1. FUND INFORMATION

Description

Lyxor Asset Management Group ("Lyxor") was founded in 1998 and comprises two subsidiaries (1) (2) of Société Générale group. Lyxor benefits from the expertise of 600 professionals across the wealth management world, advising EUR 117.6 billion* in assets. Lyxor offers bespoke asset management services, capitalising on its know-how in ETFs and indexing, Alternative and Multi Management, and Absolute Performance and Solutions. As one of the most experienced players on the market, Lyxor ETF is Europe's number three provider of ETFs (number two in terms of liquidity (3)), with AuM of more than EUR 49.8 billion*. With 220 ETFs listed on 13 financial marketplaces, Lyxor ETF provides investors with varied investment solutions enabling them to diversify their allocation across the entire spectrum of asset classes (equities, bonds, money market instruments and commodities via forward financial instruments). Demonstrating its commitment to high-quality ETFs, in 2011, Lyxor ETF implemented an ETF quality charter with the aim of ensuring that each ETF it offers complies with the strictest requirements in terms of replication quality, risk monitoring, liquidity and transparency. www.lyxoretf.com

Investment objective

The Lyxor Dow Jones Industrial Average UCITS ETF - Dist is a UCITS compliant exchange traded fund that aims to track the benchmark index Dow Jones Industrial Average Net Total Return.

The Dow Jones Industrial Average Net Total Return represents large and well-known U.S. companies, covering all industries with the exception of Transportation and Utilities. The Dow Jones Industrial Average is a price-weighted index. The Dow Jones Industrial Average is an index based on the values of 30 securities of large American companies. It is calculated using a mathematical average of the stock prices of the 30 securities. The capitalisation of the shares included in the Dow Jones Industrial Average represents approximately 20% of the capitalisation of American equities. The index is price weighted.

Risk Factors

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on www.lyxoretf.com

CAPITAL AT RISK: ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

REPLICATION RISK: The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

COUNTERPARTY RISK: Investors are exposed to risks resulting from the use of an OTC Swap with Societe Generale. In-line with UCITS guidelines, the exposure to Societe Generale cannot exceed 10% of the total fund assets. Physically replicated ETFs may have counterparty risk resulting from the use of a Securities Lending Programme.

UNDERLYING RISK: The Underlying Index of a Lyxor ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

CURRENCY RISK: ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

LIQUIDITY RISK: Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed, including Societe Generale. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, Societe Generale or other market-maker systems; or an abnormal trading situation or event.
