment Series (the "Company") is an Open Ended Investment Company ('OEIC') with six Funds. The financial statements of the Company comprise the financial statements of each of the Funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise: the balance sheets as at 31 July 2019; the statements of total return and the statements of change in net assets attributable to shareholders for the year then ended; the distribution tables; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

ISAs (UK) require us to report to you when:

- the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Authorised Corporate Director has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's or any of the Funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

We have nothing to report in respect of the above matters.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's or any of the Funds' ability to continue as a going concern. For example, the terms on which the United Kingdom may withdraw from the European Union, are not clear, and it is difficult to evaluate all of the potential implications on the funds' business and the wider economy.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Independent Auditors' Report to the Shareholders of Invesco Smaller Companies and Markets Investment Series (the "Company") continued

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 132, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the Funds' ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual Fund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
