Purpose: This document provides you with key information about this investment product and its sustainability credentials. The information is required by law to help you understand the sustainability profile of this product and to help you compare it with other similar products.

Janus Henderson Global Responsible Managed Fund | LEI: 2138004YB2HUL6PHSQ91

A sub-fund of Janus Henderson Sustainable/Responsible Funds, a UK OEIC managed by Janus Henderson Fund Management UK Limited.

This product does not have a UK sustainable investment label as it does not have a specific Sustainability Goal, but it does include environmental and social factors in its investment process in a binding manner beyond the integration of financially material sustainability risks. Sustainable investment labels help investors find products that have one of the sustainability goals covered by the sustainable investment labels available in the UK.

This document is dated 2 December 2024.

Fund Objective

The Fund aims to provide capital growth over the long term (5 years or more).

Sustainability Approach

The Sustainability Approach is split into three components:

For Global Equities (shares)

The Investment Manager believes that if a company generates at least 50% of its revenue from activities closely aligned or contributing to its predetermined environmentally and/or socially sustainable themes, then it is focused on sustainability. The Investment Manager conducts quantitative and qualitative analysis for its revenue mapping using (i) publicly available reports and information (financial reports, ESG reports); (ii) information gathered by the investment manager during its meetings with companies; (iii) company revenue data from third parties; (iv) company analysis or research from third parties; and (v) proprietary company analysis. It maps the revenue information about each company to its pre-defined sustainable themes which include efficiency, cleaner energy, water management, environmental services, sustainable transport, sustainable property and finance, safety, quality of life, knowledge and technology, and health to determine whether a company meets the minimum 50% threshold of current or projected revenues.

For UK Equities (shares) and Global Corporate Bonds

The remaining holdings may not be aligned to the sustainable themes used for global equities, however, the Fund screens out investments that the Investment Manager considers may cause material negative environmental or social outcomes and engages with companies.

For Government Bonds

The Fund will only invest in G7 Government bonds (The G7 countries are all developed economies with highly rated bonds).

Across the Portfolio

The Investment Manager believes that the carbon intensity of the Fund is an appropriate indicator of environmental sustainability and so it commits to maintaining it at least 25% below its investment universe.

The screens applied by the Fund to avoid material negative environmental or social outcomes are detailed under the "Exclusions" section for the Fund in the Prospectus.

Investor Stewardship

The Investment Manager has engagements (for both insights and action) with companies the Fund invests in. Engagements include a wide range of topics including strategy, capital allocation, performance, risk, management succession, board composition, corporate governance and environmental and social issues as applicable. The Investment Manager also supports several stewardship codes globally and is a signatory to the UK stewardship code.

Sustainability Approach (continued)

Key Performance Indicators

Whether the Fund has invested in line with its sustainability approach will be measured with reference to:

- Carbon intensity of the Fund compared with its investment universe
 - ▶ Measured as Scope 1 + Scope 2 greenhouse gas emissions normalized by sales, which allows for comparison between companies of different sizes. Scope 1 emissions are those from sources owned or controlled by the company, typically direct combustion of fuel as in a furnace or vehicle. Scope 2 emissions are those caused by the generation of electricity purchased by the company.
- Overall UNGC Principles and OECD MNE (Multinational Enterprises) status of the Fund
 - ▶ UNGC compliance covers matters including human rights, labour, corruption, and environmental pollution.
- ESG exclusion status
 - ▶ The exclusion of controversial activities deemed by the investment manager as having the potential to cause material negative environmental or social outcomes.

Sustainability Metrics

For the 12 months period up to 30 September 2024:

Metric	Performance
Carbon intensity of the Fund compared with the Fund's investment universe (Tons CO2 emitted/\$M sales)	Fund carbon intensity was 32.3 vs 107.9 for the Fund's investment universe (calculated as an average of each quarter).
Overall UNGC Principles and OECD MNE status of the Fund	At all times during the period, the Fund did not hold any companies that were in breach of the UNGC principles.
ESG exclusion status	At all times during the period, the Fund did not hold any companies in breach of the exclusionary screens.

Third-party data is primarily sourced from MSCI. Data coverage for the metrics described above is obtained where it is reasonably practicable to do so but may be incomplete and coverage differs by asset class, region and size of issuers. Datapoints with coverage of less than 60-70% may be less informative for understanding product risks and opportunities.

Further Details

Firmwide Exclusions Policy

Investment is not permitted in entities involved in the current manufacture of, or minority shareholding of 20% or greater in a manufacturer of Controversial Weapons, namely: cluster munitions, anti-personnel mines, chemical weapons, biological weapons.
