

CF CANLIFE CORPORATE BOND FUND

ABOUT THE FUND

The fund aims to maximise returns and provide an income mainly from investment in sterling-denominated fixed interest securities. It primarily invests in high quality corporate bonds combining top down macro views with bottom up credit analysis to select securities that offer the best potential.

*Minimum investments only apply when investing directly with Canada Life Investments

An investment should not be contemplated until the risks of investment and tax implications have been considered fully. Past performance is not a guide to future performance. The value of investments may fall as well as rise and investors may not get back the amount invested. Income from investments may fluctuate.

1 The Morningstar Rating is an assessment of a fund's past performance – based on both return and risk – which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. This fund received its Morningstar Rating as at 31/08/2017.

All data expressed as at 31/08/2017 unless otherwise stated. Source of performance: FE, bid to bid with net income reinvested, share class = C Inc.

Over 15 years	37.8% 

Risk warnings

Credit Risk: Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.

Liquidity Risk: As the fund invests in corporate debt securities, at times of market stress holdings may not be capable of being sold in a timely manner at reasonable prices. For full details of the fund's risks, please see the latest prospectus and the Key Investor Information Document (KIID).

The Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charges and investors may be subject to tax on distributions. The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with the relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio of that day. It does not include any preliminary charge and investors may be subject to tax on distributions. The Distribution Yield is higher than the Underlying Yield because the funds expenses are charged to capital. This has the effect of increasing distributions and constraining the fund's capital performance.

Credit ratings are internal and assigned by Canada Life Investments. Ratings will generally be in line with the major external rating agencies and should not be higher than the highest of these. Canada Life Investments will assign ratings to bonds that do not have an external rating.
