December 31, 2018 (unaudited)

#### Dear Shareholders:

We are pleased to present this annual report, which affords us the opportunity to provide both a brief review of the economic backdrop for the last 12 months and our outlook for 2019.

#### Review of 2018

As we wrote in our Market Insights research, which can be found at www.vaneck.com/blogs/market-insights/, we began 2018 by noting that global growth had gone from "ticking up" to "firmly in place" and that, while central banks were tightening, Europe remained "two years" behind the U.S. in this trend and had a trickier task. Further, our base case was for 10-year interest rates to rise to 3.5% with the curve not inverting. In its third longest bull market ever, we remained bullish on U.S. equities in the short-term, but were prepared for a correction. Finally, we believed that investors should not be underweight commodities as global growth was supporting the bullish "grind" trade narrative from supply cutbacks.

The big shock to this growth story came with concerns about European and Chinese growth in the summer of 2018. These, together with both unstable politics and weaker bank balance sheets, became obstacles to monetary policy normalization. This resulted in U.S. dollar strength and emerging markets equity weakness. In addition, rather than continuing to "grind" higher, commodities were hit by China worries and other factors and had a disappointing year.

#### 2019 Outlook

Looking forward, three of our macro views for 2019 are that: 1) developed markets central banks are tightening, we believe that Europe continues to be "two years" behind the U.S. in this trend. It will remain a slow process and may well be slower than the U.S.; 2) the pace of U.S. Federal Reserve interest rate hikes slows, with a possible pause to hikes in the next 12 months; and, 3) China's central bank is stimulating and harder-to-stimulate lending to private companies and financial reform continues. However, the government-the central bank supported by fiscal and other steps-wins in stimulating.

Our market views for the year include: 1) the withdrawal of liquidity will extend to credit and equities, which may result in a bumpier ride for many asset classes; 2) gold should benefit if rate hikes stop; commodities should benefit if China resurgence offsets developed world slowdown; and, 3) emerging markets should benefit on a relative basis if China stimulus works.

To keep you informed on an ongoing basis, we encourage you to stay in touch with us through the videos, email subscriptions, and research blogs available on our website, www.vaneck.com. Should you have any questions regarding fund performance, please contact us at 800.826.2333 or visit our website.

We sincerely thank you for investing in VanEck's investment strategies. On the following pages, you will find performance discussions and financial statements for each of the funds for the twelve month period ended December 31, 2018. As always, we value your continued confidence in us and look forward to helping you meet your investment goals in the future.

Jan F. van Eck Trustee and President VanEck Vectors ETF Trust

January 11, 2019

Investing involves substantial risk and high volatility, including possible loss of principal. An investor should consider the investment objective, risks, charges and expenses of the Funds carefully before investing. # Management Discussion (unaudited)

# **Agribusiness**

During 2018, agribusiness stocks essentially moved sideways, without any major ups or downs, until early-December. Thereafter they declined precipitously, before a brief recovery in the final week of the year. The Fund finished the year returning -5.76% for the 12 month period. The primary drivers of negative performance were companies in the industrial sector and, in particular, those in the machinery segment. While companies in the healthcare and consumer discretionary sectors contributed positively to returns, their contribution was not sufficient to outweigh the negative performances of not only the industrial sector, but also the materials and consumer staples sectors. The greatest negative returns came from companies in Japan and the United Kingdom, while the greatest positive returns came from those in Norway and Singapore.

#### Coal

Following a lackluster first six months in 2018, after the end of June the performance of coal stocks declined slowly through mid-November. Thereafter they experienced a significant decline, with the Fund returning -15.97% for the period under review.

Although U.S. coal exports of 87 million short tons (MMst)<sup>1</sup> for the first nine months of the year were up 26% over the same period in 2017, in mid-December the U.S. Energy Information Administration (EIA) expected U.S. coal production would total 762 MMst in 2018 (down 2% from 2017) and 742 MMst in 2019 (down 3% from 2018). It also expected total coal consumption in the U.S. in 2018 to be down 2.80% from 2017 and, in the electric power sector specifically, down 3.10%.<sup>2</sup>

While the long-term benefits of any of the current U.S. Administration's initiatives to provide support for the domestic coal industry remain debatable, over 2018 demonstrable benefits for coal stocks, not least in the U.S., appeared few. However, coal continues to supply a third of all energy used globally and accounts for 38% of electricity generation, in addition to playing a crucial role in industries such as iron and steel.<sup>3</sup> China was the single largest negative contributor to returns, followed by Indonesia and the U.S. No country contributed positively to performance.

# Global Alternative Energy

The performance of global alternative energy stocks during the 12 month period was disappointing, with the Fund recording a negative return of 9.02%. Companies in the information technology sector detracted by far the most from performance, those in the utilities sector were the only positive contributors to performance. The U.S. and China were by far the worst performing countries with negative performance far outweighing the positive performance of Denmark, Austria, Sweden, and Spain.

# **Gold Miners**

Both major gold miners and their junior peers had a roller coaster year. Despite fitful recoveries in the last three to four months of the year, neither recovered from the severe sell-off groups experienced through July and the first half of August. In addition, over the 12 month period, the price of gold fell 1.58%<sup>4</sup> (on the back of a stronger U.S. dollar and rising U.S. interest rates). The larger gold miners (VanEck Vectors Gold Miners ETF) posted a negative return of 8.92%; junior gold miners (VanEck Vectors Junior Gold Miners ETF) posted a negative return of 11.58% for the period.

Among the larger mining stocks, Canadian companies, with the largest average country weighting, detracted the most from performance. Companies in Australia contributed the most to performance.

The situation was similar among the juniors, with Australia the strongest contributor, followed by South Africa. Canada detracted by far the most from performance.

### Natural Resources

The Fund returned -10.69% over the 12 months period under review. The consumer discretionary sector was the single sector to contribute positively to returns. Companies in the materials, energy, and consumer staples sectors detracted the most from performance. Companies in the U.S. detracted by far the most from performance, while those from Russia contributed the most to performance.

#### Oil Refiners

While refining stocks performed quite well over the first nine months of the year, over the final three months they experienced a marked decline, erasing gains from earlier in the year and ending the 12 month period down 9.22%.

In addition to falling victim to the broader market sell off, refiners in the U.S. suffered from the narrowing of two important crude oil price differentials. Not only did the differential between West Texas Intermediate (WTI) sold at Midland and at Cushing narrow significantly over the last four months of the year, but so, too, over much the last two months of the year, did that between WTI and Western Canadian Select (WSC) following the announcement by Alberta that it would cut oil production by 350,000 barrels per day.<sup>5</sup>

Exposure to refiners in the India, Finland, Hungary, and Poland contributed most to performance. All other countries detracted from performance, with Japan, with the second largest average country weighting, detracting the most.

#### Oil Services

Oil services stocks, too, had a dismal year with the Fund losing 44.93% over the 12 month period. As with oil refining stocks, the last quarter of the year was particularly challenging. Having, essentially, moved sideways during the first nine months of the year, thereafter stock prices plummeted.

Many energy companies remained loath to ramp up production too quickly and, by the end of the year at 1,083, the Baker Hughes U.S. rig count was only slightly higher than it was at the end of 2017 (929). The count still remains considerably lower than its peak in the U.S. of over 1,900 prior to the oil glut and consequent price crash of 2015.<sup>6</sup>

The oil service stocks in the U.S., with the largest average country weighting, detracted the most from performance. Companies in the U.K. and Netherlands also detracted from performance.

# Rare Earth and Strategic Metals

The Fund had another disappointing year, losing 48.70%. Having hit a high in mid-January, stocks in the Fund's portfolio declined, with little respite, through the end of the year. The greatest detractors from performance were companies with mining operations and/or production involving cobalt and lithium. No company contributed positively to returns. Large-cap companies performed better than either their small- or mid-cap peers during the period under review.

## Steel

In 2018, steel stocks experience a number of quite violent ups and downs, with the Fund's NAV reaching highs above \$51 and a low below \$34 over the course of the year. The Fund ended the year under review recording a loss of 18.94%. The continuing trade dispute between the U.S. and both its ostensible allies and China has done little to reduce the volatility not only of steel prices, but also those of steel stocks. Perhaps surprisingly, companies in the U.S., with the largest average country weighting, were by far the greatest detractors from performance. Brazil, with the second largest average weighting during the period under review, was the only country to contribute positively to returns.

### **Unconventional Oil & Gas**

Having suffered roller coaster movements during the first three quarters of the year and a steep downturn during the final quarter, the Fund ended the 12 month under review having lost 29.96%. From a high of \$76.41 on October 3, 2018 a barrel at the start of October, by the end of the year the front month West Texas Intermediate

## VANECK VECTORS ETFs

(unaudited) (continued)

(WTI) crude oil price<sup>7</sup> had dropped nearly 40% to \$45.41. Unconventional oil and gas, particularly shale oil, companies suffered accordingly. U.S. stocks (on average approximately 85% of the Fund by weight during the period under review) detracted the most from performance.

# Uranium+Nuclear Energy

The Fund had a positive 12 months and gained 5.15%. Utility companies, with the largest average sector weighting over the period, produced the vast majority of the Fund's positive total return, with only the industrial sector detracting from performance. Geographically, companies in Japan contributed the most to performance, while South Korea was the greatest detractor from performance. According to the World Nuclear Association, by the start of January 2019, there were some 450 operable nuclear power reactors in 30 countries and 56 power reactors currently under construction in 16 countries, notably China, Russia, India, and the South Korea.<sup>8</sup>

<sup>\*</sup> Commencement of Fund: 2/14/12; First Day of Secondary Market Trading: 2/15/12

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Past performance is no guarantee of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption or sale of fund shares.

<sup>&</sup>lt;sup>1</sup> MVIS® Global Unconventional Oil & Gas Index (MVFRAKTR) is a rules based, modified capitalization weighted, float adjusted index intended to give investors a means of tracking the overall performance of companies involved in the exploration, development, extraction and/or production of unconventional oil and natural gas.

<sup>&</sup>lt;sup>1</sup> MVIS® Global Uranium & Nuclear Energy Index (MVNLRTR) is a rules based, modified capitalization weighted, float adjusted index intended to give investors a means of tracking the overall performance of companies involved in uranium and nuclear energy.

Index data prior to March 24, 2014 reflects that of the DAXglobal® Nuclear Energy Index (DXNE). From March 24, 2014, forward, the index data reflects that of the MVIS(R) Global Uranium & Nuclear Energy Index (MVNLRTR). All index history reflects a blend of the performance of the aforementioned Indexes.

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods. The result is compared with the Fund's benchmark.

Past performance is no guarantee of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption or sale of fund shares.

### VANECK VECTORS ETF TRUST

## ABOUT FUND PERFORMANCE

(unaudited)

The price used to calculate market return (Share Price) is determined by using the closing price listed on its primary listing exchange. Since the shares of each Fund did not trade in the secondary market until after each Fund's commencement, for the period from commencement to the first day of secondary market trading in shares of each Fund, the NAV of each Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for certain Funds reflect temporary waivers of expenses and/or fees. Had these Funds incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of each Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect reinvestment of dividends and capital gains distributions. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market.

The net asset value (NAV) of each VanEck Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of each fund; it is calculated by taking the total assets of each fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAVs are not necessarily the same as each ETF's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell fund shares at NAV.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. Certain indices may take into account withholding taxes. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made.

The Gold Miners Index and Steel Index are published by ICE Data Indices, LLC (ICE Data). The Agribusiness Index, Coal Index, Junior Gold Miners Index, Oil & Gas Index, Oil Refiners Index, Oil Services Index, Rare Earth/Strategic Metals Index and Uranium & Nuclear Energy Index are published by MV Index Solutions GmbH (MVIS®), which is a wholly owned subsidiary of the Adviser, Van Eck Associates Corporation. The Natural Resources Index is published by S-Network Global Indexes, LLC (S-Network). The Ardour Global Index is published by Ardour Global Indexes<sup>SM</sup>, LLC (Ardour).

ICE Data, MVIS, S-Network, and Ardour are referred to herein as the "Index Providers". The Index Providers do not sponsor, endorse, or promote the Funds and bear no liability with respect to the Funds or any security.

Premium/discount information regarding how often the closing trading price of the Shares of each Fund were above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund for each of the four previous calendar quarters and the immediately preceding five years (if applicable) can be found at vaneck.com.

### VANECK VECTORS ETF TRUST

## **EXPLANATION OF EXPENSES**

(unaudited)

## Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2018 to December 31, 2018.

# **Actual Expenses**

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

# **Hypothetical Example for Comparison Purposes**

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Ratio of net investment income to average net assets	2.21%	2.09%	2.18%	2.66%	2.10%	
Portfolio turnover rate (e)	23%	34%	37%	9%	13%	

<sup>(</sup>a) Calculated based upon average shares outstanding (b) Amount represents less than \$0.005 per share

Total return is calculated assuming an initial investment made at the net asset value at the beginning of year, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the year. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

<sup>(</sup>d) The ratios presented do not reflect the Fund's proportionate share of income and expenses from the Fund's investment in underlying funds.

<sup>(</sup>e) Portfolio turnover rates exclude securities received or delivered as a result of processing in-kind capital share transactions.

### NOTES TO FINANCIAL STATEMENTS

December 31, 2018

**Note 1 – Fund Organization –** VanEck Vectors ETF Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of December 31, 2018, offers fifty-eight investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Natural Resources ETF, Oil Refiners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (each a "Fund" and, together, the "Funds"). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index sponsored, licensed or managed by ICE Data Indices, LLC, Ardour Global Indexes, LLC, S-Network Global Indexes, LLC and MV Index Solutions GmbH ("MVIS"), a wholly owned subsidiary of Van Eck Associates Corporation (the "Adviser").

The Funds' respective Indices are presented below:

**Note 2—Significant Accounting Policies—**The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification ("ASC") 946 Financial Services—Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

A. Security Valuation—The Funds value their investments in securities and other assets and liabilities at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term debt securities with sixty days or less to maturity are valued at

### NOTES TO FINANCIAL STATEMENTS

(continued)

amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. The Pricing Committee of the Adviser provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments or other assets. If market quotations for a security or other asset are not readily available, or if the Adviser believes it does not otherwise reflect the fair value of a security or asset, the security or asset will be fair valued by the Pricing Committee in accordance with the Funds' valuation policies and procedures. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, periodic comparisons to valuations provided by other independent pricing services, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of their investments on a recurring basis, which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels of the fair value hierarchy are described below:

- Level 1 Quoted prices in active markets for identical securities.
- Level 2 Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 — Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs and the levels used to value the Funds' investments are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

- **B. Federal Income Taxes**—It is each Fund's policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.
- **C. Dividends and Distributions to Shareholders**—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Effective in the current reporting period, it is no longer required to separately present distributions from net investment income and distributions from net realized capital gains. Additionally, undistributed net investment income (loss) included in net assets is no longer disclosed separately in the Statement of Changes in Net Assets. The December 31, 2017 sources of distributions and undistributed net investment income (loss) were as follows:

	Distributions to snareholders:			
	Dividends from net investment income	Distributions from net realized capital gains	Undistributed net investment income (loss)

Distributions to shareholders

- **D. Currency Translation**—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day as quoted by one or more sources. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Such amounts are included with the net realized and unrealized gains and losses on investment securities in the Statement of Operations. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.
- **E. Restricted Securities**—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.
- **F.** Repurchase Agreements The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of December 31, 2018 are reflected in the Schedules of Investments.
- G. Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at December 31, 2018 is presented in the Schedules of Investments. Refer to related disclosures in Note 2F (Repurchase Agreements) and Note 9 (Securities Lending).

# NOTES TO FINANCIAL STATEMENTS (continued)

- **H. Components of Capital**—Effective with the current reporting period, Net unrealized appreciation (depreciation), Undistributed net investment income (loss), and Accumulated net realized gain (loss) are aggregated and disclosed as Total distributable earnings (loss) in the Statement of Assets and Liabilities.
- I. Other—Security transactions are accounted for on trade date. Realized gains and losses are determined based on the specific identification method. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

**Note 3—Investment Management and Other Agreements—**The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets (except for Oil Services ETF). The management fee rate for Oil Services ETF is 0.35%. The Adviser has agreed, until at least May 1, 2019 to waive management fees and assume expenses to prevent each Fund's total annual operating expenses (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding expense limitations listed in the table below.

The current expense limitations for the year ended December 31, 2018, are as follows:

	Expense
Fund	Limitations
Agribusiness ETF	0.56%
Coal ETF	0.59
Global Alternative Energy ETF	0.62
Gold Miners ETF	0.53
Junior Gold Miners ETF	0.56
Natural Resources ETF	0.49
Oil Refiners ETF	0.59
Oil Services ETF	0.35
Rare Earth/Strategic Metals ETF	0.57
Steel ETF	0.55
Unconventional Oil & Gas ETF	0.54
Uranium+Nuclear Energy ETF	0.60

Refer to Statement of Operations for the amounts waived/assumed by the Adviser.

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' distributor (the "Distributor"). Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

**Note 4—Investments—**For the year ended December 31, 2018, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Proceeds from

Cost of Investments

	Cost of investments	Proceeds from
Fund	Purchased	Investments Sold
Agribusiness ETF	\$ 141,868,290	\$ 138,397,355
Coal ETF	20,902,686	20,967,956

Unconventional Oil & Gas ETF	426,800	500,500	_
Uranium+Nuclear Energy ETF	1,000,200	1,349,717	_

<sup>\*</sup> Includes short-term capital gains (if any).

<sup>\*\*</sup> Recent tax regulations issued under certain provisions of the Tax Cuts and Job's Act (the "Act") require that certain undistributed earnings of foreign corporations be recognized as income by U.S. owners with significant interests in those foreign corporations. Junior Gold Miners ETF owned relevant percentages of certain foreign corporations in its portfolio during the periods affected by the Act's provisions. These provisions resulted in an increase to distributable ordinary income of \$10,699,816.

#### NOTES TO FINANCIAL STATEMENTS

(continued)

At December 31, 2018, the Funds had capital loss carryforwards available to offset future capital gains, as follow:

	Short-Term Capital Losses	Long-Term Capital Losses	
Fund	with No Expiration	with No Expiration	Total
Agribusiness ETF	\$ (178,974,364)	\$ (501,609,337)	\$ (680,583,701)
Coal ETF	(23,645,586)	(281,923,863)	(305,569,449)
Global Alternative Energy ETF	(4,812,502)	(92,797,499)	(97,610,001)
Gold Miners ETF	(1,328,717,435)	(8,426,684,721)	(9,755,402,156)
Junior Gold Miners ETF	(1,611,478,906)	(2,871,409,789)	(4,482,888,695)
Natural Resources ETF	(2,894,228)	(36,910,511)	(39,804,739)
Oil Refiners ETF	_	_	_
Oil Services ETF	(65,420,955)	(149,843,535)	(215,264,490)
Rare Earth/Strategic Materials ETF	(69,312,136)	(192,969,308)	(262,281,444)
Steel ETF	(7,198,907)	(124,475,440)	(131,674,347)
Unconventional Oil & Gas ETF	(6,808,108)	(34,933,761)	(41,741,869)
Uranium+Nuclear Energy ETF	(13,913,162)	(67,998,589)	(81,911,751)

During the year ended December 31, 2018, \$85,630,099, \$18,822,843, \$34,193,213, \$1,784,159, \$540,880, \$21,020,656, and \$41,593,262 of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Natural Resources ETF, Steel ETF, and Uranium+Nuclear Energy ETF's capital loss carryovers available from prior years expired unutilized.

During the year ended December 31, 2018, as a result of permanent book to tax differences, primarily due to the expiration of capital loss carryforwards, deemed distributions attributable to the redemption of shares and the tax treatment of gains/losses from securities redeemed in-kind, the Funds incurred differences that affected distributable earnings and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

Fund	in Distributable Earnings	in Aggregate Paid in Capital
Agribusiness ETF	\$ 6,212,776	\$ (6,212,776)
Coal ETF	9,499,879	(9,499,879)
Global Alternative Energy ETF	33,296,996	(33,296,996)
Gold Miners ETF	(257,222,502)	257,222,502
Junior Gold Miners ETF	(197,215,284)	197,215,284
Natural Resources ETF	(5,534,654)	5,534,654
Oil Refiners ETF	(3,740,712)	3,740,712
Oil Services ETF	(29,625,502)	29,625,502
Rare Earth/Strategic Materials ETF	(8,574,172)	8,574,172
Steel ETF	951,366	(951,366)
Unconventional Oil & Gas ETF	4,873,418	(4,873,418)
Uranium+Nuclear Energy ETF	41,048,086	(41,048,086)

The Funds recognize the tax benefits of uncertain tax positions only where the position is "more-likely-than-not" to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds' tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds' financial statements. However, the Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2018, the Funds did not incur any interest or penalties.

**Note 6—Capital Share Transactions—**As of December 31, 2018, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Fund shares are not individually redeemable and are issued and redeemed at their net asset value per share only through certain authorized broker-dealers ("Authorized Participants") in blocks of shares ("Creation Units"), consisting of 50,000 shares, or multiples thereof.

The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds' underlying index ("Deposit Securities") plus a balancing cash component to equate the transaction to the net asset value per share of the Fund on the transaction date. Cash may also be substituted in an amount equivalent to the value of certain Deposit Securities, generally as a result of market circumstances, or when the securities are not available in sufficient quantity for delivery, or are not eligible for trading by the Authorized Participant. The Funds may issue Creation Units in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit at the Custodian for the benefit of the Funds, collateral consisting of cash in the form of U.S. dollars at least equal to 115% of the daily marked to market value of the missing Deposit Securities.

Authorized Participants purchasing and redeeming Creation Units may pay transaction fees directly to The Bank of New York Mellon. In addition, the Funds may impose certain variable fees for creations and redemptions with respect to transactions in Creation Units for cash, or on transactions effected outside the clearing process, which are treated as increases in capital. These variable fees, if any, are reflected in share transactions in the Statements of Changes in Net Assets.

For the year ended December 31, 2018, the Funds had in-kind contributions and redemptions as follows:

Fund	In-Kind Contributions	In-Kind Redemptions
Agribusiness ETF	\$ 235,872,547	\$ 284,588,681
Coal ETF	37,855,779	65,912,754
Global Alternative Energy ETF	2,945,462	2,716,030
Gold Miners ETF	5,960,694,976	2,339,543,369
Junior Gold Miners ETF	1,807,379,544	1,518,222,320
Natural Resources ETF	19,700,198	33,621,829
Oil Refiners ETF	62,885,607	21,050,150
Oil Services ETF	3,577,437,014	3,508,243,532
Rare Earth/Strategic Metals ETF	67,268,854	44,193,782
Steel ETF	69,668,759	139,412,454
Unconventional Oil & Gas ETF	19,197,623	34,544,090
Uranium+Nuclear Energy ETF	_	2,590,682

This table represent the accumulation of each Fund's daily net in-kind shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect shareholder transactions including any cash component of the transactions.

**Note 7—Principal Risks—**The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a "passive" or index approach to achieve each Fund's investment objective by investing in a portfolio of securities that generally replicates the Funds' index. Each of the Funds (except for Natural Resources ETF) is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

As a result of events involving Ukraine and the Russian Federation, the United States and the European Union have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers held by the Funds.

At December 31, 2018, the Adviser owned 2,500 shares of Gold Miners ETF.

A more complete description of risks is included in each Fund's Prospectus and Statement of Additional Information.

# NOTES TO FINANCIAL STATEMENTS (continued)

**Note 8—Trustee Deferred Compensation Plan—**The Trust has a Deferred Compensation Plan (the "Plan") for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in "Trustees' fees and expenses" in the Statements of Operations. The liability for the Plan is shown as "Deferred Trustee fees" in the Statements of Assets and Liabilities.

Note 9-Securities Lending-To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds' custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and/or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders', administrative and custodial fees in connection with a loan of its securities. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds' behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral at December 31, 2018 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

The following table presents the amount of repurchase agreements held as collateral by type of security on loan as of December 31, 2018:

Gross Amount of Recognized Liabilities for Securities Loaned in the Statements of Assets and Liabilities\*

Fund	Equity Securities
Agribusiness ETF	\$ 41,197,255
Coal ETF	1,461,143
Global Alternative Energy ETF	4,216,046

Oil Refiners ETF	35,244
Oil Services ETF	48,348,561
Rare Earth/Strategic Metals ETF	19,837,412
Steel ETF	11,479,564
Unconventional Oil & Gas ETF	1,213,660
Uranium+Nuclear Energy ETF	1,355,842

<sup>\*</sup> Remaining contractual maturity of the agreements: overnight and continuous

**Note 10—Bank Line of Credit—**The Funds may participate in a \$200 million committed credit facility (the "Facility") to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2018, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate	Balance as of December 31, 2018
Agribusiness ETF	307	\$1,729,586	3.24%	\$ -
Coal ETF	223	284,793	3.24	_
Global Alternative Energy ETF	261	194,630	3.34	_

Outstanding Loan

**Note 11—Custodian Fees—**The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the year ended December 31, 2018, there were offsets to custodian fees and these amounts are reflected in custody expense in the Statements of Operations.

**Note 12—Recent Accounting Pronouncements—**The Funds early adopted certain provisions of Accounting Standards Update No. 2018-13 *Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement* ("ASU 2018-13") that eliminate and modify certain disclosure requirements for fair value measurements. The adoption of certain provisions of the ASU 2018-13 had no material effect on financial statements and related disclosures. Management is currently evaluating the potential impact of additional requirements, not yet adopted, of the ASU 2018-13 to financial statements. Public companies will be required to disclose the range and weighted average used to develop significant unobservable inputs for Level 3 fair value measurements. ASU 2018-13 is effective for fiscal years beginning after December 15, 2019 and for interim periods within those fiscal years.

On August 17, 2018, the SEC adopted amendments to Regulation S-X. These changes are effective for periods after November 5, 2018. The updates to Registered Investment Companies were mainly focused on simplifying the presentation of distributable earnings by eliminating the need to present the components of distributable earnings on a book basis in the Statement of Assets & Liabilities. The update also impacted the presentation of undistributed net investment income and distribution to shareholders on the Statement of Changes in Net Assets. The amounts presented in the current Statement of Changes in Net Assets represent the aggregated total distributions of net investment income and realized capital gains, except for distributions classified as return of capital which are still presented separately

**Note 13—Subsequent Event Review—**The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Trustees of VanEck Vectors ETF Trust

#### **Opinion on the Financial Statements**

We have audited the accompanying statements of assets and liabilities of VanEck Vectors Agribusiness ETF, VanEck Vectors Coal ETF, VanEck Vectors Global Alternative Energy ETF, VanEck Vectors Gold Miners ETF, VanEck Vectors Junior Gold Miners ETF, VanEck Vectors Natural Resources ETF, VanEck Vectors Oil Refiners ETF, VanEck Vectors Oil Services ETF, VanEck Vectors Rare Earth/Strategic Metals ETF, VanEck Vectors Steel ETF, VanEck Vectors Unconventional Oil & Gas ETF and VanEck Vectors Uranium+Nuclear Energy ETF (collectively referred to as the "Funds") (twelve of the funds constituting VanEck Vectors ETF Trust (the "Trust")) including the schedules of investments, as of December 31, 2018, and the related statements of operations, changes in net assets, and the financial highlights for each of the periods indicated in the table below and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds (twelve of the funds constituting VanEck Vectors ETF Trust) at December 31, 2018, and the results of their operations, changes in net assets and financial highlights for each of the periods indicated in the table below, in conformity with U.S. generally accepted accounting principles.

Individual fund constituting the VanEck Vectors ETF Trust	Statement of operations	Statements of changes in net assets	Financial highlights
VanEck Vectors Agribusiness ETF	For the year ended December 31, 2018	For each of the two years in the period ended December 31, 2018	For each of the five years in the period ended December 31, 2018
VanEck Vectors Coal ETF			
VanEck Vectors Global Alternative Energy ETF			
VanEck Vectors Gold Miners ETF			
VanEck Vectors Junior Gold Miners ETF			
VanEck Vectors Natural Resources ETF			
VanEck Vectors Oil Refiners ETF	For the year ended December 31, 2018	For each of the two years in the period ended December 31, 2018	For each of the three years in the period ended December 31, 2018 and the period from August 18, 2015 (commencement of operations) through December 31, 2015
VanEck Vectors Oil Services ETF	For the year ended December 31, 2018	For each of the two years in the period ended December 31, 2018	For each of the five years in the period ended December 31, 2018
VanEck Vectors Rare Earth/Strategic Metals ETF			
VanEck Vectors Steel ETF			
VanEck Vectors Unconventional Oil & Gas ETF			
VanEck Vectors Uranium+Nuclear Energy ETF			

#### **Basis for Opinion**

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on each of the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018, by correspondence with the custodian and brokers. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Ernst + Young LLP

We have served as the auditor of one or more of the VanEck investment companies since 1999.

New York, NY February 25, 2019

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a VanEck Vectors ETF Trust (the "Trust") prospectus and summary prospectus, which includes more complete information. Investing involves substantial risk and high volatility, including possible loss of principal. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contains this and other information, call 800.826.2333 or visit vaneck.com. Please read the prospectus and summary prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 800.826.2333, or by visiting vaneck.com, or on the Securities and Exchange Commission's website at http://www.sec.gov.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at http://www.sec.gov and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 800.826.2333 or by visiting vaneck.com.
