The data refers to past performance. Past performance is not a reliable indicator of future results.

Performance: monthly Fund returns are based on the percentage change in the net asset value per share, after adjusting those values to include any reinvestment of dividends, interest and capital gain distributions. Monthly returns are linked geometrically to determine quarterly and annual returns. Gross returns are calculated by adjusting the monthly net return to exclude Administration, Trust and Custody fees. Fees would reduce the returns shown.

Standardised Performance: Performance figures are shown on a mid-to-mid basis, inclusive of any net reinvested income and net of the annual management charge and all other fund expenses. Net returns do not include any entry charge, which may be charged before your money is invested.

† Distribution Yield is calculated by dividing the distributions paid (yearly, monthly, etc.) by its cost or net asset value. Distribution yield can be used as a measure of investment cash flow provided by an investment relative to the cost paid for that investment.

Principal Risk

- Equities are subject to material market risk. Their values tend to be volatile and can decline quickly or over extended periods of time.
- Investments in small companies may involve greater risk than is associated with larger companies due to lesser financial resources, reduced markets and narrower product lines.
- Fund assets in currencies other than the base currency of the Fund may expose the Fund to loss if the currency of those assets falls in value relative to the base currency.
- For further details of the risks, please refer to the Fund's prospectus.

Important Information
