Investment Objective

The fund's objective is to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the Fidelity Global Quality Income Index. For full details of the objectives please refer to the Key Investor Information Document (KIID) and the Prospectus.

Cumulative Performance

Source: Morningstar. Fund performance data is displayed on a Net Asset Value basis, in Share Class Base Currency terms (as shown in Fund Facts), with income reinvested, net of fees. Brokerage or transaction fees will apply. Data shown does not take into account any Initial Charge that may apply. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. Returns may increase or decrease as a result of currency fluctuations.

Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV performance.

Index Description

The Index is designed to reflect the performance of stocks of large and mid-capitalization dividend paying companies from developed countries that exhibit quality fundamental characteristics. The Index constituents are screened according to fundamental measures such as free cash flow margin, return on invested capital and free cash flow stability with the objective of identifying financially robust companies. The companies with highest dividend yield are then selected for inclusion within the index. For more information please refer to the index methodology at www.fidelity-etfs.com/documents.

Important Information:

Before investing you should read the Key Investor Information Document (KIID). The value of investments and any income from them may go down as well as up and an investor may not get back the amount invested. Where an investor's own currency is different to the currency of the fund's investments, the fund's returns can be affected by fluctuations in currency exchange rates. The use of financial derivative instruments may result in increased gains or losses within the fund.

Dealing Information

Exchange	Trading Currency	Ticker	Bloomberg	Sedol
LSE	USD	FGQI	FGQI LN	BDQZ1M8
LSE	GBP	FGQD	FGQD LN	BDQZ1N9
Xetra	EUR	FGEQ	FGEQ GR	BD0NZ37

Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used to minimise the effect of this but may not always be successful.

Top 10 Holdings (%)

GLOSSARY

Distribution Yield: The distribution yield represents the ratio of distributed income over the last 12 months to the fund's Net Asset Value as per the date of the factsheet.

Ongoing Charges Figure: Measure of total costs associated with managing and operating the fund. The Ongoing Charges Figure consists of expenses such as administrator fees and auditor fees as well as other operating costs. It excludes performance fees (where applicable) and portfolio transaction costs. It is expressed as a percentage of the net asset value of the fund.

Important Information

Fidelity only offers information on products and services and does not provide investment advice based on individual circumstances, other than when specifically stipulated by an appropriately authorised firm, in a formal communication with the client.

Fidelity International refers to the group of companies which form the global investment management organisation that provides information on products and services in designated jurisdictions outside of North America. This communication is not directed at, and must not be acted upon by persons inside the United States and is otherwise only directed at persons residing in jurisdictions where the relevant funds are authorised for distribution or where no such authorisation is required.

Unless otherwise stated all products and services are provided by Fidelity International, and all views expressed are those of Fidelity International. Fidelity, Fidelity International, the Fidelity International logo and F symbol are registered trademarks of FIL Limited.

Fidelity UCITS ICAV is registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 and is authorised by the Central Bank of Ireland as a UCITS. The Index which the sub-fund of the Fidelity UCITS ICAV is tracking comprises the equity securities of the relevant companies. For more information on the Index, please refer to the publically available index methodology at www.fidelity-etfs.com/documents.

FIL Limited and FMR LLC are separate companies with some shareholders in common.
