

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Merian North American Equity Fund R (GBP) Accumulation Shares (GB00B1XG9G04)

A sub-fund of Merian Investment Funds Series II. Managed by Merian Investment Management Limited

OBJECTIVES AND INVESTMENT POLICY

Objective: to seek to achieve capital growth by delivering a return, net of fees, greater than that of the MSCI North America Index with net dividends reinvested over rolling 3 year periods.

Policy: the Fund invests primarily (at least 70%) in US and Canadian company shares and similar investments

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

Portfolio construction is driven by systematic analysis of companies against several distinct characteristics including stock price valuation, balance sheet quality, growth characteristics, efficient use of capital, analyst sentiment and supportive market trends to identify attractively priced investment opportunities.

The MSCI North America Index with net dividends re-invested is a representation of the markets in which the Fund primarily invests and as such is a point of reference against which the performance of the Fund may be measured. The Fund is managed having regard to the Index; however the Fund does not track the Index.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can buy and sell shares on any working day in London.

RISK AND REWARD PROFILE

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Geographic concentration risk - a fall in the US and Canadian markets may have a significant impact on the value of the Fund because it primarily invests in these markets.

Currency risk - the Fund is denominated in British Pounds but holds assets denominated in other currencies. The value of your shares may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the Fund uses derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the income of the Fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the Fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.

CHARGES

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
<i>This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.</i>	
Charges taken from the Fund over a year	
Ongoing charge	0.95%
Charges taken from the Fund under specific conditions	
Performance fee	None

The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.

The ongoing charges figure is based on the fixed ongoing charge as detailed in the prospectus. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking and may vary from year to year.

You can find out more details about the charges by looking at Schedule 1 of the prospectus.

PAST PERFORMANCE
