EQUITY COMMENTARY

Equity markets continued their recovery from the March low point, driven higher by loose monetary conditions and some tentative lockdown easing measures. Despite government furlough schemes, unemployment has begun to rise sharply, both in the UK, where there were over 850,000 new unemployment claimants in April alone, and elsewhere around the world. This a worrying sign for the pace of the economic recovery from the lockdown induced halt to economic activity.

VIT's equity portfolio lagged a little behind the FTSE All Share Index in May as high yielding equities struggled again to match the wider market. The main factor affecting performance was stock selection, as several holdings came back after strong performances in April. The fund's two holdings with significant operations in Hong Kong, HSBC and Prudential, were negatively affected by increased tensions resulting from clashes between the authorities and pro-democracy protestors. FDM continued its recovery, rising by over 20%, and Vodafone was also strong (+19%) after the company confirmed its intention to pay its final dividend.

During the month we sold Lloyds Banking Group, which is unlikely to pay a dividend for some time and started a new holding in Telecom Plus which is a discount utility club with over 650,000 members. The company generates a high return on capital, has a strong balance sheet and should continue paying dividends even in the current circumstances.
