

31 May 2019

Fund Aims

To produce capital growth over the long term. The Fund will invest primarily in a combination of equities, fixed interest securities, collective investment schemes, cash, near cash and deposits. The Fund may invest in derivatives and currency forwards for investment purposes as well as for efficient portfolio management.

Investment Proposition

The Fund seeks to produce superior returns over time by combining a long-term, committed, stockpicking approach in our regional equity portfolios with the best ideas from our Rates & Currencies and Credit teams, covering interest rate and active currency views, along with investment grade and high yield corporate bond opportunities.

In addition, the Fund takes active asset allocation positions. These are driven by the views of our investment teams, based on the availability of attractive long-term investments in each area.

Sector Average (%)	10.6	-2.9	17.1	1.5	4.3

Performance source: FE, single pricing basis, total return. Returns reflect the annual charges but exclude any initial charge paid.

Additional Fund Information

The Fund is a sub-fund of the Baillie Gifford UK & Balanced Funds ICVC (Investment Company with Variable Capital) which is an umbrella Open-Ended Investment Company. Its Authorised Corporate Director ('ACD') is Baillie Gifford & Co Limited.

The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

The ongoing charges figure is based on the expenses for the financial year and may vary from year to year. It excludes the cost of buying and selling assets for the Fund although custodian transaction costs are included. Further explanation of all the charges and costs relating to this Fund can be found in the Enhanced Disclosure of Fund Charges and Costs document which is available through our website, www.bailliegifford.com

Active Share is a measure of how actively managed a Fund is and is calculated by taking 100 minus the % of the Fund that overlaps with the comparative index. An active share of 100 indicates no overlap with the comparative index and an active share of zero indicates a portfolio that tracks the comparative index. The comparative index for this Fund is the mean of The Investment Association Mixed 40%-85% Shares Sector. As this is a peer group benchmark, and therefore stock-level data is unavailable, we instead use an appropriately weighted composite of representative indices to estimate active share.

Turnover is calculated by taking the smaller figure of either total purchases or total sales for the month and dividing it by an average market value. The Annual Turnover is then calculated as the sum of the monthly turnover figures for the 12 month period.

Further Information

Any comments expressed in this factsheet should not be taken as a recommendation or advice.

This factsheet does not provide you with all the facts that you need to make an informed decision about investing in the Fund. You need to read the associated Key Investor Information Document and Supplementary Information Document and decide whether to contact an authorised intermediary.

This factsheet has been issued and approved by Baillie Gifford & Co Limited (Financial Services Register 119179), which is wholly owned by Baillie Gifford & Co (Financial Services Register 142597), both of which are authorised and regulated by the Financial Conduct Authority of 12 Endeavour Square, Stratford, London, E20 1JN.

Risk Warnings

Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and investors may not get back the amount invested. Past performance is not a guide to future returns.

The specific risks associated with the Fund include:

- Bonds issued by companies and governments may be adversely affected by changes in interest rates, expectations of inflation and a decline in the creditworthiness of the bond issuer. The issuers of bonds in which the Fund invests may not be able to pay the bond income as promised or could fail to repay the capital amount.
- The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
- Derivatives may be used to obtain, increase or reduce exposure to assets and may result in the Fund being leveraged. This may result in greater movements (down or up) in the price of shares in the Fund. It is not our intention that the use of derivatives will significantly alter the overall risk profile of the Fund.
- Custody of assets, particularly in emerging markets, involves a risk of loss if the custodian becomes insolvent or breaches duties of care.

Further details of the risks associated with investing in the Fund can be found in the Key Investor Information Document, copies of which are available at www.bailliegifford.com, or the Prospectus which is available by calling the ACD.
