

L Accumulation GBP | Data as at 31.01.2021

Fund objectives and investment policy

The fund aims to provide income and capital growth in excess of 3 Month GBP LIBOR (or an equivalent reference rate) (after fees have been deducted) over a 3 to 5 year period by investing in bonds of UK and European companies but this cannot be guaranteed and your capital is at risk. The fund is actively managed and invests at least 80% of its assets in bonds denominated in sterling (or in other currencies and hedged back into sterling) issued by companies in the UK and Europe. The fund may also invest in bonds issued by companies worldwide and by governments, government agencies and supra-nationals. The fund may invest more than 50% of its assets in below investment grade bonds (as measured by Standard & Poor's or any other equivalent credit rating agencies) or in unrated bonds. The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The Fund may use leverage and take short positions.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

Share class performance (%)

Performance over 5 years (%)

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Please refer to the Important information section for the disclosure. The above is an internal ESG accreditation.

L Accumulation GBP | Data as at 31.01.2021

5 year return of GBP 10,000

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

ABS and MBS risk: Mortgage or asset-backed securities may not receive in full the amounts owed to them by underlying borrowers.

Capital risk / negative yields: When interest rates are very low or negative, the fund's yield may be zero or negative, and you may not get back all of your investment.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Counterparty risk / money market & deposit: A failure of a deposit institution or an issuer of a money market instrument could create losses.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Derivatives risk: A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Interest rate risk: A rise in interest rates generally causes bond prices to fall.

Leverage risk: The fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

Capital erosion: As a result of fees being charged to capital, the distributable income of the fund may be higher, but there is the potential that performance or capital value may be eroded.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Synthetic risk & reward indicator (SRRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category is based upon the fund's risk target and there is no guarantee that the fund will achieve it. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. A fund is in categories 1 to 3 where it can take lower risks in search of potentially lower rewards and its price may rise and fall accordingly. A fund is in categories 4 to 7 where it can take higher risks in search of potentially higher rewards and its price may rise and fall accordingly.

Risk statistics & financial ratios

	Fund	Target
Annual volatility (%) (3y)	8.2	0.1
Effective duration (years)	2.5	-
Current yield (%)	4.5	-
Yield to maturity	4.3	-

Source: Morningstar. The above ratios are based on bid to bid price based performance data. Please note this is an accumulation share class and as such the investor will not receive an income distribution. Any income will be reinvested into the fund.

L Accumulation GBP | Data as at 31.01.2021

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Asset allocation

Target refers to the Benchmark listed in the Fund facts section and described under the Share class performance section on page 1. Source: Schroders. Top holdings and asset allocation are at fund level.

Benchmark and corporate action information

The fund's performance should be assessed against its target benchmark of 3 month GBP LIBOR (or an equivalent reference rate) and compared against the Investment Association Strategic Bond sector average return. In relation to any fund that is managed with reference to LIBOR, Schroders is in the process of assessing the potential alternatives to LIBOR and will notify investors of any decision to move away from LIBOR in due course. On 24.03.2014, the fund, previously named Cazenove Strategic Bond Fund, changed its name to Schroder Strategic Credit Fund.
