

BNY Mellon Multi-Asset Diversified Return Fund

Institutional Shares W (Acc.)

INVESTMENT OBJECTIVE AND PERFORMANCE BENCHMARK

To achieve long-term capital growth over a period of at least 5 years from a portfolio diversified across a range of assets. The Fund is managed to seek a return in excess of cash (1 Month GBP LIBOR) +3% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, a positive return is not guaranteed and a capital loss may occur.

PERFORMANCE DISCLOSURE

Past performance is not a guide to future performance. The value of investments can fall. Investors may not get back the amount invested. Income from investments may vary and is not guaranteed.

 The Sub-Fund uses sterling cash (1 month GBP LIBOR) +3% per annum over five years before fees as a target set for the Sub-Fund's performance to match or exceed. The ACD (Authorised Corporate Director) considers 1 month GBP LIBOR +3% per annum over five years before fees to be an appropriate target because 1 month GBP LIBOR is representative of cash and the Sub-Fund's investment objective is to seek a return in excess of sterling cash +3% per annum.

FUND RATINGS

Ratings should not be used for making an investment decision and do not constitute a recommendation or advice in the selection of a specific investment or class of investments.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- Emerging Markets have additional risks due to less-developed market practices.
- The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

The fund can invest more than 35% of net assets in different Transferable Securities and Money Market Instruments issued or guaranteed by any EEA State, its local authorities, a third country or public international bodies of which one or more EEA States are members.
